

<b>Resident/ Non Resident</b>	<b>Summary of Comments</b>	<b>Officer Comment</b>
Non Resident	Should provide off street car parks in the area for local workers, reduction in parking for local workers, lack of parking for parents – St Marys School. Suggests scheme not be progressed.	Parking has been allocated according to the perceived need. The scheme will undoubtedly displace local workers however the area is very well served by public transport and we are able to advise local employers in respect of green travel options/incentives. We have met with the Head of St Marys School who understands the implications of the scheme and is keen to reintroduce a walking bus.
Non Resident	Providing a solution to a non existent problem. Should provide a commuter car park. Not fair on local businesses, public transport not reliable and charges should be reversed –e.g. £15 pa for commuters and £250 for residents.	The problem is very real and many residents are unable to park near to their homes. Parking is being provided for non residents however this will be subject to a charge and spaces will initially be limited to those planned, however, should the scheme be implemented, careful monitoring in use will be undertaken to ensure the correct numbers are provided. For example, should the monitoring demonstrate that there are residents spaces not occupied then these can be amended for commuters.
Non Resident	Agrees area suffers from parking stress created by local workers but disagrees that residents in Baxter Avenue are affected. Will impact on local workers.	The majority of Baxter Avenue residents who responded to the consultation were in favour of the scheme.
Non Resident	Disagrees Baxter Avenue affected, will not solve any local problems but merely displace them.	The majority of Baxter Avenue residents who responded to the consultation were in favour of the scheme. It is likely that some parking will migrate to streets not included within the scheme however this will be monitored and we will work with those residents to seek a resolution should they be seriously disadvantaged.
Non Resident	Scheme is designed to generate income. Cannot rely on public transport. Will find free parking elsewhere. Will	The scheme is designed to relieve parking pressure and control parking in the area. The costs are calculated to

	reduce safety at the school.	ensure that the scheme is self funding. School safety has not been raised by the Head teacher.
Resident`	Inadequate parking in Wallis Avenue, land at the end of the road should be adapted for parking.	The parking allocation is based on the perceived daytime need (the scheme operates until 6.30pm) while ensuring adequate access for emergency vehicles by providing footway parking. The scheme would be monitored and if bays require re allocation due to a lack of use this will be undertaken. The land referred to is not highway and therefore outside of this departments control however the suggestion for parking has been passed to Asset Management.
Resident	Supports the scheme	
Resident	Supports the scheme	
Resident	Supports the scheme	
Resident	Supports the scheme however concerned that more resident bays needed and that commuter charge should finance the entire scheme.	Bay use will be monitored and if amendments are required this will be undertaken. Residents need to contribute to costs as this is seen to be a benefit that other council tax payers do not receive therefore it is fair a small additional charge be paid.
Resident	Supports the scheme however the need for 2 <sup>nd</sup> , 3 <sup>rd</sup> and 4 <sup>th</sup> permits should be monitored and reduced if parking stress caused.	As our first permit parking scheme we will be closely monitoring all aspects and making necessary amendments to ensure we have an excellent model to use elsewhere in areas of parking stress.
Resident	Supports the scheme and looking forward to parking stress being relieved.	
Resident	Supports the scheme and looking forward to parking stress being relieved.	
St Marys School	Satisfied that concerns have been addressed.	We have met with the school and worked together to address some issues. The school is very keen to set up a walking bus to hopefully encourage fewer parents to drive to school.
