Rosary Gardens	Rosary Gardens	Restrictions effect on residents, always been able to park residents accommodate each others needs
Rosary Gardens	Rosary Gardens	Restrictions cause problems for residents and their visitors
Carlton Avenue	Westbourne Grove, Southbourne Grove and Rosary Gardens	One hour restriction is a benefit only to residents of these roads and has a detrimental impact on residents in other roads. The road space is in great demand due to the location and as such should be shared and restricted accordingly to deter all day parking while accommodating short term parking. Parking has been displaced from a road which is not a designated bus route into a road with regular services which impacts on traffic flow.
Carlton Avenue	Westbourne Grove and Southbourne Grove	No consideration for surrounding areas, why restrict both sides when parking can be accommodated. Why should these two roads be treated differently ie restricted parking when other roads are unrestricted.
Yeovil Chase	Westbourne Grove, Southbourne Grove and Rosary Gardens	Restrictions compound problems in roads surrounding the hospital. Westbourne should be unrestricted, Southbourne unrestricted on one side and a daytime restriction on the other to accommodate traffic flow. Suggestions will alleviate current difficulties with public transport in other streets.
Southbourne Grove	Southbourne Grove	Improvement. Access for driveways easier
