16 Exclusion of the Public

To agree that, under Section 100(A)(4) of the Local Government Act 1972, the public be excluded from the meeting for the item of business set out below on the grounds that it involves the likely disclosure of exempt information as defined in Part 1 of Schedule 12A to the Act, and that the public interest in maintaining the exemption outweighs the public interest in disclosing the information.

17 Parking Procurement

Confidential report of Interim Director of Highways and Parks to follow

Chair & Members:

Cllr S George (Chair), Cllr C Mulroney (Vice-Chair), Cllr L Burton, Cllr P Collins, Cllr I Gilbert, Cllr K Mitchell, Cllr M Terry and Cllr S Wakefield

SOUTHEND-ON-SEA CITY COUNCIL

Meeting of Cabinet

Date: Monday, 14th March, 2022
Place: Council Chamber - Civic Suite

3

Present: Councillor I Gilbert (Chair)
Councillors R Woodley (Vice-Chair), P Collins, A Jones, C Mulroney
and M Terry

In Attendance: T Forster, J Williams, S Meah-Sims and R Harris

Start/End Time: 2.00 pm - 2.30 pm

778 Apologies for Absence

Apologies for absence were received from Councillors Burton and Nevin.

779 Declarations of Interest

There were no declarations of interest at this meeting.

780 City Council Branding

The Cabinet considered a report of the Executive Director (Transformation) setting out the opportunities connected to updating the corporate branding for the Council and presented branding options to engage upon more widely.

During consideration of the report the Leader of the Council confirmed that this was not a formal consultation but is an engagement exercise.

Resolved:

1. That the four branding concepts, as set out in Appendix 1 to the submitted report be approved for wider engagement.
2. That the timeframe of engagement be four weeks.
3. That the feedback from the engagement be used as an evidence-base to inform the final decision on the Council's new corporate branding.

Reasons for decision:

To enable the Council to take an active lead in responding to the new city status for Southend, with a fresh step into a new identity for the Council.

Other options:

None

Note: This is an Executive Function

Referred direct to: Policy and Resources Scrutiny Committee

Cabinet Member: Cllr Gilbert

Chair: _____

SOUTHEND-ON-SEA CITY COUNCIL

Meeting of Cabinet

Date: Tuesday, 14th June, 2022
Place: Council Chamber - Civic Suite

4

Present: Councillor S George (Chair)
Councillors C Mulroney (Vice-Chair), P Collins, I Gilbert, K Mitchell,
M Terry and S Wakefield

In Attendance: Councillors M Berry, K Evans and R Woodley
T Forster, J Chesterton, C Gamble, G Gilbert, A Keating, L White and
J Gay

Start/End Time: 10.00 am - 10.50 am

44 Apologies for Absence

Apologies for absence were received from Councillor Burton.

45 Declarations of Interest

The following declarations of interest were made:

Councillor Mitchell – Agenda Item 6 (Adult Strategy Action Plans) and Agenda Item 7 (Annual Procurement Plan) – A close family member with learning disabilities is a resident in supported living; Chair of Hamlet Court Road Community Group and the Milton community builder supports this group; Agenda Item 9 (Debt Management Position as at 31st March 2022) – A family friend works in the finance department.

46 Minutes of the Meeting held on Tuesday, 22nd March 2022

Resolved:

That the Minutes of the Meeting held on Tuesday, 22 March 2022 be confirmed as a correct record and signed.

47 Delivery of Southend Outcomes & Priorities - Provisional Resources Outturn 2021/22 and Annual Report

The Cabinet considered a report of the Executive Director (Finance and Resources) presenting the Southend 2050 Outcomes and Priorities Annual Report for 2021/22 and the provisional resources outturn for 2021/22.

Resolved:

1. That the achievements, successes and challenges brought to life within the Annual Report 2021/22 (Section 4 and Appendix 1 to the submitted report), be noted.

Recommended:

2. That the provisional 2021/22 revenue outturn position for both the General Fund (Section 5) and Housing Revenue Account (HRA) (Section 6), be noted and that the agreement of any final adjustments and the transfer of the actual final General Fund outturn position to the Business Transformation Reserve (Section 5.4 of the report) following the completion and audit of the Statement of Accounts be delegated to the Deputy Chief Executive and Executive Director (Finance and Resources).
3. That the appropriation of revenue funds to and (from) earmarked reserves, as set out in Section 5.19 to 5.25 (General Fund) and Section 6.6 (HRA) of the report, be approved.
4. That the potential revenue impact of the 2021/22 outturn on the 2022/23 General Fund budget and Medium Term Financial Strategy (Section 5.26 – 5.39 of the report), be noted.
5. That it be noted that the expenditure on the capital investment programme for 2021/22 totalled £68.969M against a revised budget of £78.632M (Sections 7.4 and 7.7 of the report).
6. That the relevant budget carry forwards and accelerated delivery requests totalling a net £11.759M moving into 2022/23 and future years, as set out in Appendix 2 to the report, be approved.
7. That the virements, reprofiles, additions, deletions and new external funding for schemes, as detailed in Appendix 2 to the report, be approved and it be noted that this will result in an amended Capital Investment Programme deliverable by the Council of £145.906M for the period 2022/23 to 2026/27, as detailed in Appendix 3 to the report.
8. That it be noted that the requested changes as detailed in Appendix 2 to the report will result in an amended total Capital Investment Programme deliverable by South Essex Homes Limited, Porters Place Southend-on-Sea LLP and Kent County Council of £55.759M, as detailed in Appendix 3 to the report.
9. That a review take place and appropriate consideration be given to the affordability and prioritisation of the current approved Capital Investment Programme and the schemes currently listed as subject to viable business cases.
10. That the content of the Infrastructure Funding Statement 2021/22 (included in Appendix 4 to the report), be noted and that the Main Fund receipts from reported year 2021/22 and previous reported years be carried forward until the CIL Governance Framework and spending plans are reviewed for the reported year 2022/23.
11. That the five-year deadline for spending the CIL Ward Neighbourhood Allocations be approved and extended for another three years from date of receipt (with the intention that at the end of that period any remaining neighbourhood allocations will be transferred to the CIL Main Fund).

12. That authority be delegated to the Executive Director for Growth and Housing (in consultation with Ward Members and the Cabinet Member for Environment, Culture and Tourism) to agree how the CIL Ward Neighbourhood Allocations received up until 31 March 2022 (excluding allocation to Leigh Town Council) are to be spent.

Reasons for decision:

1. To provide Cabinet with the provisional revenue and capital outturn position for 2021/22. As part of the year end processes, Cabinet is required to approve any appropriations to or from earmarked reserves.
2. Cabinet is required to approve capital budget carry forwards, accelerated delivery requests and in year amendments to the current approved programme.

Other options:

None

Note: The decision in 1 above constitutes an Executive Function. The decisions in 2-12 above constitute a Council Function.

Called in to: All three Scrutiny Committees

Cabinet Member: Cllr Collins

48 Waste Procurement

The Cabinet considered a report of the Executive Director (Neighbourhoods and Environment) setting out the outcome of the early market engagement exercise in accordance with the Council decision of 24th March 2022 and highlighted the key points of feedback. The report also proposed the approach that should be set so that the formal procurement exercise can commence.

Resolved:

1. That the views of the market, be noted.
2. That the competitive dialogue process to be used for instructing bidders to submit two priced (outline) proposals at the end of Stage 1 of the process, be approved. One option being a mandated full weekly collection service and the second being an option proposed by the bidder that they might feel better achieves the Council's stated aims and objectives, specifically:
 - Recognise the declaration by the Council of a Climate Emergency in 2019 and the need to significantly reduce residual waste.
 - Comply with the Environment Act 2021 and its promulgated requirements for recycling (likely to be 65% by 2035) and other environmental matters and adaptability to further changes in legislation.
 - Satisfy the financial imperatives for the Council to ensure value for money principles are adhered to.
 - Follow the principles of the Waste Hierarchy.
 - Maximise the use of zero or low emission plant and fleet in the operation of the services.
 - Provide the best customer and digital experience for residents.
 - Consider the inclusion of a Commercial waste offering.

2. That a further report to the Cabinet comes forward at the appropriate time to select the service parameters (based on the results of the stage 1 submissions) for the second and final stage of the procurement process, resulting in each bidder being required to submit only one detailed, priced bid for final evaluation/award.

Reasons for decision:

As the market has stated it would be prepared to submit two priced outline proposals at the end of stage 1, this approach is proposed, rather than trying to agree the final model now without the associated costings.

Other options:

None.

Note: This is an Executive Function

Called-in to: Place Scrutiny Committee

Cabinet Member: Cllr Collins

49 Adult Strategy Action Plans

The Cabinet considered a report of the Executive Director (Adults and Communities) presenting the proposed action plans for year one (2022/23) for the three Adult Social Care Strategies – Aging Well, Living Well and Caring Well.

Resolved:

1. That the 2022/23 annual action plans for the three Adult Social Care strategies, be approved.

2. That Cabinet review progress against the three Adult Social Care action plans in December 2022. (The action plans will be published with any updates and amendments and would be used to prepare the baseline for subsequent yearly action plans).

Reasons for decision:

To approve the 2022/23 annual action plans for the three Adult Social Care Strategies – Aging Well, Living Well and Caring Well.

Other options:

None

Note: This is an Executive Function

Eligible for call-in to: People Scrutiny Committee

Cabinet Member: Cllr Burton

50 Annual Procurement Plan

The Cabinet considered a report of the Executive Director (Finance and Resources) presenting details of the £1m plus projects listed within the 2022/23 annual procurement plan as well as a full 5 Year Procurement Plan '2022-27'.

Resolved:

1. That the procurements with a contract value in excess of £1m, as set out in Appendix 1 to the submitted report, be approved.
2. That the full 5 year procurement plan for 2022-27 (contracts with a value of £25k inclusive of VAT and above which will required procurement support/advice) and that this will be subject to change and annual reviews, be noted.
3. That it be noted that the capital projects (2022-27) approved by Cabinet as part of the capital programme, and with a value of over £25k, have also formed part of the final procurement plan for 2022/23 and the full 5 Year Procurement Plan 2022-27. These will also be subject to change as the capital programme is reviewed.
4. That it be noted that once the Government have concluded the Public Procurement Reform (expected in 2023/24) it is expected that it will be a mandatory requirement for the public sector to publish their future procurement plan (pipeline plans) and so the 5 year plan will provide that mechanism to publicly report.
5. That it be noted that the Council's contracts, values and suppliers are already publicly available through the Council's spend transparency reports (£500 plus) and also the UK Contracts Finder website where Council's are required to publish any contracts awarded that have a value above £25k.

Reasons for decision:

1. Approval of the Council's annual procurement plan is a requirement under Part 4g of the Council's Constitution.
2. The development of comprehensive contracts register and 5 year procurement plan provide benefits in terms of the Council's commissioning plans, financial planning as well as future planning for suppliers and local businesses.
3. The 5 year plan will also align with the anticipated requirements once the UK Public Procurement Reform is approved by Government.

Other options:

Annual approval of the Council's procurement plan is required under the Council's Constitution. The Cabinet could decide to just publish an annual plan but the development of a full 5 year procurement plan will assist the Council and businesses in their resource and future planning. The move to a 5 year plan will also align with the anticipated requirements once the UK Public Procurement Reform is finalised by Government.

Note: This is an Executive Function.

Eligible for call-in to: Policy and Resources Scrutiny Committee

Cabinet Member: Cllr Collins

51 Treasury Management Report 2021/22

The Cabinet considered a report of the Executive Director (Finance and Resources) covering the treasury activity for the period April 2021 to March 2022 and reviewed performance against the Prudential Indicators for 2021/22.

Resolved:

1. That the Treasury Management Report for 2021/22 and the outturn Prudential Indicators for 2021/22, be approved.

2. That it be noted that the financing of 2021/22 capital expenditure of £68.969m has been funded in accordance with the schedule set out in Table 2 of Section 4 of the submitted report.

3. That it be noted that the Capital Financing and Treasury Management were carried out in accordance with statutory requirements, good practice and in compliance with the CIPFA (The Chartered Institute of Public Finance and Accountancy) Prudential Code during 2021/22.

4. That, in respect of the return on investment and borrowing, the following matters be noted:

- The loan and investment portfolios were actively managed to minimise cost and maximise interest earned, whilst maintaining a low level of risk.
- £1.593m of interest and income were earned during 2021/22 at an average rate of 0.97%. This is 0.83% over the SONIA rate (Sterling Overnight Index Average) and 0.78% over the average bank base rate. Also, the value of the externally managed funds increased by a net of £4.801m due to the changes in the unit price, giving a combined return of 3.89%.
- The level of borrowing from the Public Works Loan Board (PWLB) (excluding debt relating to services transferred from Essex County Council on 1st April 1998) started the year at £310.3m and increased to £347.3m (Housing Revenue Account (HRA): 74.2m, General Fund (GF): £273.1m) by the end of 2021/22.
- The level of financing for 'invest to save' schemes decreased from £8.53m to 8.39m by the end of 2021/22.

5. That the limit on deposits with any one Property Fund be increased from £25m to £30m.

Reasons for decision:

The CIPFA Code of Practice on Treasury Management recommends that Local Authorities should submit reports regularly. The Treasury Management Policy Statement for 2021/22 set out that reports would be submitted to Cabinet quarterly on the activities of the treasury management operation.

Other options:

There are many options available for the operation of the Treasury Management function, with varying degrees of risk associated with them. The Treasury Management Policy aims to effectively control risk to within a prudent level, whilst providing optimum performance consistent with that level of risk.

Note; This is an Executive Function

Eligible for call-in to: Policy and Resources Scrutiny Committee

Cabinet Member: Cllr Collins

52 Debt Management Position to 31st March 2022

The Cabinet considered a report of the Executive Director (Finance and Resources) concerning the position of outstanding debt to the Council as at 31st March 2022 and debts that have been written off, or recommended for write off, in the current financial year as at 31st March 2022.

Resolved:

1. That the current outstanding debt position as at 31st March 2022 and the position of debts written off to 31st March 2022 as set out in Appendices A & B to the submitted report, be noted.

2. That it be noted that no write offs greater than £25,000 need Cabinet approval on this occasion.

Reason for Decision:

All reasonable steps to recover the debt have been taken, and therefore where write off is recommended it is the only course of action that is left available.

Other Options:

None.

Note: This is an Executive Function

Eligible for call-in to: Policy and Resources Scrutiny Committee

Cabinet Member: Cllr Collins

Chair: _____

SOUTHEND-ON-SEA CITY COUNCIL

Meeting of Cabinet

Date: Friday, 1st July, 2022
Place: Council Chamber - Civic Suite

5

Present: Councillor S George (Chair)
Councillors C Mulroney (Vice-Chair), P Collins, K Mitchell, M Terry
and S Wakefield

In Attendance: Councillors T Cox, K Evans and N Folkard
A Lewis, J Chesterton, J Burr, S Dolling, C Gamble, G Gilbert,
S Meah-Sims and A Richards

Start/End Time: 11.00 am - 12.05 pm

60 Apologies for Absence

Apologies for absence were received from Councillors Burton and Gilbert.

61 Declarations of Interest

The following interests were declared at the meeting:

(i) Minute 64 Southend City Centre, Seafront and Adjoining Areas Public Spaces Protection Order Extension and Variation – Councillor Terry: Lives near the seafront;

(ii) Minute 65 – PSPO Dog Friendly Beach - Councillor Terry: Lives near the seafront;

(iii) Minute 67 – City Music Festival – Councillors George and Mulroney – Members of the Town 2 City Partnership; and

(iv) Minute 69 – Minutes of the meeting of the Senior Managers Pay Panel held on Friday 1st July 2022 – All Senior Managers.

62 Levelling-Up Fund Round 2

The Cabinet received a report of the Interim Executive Director (Growth and Housing) setting out the proposed approach to applications to the Government's Levelling-Up Fund (LUF) round 2 and the outcomes that would be achieved by successful bids.

On consideration of the report, the Cabinet was informed that the Department for Levelling Up, Housing and Communities had confirmed an extension to the deadline for the submission of bids.

Resolved:

1. That a bid be submitted to the Levelling-Up Fund (LUF) for highways and the associated capital and revenue costs, be noted.
2. That a bid be submitted to the Levelling-Up Fund (LUF) for culture-led city centre regeneration and the capital and revenue costs for the Council, be noted.
3. That, if these bids are successful, the relevant legal agreements are entered into to draw down the funding.

Recommended

4. That if bids are successful, they be included in the Capital Investment Programme, subject to a reprioritisation of the existing programme to ensure that there is no additional net cost to the capital investment programme after including the LUF schemes

Reasons for Decisions

The bids are based on stakeholder feedback, contribution to Southend 2050 outcomes and recovery priorities. They are grounded in extensive work setting out the nature of the work to be done and the impact it will have.

Other Options

There is no requirement to submit LUF applications. The Council could decide not to submit bids. This would ease pressure on the capital programme. However, not making applications would be detrimental to Southend as it would then miss potential external funding to deliver existing Southend 2050 and economic recovery priorities. It could also be reputationally damaging if the Council is not seen to be pursuing funding for levelling-up which can realise growth ambitions.

Note: Resolutions 1 to 3 are an Executive function. Recommendation 4 is a Council function

Referred direct to Place Scrutiny Committee for consideration

Cabinet Member: Cllr Gilbert and Collins

63 Seaway Leisure

The Cabinet received a report of the Deputy Chief Executive & Executive Director (Finance and Resources) providing an update on Seaway Leisure legal documentation.

The Cabinet was updated at the meeting on Counsel's advice to note the different nature of the transaction. In particular, that the arrangement is now confined to sale, leases and underlease. It no longer includes provisions that allow the Council to enforce construction obligations.

It was asked to note that the deliverability of construction is dealt with in the agreement between the funder and Turnstone and the agreements between sub-tenants and Turnstone. The Council will also exercise its statutory powers through its planning and building control functions. Under the new structure, the Council is not obliged to take the annuity lease until the

development has been completed therefore the new suite of documents are confined to the sale, lease and underlease and do not control construction.

Resolved:

That the preparation of a final clean suite of legal documents for the Seaway Leisure scheme, be approved.

Reasons for Decision

To enable the proposition to be presented clean, current documents for the funding market and to reduce procurement risk.

Other Options

The updated transaction could be documented by way of the approved variations but this is not considered to be optimal either in terms of managing risk or presentation to the funding market.

Note: This is an Executive function

Referred direct to Policy & Resources Scrutiny Committee for consideration

Cabinet Member: Cllrs Gilbert and Collins

64 Southend City Centre, Seafront and Adjoining Areas Public Spaces Protection Order Extension and Variation

The Cabinet received a report of the Executive Director (Strategy, Change and Governance) proposing the extension of the Southend Town Centre, Seafront and Adjoining Areas Public Spaces Protection Order (“the PSPO”) for three years and to include the proposed variations identified in this report under Section 59 of the Anti-Social Behaviour, Crime and Policing Act 2014 (“the Act”) taking into consideration the results of the statutory consultation and further evidence as detailed in this report.

Resolved:

1. That the Council varies the Public Spaces Protection Order (PSPO) over the restricted area in the form annexed at Appendix A and plan at Appendix B to the submitted report and extend it to run for a further three years.

2. That the Director of Public Protection, in consultation with the Director of Legal Services, explore further options for authorising third parties, including South Essex Property Services (SEPS), to enforce the PSPO and take the necessary steps to implement and ensure that training is provided in accordance with the enforcement policy at Appendix C of the submitted report.

3. That the Council extends the Drinking Control Area to include the Queensway Estate.

Reasons for Decisions

A PSPO covering the Town Centre, Seafront, Southchurch Hall Gardens,

Hamlet Court Road and York Road is believed to be an appropriate additional tool to tackle persistent and unreasonable anti-social behaviour (“ASB”) which is taking place. It can help provide realistic and proportionate enforceability to help reduce the ASB which discourages and prevents the law-abiding majority from feeling safe in, and subsequently using and enjoying, these public spaces.

The overwhelming majority of respondents to the Consultation supported the necessity and continuation of the PSPO including the New Restrictions

The Council considers that the requirements in S.59 of the 2014 Act are met and that the prohibitions are reasonable ones

Other Options

The Council could choose not to continue with the PSPO, however, this would lose the opportunity to continue this measure to tackle ASB which is having a damaging effect on our City Centre, Seafront and other areas identified in this report. Additionally, following the support of the PSPO that has been displayed in the consultation, choosing to not implement the Order could negatively impact the reputation of the Council within the communities worst affected by the ASB.

Alternatively, the Council could retain the current PSPO and not include the additional restrictions concerning cycling and e-scooters, or not extend the Drinking Control Zones as proposed at Queensway and adjacent to the Seaway car park.

Note: This is an Executive function
Referred direct to Policy & Resources Scrutiny Committee for consideration
Cabinet Member: Cllr Terry

65 PSPO Dog Friendly Beach

The Cabinet received a report of the Executive Director (Adults and Communities) that provided an update on proposals for a dog friendly beach in Southend.

Resolved:

1. That a dog friendly beach is not introduced at Shoebury East Beach.
2. That the Dog Friendly Beach consultation feedback be noted and the situation regarding an appropriate location be reviewed .

Reasons for Decisions

Compelling feedback from residents in the immediate area and environmental representation has been drawn from the consultation to inform the recommendation.

Other Options

The dog friendly trial could proceed however this is not recommended given the strength of feeling from local residents through the consultation process and the environmental representations.

Note: This is an Executive function
Referred direct to Place Scrutiny Committee for consideration
Cabinet Member: Cllr Mulroney

66 City Council Branding Refresh (Engagement)

Pursuant to Minute 802 of the meeting of the Policy & Resources Scrutiny Committee held on 16th March 2022, the Cabinet received a report of the Executive Director (Strategy, Change & Governance) setting out the opportunities connected to updating the corporate branding for the Council and re-presents options for consideration, and for those options to be engaged on more widely.

Resolved:

1. That the four branding concepts to go out to wider engagement, as set out in section 4.1 of the submitted report be approved.
2. That the timeframe of engagement of 4 weeks be approved.
3. That the feedback be used as an evidence-base to inform the final decision on the council's new corporate branding.

Reasons for Decisions

To enable the Council to take an active lead in responding to the new city status for Southend, with a fresh step into a new identity for the Council.

Other Options:

None

Note: This is an Executive Function
Not eligible for call-in by virtue of section 15(e)(ii) of Part 4(e) of the Council's Procedure Rules.
Cabinet Member: Cllr George

67 City Music Festival

The Cabinet received a report of the Executive Director (Adults and Communities) that sought approval for, and for the Council to partially underwrite, Southend hosting a major music festival as part of its city year celebrations. The Cabinet also had before it a confidential financial forecast for the event.

Resolved:

1. That a proposed major festival with world class artists be supported to lever in significant benefits to the Southend community.
2. That it be noted that commercial sponsorship has already been secured for the festival.
3. That the Council underwrites the cost base of the festival by £125,000 and if required will be funded by the Council's event budget;

4. That the Director of Culture and Tourism, in consultation with the Cabinet Member for Environment, Culture & Tourism, be authorised to agree the final arrangements and continue negotiations with partners on further sponsorship.

Reasons for Decisions

The City year is a unique opportunity for Southend to present its capabilities on an increased level of profile. The proposed venue and type of festival can create change in perceptions of place and support local skills infrastructure in event delivery and aligns with several long-term objectives. Feedback from residents on several occasions including 2050 and culture vision surveys has been to develop more major music festival activity. City year would be an ideal opportunity to implement this change. The potential of setting a precedent for bigger events and interest in the festival community in Southend after this first year would be transformational.

Other Options

The event programme could continue with lower profile activity but would not have the step change around Southend's festival capability in this inaugural City year.

Note: This is an Executive function

Referred direct to Place Scrutiny Committee for consideration

Cabinet Member: Cllr Mulronev

68 Integrated Care Partnership

The Cabinet received a report of the Executive Director (Adults and Communities) setting out the reforms to NHS structures and the establishment of integrated care systems in accordance with the new Health and Care Act 2022.

Resolved:

1. That Southend City Council makes arrangements to become a member of a new statutory joint committee (to be known as an Integrated Care Partnerships, or ICPs) between NHS integrated care boards and Essex County Council and Thurrock Council, the relevant upper tier authorities in the areas affecting Mid and South Essex (covering Basildon, Braintree, Brentwood, Castle Point, Chelmsford, Maldon and Rochford plus the unitary authorities of Southend and Thurrock).

2. That the terms of reference for the joint committee as appended to the submitted report be approved and that authority be delegated to the Monitoring Officer, in consultation with the Leader, to agree on behalf of Southend City Council any final amendments to the constitution/terms of reference of the joint committee.

3. That the Chief Executive, in consultation with the Leader, will:

(i) Nominate representative(s) to sit on the new NHS Integrated Care Board and will work with other authorities to agree joint nominations where possible; and

(ii) Agree and confirm who will be the statutory nominee of Southend City Council on the Integrated Care Partnership; and

4. That the Executive Director (Adult and Communities), in consultation with the relevant Cabinet Member, be authorised to update, amend, transfer or replace existing section 75 arrangements between the Council and Essex clinical commissioning groups to the new NHS integrated care boards.

Recommended:

5. That the Southend Health and Wellbeing Board update and refresh its membership to reflect changes to NHS organisations and structures. ||

Reasons for Decisions

The Council has little choice following the abolition of CCGs but to participate in ICPs and ICBs. Both are public bodies carrying out public functions, meaning that they must have robust decision-making processes and therefore need to agree their terms of reference.

Other Options

None

Note: Resolutions 1-4 above are an Executive function. Recommendation 5 is a Council function

Referred direct to People Scrutiny Committee for consideration

Cabinet Member: Cllr Mitchell

69 Minutes of the meeting of the Senior Managers' Pay Panel held on Friday 1st July 2022

The Cabinet considered the recommendation of the Senior Managers' Pay Panel held on 1st July 2022.

Resolved:

That the recommendation of the Senior Managers Pay Panel held on 1st July 2022, be approved.

Note: This is an Executive Function

Referred direct to Policy & Resources Scrutiny Committee for consideration

Cabinet Member: Cllr George

70 Vecteo (Part 2 Report) - Statement by Chief Executive

The Chief Executive referred to the confidential report (Minute 72, refers) concerning SEND children which had been uploaded onto "Twitter" in advance of the Cabinet meeting and emphasised that the confidentiality of the document should have been respected. He added that the consequences of this breach are yet to be fully known but advised it may have serious financial and reputational issues for the Council and could significantly impact upon services to SEND children. He further advised that he was working with the Monitoring officer to

agree what actions are necessary to seek to ensure that exempt and confidential council documents in the future remain confidential.

71 Exclusion of the Public

Resolved:-

That, under Section 100(A)(4) of the Local Government Act 1972, the public be excluded from the meeting for the item of business set out below, on the grounds that it would involve the likely disclosure of exempt information as defined in Part 1 of Schedule 12A to the Act and that the public interest in maintaining the exemption outweighs the public interest in disclosing the information.

72 Vecteo

The Cabinet received a report of the Interim Director of Highways, Parks and Open on the London Hire Community Services (LHCS) and Southend Travel Partnership (Vecteo) Year 2 Financial Performance.

Recommended:

1. That the request for providing a working capital interest free cash injection to the Joint Venture Company Vecteo, as requested in their letter of the 7th June 2022 (Appendix A to the submitted report) and provided by 31st July 2022 at the latest which will be funded by the Business Transformation Reserve, be approved.
2. That the update regarding the initial exploration of alternative options for future service delivery, be noted.

Reasons for Decision

As set out in the submitted report

Other Options

As set out in the submitted report

Note: This is an Council function

Referred direct to the Policy & Resources Scrutiny Committee for consideration

Southend City Council's draft Corporate Plan 2022-2026

Policy & Resources Scrutiny Committee
Cabinet Member: Councillor George
Part 1 (Public Agenda Item)

1. Purpose of Report

1.1 To present the council's draft Corporate Plan for 2022-26 for agreement.

2. Recommendation

2.1 That the draft Corporate Plan 2022-26 (**Appendix 1**) is agreed and responsibility for any final changes prior to publication be delegated to the Chief Executive, in consultation with the Leader of the Council.

3. Background

3.1 Since 2018 the council has operated without a corporate plan, instead directed by the Southend 2050 Ambition, with the Council's contributions articulated through the Southend 2050 themes and Roadmap. This operating model has enabled the vision for Southend to be clearly articulated. However, Southend 2050 focuses on Southend as a place and community, rather than setting out how the council needs to operate and prioritise in order to deliver and contribute to the Ambition.

3.2 The intention of the Corporate Plan is to bridge the gap between our Southend 2050 Ambition and the day-to-day work delivered by the council. It is shaped by a number of influences which include: the administrations priorities; our statutory responsibilities; responses to inspections and audits; feedback from the Local Government Association Peer visit; and national policy change.

3.3 Our Corporate Plan provides a helpful narrative and sets the direction for the work we're doing, providing a place to knit all of the council's work together in a way that makes sense to everyone. It's aims are to:

- Provide clarity and direction in a 4-year business plan
- Ensure efficient use of resources

- Provide a way of measuring success
- Support effective decision making
- Coordinate activities
- Motivate and guide staff

4. Southend City Council Corporate Plan 2022-2026

4.1 Our corporate plan clearly articulates the council's focus for the next four years, between 2022 and 2026. It translates ambitions set out in Southend 2050, our long-term vision for Southend-on-Sea, into medium-term priorities. The corporate plan details for our employees and councillors how we will work with residents and partners to co-create our new city, deliver strategic priorities, and take Southend-on-Sea from strength to strength and how we will step up from a borough to a city council.

Our 4 corporate priorities are:

- **A strong and prosperous city** – *We will power economic and community recovery to help our communities thrive and make Southend-on-Sea a strong and prosperous city.*
- **A city with a good quality of life** – *We will work hard to ensure people have a good quality of life.*
- **A city rising to the climate change challenge** – *We will tackle climate change, become a national exemplar for flood and coastal erosion risk management, and make Southend-on-Sea a green city.*
- **A city delivering genuinely affordable housing** – *We will deliver and maximise the supply of safe, well managed affordable housing.*

4.2 To achieve the priorities set out in the corporate plan we need to transform how we work. We must focus on transforming in areas that will have the greatest impact, unlocking the potential of our employees, and enable us to deliver the best possible outcomes for our residents and communities. Areas in the council we need to see transformation are:

- **Delivering the right quality services** – The overall goals of customers need to be understood and there to be an alignment of a common customer-centric vision. We will listen to customers to understand their needs, enhance customer journeys and manage service delivery risks. We will design services from the point where a customer begins to try to achieve a goal, right through to the point when the goal has been completed and the best possible outcome is achieved.
- **How we work** – There is a need to develop modern working practices to maintain employee engagement, enable employees to maximise their performance, including our approach to hybrid working, and make sure those working from home don't suffer from increased levels of loneliness and mental distress. New technologies are making it easy to access information remotely, work from different locations, and provide a more joined up service for our customers. Adapting to a hybrid approach to work will improve the services to local people, reduce our carbon footprint, cut down on travel time and costs and ensure there are new experiences and face-to-face interactions for employees.

This will increase our attractiveness for talent attraction and help manage retention of existing employees. Progressing the review of the council's Constitution will ensure effective and efficient governance and enable better decision making.

- **Digital as an enabler** – Almost all transformation has a digital element to it. Our sustainable smart city and smart tourist city programmes will help us to develop a new way of working that supports everyone in the council to deliver their best work and achieve improved outcomes for residents and communities. Key to this is making the council a more accessible and inclusive place to work. Flexible working and the ability to be flexible when needed will allow us to adapt to meet new challenges and opportunities. Alongside this, collaborating and co-designing with others will enable us to understand and identify any prospects or barriers on the way, so we can make best use of our resources and time. We will develop services to be joined up so there is one single view of our customers and always accessible, to allow for ease of customer use. This will be supported by the Digital Strategy and the four elements that sit underneath it: Smart Tech, Smart Working, Smart Council and Smart City.

4.3 A performance management framework will sit alongside the corporate plan and within a wider governance framework. The structure beneath the Corporate Plan will include service plans and individual performance agreements to enable a clear golden thread from individuals right through to their contributions to the corporate plan and the Southend 2050 Ambition.

4.4 Our corporate plan is set in a financial context that is difficult. Like many other local authorities across the country, the council faces notable financial constraints and challenges. Our social care costs have risen significantly; there are national inflation costs; and without an increase in government funding to match the increases we will be faced with some hard choices to achieve financial sustainability and will have to work much smarter to deliver the same results.

5. Other Options

5.1 There is no requirement to have a Corporate Plan, but it is best practice and provides a helpful narrative to set the direction for the work, clearly articulating our priorities and contribution to the Southend 2050 Ambition.

6. Reasons for Recommendations

6.1 To ensure the Council has a robust strategic plan which clearly articulates the priorities for the organisation enabling efficient use of resources.

7. Corporate Implications

7.1 Contribution to the Southend 2050 Road Map
The Corporate Plan articulates the council's contribution to the delivery of the Southend 2050 Ambition and how it will collaborate with partners.

7.2 Financial Implications
Resourcing the council's strategic priorities as set out in the Corporate Plan will require tough choices and careful consideration over the next four years. Decisions will be underpinned by our Financial Sustainability Strategy (2022-

2032) and the Medium-Term Financial Strategy for 2022/23-2026/27, helping to target resources and effectively consider and manage a range of financial impacts.

7.3 Legal Implications
None.

7.4 People Implications
The Corporate Plan provides direction and sets the priorities for the council. Feedback from employees on the Southend 2050 refresh in 2021 highlighted the desire for a corporate plan.

7.5 Property Implications
None.

7.6 Consultation
The Corporate Plan has been informed by findings from the residents' perception survey undertaken in 2021 in addition to specific, consultation, engagement and co-production for associated strategies and plans.

7.7 Equalities and Diversity Implications
The council's Equality Objectives were updated in 2022 with a new approach to support our desire to be more effective and accountable on EDI matters. The approach includes an overarching Equalities Statement that sets a vision for the type of council we want to be. We will achieve the vision through a number of objectives, which cover four key topics: employees, access to services, partnership working and community cohesion. Under each topic we have identified a commitment which describes a specific and measurable piece of work, which when completed will help us on our journey to achieving our stated equalities vision. We will report on our progress against the commitments in future corporate plans.

7.8 Risk Assessment
Corporate risks will be identified and monitored alongside the priorities in the Corporate Plan through the Corporate Risk Register.

7.9 Value for Money
The council benchmarks its performance and spend against comparators to ensure it is providing value for money.

7.10 Community Safety Implications
Our priorities for reducing crime and disorder and protecting vulnerable people across Southend are set out in the Community Safety Partnership Strategy for 2022-2025 and through the Community Safety Partnership.

7.11 Environmental Impact
The council is committed to becoming net zero carbon by 2030 to help meet the climate emergency, with this being a leading priority for the council. Priorities actions include: preventing waste, re-use and increase recycling; developing an active and sustainable travel network; enhance, promote and protect our natural environment; and undertake flood and coastal erosion risk management.

Introduction

Our new city of Southend-on-Sea, which extends from Leigh-on-Sea to Shoeburyness, is a connected, ambitious, creative and diverse place to live, work and visit, providing a warm welcome to everyone. Our characterful, inspiring coastline is peppered with gems unique to us – from the iconic Southend Pier, the longest pleasure pier in the world, and the buoyant Adventure Island theme park to the historical Shoebury Garrison and 1,000-year-old fishing village of Old Leigh.

Our city radiates fresh ideas and new approaches, and we apply that approach to our work as a council. Our proud, guiding principle is to support our residents, communities and businesses to thrive and to deliver the very best public services we can for our community and millions of visitors who come here every year.

We must acknowledge that we will continue to face challenges, such as the cost of living

crisis, the local health, social and economic consequences of the pandemic and the inequality that exists across Southend-on-Sea. Within the city, we have neighbourhoods considered to be some of the most deprived areas nationally, whilst also having neighbourhoods ranked amongst some of the least deprived.

Like many other local authorities across the country, the council faces notable financial constraints. Our social care costs have risen significantly and without an increase in government funding to match the increases we will be faced with some hard choices to achieve financial sustainability and will have to work much smarter to deliver the same results.

Our corporate plan clearly articulates the council's focus for the next four years, between 2022 and 2026. It shows how we will step up from being a borough council to a city council. It also translates ambitions set out in Southend 2050, our long-term vision for Southend-on-Sea, into medium-term priorities. The corporate plan details for our employees and councillors how we will work with residents and partners to co-create our new city, deliver strategic priorities and take Southend-on-Sea from strength to strength.

Becoming a city gives us the opportunity to [create something special](#). We can build on our great strengths – our location, our businesses, transport links, services and the rich diversity of our people and communities – and create

a more equal and inclusive Southend-on-Sea for current and future generations, where everyone who lives here has an equal chance to flourish.

We have listened to what is important to our residents through regular dialogue and engagement. We know that:

- our parks and open spaces have become much more important to residents following the pandemic.
- residents want crime and antisocial behaviour to be addressed and to feel safe and secure in all parts of the city at all times.
- the environment matters a great deal to residents and they are willing to take action to help achieve our net zero carbon ambition. This is not just the council's target; it is everyone's target.

We will continue to engage with the people and communities of Southend-on-Sea to understand their diverse experiences and what they want for their lives and their new city, and what that should mean for our direction as a council. We will use insight to shape council activities and plans.

A remarkable community spirit exists within Southend-on-Sea. The kindness and compassion of our residents and communities so powerfully displayed during the COVID-19 pandemic and in the aftermath of the tragic death of Sir David Amess in October 2021.

We will harness that community spirit as we continue to support each other.

We want to see Levelling Up benefit Southend-on-Sea and the wider area, and support residents to live longer and more fulfilling lives and gain from sustained rises in living standards and well-being. We also want to meet the aims of the health and social care white paper, which sets out measures to make integrated health and social care a universal reality for everyone across England regardless of their condition and location. We will work with our partners to enable integrated care and support arrangements and achieve improved health and social care outcomes for our residents. We will also do our bit to enable the roll-out of digital infrastructure in the city to ensure that growing internet demand from businesses and residents is met.

We continue to work alongside our neighbouring boroughs, local partnerships and central government. We will lead collaboratively alongside our communities and partners, and do so with innovation, ambition, openness and purpose, to build a bright future for everyone in our new city.

**Cllr Stephen George,
Leader of the Council, and
Andrew Lewis, Chief Executive,
Southend-on-Sea City Council**

A speech by HRH The Prince of Wales during an Official Council Meeting to mark Southend-on-Sea becoming a City

“In the aftermath of Sir David’s brutal murder, the people of Southend-on-Sea came together in a remarkable and inspiring way to bring good out of evil. In doing so, they demonstrated a deep truth: that what matters more than any name, whether of a person or a place, is the spirit. Today, Southend becomes a city. As we celebrate and honour that fact, we remember that it is always, and crucially, a community.” Read the full speech.

About our city

The map below shows how Southend-on-Sea is comprised of 17 wards, which are grouped into four localities:

West, West Central, East Central and East.

Population (2021 Census data)

182,700
residents

7,000+

(4.1%) growth of population since the last census in 2011, when it was 173,568.

12%

increase of older people aged 65 and over from 2011.

4.2%

increase of younger age groups from 2011.

4,336

residents per sq km in Southend-on-Sea in 2021, up from 4,167 per square kilometre in 2011.

3,000+

(4.9%) increase of households in Southend-on-Sea. Up from 74,678 in 2011 to 78,300 in 2021.

9

family centres

7 miles of coastline

8 Beaches and 5 Blue Flags

529.9

hectares of protected greenspace

33

Parks

30k+

total of all trees in addition to street

19

allotments

7

Green Flag awards

8

nature conservation areas

50+

sport facilities and pitches

15

64,000 jobs in Southend-on-Sea
39,000 full-time and
25,000 part-time
(2020 figures)

Level of qualifications

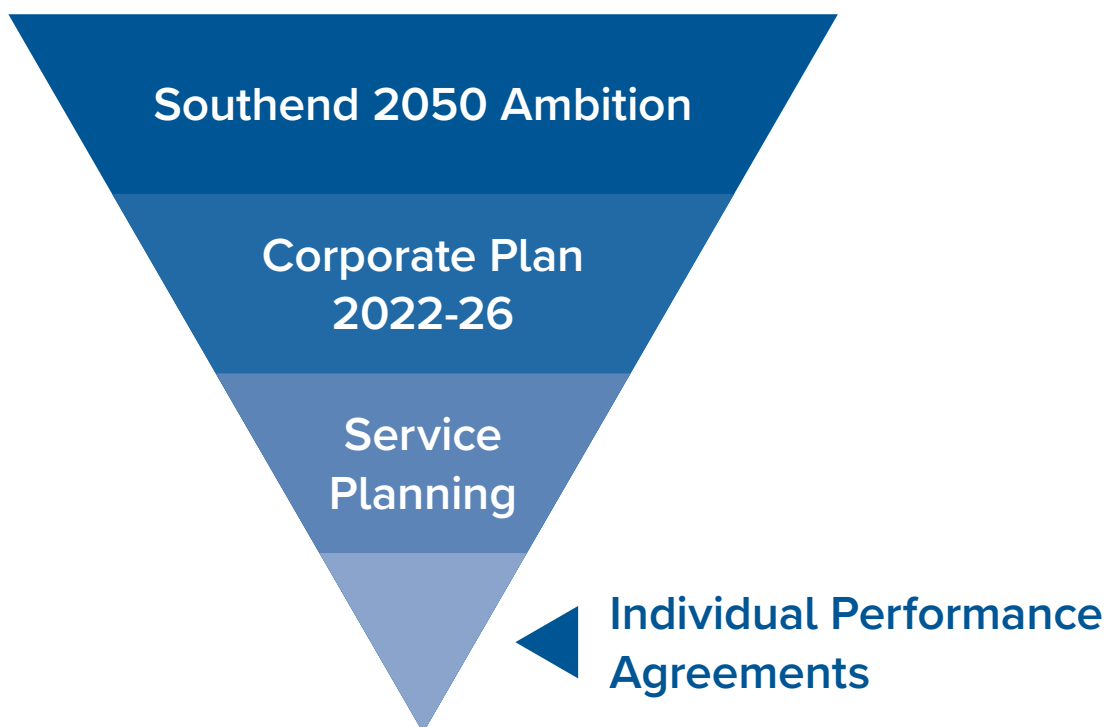

Education

Strategic framework

The council has a strategic framework (see diagram below) to help us make decisions, set strategy and manage performance. It includes the golden thread of documents that describe our long, medium and short-term priorities, and provides a clear line of sight between the Southend 2050 ambition, day to day service delivery and individual performance.

The top-line of the strategic framework is the Southend 2050 ambition, which provides a co-produced, long-term vision for Southend-on-Sea. The Southend 2050 ambition has five themes. These themes are shown in the diagram overleaf. The Southend 2050 ambition also needs to be set against the context of the council's declaration of a Climate Emergency in 2019.

The Southend 2050 ambition is not something that can be achieved by the council alone.

We must work in partnership with our residents and communities, businesses and organisations to deliver it.

Sitting underneath the Southend 2050 ambition is the council's corporate plan. This plan translates the long-term Southend 2050 ambition into medium-term priorities for the council. The corporate plan will be turned into tangible activity in service plans coming in 2023. These service plans will set out in detail the activity of each service area within the council.

The diagram below sets out the council’s governance, performance, finance and risk management, and individual performance agreements.

The **Governance Framework** allows the council to operate in accordance with the law and proper standards, and ensure that public money is safeguarded, properly accounted for and used economically, efficiently and effectively. It brings together an underlying set of values, legislative requirements, governance principles and management processes.

Our **Financial Sustainability Strategy 2022 to 2032** and **Medium-Term Financial Strategy for 2022/23 to 2026/27** underpin the priorities set out in the corporate plan. They support the achievement of desired outcomes in the corporate plan and will ensure the council remains financially resilient.

The corporate performance management framework details how the council’s priorities will be managed and reviewed alongside our corporate risk, transformational projects and equality objectives. Individual performance goals will drive individual performance management and be governed by our

People Vision, to support the creation of a great employee experience linked to the strategic priorities of the council.

Our People Vision has been structured to reflect the employee life cycle and consists of eight core component parts. These eight component parts are:

- diversity and inclusion
- attracting and retaining the best talent
- reward
- wellbeing
- learning and development
- hybrid working/Work Smart
- visionary leadership
- empowering our people to perform

Within each component part are detailed plans setting out how we will achieve our vision and the core deliverables for the next four years, between 2022 and 2026.

Values and behaviours

Our values and behaviours represent our core principles and ethics for how we approach our work and collaborate as individuals, teams and one organisation. They underpin delivery of our People Vision and the priorities set out within this corporate plan.

Our values:

- Collaborative
- Honest
- Inclusive
- Proud

Our behaviours:

- Driving positive change
- Trust and respect
- Demonstrating strong leadership
- Acting with integrity and behaving responsibly
- Building relationships to work well together

Equality, diversity and inclusion

The council's equalities statement and equality objectives support our desire to be more effective on equality, diversity and inclusion matters. They were written in 2022 following consultation with residents, council employees and representatives from groups and organisations who work with and support people with [protected characteristics](#).

Equalities statement:

Southend-on-Sea City Council recognises and values the benefits of diversity and inclusiveness in our city, where people from different backgrounds are valued and get on well together. We will work to bring equality, diversity and inclusion issues into sharper focus and seek out improvements to our services and work environment.

We are committed to supporting all Members and employees to feel they belong at the council and have opportunities to succeed.

We will work with employees to identify and remove barriers to inclusivity and diversity.

The council will actively celebrate the value that a diversity of perspectives brings and will proactively seek opportunities to celebrate our differences as well as the common goals that connect and unify us all – together we are stronger.

As an inclusive local authority, we will seek opportunities to work with residents from all groups of protected characteristics to design, co-produce and deliver high quality services that work for all. Collaborative, partnership working is the way to achieve this.

Our equality objectives are:

We will achieve our equalities vision through our equality objectives.

- **Our employees** – To create an inclusive and collaborative working environment that is representative of our communities
- **Access to services** – To provide support in accessing services for all, accommodating diverse needs, and promoting inclusion at all levels, including a developed digital literacy offer
- **Cohesive community** – To raise awareness of the richness in diversity, by celebrating our communities' differences and what unites us
- **Partnership working** – To seek opportunities to co-produce, co-design and to bring lived experience into policy making, strategy development and implementation/ service delivery

Under each objective is a commitment which describes a specific and measurable piece of work, which when completed will help us on our journey to achieving our equalities vision.

Our corporate priorities and change programme

We have identified four overarching priorities that as a council we want to achieve for the city. Under each priority there are a number of areas of action and more detail about what we will do.

Our council priorities are:

A city that is strong and prosperous

We will support economic recovery, enhance the city's role as a place for prosperity and opportunity, and safeguard business clusters, including those focussed around the city and district centres and London Southend Airport. We will deliver on regeneration projects to support jobs, growth and opportunity, improve the skills base of the city's workforce and build a more inclusive local economy. We will build strong communities, wellbeing and resilience and create a city that is safe for all.

We will power economic and community recovery to help our communities thrive and make Southend-on-Sea a strong and prosperous city.

A city with a good quality of life

We will create better life opportunities for our children and young people, and work collaboratively with adults to enable them to live safe, well and independently in the community, connected to the people and things they love. We will also support children and adults who look after a family member, partner or friend who would struggle to cope without their support.

We will work hard to ensure people have a good quality of life.

A city rising to the climate change challenge

We declared a Climate Emergency in 2019, consolidating carbon reduction and climate mitigation and adaptation activity across the council. We will continue our evidence-based approach and use our resources wisely to ensure strategies and projects maximise carbon reduction and climate mitigation and adaptation. We will also implement measures to address the risks of natural flooding and coastal erosion.

We will tackle climate change, become a national exemplar for flood and coastal erosion risk management, and make Southend-on-Sea a green city.

A city delivering genuinely affordable housing

We know there is a pressing need for locally affordable housing in the city, and to increase the environmental sustainability of homes. Rented housing in the private and social sector must be safe and well managed, with tenant's voices listened to and repairs and maintenance carried out in a timely way. Those at risk of homelessness must be supported and where homelessness occurs, this should be brief and non-recurrent.

We will deliver and maximise the supply of safe, well managed affordable housing

Change programme

To achieve the priorities set out in the corporate plan we need to transform how we work. We must focus on changing in areas that will have the greatest impact, unlock the potential of our employees, and enable us to deliver the best possible outcomes for our residents and communities. Areas in the council we need to see change are:

- **Delivering the right quality services** – The overall goals of customers need to be understood and there to be an alignment of a common customer-centric vision. We will listen to customers to understand their needs, enhance customer journeys and manage service delivery risks. We will design services from the point where a customer begins to try to achieve a goal, right through to the point when the goal has been completed and the best possible outcome is achieved.
- **How we work** – There is a need to develop modern working practices to maintain employee engagement and enable people to maximise their performance. This includes developing our approach to hybrid working and making sure those working from home don't suffer from increased levels of loneliness and mental distress. New technologies are making it easy to access information remotely, work from different locations, and provide a more joined up service for our customers. Adapting to a hybrid approach to work will improve the services to local people, reduce our carbon footprint, cut down on travel time and costs and ensure there are new experiences and face-to-face interactions for employees. This will increase our attractiveness for talent attraction and help manage retention of existing employees. Progressing the review of the council's Constitution will ensure effective and efficient governance for councillors and council officers and enable better decision making.

- **Digital as an enabler** – Almost all transformation has a digital element to it. Our sustainable smart city and smart tourist city programmes will help us to develop a new way of working that supports everyone in the council to deliver their best work and achieve improved outcomes for residents and communities. Key to this is making the council a more accessible and inclusive place to work. Flexible working and the ability to be flexible when needed will allow us to adapt to meet new challenges and opportunities. Alongside this, collaborating and co-designing with others will enable us to understand and identify any prospects or barriers on the way, so we can make best use of our resources. We will develop services to be joined up so there is one single view of our customers and always accessible, to allow for ease of customer use. This will be supported by the Digital Strategy and the four elements that sit underneath it: Smart Tech, Smart Working, Smart Council and Smart City.

Effective programme management is key to the delivery of transformation programmes. We must continue to flex our approach to ensure the council meets its strategic objectives and effectively responds to the changing operating environment. This work is already underway, but with our corporate plan we have extended the scope and accelerated the pace of change. The need for effective management of demand and customer expectations requires robust monitoring and management of quality, performance and outcomes alongside coherent and co-ordinated programmes of work projects. A key element of our change programme will be in strengthening alignment and governance across our project and programme portfolios. Creating consistency of understanding around direction, overall spend, outcomes and value for money.

Financial sustainability

We will continue to strive to ensure the council remains financially stable and resilient for the future. This has never been more challenging. Like most local authorities across the country, we face tough financial challenges whilst also experiencing major increases in demand for our services. We are also in a cost-of-living crisis, with escalating numbers of residents in Southend-on-Sea experiencing financial hardship and climate crisis.

Resourcing our strategic priorities will require tough choices and careful consideration over the next four years. Decisions will be underpinned by our Financial Sustainability Strategy 2022 to 2032 and Medium-Term Financial Strategy for 2022/23 to 2026/27, helping to target resources and effectively consider and manage a range of financial impacts. Both strategies have been comprehensively updated to reflect the impact of the COVID-19 pandemic. They provide a clear financial framework for the organisation and will support the delivery of our priorities, including local regeneration ambitions, facilitating more effective joined-up health and social care services as set out in the Government's Integration White Paper, whilst navigating the challenges and impact of a pandemic, climate change, a cost-of-living crisis, and an unprecedented increase in demand for advice and support from local residents and businesses.

Despite the challenges, the council is determined to build on the solid financial foundation we have worked so hard to create locally. We will maintain robust financial planning, scrutinise budgets closely, be prudent in managing risks and always strive to deliver better value for money for local people. We will continue to embed our 'Getting to Know Your Business' programme and have a commercial mindset when thinking about our assets. We will ensure that our financial strategy continues to align with Government funding and aim to mobilise all our limited resources to deliver priorities that will make a tangible, positive difference for our residents, businesses and visitors.

A city that is strong and prosperous

We will:

- support economic regeneration and business development
- use our spending power wisely
- bid for funding opportunities and attract inward investment
- sustain and grow digital investment and inclusion
- deliver our city centre strategy and investment plan
- enhance our tourism, cultural and leisure offer
- support community recovery
- improve community safety

Support economic regeneration and business development

We will progress a programme of culture-led regeneration projects to support economic recovery, enhance Southend-on-Sea's important sub-regional role as a place for economic prosperity and opportunity, and safeguard key business clusters, including those focussed round the city and district centres and London Southend Airport, while avoiding bringing noise and air pollution.

Regeneration projects to be delivered over the next three to five years include:

- activating the Victoria Centre development and taking forward plans to ensure its long-term business sustainability.
- the Seaway Leisure project
- redevelopment at Roots Hall and a relocated stadium for Southend United Football Club at Fossetts Farm
- The Launch Pad innovation hub at Airport Business Park Southend
- facilitating growth of London Southend Airport in partnership with Rochford District Council and other stakeholders, to realise its potential as a zero carbon regional transport hub, providing significant new employment opportunities

We will be innovative and proactive in helping our businesses, organisations and communities recover from the impact of the pandemic, encouraging the city's strong entrepreneurial spirit. We will enable transition to a sustainable economy by supporting low carbon growth and encouraging businesses to reduce waste and pollution.

The council will play a leading role to ensure the local employment and skills system improves residents' skills and employment prospects and helps businesses with their recruitment needs:

- **Skills** – We will work to improve the skills base of the city’s workforce and build a more inclusive local economy. The Southend Adult Community College has an important role in delivering community learning to improve our digital offer and attract more businesses to the area.
- **Jobs** – We will deliver on major regeneration projects to support jobs, growth and opportunity. We will support our key employment sectors, including health and care, finance and business hospitality, retail and tourism, and support employment growth sectors, such as digital, cultural and creative, healthcare technology, advanced manufacturing and engineering, and the green and blue economy, to create local opportunities. As a Kickstart Gateway, we will help local employers get funding to create jobs for 16 to 24 year olds on Universal Credit.
- **Inclusion** – We will work with businesses, developers and our suppliers to ensure equal access to well-paid and secure jobs with prospects. We will also support women, young people, disabled people and people from Black, Asian and minority ethnic communities to achieve their full potential.

We are well positioned as a city to maximise opportunities from regional partnerships, such as the Association of South Essex Local Authorities (ASELA), Thames Estuary Growth Board and South East Local Enterprise Partnership. In our ASELA partnership, we are working to create a [new technical university in south Essex](#). This new university will focus on degrees, degree-level apprenticeships and short course CPD in highly vocational subjects. We are also working on plans to develop the [South Essex Estuary Park](#). The Park will be a single regional parkland system, with multiple benefits including flood risk management

and climate change mitigation, featuring a continuous and accessible coastal path from Tilbury Fort to Shoeburyness.

We will build and maintain links with Thames Freeport, an economic zone connecting Ford’s world-class Dagenham engine plant to the global ports at London Gateway and Tilbury, so residents can take advantage of new jobs and skills created at Freeport.

Use our spending power wisely

We will use the council’s spending power to support economic growth and regeneration. We have big investment stakes in housing and jobs within the city and we are a Living Wage employer. We will maximise benefits from our spending power by mainstreaming social value in all procurements. Social value will create new jobs and apprenticeships, ensure local businesses are part of large contract supply chains as well as deliver environmental sustainability and community outcomes. Where possible, we will buy goods and services locally and we will require suppliers to pay their staff at least the Living Wage.

Bid for funding opportunities and attract inward investment

We will use our now status as a city to change the conversation about Southend-on-Sea as a place to invest and do business. We want to see businesses thrive and grow and Southend-on-Sea become an attractive and safe location for investors. We will welcome new opportunities and investment in the area. We will make sound judgements about where investment comes from. It must be green and reflect our equality, diversity and inclusion aspirations.

We will be ready with programmes and projects in order to bid for funding that supports employment and skills, connectivity, economic recovery and growth, and culture-led regeneration. This will include bidding for the Government's Digital Growth Grant and Levelling Up Fund.

A central pillar of the Government's Levelling Up agenda is the UK Shared Prosperity Fund (UKSPF). We will prepare investment plans for the UKSPF and Multiply, which is the first priority of the Fund, and seek to ensure the outcomes they target will have positive impacts in Southend-on-Sea. Under the UKSPF, all areas of the UK will receive a multi-year conditional allocation via a funding formula. The Fund is focused on investing in community and place, supporting local business and people and skills. Multiply funding will help to improve adult numeracy skills.

Sustain and grow digital investment and inclusion

We will invest in our places to unlock the city's economic potential and make sure that Southend-on-Sea is a place where businesses want to be. Connectivity across Southend-on-Sea needs to be improved to attract business growth and inward investment and cater for growing digital needs. We will complete the city's £30 million full fibre upgrade, in partnership with CityFibre, to provide access to gigabit broadband, and do our bit to make sure that the digital infrastructure is in place to support increasing internet traffic.

We will encourage businesses and residents to use superfast broadband, 4G, 5G, Low Power networks and wifi for business, working-from-home and education. We know that the cost of getting fibre to the door can be prohibitive. We will explore opportunities to enable connectivity for our residents. Digital inclusion

offers a sustainable way to support people out of poverty and is a critical driver for our sustainable smart city.

Deliver our city centre strategy and investment plan

We will put our new City Masterplan in place, reimagining the city centre for future generations. We will work with our partners to implement the plan, recognising that the vibrancy of the High Street is often seen as a barometer for the vitality of a place and therefore it is a shared priority.

We are rethinking our approach to all our shopping centres, minimising reliance on retail only spaces. With our partners we will create mixed-use, well connected high streets with featuring retail, residential, heritage, cultural, entertainment, public, green and residential spaces. We will ensure heritage assets and their setting are conserved and enhanced so they continue to make a full contribution to the character of Southend-on-Sea. We will improve access to all parts of our city for people with physical, sensory and learning disabilities. We will also create a safer city centre for all.

Enhance our tourism, cultural and leisure offer

Southend-on-Sea is an aspiring smart and green tourist city, a city which needs to balance the needs of residents, and visitors and the environment. We will recover and grow our visitor economy sustainably, promoting Southend-on-Sea as a place to visit and stay for local visitors and for those from further afield. Our tourism strategy 'Destination Southend' sets out clear priorities and actions for the council to work in partnership with the tourism business community to enhance the offer and develop opportunities to increase the

value of the visitor economy – extending the season and building on staycation – and grow green tourism.

Southend-on-Sea’s world-famous pier requires continued investment from the council and its visitor experience will continue to grow, building on recent record numbers of visitors. We also want to make the most of our natural environment. Managing our open spaces and award-winning beaches will help spread the value of tourism across the whole city area and events will be developed to support this wider opportunity.

We are investing in our cultural offering, including improvements to the Cliffs Pavilion, public spaces and other cultural assets to ensure that residents and visitors can enjoy high quality experiences in Southend-on-Sea. The recently co-produced ‘Culture Vision’ sets out our aspirations to work with partners in the cultural sector and grass roots organisations to help demonstrate the real power of culture.

Our libraries, museums and galleries will all contribute to support community needs and play an important role in the public health agenda, both for physical and mental wellbeing. Our leisure offer will continue to adapt to meet the changing needs of residents.

We will promote and enhance the city’s tourism, cultural and leisure offer to ensure wide participation and benefit our residents, businesses and visitors.

Support community recovery

Southend-on-Sea is a place of diverse and many different cultures. We will continue to develop relationships with our diverse communities and partners, including those that represent groups with protected characteristics. We will help build strong communities, wellbeing and resilience and secure the best possible outcomes for our residents.

Priority areas for community recovery include:

- **Tackling poverty and hardship**

We will develop and implement a tackling poverty strategy to address the inequalities in our city and make life fairer for those affected by poverty and the cost of living and the consequences of living in debt. We will co-produce the strategy with residents and work together to find sustainable solutions across the four-year lifespan of the corporate plan and beyond.

- **Reduce health inequalities**

We will take a place-based approach for reducing health inequalities, including mental and physical health inequalities, and life expectancy inequality across Southend-on-Sea.

- **Service provision** - We will continue to work with health and voluntary sector partners to tackle service inequality in the city, including making sure services are accessible to vulnerable people.

- **Food Environment Policy** - We will need to increase our collaboration in reducing the growing burden of obesity, which has an enormous impact on health and well-being outcomes. The COVID pandemic has seen a change in how people access food, especially less

healthy food, with a growing industry for fast food delivery. Additionally, the rising cost of living is significantly impacting on people's access to food and we are seeing more dependency on food banks. We will need to be bold in how we effect sustainable change in our food environment and people's relationship with food, to have a balanced approach in our local plan and policies on how we promote access to healthier food and reduce wastage, improve the provision and access to relevant information, advice and guidance on healthier eating, reduce food poverty and insecurity and boost the economic recovery.

- **Physical activity** - We want our residents to have physically active lifestyles, to move more and make use of our parks, open spaces and coastline. We will encourage them to do so through varied lifestyle improvement and wellbeing activities and making walking and cycling more convenient and accessible.
- **Healthy places** – We are committed to making Southend-on-Sea a healthier place to live and are already delivering when it comes to tackling air quality through actions set out in our Air Quality Action Plan. We will keep working to reduce levels of air pollution in the city and meet national air quality objectives.
- **Social isolation**
We will support initiatives that enable residents working with other residents to address digital exclusion and break down [intergenerational barriers](#). Community builders, who are people who encourage others to get involved with their neighbourhood of with a common need or interest, will continue to have hundreds of conversations per month with residents, businesses and groups, identifying local community connectors, ideas and

resources. They will support events and spaces connecting people with each other to reduce social isolation and create momentum to take community action. We will also continue to develop the [Southend Livewell directory](#), which highlights local groups and projects that can be accessed to form new friendships, learn new skills and make a positive difference locally.

- **Understanding and improving our communication with vulnerable residents**

We will work with the Trauma Alliance to ensure that all staff dealing with vulnerable people within the authority, statutory and the voluntary sectors are trained to be trauma informed and have on going membership to a community of practice. This will improve our residents experience when accessing front line services and improve relationship building and trust.

- **Strengthening our community, faith and voluntary sector**

We will:

- support the direction of any additional identified funding towards the Community Investment Board, which is managed and delivered by volunteers and gives the community control on what is funded
- re-procure the Voluntary Sector Infrastructure organisation to include a strong volunteer support and brokerage offer, to connect volunteers with local volunteering opportunities
- support community engagement projects that will help to create a stronger, more resilient voluntary, faith and community sector in Southend-on-Sea
- continue to work with individuals and organisations from a strengths-based perspective and celebrate achievements
- build on the relationships and contacts with communities fostered during

the pandemic. For example: [Good Neighbours scheme](#), the [Westborough Alleys project](#) and the [Community Connectors project](#) run by the council and SAVS

Improve community safety

Our priorities for reducing crime and disorder and protecting vulnerable people across Southend-on-Sea are set out in the Community Safety Partnership Strategy for 2022 to 2025. The strategy has been developed by the Southend Community Safety Partnership Board, which comprises of statutory and non-statutory partners, including Essex Police. The Community Safety Partnership's priorities are based upon an assessment of crime and disorder issues across the city and reflect community views and insight. The priorities are:

- Safe and Confident Communities
- Violence Against Women and Girls
- Hate Crime
- Knife Enabled Serious Violence

We will implement community safety measures to create a safe and secure city for residents and visitors of all ages. The Community Safety Patrol Team, CCTV equipment and town link radio system are all central to this. We will continue to take action against individuals that commit anti-social behaviours.

We will work collaboratively with partners to prevent and reduce sexual harm on the night time economy, including understanding the specific needs of women who sell sex on the street. The Street Prostitution Strategy 2022 to 2023 will protect and improve the quality of life of sex workers and make sure residents feel safe in areas of the city where street prostitution happens.

The council will work with its partners to make sure the Southend Domestic Abuse Strategy meets the requirements in the Domestic Abuse Act 2021 for local authorities. The new strategy aims to address the local response to domestic abuse more generally, not just the support to victims within 'safe' accommodation.

We will look to provide safe community spaces for children and young people and continue to develop the 'See The Signs' campaign to educate residents and communities on county lines drug gangs and child exploitation.

Delivery strategies and plans

The list below shows relevant delivery strategies and plans for this priority area.

- Economic Growth Strategy 2017 to 2022
- City Centre Strategy and Investment Plan
- Social Value Policy
- Tourism Strategy 'Destination Southend'
- Culture Vision
- Tackling Poverty Strategy 2023 to 2026
- Essential Living Fund Policy 2013
- Food Environment Policy
- Air Quality Action Plan 2022 to 2025
- Community Safety Partnership Strategy 2022 to 2025
- Street Prostitution Strategy 2022 to 2023
- Domestic Abuse Implementation Strategy 2021
- Southend, Essex and Thurrock Exploitation Strategy 2019 to 2024

Our priorities

A city with a good quality of life

We will:

- Achieve our vision of a city where all children achieve success
- ensure children and young people, including those in care, feel and are safe at home, school and in their communities
- enable and provide opportunities for the best start in life
- enable people to age well, live well and care well
- ensure that health and care services meet the needs of all
- ensure services are diverse, sustainable and high quality, including those who pay for their own care

Achieve our vision of a city where all children achieve success

We will continue to improve the experience of children, young people and families have when in contact with children's services by focusing on delivering against our improvement targets. This work will be delivered in collaboration with children, young people, families, and with our employees.

Part of our vision of a city where all children achieve success is increasing the influence of children, young people and communities in planning and decision making. We will provide co-production opportunities in all areas of planning and decision making in the council.

Ensure children and young people, including those in care, feel and are safe at home, school and in their communities

Working as a member of the Southend Safeguarding Children's Partnership we will maintain a focus on safeguarding all children and young people. We will provide the right support for children and their families at the earliest opportunity, through to specialist and statutory interventions. This is to ensure the welfare and safety of vulnerable children and young people.

Children, young people and families will receive the support needed that improves their resilience and outcomes or reduces the chance of a problem getting worse. They will have access to co-ordinated Early Help in accordance with need as soon as difficulties are identified. We will work with our partners to ensure they have the best possible emotional health and wellbeing outcomes.

Enable and provide opportunities for the best start in life

We will work in partnership with early year providers and partners to ensure a coordinated and integrated delivery of services to give young children the best start in life and support their transition to school.

We will work with schools and other partners to make sure that every young person in the city has access to the opportunities they need to thrive in life, including an excellent education. We will seek to eliminate disparities in educational achievement.

We will:

- offer support and challenge all schools and trusts in Southend-on-Sea to be Ofsted Good or Outstanding
- continue the improvements with special educational needs and disability (SEND) so that by the time the next Ofsted and Care Quality Commission inspection comes about, we will be judged as 'Good' or the equivalent
- implement changes to statutory attendance and entitlement so pupils can attend the most appropriate setting, and are safe and well

We will support schools and settings to become even more inclusive, and to deliver outcomes for pupils (and their families) who have additional needs to enable them to thrive in their mainstream setting alongside their peers.

Enable people to age well, live well and care well

The council will work with residents to enable them to live safe, well and independently in the community, connected to the people and things they love. We will achieve this by:

- listening to people and focusing on their strengths
- transforming care and support to ensure that there are flexible options that enable independence
- getting the best value from the Southend-on-Sea pound for the people we support

Delivering this vision will mean people in the city:

- can easily access information and advice that connects them to support that helps prevent, reduce, delay the need for care and support
- can lead the discussion where they might need more formal assessment
- are supported to live well and longer in their community with choice and control
- have a good experience of the care and support they receive
- have a smooth transition into adult services with a focus on their potential and living independently

Embedding a strength and asset-based approach

A strength and asset-based approach will view individuals holistically and explore their abilities and circumstances, in a solution focused way. Individuals will be encouraged to identify the goals they want to achieve and work towards attaining these goals to empower the individual. Reablement, active recovery and tools for independent living will be central to this approach.

Transforming care and support

The council's overall direction for adult social care is built on three core strategies named [‘Ageing Well’, ‘Caring Well’, and ‘Living Well’](#), setting out priorities over the next five years. The three strategies were co-designed with people who use services and their friends and families:

- The **‘Ageing Well’** strategy focuses on supporting the needs of people as they get older. It aims to provide ‘a life, not just a service’ and support people be in control of their own lives and care, to enable independence.
- The **‘Living Well’** strategy looks at the needs and wellbeing of adults of working age with additional needs such as physical, sensory, learning difficulties, mental health challenges and autism. Best practice has shown our residents living with these challenges would benefit from a person-centred approach to care, which supports them to live independently and be involved within their local community.
- Our **‘Caring Well’** strategy focuses on the needs of unpaid carers, sometimes called ‘hidden carers’, which can be children or adults that find themselves in a position caring for a family member, partner or friend. These carers play a significant role in preventing the need for a more formal care provision, and the health and social care system relies on this unpaid support.

We have annual action plans to move forward the delivery of each strategy and take us to where we want to be by 2027. Partnership groups have been formed to manage the development, delivery, and monitoring of the yearly action plans for each strategy. These will build on the work of the previous year and in reaction to emerging needs and trends.

All action plans contain a desire to further develop co-production and ensure links across services and other department plans and strategies to reduce duplication and make efficient use of available resources.

Ensure that health and social care services meet the needs of all

In September 2021, the Government set out its [new plan for adult social care reform in England](#). This included a lifetime cap on the amount anyone in England will need to spend on their personal care, alongside a more generous means-test for local authority financial support. In December 2021 the Government published a white paper, [People at the Heart of Care](#), outlining a 10-year vision that puts personalised care and support at the heart of adult social care, ensuring people: have the choice, control and support they need to live independent lives; can access outstanding quality and tailored care and support; and find adult social care fair and accessible.

We will work with our health and social care partners to make navigating health and social care services seamless for our residents and reduce the factors that exacerbate health inequality in the city.

Health and social care integration

The Government's Health and Care Act received Royal Assent on 28 April 2022. The Act introduces significant reforms to the delivery of health and care services in England. As part of the measures, every part of England will be covered by an integrated care system, bringing together NHS, local government and other partners to collectively plan health and care services to meet the needs of the local population. The Mid Southeast Essex Integrated Care System is made up of two parts:

- the Integrated Care Board is responsible for commissioning a range of services and will have legal duties, including reducing inequalities, improving quality of provision, maintain patient choice and promoting integration.
- the Integrated Care Partnership will create a local integrated care strategy, involving people who live in Southend-on-Sea, with a focus on influencing the wider determinants of health and broader socio-economic development.

Our partnership working ambitions are grounded within our Health and Wellbeing Strategy, Joint Strategic Needs Assessment, Locality Strategy and Southeast Essex Alliance place plan. We recognise there are system challenges relating to demand, capacity in care provision and discharge out of hospital, which we will address through short and long term mitigation plans, particularly in employee recruitment and retention schemes and investing in the care market. We are working with health partners to develop place-based provision and approaches. This will provide opportunities for joined up initiatives to reduce care needs, manage increasing demand and complexities, improve discharge flow out of hospital and ensure people can remain living independently for as long as possible at home.

Care Quality Commission local system inspection readiness

In May 2022, Parliament officially granted the Care Quality Commission (CQC) powers to review health and social care local systems. At the core of this new approach will be the CQC new single assessment framework, against which they will assess providers, integrated care systems and local authorities. This framework will set out what they expect good care to look like in terms of what a person should experience when navigating the health and social care sector and assessing care.

From April 2023, the inclusion of a duty for the CQC to assess local authorities' delivery of social care services will begin. The new single assessment framework will include five key lines of enquiry – Safe, Effective, Caring, Responsive and Well Led. It will draw on “I” statements used in Think Local Act Personal “Making it Real” framework, to ensure personalised, culturally appropriate care.

In CQC inspection readiness we are developing our self-assessment against the framework and will bring to life the real experiences of people who use services, their families and carers, ensuring that they are the central focus.

Ensure services are diverse, sustainable and high quality, including those who pay for their own care

As a condition of the Government's published white paper, [People at the Heart of Care](#), we will complete a fair cost of care exercise with home care and care home providers, to arrive at a shared understanding of the local cost of providing care.

Market Position Statement

A market position statement has been produced by the council following market research and engagement with people who use or run care services, our partners and market stakeholders. The market position statement summarises supply and demand in Southend-on-Sea and highlights business opportunities in the area.

Delivery strategies and plans

The list below shows relevant delivery strategies and plans for this priority area.

- Southend Early Help Partnership Strategy 2021 to 2024
- Special Educational Needs and Disabilities Strategy
- School Performance Strategy 2019 to 2023
- Ageing Well 2022 to 2023
- Living Well 2022 to 2023
- Caring Well 2022 to 2023
- Southend Essex Thurrock Dementia Strategy 2022 to 2026
- Health and Wellbeing Strategy 2021 to 2024
- Joint Strategic Needs Assessment
- Locality Strategy 2018
- Southend-on-Sea Market Position Statement

A city rising to the climate change challenge

We will:

- become a net Zero Carbon Southend by 2030
- prevent waste, re-use and increase recycling
- develop an active and sustainable travel network
- enhance, promote and protect our natural environment
- undertake flood and coastal erosion risk management

Become a net Zero Carbon Southend by 2030

Transition to a zero carbon Southend-on-Sea will help us to meet the climate emergency, support our economic and community recovery and create opportunities for new high skilled jobs and industry.

We know the carbon footprint of our city – developed through the council's work with Project REMeDY. This is a part-government funded project led by the council with a consortium of partners, including technical and industry experts and academics, working to bring affordable low carbon heating to residents and businesses in Southend-on-Sea.

Measuring our carbon footprint is an important step in our evidence-based approach to achieving our ambitious net zero target. It shows the scale of the challenge and will shape our plans and priorities. The largest sources of carbon emissions in Southend-on-Sea are residential energy, commercial energy and road transport.

Other work in progress includes:

- geographic information system mapping of residential and commercial emissions
- carbon tool for updating and reporting on emissions reduction
- detailed modelling of pathway to net zero for a selection of building archetypes

Based on all this information we are developing a Net Zero strategy, to be launched in 2022/23. We will demonstrate strong local leadership and take a strategic approach to climate change. We will reduce emissions across our own estate, including South Essex Homes properties, and identify how we can reach the council's net zero carbon target via transport and procurement.

We are also reframing our Green City Action Plan. The plan will help the council to build climate resilience across Southend-on-Sea, take a proactive approach to urban greening and create and improve public open spaces.

Our new [Southend-on-Sea City Local Plan](#) will set out site options and policies for new jobs, housing, services, green spaces and supporting infrastructure.

We will continue to build solid partnerships with a range of organisations to achieve a clear pathway for our city to achieve net zero carbon by 2030. Businesses, stakeholders and residents made clear their commitment to minimising the impacts of climate change during the development of Southend 2050, resulting in the green city ambition.

Reduce waste, re-use and increase recycling

The Government's [Environment Act](#) became Law in November 2021. It contains a variety of targets, plans and policies for improving our natural environment that will affect the council. The Act will mean major changes to waste and recycling services in the city over the next few years. Proposed changes include:

- extended producer responsibility to make producers pay for 100% of cost of disposal of products
- a Deposit Return Scheme for single use drinks containers
- charges for single use plastics
- greater consistency in recycling collections in England

We are procuring recycling and waste collection and treatment solutions for the city that meet these changes, as well as our environmental, sustainability and social value ambitions. Importantly, these solutions will be aligned to the needs of our residents and local environment.

We will encourage people to prevent waste, promote re-use and recycling behaviour, and incorporate a carbon reduction approach. We are committed to driving resources up the waste hierarchy to become a sustainable city for businesses, residents and visitors. We will do this through outreach and engagement activities.

The [PlastiCity](#) project is laying the foundation for the development of a circular economy in Southend-on-Sea. The circular economy is a model of production and consumption, which involves sharing, leasing, reusing, repairing, refurbishing and recycling existing materials and products as long as possible. In this way, the life cycle of products is extended. In practice, it implies reducing waste to a minimum. As part of our circular economy approach, we are developing strategies and solutions to reduce plastic consumption and increase plastic recycling rates across the city's businesses and schools. In addition, we are identifying and mapping circular activities in Southend-on-Sea, including business activities. The main focus is on plastics, but we are also looking at other materials and activities, such as waste reduction, repair and re-use schemes.

Develop an active and sustainable travel network

To achieve our ambition of reaching net zero by 2030 and increase mobility and accessibility for all residents in the city, we will improve public transport, make travel easier, enable healthy living and active travel, and keep people and goods moving. The Local Transport Plan 4 (2023 to 2040) sets out the council's plans, policies and programmes on transport and transport infrastructure.

We will improve bus services and work with local bus companies to make those improvements. Bus service improvements in the Southend-on-Sea Bus Service Improvement Plan (2022 to 2027) will be delivered through the Southend-on-Sea Enhanced Partnership Plan (2022 to 2027).

We will make active travel modes such as walking and cycling more convenient and accessible for everyone in the city and make single occupancy car use less attractive.

We will:

- improve our cycle network
- progress implementation of school streets and low traffic neighbourhoods
- promote ways of travelling by bus, train, bike, e-bike and on foot
- introduce demand management measures for the transport network
- decarbonise the transport network by reducing the need to travel, increasing sustainable modal split, increasing electric vehicle charging points, investigating the development of hydrogen fuel cell infrastructure and making use of new technologies

Promoting low-carbon vehicles, by rolling out electric vehicle charging infrastructure and investigating developing hydrogen fuelling infrastructure, is a priority action for the council. We will continue to support meeting the needs of electric vehicle charging, recognising that the electricity network and street furniture infrastructure does not currently allow for the level of ambition of the council. In addition to this, air quality, embodied carbon and congestion issues remain. The council is taking an evidence-based approach to the delivery and implementation of electric vehicles across the city that aligns with the objectives of Local Transport Plan 4 (2023-2040) and the climate change programme.

Our corporate transport priorities will be supported by the following strategies and plans:

- the council's Air Quality Action Plan sets out our actions for improving air quality in the city
- London Southend Airport preparing for hydrogen powered aircraft
- the Association of South Essex Local Authorities' [transport vision](#)
- the Thames Estuary's [The Green Blue action plan](#)

- Transport East's [transport strategy](#)
- the Government's [Levelling up white paper](#) and [transport decarbonisation plan](#)

We will continue to deliver on our ambitious programme of investment in improving our pavements and highways. We will also effectively manage parking needs from residents, shoppers, businesses and their workforces, visitors and airport passengers, to support the quality of residents' street scene and local environment, and growth of our high streets, tourism sector and London Southend Airport.

Enhance, promote and protect our natural environment

We will invest in enhancing, promoting and protecting our natural environment, preserving it for future generations. This will include:

- developing a 10-year vision for our parks and green spaces, identifying areas of greatest need for investment, including infrastructure, biodiversity, children's play, sports facilities and creating opportunities for volunteering
- delivering our strategies on managing our trees, as well as improving opportunities for pollinators, such as bees and butterflies, in line with the Government's [National Pollinator Strategy](#)
- creating new partnerships and strengthening existing ones in delivering our green vision for the city
- adopting a green infrastructure approach to green space planning, acknowledging the multiple benefits green spaces provide for our environment, economy, health and well-being and communities
- protecting and enhancing the biodiversity of our natural environment, including seeking opportunities to re-wild in many of our green spaces

- procuring street cleaning services to support us in protecting our natural environment.
- encouraging residents to join a growing street champion volunteer base, empowering communities to improve their local natural and built spaces
- launching communications and engagement campaigns with multiple audiences, using nudge theory, with a call to action to preserve and respect our environment
- working with partners to increase the number of Green Flag Parks in the city
- investigate significant flooding incidents and publish results of these reports
- authorise consent to works on ordinary watercourses

Our key plan is the Local Flood Risk Management Strategy, which specifies:

- our objectives for managing local flood risk
- measures to achieve our objectives
- the costs and benefits of implementing measures, how they will be funded and maintained in the future

We are also a Risk Management Authority under the Coastal Protection Act (1949) and have permissive powers (not duties) to manage seven miles of coastline. We are responsible for leading on coastal erosion risk management activities, including monitoring coastal change and repairing and building new coastal erosion defences. Our Southend-on-Sea Shoreline Strategy (2019) provides a long-term, holistic framework for managing the risk of coastal change in Southend-on-Sea. A priority scoring tool will be used to aid the prioritisation of asset maintenance across the Southend-on-Sea coastal frontage.

Areas of action for flood and coastal risk management work include:

- the council led [Catchment to Coast Partnership Project](#), part of the Environment Agency's [National Flood and Coastal Resilience Innovation Programme](#) to demonstrate how practical actions can improve resilience to flooding and coastal erosion.
- using an Integrated Urban Drainage Model to look at the hydraulic catchment area of Eastwood Brook as a whole, working with Essex, Castle Point and Rochford councils as project partners.
- the Leigh Port infrastructure project, which will see the construction of a new quay wall frontage, improvements to site access,

Undertake flood and coastal erosion risk management

We will invest in protecting and nurturing our coastline, which continues to be our much loved and best used asset. We will also connect communities with water assets and environmental issues.

The council will work with the Environment Agency, who are responsible for sampling the seawater during the bathing season, which runs between May and September. We will provide information to the public about bathing water quality and alert people if there is a risk to bathers.

Under the Flood and Water Management Act 2010, the council is designated as a Lead Local Flood Authority (LLFA) and has a duty to take the lead in the management of local flood risk in the area. The Act confers powers on the LLFA to enforce flood management policies in the city for riparian owners. As a LLFA, we will:

- manage local flood risk, defined as flooding from surface water runoff, tide lock, ordinary watercourses and groundwater
- maintain a register of the assets or features that increase flood risk
- approve and adopt sustainable drainage systems

dredging of the area beside the quay wall and channel, and resurfacing of the wharf to make the port a safe place to work and visit. This work is funded by an award from the Government's Levelling Up Fund.

- the Marine Parade public realm project to incorporate a modern and safe by design streetscape with integrated art elements and sustainable drainage features, green infrastructure and hostile vehicle mitigation measures.
- the East Beach coastal defence refurbishment scheme.
- refurbishment of the groyne field along Southend-on-Sea's coastal frontage.
- the [Sustainable and Resilient Coastal Cities \(SARCC\) pilot](#), which will pilot a series of nature-based solutions to be integrated into existing engineered coastal assets. Works will range from dune restoration, installation of vertipools and green gabion baskets.

We will work in partnership with all relevant risk management authorities, including the Environment Agency and Anglian Water, on flood and coastal erosion risk management issues, such as discharge of sewage from storm overflows.

The council's Shoreline Strategy, Local Flood Risk Management Strategy and sustainable drainage systems policy all link to the Southend-on-Sea Local Plan.

Delivery strategies and plans

The list below shows relevant delivery strategies and plans for this priority area.

- Net Zero Strategy
- Green City Action Plan 2022
- Local Transport Plan 4 2023 to 2040
- Southend-on-Sea Bus Service Improvement Plan 2022 to 2027
- Southend-on-Sea Enhanced Partnership Plan 2022 to 2027
- Parking Strategy
- Local Flood Management Strategy
- Southend-on-Sea Shoreline Strategy 2019

Our priorities

A city delivering genuinely affordable housing

We will:

- address local housing need
- prioritise the supply and quality of safe, genuinely affordable homes
- make any instance of homelessness brief and non-recurrent, aiming for functional zero homelessness
- maximise environmental sustainability of homes
- ensure good quality housing design, management and maintenance
- reduce the number of empty homes
- deliver the Local Plan

Address local housing need

Our housing priorities are to:

- prioritise the supply of safe, locally affordable homes
- ensure regeneration and growth creates inclusive, healthy places to live and thrive
- encourage good quality housing design, management and maintenance
- support people to live independently in their own homes and avoid homelessness

- make any instance of homelessness brief and non-recurrent

These priorities, which are set out in our [Housing, Homelessness and Rough Sleeping Strategy 2018 – 2028](#), underpin how we will respond to evolving housing challenges, major projects and Government initiatives.

Prioritise the supply and quality of safe, locally affordable homes

We recognise a range of housing types are needed to meet different types of housing needs. We will:

- continue to build and acquire new council housing, developing on the successes of the Housing Revenue Account Land Review project and the Acquisitions Programme.
- ensure registered providers prioritise the delivery of locally affordable homes in line with council priorities.
- work with our partners to progress the Better Queensway project and create a new neighbourhood at Porters Place, providing high quality homes well connected to the city centre.
- support wider sections of our community to access the housing market, including key workers.

Make any instance of homelessness brief and non-recurrent, with functional zero homelessness

We will improve outcomes for people approaching us as at risk of homelessness. Where people approach us as homeless, we will seek to make the experience as brief as possible and put the right housing and support in place so that they don't have to encounter homelessness multiple times. We will aim for 'functional zero' homelessness, which is making sure that the services and support in our city match demand. So even if someone is homeless, they will still have somewhere safe and warm to sleep, whilst longer-term, settled arrangements are made as soon as possible.

The council's successful bid for a three-year Rough Sleeper Initiative grant fund, partnership work and our core homelessness powers and duties will all play a role in the delivery of our aim of functional zero homelessness.

Maximise environmental sustainability of homes

We will maximise environmental sustainability in local housing, and make sure there is a high standard of energy efficient and net zero homes across the city's housing stock. We will do this by:

- improving the safety, comfort and sustainability of existing council housing
- engaging and involving residents and developers more about improving the environmentally sustainability of homes
- embedding environmental sustainability standards that are more stringent than building regulations into the local plan

- requiring development to be low or zero carbon, more resilient to climate change and adequately mitigating flood risk
- encouraging residents to access energy efficiency grants and discounts
- investigating the potential for local heat networks
- showcasing outstanding examples of energy efficient and net zero homes

Ensure good quality housing design, management and maintenance

We will ensure good quality housing design, management and maintenance in social housing and the private rented sector.

We will continue to roll-out the Selective Licensing Scheme in designated areas of the city to improve the private rented sector.

All inadequate housing in the private rented sector will be identified and action taken by the council to encourage and, where appropriate, force landlords to meet legal standards and local requirements. This includes houses of multiple occupancies. We will use the full range of engagement and enforcement tools at our disposal to do this.

Wherever possible, we will support owner-occupiers to make sure their homes meet

minimum standards, both in terms of their condition and energy efficiency. We will identify and implement IT systems to facilitate improvements in the licensing of dwellings and to allow us to carry out inspections more efficiently

Reduce the number of empty homes

We are strongly committed to reducing the number of empty homes, facilitating and assisting the creation of good quality and affordable homes in the city and to making best use of existing housing stock.

Working in partnership with empty property owners, residents and partner agencies is integral to the successful delivery of this priority. We will work with owners early on to prevent properties becoming empty for a prolonged period and use legislative tools to bring long-term empty homes back into use in a timely and effective manner. We will support older residents to 'right size' their housing as a means of improving their quality of life, which will link to our improved later life living offer.

The steps we will take to reduce the number of empty homes in the city, maximise the re-use of empty homes and tackle issues surrounding empty homes are set out in detail in our [Empty Homes Strategy 2021–2026](#).

Deliver the Local Plan

We will deliver a Southend-on-Sea Local Plan shaped by the needs of our communities. We will make sure the following ambitions set out in the plan are achieved:

- ensure the right development in the right places
- reduce spatial inequalities
- improve health and wellbeing
- continue to protect the natural and heritage assets we cherish

We will consult on the Preferred Approach version of the Local Plan in 2022/23. Following this, we will prepare a final version of the document for comment and subsequent examination. The adoption of a Local Plan will provide clear priorities for action in the short, medium and long term to address the challenge of climate change, provision of homes, jobs and infrastructure, and the transition to a low carbon Southend-on-Sea.

We will raise the quality of development and secure higher environmental building standards, including the development of design codes co-produced with the community. We will require development to be zero and low carbon and more resilient to climate change, taking into account evidence on flood risk and coastal change, biodiversity, heritage and so on.

The Local Plan will focus development in accessible locations to support active travel and make the most effective use of brownfield land. We will improve access to green space, promoting new and improved green infrastructure in areas where this is lacking.

Delivery strategies and plans

The list below shows relevant delivery strategies and plans for this priority area.

- Housing, Homelessness and Rough Sleeping Strategy 2018 to 2028
- Empty Homes Strategy 2021 to 2026
- Allocations Policy 2021
- Selective Licensing Scheme
- Southend-on-Sea Local Plan

How the plan will be delivered

To deliver this ambitious corporate plan we need to build on our strengths and the lessons learned during the pandemic, reflect on our areas of development, and transform as a council. As a major employer and leader in the city, we must become an outstanding and inclusive organisation that all councillors, employees and residents can be proud of.

- **A clear set of priorities** – This plan sets out a clear and ambitious set of priorities, which provide a sense of purpose for every council employee and are collectively owned by the organisation’s leadership at political and officer level. All departments in the council will deliver on or enable one or more of these priorities to be delivered.
- **Outcome-based approach** – We are committed to achieving changes for the better for the people and communities of Southend-on-Sea. We will make better use of insight gained from analysing data and information, effectively engage with our residents and communities and deliver the right services to achieve desired outcomes.
- **Measure and monitor our progress** – We will measure and monitor our progress in delivering our priorities, and flex our resources and approach accordingly. Our new Performance Management Framework will drive the what and the how of measuring success. Our performance monitoring is aligned with our financial reporting and risk management. Key performance indicators (KPIs) are aligned to each of our Corporate Priorities, reporting to our Cabinet and Corporate Management Team. All council employees will have performance and development conversations, connecting them to the delivery of our outcomes.
- **Challenging inequality** – We will challenge inequality, to make sure Southend-on-Sea is a city that works for everyone. Inequalities cannot continue to hold people back in our city and prevent them from reaching their full potential. We will act to remove barriers that people face.

- **Employee and member development** – Our councillors and employees are our greatest assets. Together our councillors and employees combine the essential skills, experience and knowledge to manage and lead our council. A core component of our People Vision is to build a collaborative learning culture that embeds personal growth, ensuring the right skill sets and behaviours to build mutual trust and respect are at the heart of the working relationship between councillors and officers. We will be clear to our present and future employees what our employment proposition is, how they will be supported to perform their roles well and progress their careers. We will build a more inclusive working environment, support underrepresented groups at senior levels and eliminate discrimination. The council’s Constitution will be reviewed to enable better decision making by councillors and council employees.
- **Empowering our communities and residents** – We will continue to engage and empower our communities and residents through co-design and co-production, where service providers and users work together to reach a collective outcome. We will further develop our online engagement platform ‘Your Say Southend’, develop

a consistent approach for working with communities and residents, and reach out to voices seldom heard. We will involve residents in the design and delivery of services and help increase the capacity for communities to come together to enhance their and environment. Understanding lived experiences is crucial to co-producing local solutions. We will build trust and relationships with residents and communities, work jointly on challenges, provide support and training, and where possible, share power and resources.

- **Working in partnership** – We will continue to work alongside our neighbouring boroughs, local partnerships, central government and MPs. We will lead collaboratively alongside our communities and partners, and do so with innovation, ambition, openness and purpose, to build a bright future for everyone in our new city. We will work jointly with our partners in the Mid Southeast Essex Integrated Care System. This includes the Integrated Care Board and Integrated Care Partnership. We will continue to explore the potential for joint working and additional powers that could bring in south Essex and wider work across pan Essex with the Association of South Essex Local Authorities.

Get involved

It is essential that the voice of communities and partners are reflected in our plans for our new city. We maintain a number of different, accessible channels of engagement, such as face to face meetings and workshops, telephone, email and our [website](#).

[Contact your Councillor](#) to find out how you can share your ideas or concerns. You can ask if they hold surgeries in their ward. Your councillor represents public interest as well as individuals living within your ward, including you. They have regular contact with the public through council meetings, telephone calls or surgeries. Surgeries provide an opportunity for any ward resident to go and talk their councillor face to face.

[Your Say Southend](#) will help you find and participate in discussions and consultations that are ongoing in Southend-on Sea. Have 'your say' and take the opportunity to feedback, share your ideas and influence decisions that matter to you.

If you are interested to get involved on a practical level check out Livewell Southend and the Community Directory run by the Southend Association of Voluntary Services. You can find hundreds of active groups and projects which might need help and resources to continue to make our city a better place for everyone.

If you are a young person and want to influence the work of the council, please contact Youthvoice@southend.gov.uk

Southend-on-Sea City Council

Report of Chief Executive and Town Clerk
To
Cabinet
On
26 July 2022

Agenda

Item No.

7

Report prepared by: Andrew Barnes – Head of Internal
Audit

Corporate Risk Register – July 2022 update

**Relevant Scrutiny Committee(s): Policy & Resources, People and Place
Scrutiny Committees**

**Cabinet Member – Cllr Collins
A Part 1 Public Agenda Item**

1 Purpose of Report

1.1 To consider the updated summary Corporate Risk Register.

2 Recommendations

That Cabinet considers the updated summary Corporate Risk Register and the position at July 2022 outlined in Appendix 1.

3 Summary Corporate Risk Register

3.1 The Council's Corporate Risk Register sets out the key risks to the successful delivery of the Council's corporate Southend 2050 Ambition and Outcomes and outlines the key management arrangements in place to mitigate and reduce risks, or maximise opportunities.

3.2 Updates on the Corporate Risk Register are discussed with and reported to Corporate Management Team (CMT) and the summary position is reported to Cabinet twice a year in June / July and January / February. The updated position on each risk or opportunity and management arrangements to mitigate these are included in Appendix 1.

3.3 The presentation of the risks reflects the alignment to the Southend 2050 Themes and reports the management actions being taken to mitigate the risks, or maximise the opportunity and includes the lead officer and relevant Cabinet Member for each risk. The differing roles of Members, in determining priorities and policies, and Officers in managing delivery of those priorities and implementing those policies should be remembered.

3.4 The re-introduction of a Corporate Plan from 2022/23 has provided the opportunity for a review of the Council's governance framework that underpins the delivery of the expectations of the Corporate Plan, and therefore a team is reviewing the current governance arrangements and will make recommendations to deliver improvements that will seek to implement the Council's aim of simple and effective governance.

3.5 Effective risk management is a key element of the governance framework and will therefore provide a key element of the updated governance framework. Work is being undertaken on updating the risk management policy statement and strategy as part of the review of governance arrangements, with the aim of ensuring that risk awareness and horizon scanning is business as usual for all teams.

- 3.6 In the period since the last report to Cabinet there have been further changes to the context that the Council is operating within as a result of the continuously changing impact of the ongoing Covid-19 pandemic, and the increasing impact of the inflation and cost of living pressures, that have the potential to cause far reaching consequences and impacts across the whole of the Council's activities, the ways that services and officers are required to operate and the support that needs to be provided to the City.
- 3.7 As a result the focus for this period, as agreed by Members, has been on
- the prioritised roadmap milestones for delivery
 - response to the Covid-19 pandemic
 - economic recovery
 - sustainability – financial, environmental and our transformation as an organisation.
- 3.8 Within this context CMT and other Directors have identified the following risks to be managed, monitored and reviewed as part of the Corporate Risk Register (with the relevant Scrutiny Committee for each risk in brackets):
1. Covid-19 pandemic (Policy & Resources / People)
 2. Financial sustainability (Policy & Resources)
 3. Inflation and cost of living pressure (Policy & Resources / People) – escalated to CRR
 4. Public services landscape (Policy & Resources)
 5. Workforce (Policy & Resources)
 - 6a. Cyber security event (Policy & Resources)
 - 6b. Data protection (Policy & Resources)
 7. Capital investment delivery programme (Policy & Resources)
 8. Safeguarding responsibilities and child welfare (People)
 9. Mitigating for and adapting to climate change (People / Place)
 10. Health inequalities (People)
 11. LGA peer review of Special Educational Needs and Disability (SEND) and Children With Disabilities (CWD) (People)
 12. Housing (Place)
 13. Adult social care (People)
 14. Social cohesion (People)
 15. Waste management service (Policy & Resources)
 16. House building programme (Place)
 17. Regeneration and major projects (Place)
 18. Southend as a visitor destination (Place)
 19. Economic recovery and income inequalities (Policy & Resources / People)

20. Local plan (Place).

- 3.9 The risk register heat map on page 4 of appendix 1 plots the current risk score for each risk using the Council's scale, as shown on page 2 of appendix 1. This shows that the risks that have been escalated to the Corporate Risk Register are those with the potential to be the most detrimental to achieving the Ambition for the City, which is why the risk scores are all relatively high and consequently the risks appear on the Corporate Risk Register.
- 3.10 Incidents have occurred at other Councils where examples of the risks that we are facing and working to manage have crystallised resulting in significant detrimental effects on the operations and provision of services at those Councils. These incidents demonstrate the importance of the management arrangements in respect of, and the governance arrangements overseeing that management of, the risks that are being faced by the Council and the need to remain vigilant to the potential for things to go wrong.
- 3.11 As a reminder it is worth noting that the underlying risk management arrangements currently follows a 3-stage process:
- 1st stage:** An 'inherent risk' with the risk assessed with no controls, assurance or actions in place, resulting in an inherent risk score.
- 2nd stage:** The 'current risk' where the risk is assessed with controls, assurances and identified management actions and arrangements. It is this position that is being reported within the summary corporate risk register at Appendix 1.
- 3rd stage:** The 'target risk' which is the risk with the controls, assurances and actions, as if they have been completed, resulting in a target risk score.
- 3.12 Appendix 1 provides a summary of the risks and opportunities currently on the corporate risk register and the arrangements in place to manage those, along with the 'current score' position for each risk as assessed by management, based on the risk or opportunity itself and the management of the issue that is in place to ensure that it progresses as the Council would want.
- 3.13 The risks as documented are effectively the worst-case scenario of what could happen if the Council is not appropriately managing the risk that it is facing. This does not mean that it will happen, as the purpose of the arrangements being put in place to manage the risk, or deliver the opportunity, is to ensure that the issue works out in the way that the Council wants it to.
- 3.14 Executive and other Directors ensure service specific risks are managed within their departments, within service management and in accordance with the risk management strategy and processes. 'Red' rated risks with corporate implications can be escalated to CMT via those Directors. Actions for managing these risks are updated and reviewed by Departmental Management Teams.
- 3.15 Operational risks, managed within departments, are also assessed as part of reviews undertaken by Internal Audit and project risks are monitored by CMT where applicable.

4 Reason for recommendation

The Accounts and Audit Regulations 2015 require that a relevant authority must ensure it has a sound system of internal control which facilitates the effective exercise of its function and the achievement of its aims and objectives, ensures that the financial and operational management of the authority is effective and includes effective arrangements for the management of risk.

5 Corporate Implications

5.1 Contribution to the Southend 2050 ambition, outcomes and road map

The Corporate Risk Framework underpins the operational effectiveness of the Council's Corporate Governance arrangements and specifically monitors progress of managing key risks associated with the successful delivery of the 2050 Ambition and Outcomes.

5.2 Financial implications

Any financial implications arising from identifying and managing risk will be considered through the normal financial management processes. Proactively managing risk can result in reduced costs to the Council by reducing exposure to potential loss.

5.3 Legal Implications

The Accounts and Audit Regulations 2015 require that:

A relevant authority must ensure it has a sound system of internal control which facilitates the effective exercise of its function and the achievement of its aims and objectives, ensures that the financial and operational management of the authority is effective and includes effective arrangements for the management of risk.

5.4 People Implications

Any people and property implications arising from identifying and managing risk will be considered through the Council's normal business management processes.

5.5 Property Implications

None specific.

5.6 Consultation

Consultation has taken place with key stakeholders of the corporate risk register.

5.7 Equalities and Diversity Implications

Corporate equalities considerations have been considered in the drafting of the register and any specific equality related risks have been identified for the Council.

5.8 Risk Assessment

Failure to implement a robust assurance framework which includes fit for purpose risk management arrangements increases the risk that Council ambition and outcomes will not be delivered.

5.9 Value for Money

Effective forecasting and timely management of risk is a key factor in preventing waste, inefficiency and unnecessary or unplanned use of resource.

5.10 Community Safety Implications

None specific.

5.11 Environmental Impact

None specific.

Risk Register Heat Map: Current risk score

CRR ref	Risk / Opportunity	Management (key controls and action to mitigate the risk / deliver the opportunity)	Risk Assessment (current score)		Risk rating (LxI)	Leads
			Likelihood	Impact		
1 71	<p>Covid-19 pandemic</p> <p>Risk that the Covid-19 pandemic causes an outbreak of ill-health in the City resulting in health and care services being unable to cope with the volume of cases, and significant disruption to the operational activities of the Council and other public service organisations in the City.</p>	<p>1. This risk continues to evolve as the pandemic situation continues to change and the management of the risk is adjusted accordingly.</p> <p>2. Civil contingency arrangements redeployed as necessary, including the Local Outbreak Management Plan (revised May 2022), Health Protection Oversight and Engagement Board and the Health Protection Board, with representation from UK Health Security Agency (UKHSA) and links into the Essex Resilience Forum and central government.</p> <p>3. The Health Protection Board and the Health Protection Oversight and Engagement Board are now responsible for dealing with wider public health protection issues and will ensure the system remains vigilant and optimises local resilience to respond.</p> <p>4. Collaborative working to deliver a vaccination programme targeted at the most vulnerable, including care home residents and staff, front line NHS and social care workers, with numerous sites operating across the City and the Civic Centre operating as a hub, preparing for the next round of vaccination.</p> <p>5. Further redeployment of some Council staff to support the ongoing public health response has been agreed and additional training will be provided.</p>	3	3	9	Andy Lewis / Leader and CM for ASC & HI

CRR ref	Risk / Opportunity	Management (key controls and action to mitigate the risk / deliver the opportunity)	Risk Assessment (current score)		Risk rating (LxI)	Leads
			Likelihood	Impact		
2	<p>Financial sustainability</p> <p>Risk that failure to address the financial challenges by effectively managing the growing demand for services, managing the costs of the impact of covid-19, inflation and the cost of living, while enhancing local income streams as part of recovery will threaten the medium to long term financial sustainability of the Council, leading to a significant adverse impact on Council services and the ability to deliver the outcomes desired by the Council, to address the financial position.</p>	<ol style="list-style-type: none"> 1. Budget setting process identified required investment and efficiencies to deliver a robust budget for 2022/23 and agreement to a robust programme of ongoing activity to deliver budget sustainability into the medium term. 2. Budget monitoring of revenue, capital and medium term programme of reviews to ensure the overall budget is effectively managed through the year, delivered and progress made towards future years budget setting. 3. Management oversight of budget setting process for 2022/23 through challenge provided by Cabinet, CMT and Director to Director challenge to each other and services on proposed savings and resultant proposed budgets. Regular reports and monitoring to CMT and Cabinet. 4. Medium Term Financial Strategy (MTFS), including budget pressures to regularly consider financial impact of inflation, cost of living and Government policy reported to CMT, Cabinet and Council to provide assurance, with reports to and minutes of meetings. This includes close attention to the Comprehensive Spending Review and Local Government Settlement along with a watch alert on the Government's finance reform plans for 2023/24. 5. Increased focus on the budget and transformation through the refreshed roadmap for the short to medium term with early start on 2023/24 budget process planned. 6. Know your business workstream developed as part of FWOV to ensure that appropriate focus on achieving value for money and the optimum approach to the delivery of the Southend 2050 outcomes is being made by all services. 	3	4	12	Joe Chesterton / Leader and CM for AM & II

CROSS CUTTING

CRR ref	Risk / Opportunity	Management (key controls and action to mitigate the risk / deliver the opportunity)	Risk Assessment (current score)		Risk rating (LxI)	Leads
			Likelihood	Impact		
3	<p>Inflation and cost of living pressures</p> <p>Risk that failure to address the pressures caused by inflation and cost of living cause budgetary control difficulties and growing demand for services, that the Council is unable to address, threatening the financial sustainability of the Council.</p> <p>Risk that impact on the supply chain (causing labour shortages, cost increases in materials, labour and fuel and difficulty in sourcing plant and vehicles) and finance to deliver the increased costs of the capital programme, lead to a significant adverse impact on Council services and the ability to deliver the outcomes desired by the Council.</p>	<ol style="list-style-type: none"> On-going budget reviews; better linking of business planning and budgeting to service outcomes; effective and creative management of service demand; review of major contractual arrangements; further implementation of the Commissioning Framework; exploring new commercial opportunities; evaluating a range of income generation initiatives. Medium Term Financial Strategy (MTFS), including budget pressures to regularly consider financial impact of inflation and cost of living reported to CMT, Cabinet and Council to provide assurance, with reports to and minutes of meetings. Assisting many local households through providing access to a range of Government grants, including the Household Support Fund (£1.4m), Council Tax Energy Rebate Scheme (£10.5m), Essential Living Scheme (£270k), Discretionary Housing Payments (£400k) and schemes such as rent and deposits for qualifying people in housing need and targeted hardship support for South Essex Homes tenants. A new local Tackling Poverty Strategy is under development that will include themes and advice around debt and welfare, fuel poverty, digital exclusion, housing poverty and food poverty. Key elements of this new strategy will be co-produced with local people throughout this summer. A Just About Managing page on the Council's website signposting people to advice, guidance, and opportunities. The Council, where it can, will try to provide an additional package of local support / mitigation / advice for the most vulnerable. 	4	4	16	Joe Chesterton / Leader and CM for AM & II

Report of Director of Public Health

to
Cabinet

on
26th July 2022

Report prepared by: Public Health Team

The Annual Report of the Director of Public Health (2021-22)

Cabinet Member: Cllr K Mitchell

Relevant Scrutiny Committee: People Scrutiny Committee

Part 1 (Public)

1. Purpose of Report

1.1 To present the 2021 Annual Report of the Director of Public Health.

2. Recommendation

2.1 That CMT/Cabinet considers and comments on the content and highlighted actions of the 2021 Annual Report of the Director of Public Health.

3.0 Background

3.1 The Health and Social Care Act 2012 requires the Director of Public Health to prepare an annual report on the health of the local population. This is an independent report which the local authority is required to publish. The report is an opportunity to focus attention on particular issues that impact on the health and wellbeing of the local population, highlight any concerns and make recommendations for further action.

3.2 Southend became a City in February 2022 in memory of Sir David Amess and his tragic death. As we aspire to accelerate our growth as a City, the public sector, businesses and the voluntary sector will all need to play a much bigger part and embrace every opportunity to enhance our partnering endeavours. The pace of our spatial planning and regeneration will also need to step up in ensuring that we experience a marked transition into cityhood, including the Better Queensway and Marina development as well as a remodelled and rejuvenated City centre.

4.0 The 2021 Annual Report of the Director of Public Health

4.1 The Report this year provides an update on last year's report (2020 Annual Public Health Report) and covers the following six themes:

- ✓ **Tackling Health Inequalities** – Focus on improving Life Expectancy; tackling the key health Risk Factors, including Weight Management; improving the uptake of Vaccinations, including MMR in young children.
- ✓ **Developing a Food Environment policy** - Making Southend a Healthy City; collaboration in tackling Food Poverty/Insecurity; extending A Better Start Southend (ABSS) Legacy.
- ✓ **Mental health and wellbeing** – Focus on Suicide Prevention, including in young people with complex needs; further drive to tackling Harmful Behaviours including gambling addiction.
- ✓ **Improvement in Air Quality & Transport strategy** – Further interventions to improve Air Quality; development of a refresh Transport Plan to support the Modal shift in Travelling.
- ✓ **Learning to Live with COVID** and building up our resilience.
- ✓ **Support for Economic Recovery** – Improving Jobs Opportunities; Skills Development and Raising Aspirations; improving Workplace Health and seeking better Social Value contribution for our neighbourhoods.

4.2 In 2020, we highlighted that we had a focus on two key themes:

- **Health Protection** - Flu & COVID immunisation; COVID-19 Impact;
- **Tackling Wider Inequalities** – Mental Health and Wellbeing; Adult Obesity & Weight Management; Food Environment; Drug & Alcohol; Social Prescribing – Loneliness and Self-care; Unpaid Carers; Autism; Homelessness.

A RAG-rated summary of actions against each of the recommendations has been included in the report's appendix section.

4.3 The Southend 2050 Ambition and the NHS Long Term Plan collectively set out the key things we can expect to work as partners to turn the ambitions into improvements in services and build community resilience. The key S2050 themes that this report will link into are [1] Safe and Well [2] Opportunity and Prosperity [3] Connected and Smart and [4] Active and Involved. Combined with the challenges of the pandemic, we will need to address recovery, living with Covid and continue to refocus our joint endeavours on tackling health inequalities.

4.4 As the system continue working to address the recovery actions, we should also focus on building a stronger bridge with the wider communities, on the back of pronounced and sustained goodwill during the past 2 years. Our renewed engagement with the voluntary sector has been further calibrated and will prove invaluable in achieving better outcomes for our residents in some of the key topics in the report.

- 4.5 A number of **Key Actions** are listed in the report this year. We also have agreed plans or ones in the process of finalisation to help deliver most of these key topics.

Therefore, CMT/Cabinet are to note the various key actions and highlighted approach through the document and note the progress made against the 2020 Annual Report's recommendations.

5.0 Other Options

There are no other options presented as it is a statutory duty of the Director of Public Health to prepare an Annual Public Health Report.

6.0 Reason for Recommendations

- 6.1 The Health and Social Care Act 2012 requires Directors of Public Health to prepare an annual report on the health of the local population.

7.0 Corporate Implications

- 7.1 Contribution to Council's Southend 2050 Ambition and Priorities, including the MSE's Health and Care Partnership's shared priorities.

The Council has a statutory duty to protect the health of the local population. The 2021 Annual Public Health Report highlights selected key issues for people in Southend, actions being taken to address them and further contributions to be delivered by local partners.

- 7.2 Financial Implications

At this stage any financial implications arising from this report are unquantified and, as further work is undertaken, any resource implications will be identified and dealt with, primarily through the Public Health Grant, and other existing budgets as necessary.

- 7.3 Legal Implications

There are no legal implications arising directly from this report.

- 7.4 People Implications

None identified

- 7.5 Property Implications

None.

7.6 Consultation

There will not be any formal consultation on the Annual Public Health Report, although it will go through the relevant governance route within the Council as well as to the Southend Health & Wellbeing Board.

7.7 Equalities and Diversity Implications

The Annual Public Health Report provides evidence that population health needs are assessed and considered.

7.8 Risk Assessment

A risk assessment will be undertaken of individual initiatives introduced to tackle the key issues highlighted in the report.

7.9 Value for Money

No implications.

7.10 Environmental Impact

None.

8.0 Background Documents

8.1 Background documents are referenced throughout the Annual Public Health Report, with direct web-links.

9.0 Appendices

9.1 The 2021 Annual Report of the Director of Public Health for Southend.

Introduction

This is my independent public health report for 2021, as we continue to grapple with the COVID-19 pandemic and the tragic loss of our MP, Sir David Amess. This report reflects on some of the key achievements, some challenges and highlights where we can continue to collaborate to improve health and wellbeing in Southend-on-Sea.

I have provided an update on the progress with last year's recommendations in the appendices, which is generally positive and shows where we can continue to build on with more pace.

We have been bestowed City status in early 2022 and with a number of White Papers being released this year, there will be a renewed opportunity to reshape our new City and ensure we can all work together for wider socio-economic as well as health and wellbeing benefits. As an already densely populated City, Southend will need to regenerate at a much faster pace, building new living and working spaces and ensuring our spatial planning is protecting our environment and creating more greener public expanses.

Much of our collective endeavours have been focused on working to tackle the wider determinants of health and with the growing obesity epidemic, we will need to revisit our approach in shaping the local food environment. I am proposing that we consider the development of a Food Environment policy for Southend over the coming months, which will also explore how we can influence the commercial determinants of health. We know that unhealthy food causes ill-health, so we need to tackle the business, market and political practices and globalisation that are harmful to health and the environment. We have a unique opportunity to shift the paradigm in public health, where individual behaviours are being driven by inadequate environments and secure a more favourable policy environment.

The Levelling Up White Paper, is reshaping the Health in All Policies approach that we have long seen as a catalyst to improve health and wellbeing and should now act as a system enabler and progress our ambitions.

A number of areas have been highly impacted by COVID where we need to refocus, as we learn to live with COVID. Some of the key areas in tackling health inequalities will be led jointly by the NHS and the City Council with a determined resolve of improving healthy life expectancy whilst accelerating recovery in health and care services. We have seen an increase in other communicable and infectious diseases and we have been striving to act collaboratively in mitigating those risks which is reflected in our new joint Health and Wellbeing Strategy.

This report is underlining the challenges faced in our communities, in coping with the loss of jobs, low paid jobs and the rising cost of living, which is not showing any signs of abatement. The socio-economic recovery will be major part of the regeneration and wider inclusion agenda, whilst striving to recreate a more vibrant and inspirational Southend City centre. We need to continue engaging and enabling our citizens and visitors to co-design our spatial planning and co-produce new services that will better meet their needs.

In building our community resilience, we will continue to place more emphasis on mental health and wellbeing, reducing the gender inequality which sees more young men taking their lives in Southend. The new Ofsted strategy - *Every child deserves the best start in life* - will be a catalyst to improve the lives of children and young people, which is more important than ever following the disruption and distress of the past 2 years and the relatively unquantifiable impact of long covid in this young generation.

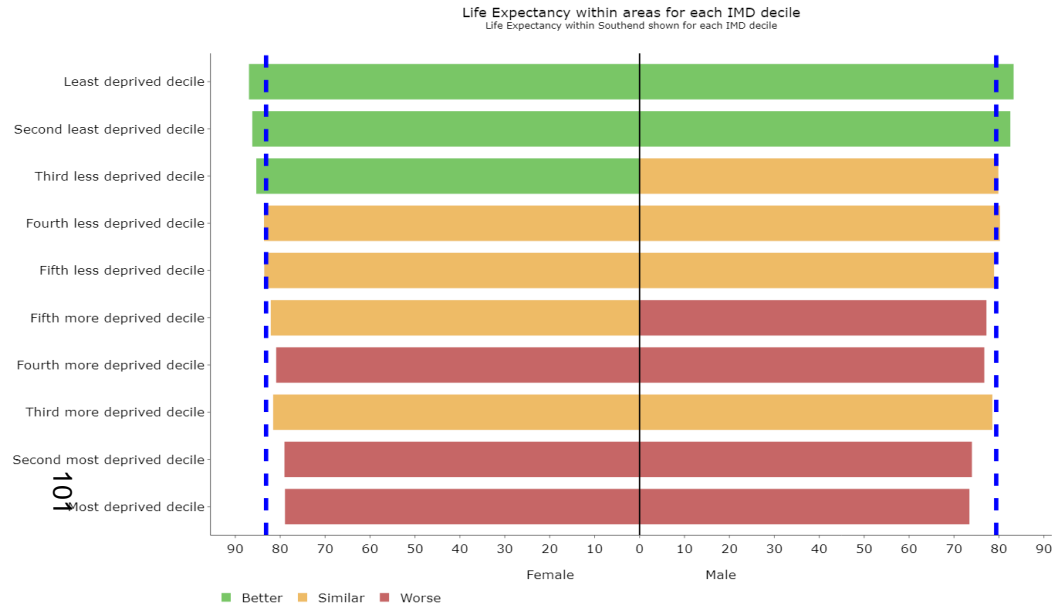

Reducing air pollution continues to prove a challenge across Southend and remains one of the main public health emergencies, especially as the UK limits on air pollution are all several-folds than the new World Health Organisation's limits. Multiple interventions, each producing a small benefit, can act cumulatively to produce significant overall benefits, including increased physical activity, noise reduction, greater road safety and climate change mitigation, as well as adapting to new ways of working and travelling.

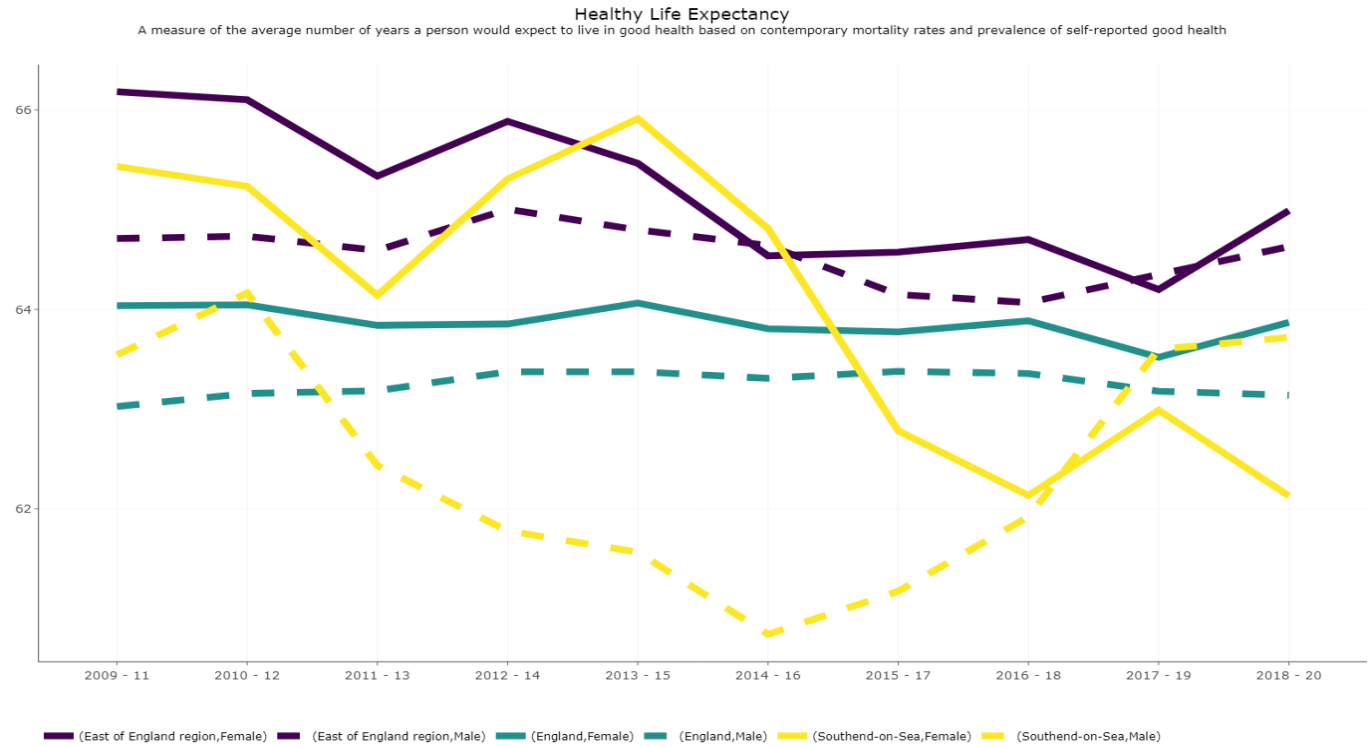

Health Inequalities

OPPORTUNITY
& PROSPERITY

Life Expectancy

Source: NHS Fingertips Indicator ID 90366 Accessed:2022-05-17

Source: NHS Fingertips Indicator ID 90362 Accessed:2022-05-17

- Life expectancy is considered to be the ultimate measure of the health and wellbeing in an area and a tool for identifying inequalities in our communities.
- Life expectancy** at birth is defined as the average number of years that a newborn is expected to live if current mortality rates continue to apply.
- Healthy life expectancy** is how many years a person might live in 'good' health. Due to the smaller population size in Southend, healthy life expectancy is more variable than the East of England or national average. Since 2016-18, men have had a higher healthy life expectancy than women across Southend City.
- The council and partners will continue to work closely with the UK Health Security Agency, as part of a single public health system, to deliver effective protection from incidents and outbreaks of communicable and non-communicable hazards. A Local Outbreak Management Plan is in place to guide us all.

Key Health Risk Factors

Cardiovascular disease (CVD) covers a family of diseases including heart disease and stroke and also relates to other conditions such as vascular dementia, chronic kidney disease, sudden cardiac death and heart failure. They are the cause for most preventable early mortality.

Cancer remains one of the most challenging risk factor in preventing early deaths. Preventative work includes the opportunity to optimise early diagnosis and early intervention.

Diabetes is a condition defined as a disorder of insulin, a spectrum from inadequate production to effect resulting in excess glucose or sugar in the blood stream.

The following are known risk factors shared for CVD, Diabetes and Cancer:

- smoking
- excess alcohol consumption
- physical inactivity
- poor diet

Obesity is a result of many of these risk factors and is broadly defined in adults as BMI (body mass index) greater than 30, and itself is a further risk factor for developing all 3 of the above conditions.

In the most recent data, cancer accounts for 22.3% of deaths and circulatory diseases accounts for 20% of deaths within Southend.

Whilst we have seen a continued decline in mortality from cancers, cardiovascular and respiratory diseases until 2020, the impact of the pandemic on non-Covid related prevention and delayed surgical interventions will see a potential slow-down in this decline.

Weight Management

Around 22.4% of Reception year children and 33.4% of Year 6 children are overweight or obese. Southend is ranked the highest for the prevalence of severe obesity in Reception year children, among the East of England region.

65.1% of adults in Southend are overweight or obese. This is above the national average at 62.8%.

29.9% of adults in Southend are physically inactive. This is above the national average of 27.2%. This is according to the most recent Active Lives data.

Weight management services improve population health outcomes. This has a positive impact in addressing health inequalities as individuals with more than one issue will be disproportionately affected and the interventions will support:

- ✓ Prevention of the risk of heart disease, cancer, stroke and type 2 diabetes;
- ✓ Control of the health-related costs, caused by diseases from unhealthy lifestyles.

KEY ACTIONS

- ❖ Local partners are working strategically, to address factors that impact on peoples' weight, in more innovative and collaborative ways.
- ❖ Following local community and partner engagement, the Health and Wellbeing Strategy for Southend was launched in late 2021. Weight management is a major priority within the action plan, that forms part of the strategy.

Obesity harms adults

Less likely to be in employment

Discrimination and stigmatisation

Increased risk of hospitalisation

Obesity reduces life expectancy by an average of 3 years

Severe obesity reduces it by 8-10 years

Obesity harms health

Vaccinations in Southend

MMR Uptake Percentage
MMR Uptake percentage in Southend on Sea (target value is 95%)

Source: NHS Digital Accessed 23-05-2022

Flu Vaccination Group	Southend Uptake (Comparison to last year)	National Uptake	National uptake Comparison
65 and over	76.6	82.1	Worse
At risk - (6 months to under 65 years)	46.1	52.5	Worse
Children aged 2 (Born: 01/09/2018 -31/08/2019)	41.1	48.3	Worse
Children Aged 3 (Born: 01/09/2017 -31/08/2018)	43.9	50.8	Worse
Pregnant Women - All	34.3	37.6	Similar

We continue to work closely with NHS, EPUT and others to reduce inequalities and vaccine hesitancy via community outreach and making phone calls to unvaccinated residents.

MMR vaccination dose 1 is due before age 2 and second dose before age 5. We have seen a drop in the uptake during the past year, following unprecedented pressure on primary care health services.

Flu vaccines are offered to a number of at risk groups the percentage uptake of those groups can be see in the table below. The highest uptake is in the 65+ at risk group. Compared to the previous year the uptake has increased across all groups. Compared to the national levels Southend is worse across 65+, at risk and children ages 2 and 3. We have seen an increasing uptake of the flu vaccine in those aged 65years and over, although the proportion amongst pregnant women were still significantly low.

COVID Vaccination

Vaccination coverage by those eligible
Vaccinations as of 09 May 2022

First and second dose uptake has been broadly similar across age groups over 50 years. This similarity drops when we look at those below 50s in comparing the first and third doses.

Vaccine uptake percentage is higher for first and second dose than the national values but lower than the regional values.

Moreover, we continue to see a marked difference in uptake between some communities and continued joint efforts to reduce vaccine hesitancy will be required.

	Southend (No.)	Southend (%)	England (%)	East Region (%)
First Dose	135,303	81.1	79.8	83.2
Second	128,061	76.7	75.5	79.4
Third	99,165	59.4	59.2	64
Total	362,529			

Key Actions

- ❖ Targeted interventions through the Health and Wellbeing Implementation plan with a particular focus on men's health and wellbeing.
- ❖ As a system, we will need to explore all collaborative approaches to ensure we can optimise the use of hospital beds, increase our targeted preventative work and increase our efforts to mobilise our communities in self-care and adopting healthier lifestyles.
- ❖ In addition to the 'key actions' highlighted on slide 7 to address the challenge with weight management, we will explore further how we can help improve the food environment.
- ❖ Through the Health Protection Board, we will explore and deliver an improvement in the uptake of Flu (at risk groups), Covid and MMR vaccines during 2022-23.

Food Environment

ACTIVE & INVOLVED

107

Making Southend A Healthy City

Healthy City planning policies can be used by councils to help promote healthier food and drink choices. There is a need for more national drivers and the impending national Food Strategy can support local councils in the endeavour. Working with our planning teams over a number of years, we can support to create a healthier food environment by:

- ensuring shops and markets that sell a diverse food offer are easy to reach by walking, cycling, e-scootering or public transport
- requiring leisure centres, workplaces, schools and hospitals with catering facilities and/or vending machines to have a healthier food offer for staff, students, and/or customers – this requires dedicated collaboration (such as social value contribution)
- explore through the Local Plan what evidence can enable with opportunities that will support a healthier food environment.

An increasing number of local councils are developing Supplementary Planning Documents (SPDs) to support a healthier food environment. Local councils can develop an approach that, based on the latest evidence, is likely to be appropriate and effective.

For planning decisions to be successful, we need to be able to demonstrate a link to sound evidence and clear local policy. In particular, there needs to be good linkage between any SPDs or neighbourhood planning policies, health strategies (Health and Wellbeing strategy and the Joint Strategic Needs Assessment) and, most importantly, the Local Plan. Local plans need to refer to these health strategies and vice versa.

Public Health England

Healthmatters Food and drink environment

Tackling Food Poverty/Insecurity

Food poverty is complex. There is no widely accepted definition of 'food poverty', but a household can broadly be defined as experiencing 'food poverty' or 'food insecurity' if they cannot (or are uncertain about whether they can) acquire an adequate quality or sufficient quantity of food in socially acceptable ways. Food insecurity incorporates multiple experiences on a scale from starvation to anxieties about being able to afford food, and this especially amongst more vulnerable communities, including our ageing populace. There are many different factors, particularly around access and availability that can affect and exacerbate the impact on individuals and families. They result primarily from the socio-economic and environmental context in which people live.

Food insecurity affects approximately 8.4 million people in the UK. Emerging research and evidence indicate that there is an increasing number of households in Southend, unable to sustain normal patterns of food shopping and eating, with many seeking charitable food aid to help them do so. **Southend Foodbank distributed food to a third more people in 2021 than it did in 2020.** In addition, the FOOD Club has been working across a number of Family Centres to offer a more affordable food package to families who are in need. ABSS and the Council are collaborating with the local Food Alliance to look at reducing this challenge for our communities, especially with the rising cost of living in a more sustainable way.

Healthy Schools

The Food Foundation's latest data indicate that an estimated 2.6 million children in the UK live in households that missed meals or struggled to access healthy food during April 2022. The cost of living crisis means many more families are now struggling to afford school lunches. In 2021, across Southend a total of 8,512 people received support from Southend Foodbank in 2021, with 3,934 of these being children.

Children need a healthy balanced diet to support growth and development, and the school environment can have a powerful influence on their eating habits. Children eat at least 1 and sometimes more meals there each day. For some, a school lunch is their main meal, providing a critical nutritional safety net.

The Southend Healthy Schools award, led by the School Nursing team, has now greater focus on healthy meal provision rather than just hot meal. School Health Profiles are being undertaken with every school to identify their needs and provide more targeted support.

With a significant proportion of secondary, and even some primary age pupils, choosing to purchase food from nearby outlets, the food environment around schools has also an important role to play in encouraging children and young people to eat a healthy diet.

A Better Start Southend Legacy

Breastfeeding has been acknowledged as being an important intervention in improving children's health and reducing health inequalities. Breastmilk protects children from a vast range of illnesses including infection, diabetes, asthma, heart disease and obesity.

A Better Start Southend (ABSS) breastfeeding and infant feeding support projects alongside the Parent Champions, the Council's health visiting team and community agencies have increased the prevalence of **breastfeeding rates from 39.1% in 2018 to 50% in 2022 in the ABSS wards**. This is a remarkable achievement and further engagement with the midwifery services and local parent champions will help to drive this up and ensure we can further embed this into the fabric of Southend.

The Southend Supports Breastfeeding scheme informs parents of venues that actively welcome breastfeeding mothers and empowers them to feel confident when feeding or comforting their babies – **one the City should be proud of**.

As part of ABSS, the 3-4 month contact, education and advice around breastfeeding and introduction to solid foods, was delivered to all families of babies in ABSS wards. After a successful delivery, the Southend Health visiting team is rolling this programme out to all families across the city.

Prevalence of Breastfeeding Rates in Southend

Source: ONS

Rates for wards within the ABSS program only

Key Actions

- ❖ The Council is collaborating with local agencies to develop and Anti-poverty strategy, which will cover food poverty.
- ❖ Schools can adopt a number of policies to encourage pupils to purchase their lunch from the school canteen.
- ❖ More is required locally to address food poverty and reduce food poverty. We are working with the local Food Alliance to optimise collaboration, explore social value contributions from local businesses, and ensure we can create a more sustainable approach to food clubs.
- ❖ We will develop a Food Environment Policy across Southend where we will support citizens, young and old, to make healthier choices including in our educational settings, work with our business to support this approach, reduce wastage and reduce food poverty/insecurity. This may also include a local 'healthier options' award being explored with our Regulatory services team at the Council.
- ❖ To promote and increase the uptake of the Healthy Start scheme to support vulnerable children and families affected by food insecurity.
- ❖ To enhance school healthy eating programmes and promote community growing initiatives.

Mental health and wellbeing

**SAFE
& WELL**

Suicide Prevention

Suicide rate (Persons)
Age-standardised mortality rate from suicide and injury of undetermined intent per 100,000 population with 95% confidence intervals

Source: NHS Fingertips Indicator ID 41001 Accessed:2022-05-19

Suicide Percentage in Males and Females

Source: ONS

77.5% Males 22.5% Females

Suicide Prevention is a top public health priority. Suicide is complicated and tragic, but it is often preventable.

In 2020, 5,224 people in England and Wales took their own lives. Around three-quarters of registered suicide deaths in 2020 were for men (3,925 deaths; 75.1%), most commonly in males aged 45 to 49 years.

In Southend, between 2018 -2020, there were 62 deaths registered as suicide, this equates to an age-standardised mortality rate is 13.0 per 100,000 people - this is not significantly different to the England rate of 10.4 per 100,000 people, but nevertheless higher. We have also experienced some very tragic outcomes with young people with complex needs and it is vital that our service design and support are further strengthened.

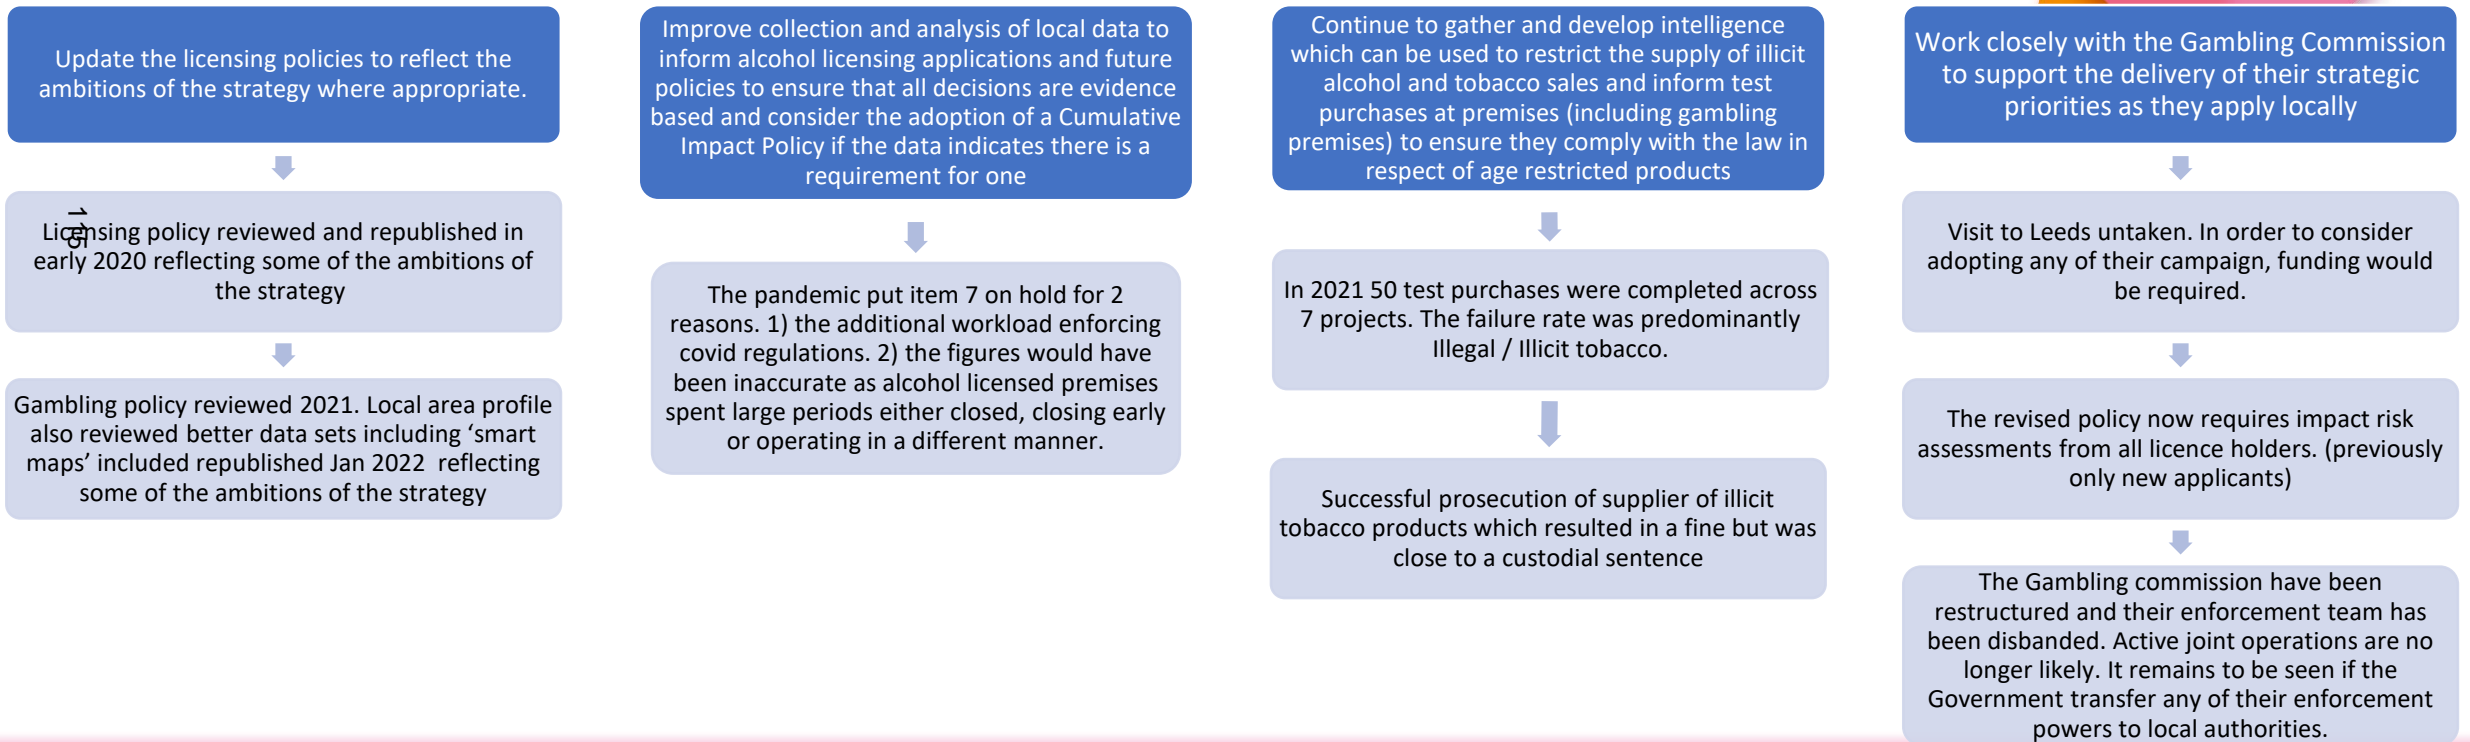

Key Actions

- ❖ Support the delivery of the Suicide Prevention Wave 3 Transformation Programme workstreams at a Southend resident and partner organisation level.
- ❖ Restart the Southend Suicide Prevention Steering Group as a sub-group of the Southend, Essex, and Thurrock Suicide Prevention Steering Group.
- ❖ Increase the promotion of [Let's Talk About Suicide Essex](#) prevention training.
- ❖ Working in partnership, we will develop an action plan to address local opportunities and challenges in suicide prevention particularly focussed on men.
- ❖ Promoting national mental health and wellbeing campaigns through social media and working with partner organisations to raise awareness
- ❖ With regards to Southend Veterans, we plan to do an investigative piece of work in the upcoming year, as it is known that they have huge health-social inequality needs and worse health and life outcomes compared to the general population.
- ❖ Further collaborative work between the Council, the NHS, other key partners and local families to ensure we improve the offer for young people with more complex needs.

Tackling Harmful Behaviour

Whilst we have previously reported on a lot of the actions around reducing the impact of smoking and drug and alcohol, we are now reporting on the on-going work by our Public Protection team and their regulatory interventions which are key to reducing harmful behaviours, including the socio-economic impact of gambling.

Key Actions

- ❖ Further local data collation will be required to provide a better understanding of needs and impact.
- ❖ The Licensing policy will be next reviewed in 2024, which will also incorporate new evidence of good practice.
- ❖ Gambling policy will be next reviewed 2025, and will also incorporate new evidence of good practice.
- ❖ For Illegal /Illicit tobacco, we are looking at tracing suppliers as well and are working closely with HMRC in this regard. We are currently in the planning stage for this year's programme and will likely need to source funding for it.
- ❖ We will initiate a system approach in test purchasing for NIPs (Vaping), in protecting our citizens.
- ❖ This summer, our test purchase operation will be targeting adult gaming centres (arcades) during the school holidays.

116

Air Quality & Transport

CONNECTED
& SMART

117

Air Quality

Air pollution is the biggest environmental threat to health in the UK. There are numerous contributory factors including dependency of car travels, use of wood-burning stoves and other wider sources.

Having a Green Plan at the Council and partner agencies, includes measures that improve air quality whilst also offering wider public health and wellbeing co-benefits, including an improvement in overall environmental quality, increased physical activity, noise reduction, greater road safety and climate change mitigation.

From the chart, it can be seen that the Nitrogen Dioxide (NO₂) levels were consistently lower in 2020 than 2019. While the initial drop in January and February 2020 may not be related to Covid-19 as there were no restrictions in place the low levels from March 2020 to July can be directly attributed to the lockdowns.

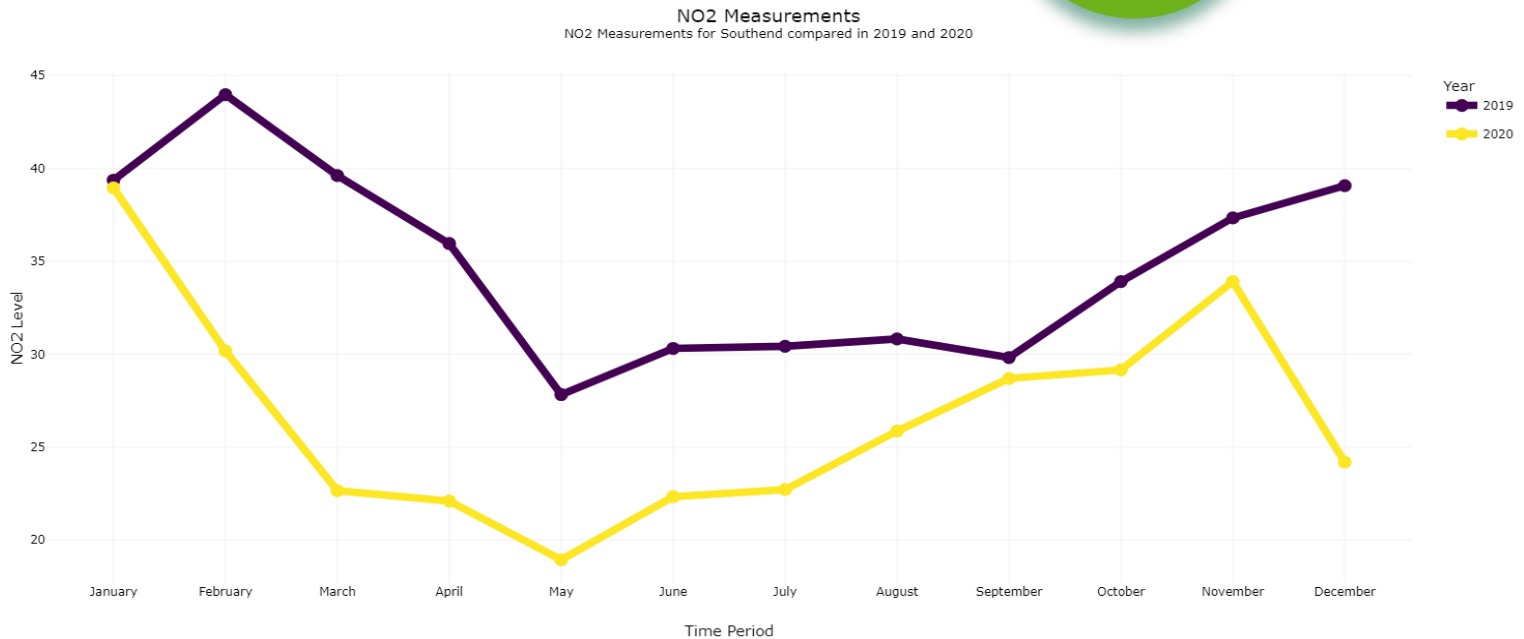

The way we work and travel have changed significantly and as part of living with Covid, we will need to adapt to new habits and embrace new opportunities.

Scale of the problem

It is estimated that **long-term exposure to man-made air pollution in the UK** has an annual effect equivalent to:

Over the following 18 years a **1 µg/m³ reduction in fine particulate air pollution in England** could prevent around:

- 28,000 to 36,000 deaths**
- 50,900** cases of coronary heart disease
- 16,500** strokes
- 9,300** cases of asthma
- 4,200** lung cancers

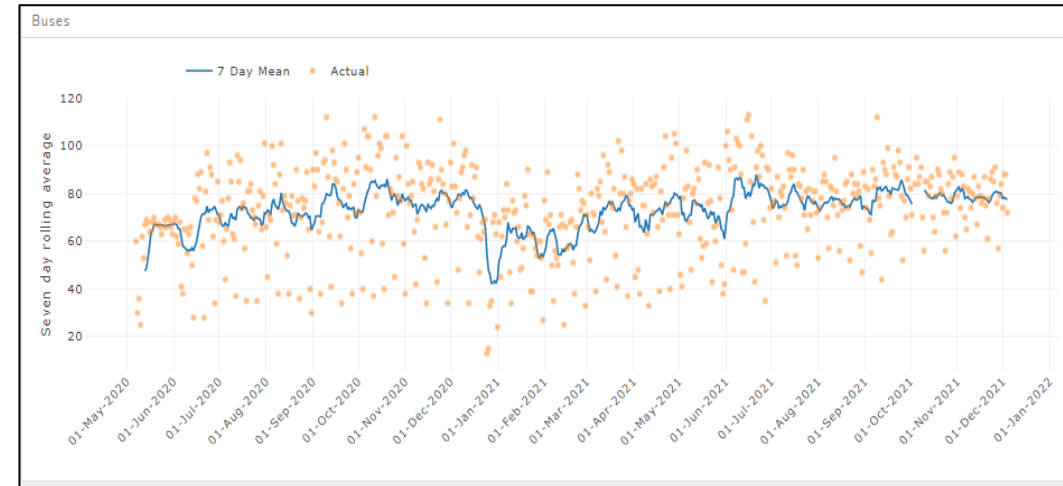

Air Quality Management Areas

Southend City Council has 2 Air Quality Management Areas (AQMAs). They are both along the A127 with one AQMA initiated at the Bell Junction (Hobleythick Lane and Rochford Road) and the second AQMA along Victoria Avenue, both for excessive levels of Nitrogen Dioxide.

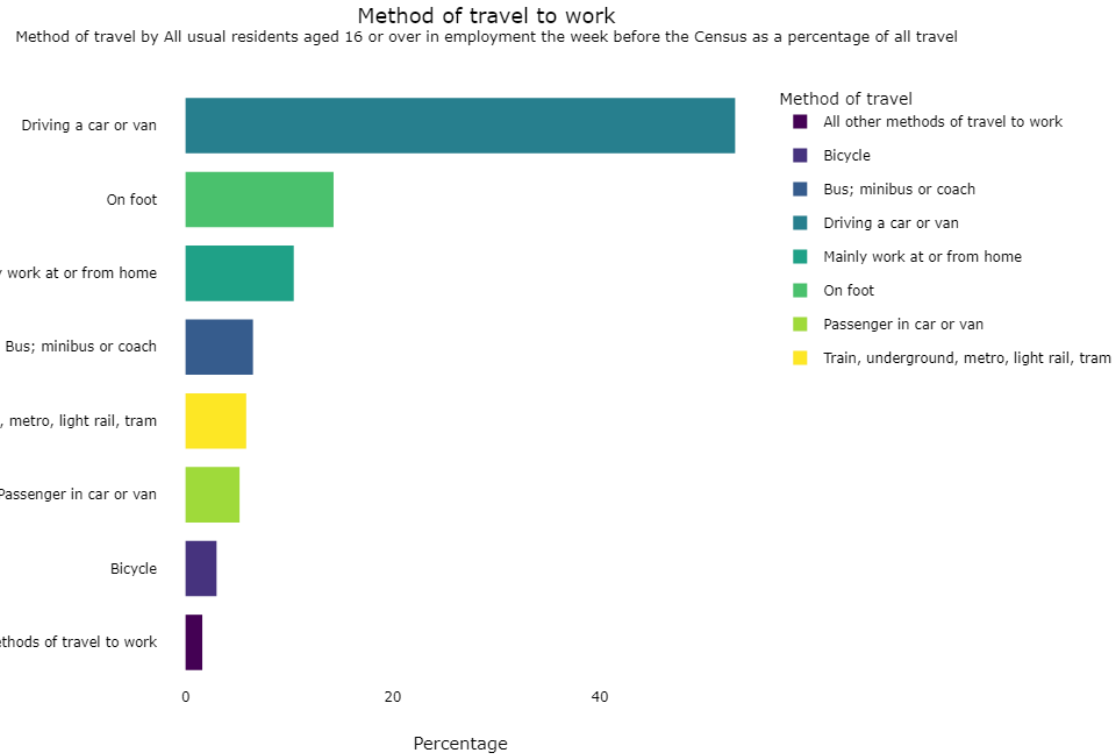

The data shows that cars are still the dominant mode of transportation in the city. The emissions from vehicles (both Nitrogen oxide [NOx] and particulate matter such as dust, pollen, soot, smoke) have a detrimental impact on air quality and respiratory health especially in vulnerable populations especially children and people with respiratory diseases. Strategic objectives are in place and continuously being reviewed from the Air Quality Action Plan, Green City Action Plan and the development of the Local Transport 4 Plan, to better support the modal shift and decarbonisation of transport.

Whilst the rollout of EV infrastructure will support NOx reduction, tail pipe emissions from electric vehicles are particulates and the impact of network congestion is not alleviated. The priority remains to reduce the number of journeys overall, but specifically shorter journeys.

619

Modes of Travelling

Source: Census 2011

Local Transport Plan – The development of this plan will need to consider the modal shift in transportation and the benefit of introducing less energy dependent mechanised vehicles. The use of e-scooters could be considered but only where safety for utilisation has been improved, following large scale national pilots. This is becoming highly popular, especially among our younger populace, leading to less reliance on family members driving them on short distance journeys.

More infrastructure investment and planning will be required to support this change.

From the 2011 Census (no new data from the 2021 Census will be released till the autumn), it can be seen that over half of the journeys to work were taken by driving a car or van. This may have evolved since this census and we will review the new data in the autumn of 2022.

Our Youth Forum indicated their priorities as:

- ✓ More need for trees
- ✓ Improved transport infrastructure
- ✓ Investment in renewable energy

Key Actions

- ❖ A Green Plan has been initiated to tackle some of the challenges in improving our Air Quality, as we will pledge to engage with school communities to promote Clear Air Day in June 2022 and annually thereafter.
- ❖ The Southend Local Transport Plan 4 will be published in 2023 with a clear approach to support citizens to reduce their carbon footprint, encourage more young people to be consider alternative means of travel, including walking, cycling and e-scootering.
- ❖ Ensure we build resilience within Southend to continue the on-going management of the pandemic and reduce socio-economic consequences and well as health and wellbeing impact.

Living With COVID

**SAFE
& WELL**

122

Impact of & Living with Covid

The future path and severity of the Covid-19 virus is uncertain, and it may take several years before it becomes more predictable. As a result, we are working closely with UKHSA to ensure we are maintaining enough capacity, resilience and skills within the organisation to upscale our activities should the need arise.

The Government's *Living with Covid* strategy has moved us away from a focus on reducing prevalence, to reducing the risk of serious harms to vulnerable people. Covid-19 will eventually be completely managed in line with other respiratory viral illnesses and we will continue to promote behaviours that can reduce the transmission of such viruses. Covid-19 case rates, hospitalisations and deaths are all on a downward trajectory at the time of writing this report.

A greatly-reduced core pandemic management team will ensure that the Director of Public Health and the Health Protection Board can continue to monitor risks, retain appropriate surveillance in conjunction with UKHSA, contain localised outbreaks and support the on-going vaccination programme.

Covid-19 has impacted significantly on mental wellbeing and we will need to ensure our local programmes can continue to more effectively impact on the mental wellbeing recovery and support people to return to their daily activities.

The table below shows that there was a significantly higher rate of Covid deaths in Southend compared to both the national and regional levels, primarily as we have a disproportionate larger number of care homes as well as a more ageing population. In the last year April 2021 to March 2022, there were 149 deaths attributed to Covid.

	Total Deaths (All time)	Rate per 1000 (for total)	April 2021-March 2022 Deaths
Southend	831	454.7	149
East Region	18,613	296.9	3,412
England	163,363	288.9	35,060

Economic Recovery

OPPORTUNITY
& PROSPERITY

124

Jobs and Development

Tackling low income jobs and Improving job opportunities

The council is making investments and promoting new and existing business growth to increase the number of well-paid jobs in the borough - we are investing in regeneration that creates places that businesses want to be and grow as well as providing direct support to our business community in the form of grants and business support.

There are a range of skills and employment activities taking place that seek to upskill residents so that they can access better paid work – these are delivered through various council services as well as providers in the education and private sectors.

We will be establishing a Good Employment Charter with businesses in the next year which will incentivise the creation of well-paid jobs, with flexible and responsible working practices for employers that behave ethically and promote sustainability.

Additionally, the Council and NHS are collaborating on a wider workforce development and retention scheme, aimed at supporting career pathways and improved terms and conditions of employment.

We are also ensuring that self-employment is seen as a real alternative to traditional paid employment by delivering pre-start and start-up advice to residents and very new enterprises.

124 Southend
businesses supported with
support to thrive and grow

£118k business grants awarded
38 jobs created or safeguarded

125

Skills Development & Raising Aspirations

The Careers Hub is working with schools and colleges to improve the quality of careers education and raise the aspirations of our young people. The Hub provides strategic support and operational help to broaden access to the latest labour market information and careers. Through the Hub, a new approach to work experience is currently being developed to help young people build their confidence and social capital which in turn will promote social mobility.

We continue to develop and deliver preferential pathways to work schemes for our key employment and growth sectors – residents are being supported into work in health & care, construction, digital, creative industries, and business and administration roles through a variety of schemes.

Mid and South Essex NHS Foundation Trust has been awarded just over £400,000, through the UK Community Renewal Fund to deliver a landmark Anchor Institution initiative in Southend.

It's important that we continue to work together to support people to reach their aspirations and help those who have lost their jobs to retrain or upskill. This is exactly what the **Southend Anchor Programme** is striving to do. It will drive local recovery, instil pride and help to unleash the potential in people who are most in need of support.

By teaming up with health and care partners, Southend City Council and the voluntary and education sector, we can reduce our environmental impact and create exciting and innovative employment, volunteering, internship and network opportunities for those we serve.

Over 50% of learners to post 16

19 schools supported by the Careers Hub to improve careers education and raise ambitions

Engaged with over 2000 learners aged 25 – 65+

Skills Development & Raising Aspirations

Southend Adult Community College (SACC) continues to deliver a wide range of high quality learning outcomes for our residents focusing on vocational education and employability, community and life-long learning, alternative post 16 provision and supporting adults with physical and learning disabilities to achieve positive employment and independence outcomes.

The Southend Skills Leadership Group, a cross-sector partnership group, meets regularly to shape the skills agenda in Southend to ensure it meets current and future business need. In the next year, this group will be developing a new skills strategy for the borough aimed at raising aspirations and increasing attainment for residents of all ages.

We continue to break cycles of intergenerational worklessness through the ABSS Workskills project – supporting parents of young children in our most deprived wards towards work so that they become working role models. Children with working parents, are more likely to have better engagement in education, have higher aspirations and enter and sustain work than those without.

SACC responds rapidly to the changing landscape of Southend by integrating the differing needs of new and existing residents and responds well to national and local initiatives. The college has worked with 30 Afghan refugees and 52 Ukrainian refugees creating a safe place for them and they have engaged effectively and have built trust enabling them to engage with learning opportunities. Over 50% of our learners have progressed onto other learning programmes in post 16 learning colleges. 6% of our learners have progressed into meaningful paid employment.

This is an area we will need to continue to invest and shape to ensure we can provide the right skills for our local community and support our socio-economic recovery.

30 Afghan refugees

52 Ukrainian refugees

Workplace Health and Social Values

Workplace health and wellbeing

Through the Southend Business Partnership Briefings and newsletters we have been sharing information about workplace health and wellbeing.

The Good Employment Charter will also include pillars around workplace health & wellbeing.

Working with partners including Everyone Health we will continue to support initiatives and campaigns that promote wellbeing in the workplace.

Instilling Social Values

The council has been developing its approach to social value in procurement and is rolling out a new robust approach to ensuring that we are using our buying power to maximise local benefit.

The Good Employment Charter will also seek to embed social values with our businesses and key employers around equality and inclusion, sustainability, ethical behaviours and ensuring a fair pay.

Significant strides have been made to promote approaches to buy local with the creation of a new business directory to promote local business-to-business and local business-to-customer transactions, as well as help the council and anchor organisations spend more money locally.

Appendices

Updates on last year's report recommendations

Recommendations	Progress
Covid-19 Vaccinations - Delivery of Vaccine Hesitancy Plan	Significant and innovative approaches to local campaigns and outreach clinics with marked increases in the uptake of COVID vaccination across the 4 targeted wards, people aged 12-45 years.
Maximise uptake of Flu Immunisation Programme in the 'under 65s At Risk' groups and people aged 65 years and over	Flu jab uptake was better than previous years although the over 64yrs numbers were below the national target. More targeted work through pharmacies, dedicated primary care clinics and a wider collaboration on our local campaigns.
Maximise uptake of Flu Immunisation Programme in those ages 2-3 years and Pregnant women	For those aged 2-3years, this was similar to last year's although much improved over previous years. For Pregnant Women - we have identified gaps within the local delivery which remained very low. New plans will be in place this year.
Provision of good Information, Advice and Guidance via the Livewell Southend portal, and wider coverage for public health campaigns	More development work is on-going to improve the Livewell Southend portal, with dedicated engagement with a multi-agency steering group reinstated after months of pandemic disruption. All public health campaigns were created and promoted throughout the year and in collaboration with NHS and partners.
Taking action to address the factors which play a crucial role in shaping mental health and wellbeing outcomes for adults and children	Work continues through the SEE Mental Health Forum an the City Council including Time to Talk Day; World Suicide Prevention Day; Mental Health Awareness Week; and World Mental Health Day – all had extensive public health campaigns. Additional funding received to support the work around suicide prevention. A new commissioning-led multi-agency group established to support children and young people services with a focus on school assessment on needs of school age children post-Covid and a renewed approach to the Healthy Schools scheme.
Building regular physical activity into everyday life can help improve self-esteem, reduce stress, and decrease levels of anxiety	Active Southend continues to work in partnership, through Everyone Health and with a range of partners, to engage with those that are physically inactive. Free of charge or very cheap low impact sport or physical activity courses are provided at suitable locations, which is also contributing to emotional wellbeing.
Promotion of the NHS 24/7 urgent mental health helplines. It helps individuals find the nearest source of support for any mental health issue	5 Mental health public health campaigns have been promoted through the Council and partners covering NHS111 Option 2 service, Lets Talk About Suicide website for those in crisis situation.
Promoting self-help and self-care are supported through Books on Prescription and Reading Well Books, available at Southend Libraries	Southend Libraries provide books, e-books and e-audio to support health and wellbeing, and specific booklists to help adults, children and young people (or their families) with mental health, dementia, bereavement, long term conditions, and mood boosting.
Develop a weight management strategy, to address the complexities around obesity	Working group established and co-ordinating service planning and provision under the banner of Growing Well-Working Well-Ageing Well. The rise in delivery of fast-food means this is no longer an issue only for the 'high street'. As a collaborative, we have seen obesity rising across all age groups and is seen as the biggest challenge for the system. Whilst a lot of positive development is ongoing with 'Energy Out', we are now exploring the 'Energy In'.
The Council and partners to carry out community engagement and relaunch the Health and Wellbeing Strategy	During the autumn of 2021, Southend's Health and Wellbeing Strategy was launched, with an Action Plan in implementation.
Systems to improve the food environment in Southend to promote small lifestyle changes and reduce weight gain, including limiting access to unhealthy food outlets, and a clear policy on the health and wellbeing approach through planning guidance	We are stills coping a wider social marketing approach, especially with ABSS partners. Limiting access to unhealthy food has limited evidence of success and this is now superseded by cheap food deliveries. We are developing a health and wellbeing policy which will be included in the Local Plan.

Update on last year's report recommendations

Recommendation	Progress
<p>More consideration for dedicated public health promotions to alert key groups about the risks of harmful drinking, and encouraging them to reduce their intake and seek support where required</p>	<p>Comprehensive campaign conducted across Council social media channels for Alcohol Awareness Week (15th – 19th November), including access to online tools and links to available support services. Further campaigns will be promoted in 2022 including:</p> <p>International Overdose Awareness Day (31st Aug 2022)</p> <p>Alcohol Awareness Week (11th – 15th Nov 2022) and we also exploring campaigns on allied health issues.</p>
<p>Consideration should be given to ensuring point of contact services (GPs, Wellbeing Service, Social prescribers) are asking questions about alcohol intake and can provide Extended Brief Interventions to those who might benefit</p>	<p>Alcohol Use Disorders Identification Test questionnaire is included as part of the NHS Health Check delivered by GPs and as part of our outreach Health Check service delivered by Everyone Health -with advice/referral provided when thresholds are met. Workplace health programme also offers guidance on alcohol consumption.</p>
<p>Ensure that the online offer of information, advice, and guidance through sites such as LiveWell Southend include links to free apps, sites or tools that allow people to assess and manage their own drug or alcohol use, which can also act as a repository for preventive education provision</p>	<p>Livewell and SCC website content has been reviewed and refreshed. Additional links to online quizzes and assessments are accessible through these sites. Signposting to local services has been reviewed and updated.</p> <p>Exploring the possibility of a standalone site dedicated to drugs & alcohol resources/support.</p>
<p>Consideration is being given to how best to meet the needs of an ageing cohort in the current round of procurement for our specialist drug and alcohol services</p>	<p>The new provider is developing pathways, including developing links with GPs and health centres, and we are exploring the possibilities of seconding drug/alcohol workers into supported housing providers</p>
<p>Raise the profile of social prescribing, including the development of a digital platform aligned to Livewell Southend as a core offer and its linkage into other services and support</p>	<p>Social Prescribing continues to be delivered in Southend with increasing capacity brought in in 2021-22. A digital platform is being progressed with key champions including voluntary sector organisations. The integration of the digital tool is a key component of the future provision of Livewell Southend.</p>
<p>Link into Community Connectors/Builders to support residents who are feeling lonely and isolated and/or have poor mental health and wellbeing, to connect with their community</p>	<p>SAVS was recently awarded the contract for Community Builders which has superseded the Community Connectors offer. Three (2FTE) Community Builders are employed to "walk the streets" in chosen neighbourhoods and have begun asset mapping and local conversations with residents.</p>

Update on last year's report recommendations

Recommendation	Progress
Implement the priorities in the Commissioning Strategy for Carers	The Carers Strategy will be signed off this spring. There is a new contract in place for Care First to support carers in Southend. The NHS have identified carers as key priority group to support with further opportunities to work collectively on this agenda.
Improving support to people with autism – including housing and support at home offers for people who need this, co-producing support to integrate effectively with the community	We are currently looking to offer a more robust universal offer to those with autism who may not be known to services. This is likely to take some time to develop, but providers are on board to increase the universal offer.
Prioritise the supply of safe, locally affordable homes	Council Housing development programme continues to progress and at Saxon Gardens this included the Council's first Net Zero Carbon Homes. The Acquisitions Programme purchased 10 market properties for use as Council Housing and the HRA Land Review Project Phases 3 & 4 are currently at the procurement and planning stages respectively. Work also continues with a number of Registered Providers on their affordable housing development programmes.
Ensure that regeneration and growth creates inclusive, healthy places to live and thrive	Better Queensway project, which includes social value and green city workstreams, continues to progress with the hybrid planning application having been permitted. Public health has a dedicated Health Visitor working with a named GP and local charities to ensure regular access to clinical and wellbeing services for people who are homeless. The launch of Indirock bouldering wall in the VC has embodied the wider healthy place approach whilst working with the council on delivering on a social value contribution. The council's delivery on the Green City plan is progressing positively.
Encourage good quality housing design, management, and maintenance	Current Council housing developments are surpassing nationally prescribed standards in terms of space and surpassing local sustainability standards evidenced with the development of the Council's first Net Zero Carbon homes. Improved future sustainability standards are also being developed and partnership work continues with SEH to ensure Council stock in managed and maintained to agreed Decent Homes standards.
Support people to live independently in their own homes and avoid homelessness	Older Peoples Housing Needs Assessment underway and Selective Licensing introduced in order to improve conditions in private rented sector. New supply of adapted properties continues to be a priority with a number of properties proposed as part of part of the future phases of the HRA Land Review Project.
Make any instance of homelessness brief and non-recurrent	Strong partnership work under Rough Sleeping Initiative continues, including targeted health support and interventions. In the first quarter of 2022 monthly rough sleeper numbers have been consistently under 20 (total over the month not on a given night), with nightly snapshot figures under 5 and often 0. This means we are working more efficiently to prevent rough sleeping but also ensure swift intervention if individuals are found rough sleeping to bring them into support services.

Southend-on-Sea City Council

Report of Interim Executive Director (Strategy, Change
and Governance)

to

Cabinet

on

26 July 2022

Agenda
Item No.

9

Report prepared by: S. Tautz (Principal Democratic Services
Officer)

In-Depth Scrutiny Project - 'Enabling Councillors to be Effective'

Relevant Scrutiny Committee(s): People Scrutiny Committee, Place Scrutiny
Committee, Policy and Resources Scrutiny Committee

Cabinet Member: Councillor S George

Part 1 (Public Agenda Item)

1. Purpose of Report

- 1.1 To present the final report of the In-Depth Scrutiny Project for 2021/22 – 'Enabling Councillors to be Effective.'

2. Recommendations

- 2.1 That Cabinet approve the recommendations arising from the in-depth scrutiny project, detailed at Paragraph 12 of the attached report.
- 2.2 That the budget implications arising from the recommendations of the in-depth scrutiny project be considered as part of current and future years' budget processes prior to implementation.

3. Background

- 3.1 At the cycle of meetings in July 2021, the Place Scrutiny Committee (Minute 107), the People Scrutiny Committee (Minute 116) and the Policy and Resources Scrutiny Committee (Minute 134) each agreed that a single joint in-depth scrutiny project be undertaken on behalf of the three committees during the 2021/22 municipal year on the theme of 'Enabling Councillors to be Effective', as part of the respective scrutiny work programmes for the year. The project plan and work programme for the in-depth scrutiny project were agreed by the committees during the cycle of meetings in September 2021.
- 3.2 The project was led by a member Project Team for which appointments were agreed by the Council at its meeting on 15 July 2021. The Project Team comprised the following members: Councillors B Beggs, K Buck, T Cowdrey, K Evans, A Line, J Moyies, D Nelson, I Shead and A Thompson. Councillor J Moyies was appointed Chair of the Project Team at its meeting on 19 August 2021.

- 3.3 The Project Team was supported by relevant officers including S Meah-Sims (Interim Executive Director (Strategy, Change and Governance)), T Row (Principal Democratic Services Officer) and S Tautz (Principal Democratic Services Officer/Project Co-ordinator). Other officer support was provided in respect of specific elements of the in-depth scrutiny project:
- 3.4 Progress with regard to the joint in-depth scrutiny project was achieved throughout the 2021/22 municipal year, including the development of an action plan, a comprehensive work programme and the receipt of relevant presentations. Although the progress of the project was delayed slightly as a result of the unfortunate local events that occurred in October 2021, efforts were made to ensure that the timescale for the delivery of the project was maintained and that the project was completed by the end of the 2021/22 municipal year.
- 3.5 The draft final report and recommendations arising from the in-depth scrutiny project were agreed by each of the scrutiny committees during July 2022. In considering the recommendations of the project that concerned the enhancement or development of digital systems, the scrutiny committees were advised that the corporate commitment of the Council to ensure that its services were fully inclusive would be maintained and that alternative means of contacting the authority would continue to be offered where digital systems might exclude residents and service users.
- 3.6 In accordance with Scrutiny Procedure Rule 10 (Part 4 (e) of the Constitution), the report and recommendations of the in-depth scrutiny project would normally be presented to the Cabinet by the chair of the relevant scrutiny committee. As the scrutiny project for 2021/22 was undertaken jointly on behalf of each the three committees, each scrutiny committee has agreed that the report and recommendations arising from the project should be presented to the Cabinet by Councillor J Moyies as Chair of the Project Team.

4. Recommendations

- 4.1 In accordance with Scrutiny Procedure Rule 10 (Part 4 (e) of the Constitution), the report of the in-depth scrutiny report is attached at Appendix 1 for approval by the Cabinet.
- 4.2 The recommendations from the review are set out in Section 12 of the report. Some of the recommendations arising from the review have budget implications that will require consideration as part of future years' budget processes prior to implementation.
- 4.3 The Cabinet is requested to endorse the recommendations arising from the in-depth scrutiny project.

5. Other Options

- 5.1 To note the report but not progress any of the recommendations.

6. Reasons for Recommendations

- 6.1 Not applicable

7. Corporate Implications

7.1 Contribution to the Southend 2050 Road Map

As described in the report of the joint in-depth scrutiny project

7.2 Financial Implications

A number of the recommendations arising from the in-depth scrutiny project have financial implications that will require consideration as part of future years' budget processes prior to implementation. The financial implications of these recommendations will be identified as proposals for their implementation are developed.

7.3 Legal Implications

None

7.4 People Implications

None

7.5 Property Implications

None

7.6 Consultation

As described in the report

7.7 Equalities and Diversity Implications

None

7.8 Risk Assessment

None

7.9 Value for Money

None

7.10 Community Safety Implications

None

7.11 Environmental Impact

None

8. Background Papers

None

9. Appendices

Final report of the in-depth scrutiny project (Appendix 1)

**People Scrutiny Committee, Place
Scrutiny Committee, Policy and
Resources Scrutiny Committee**

Joint In-Depth Scrutiny Project 2021/22

‘Enabling Councillors to be Effective’

Final Report and Recommendations (May 2022)

1. INTRODUCTION

- 1.1 Elected councillors give local government its essential legitimacy, accountability, strategic direction and community focus. The provision of support and assistance to all councillors regardless of which political party or group they belong to, whether they are Executive or 'back-bench members or whether they are part of an administration or in opposition, is essential for the purposes of enabling councillors to be effective.
- 1.2 The work of a councillor is complex and challenging and the political, legislative and local landscape in which we work is changing constantly. As more duties and responsibilities have been placed on local authorities, councillors have seen their workload increase significantly. Local residents and communities have high expectations of their elected representatives from the day of their election and throughout their period of office. Both new and experienced councillors therefore need appropriate support, guidance and personal and professional development to undertake their complex and evolving roles.
- 1.3 I would like to thank all councillors and officers for their contribution to the in-depth scrutiny project.

Councillor James Moyies
Chair of the In-Depth Scrutiny Project Team

2. BACKGROUND

- 2.1 Each of the Council's scrutiny committees (the People Scrutiny Committee, the Place Scrutiny Committee and the Policy and Resources Scrutiny Committee) has traditionally undertaken an in-depth scrutiny project each year. The in-depth projects are selected at the beginning of each municipal year and generally focus on the Council's corporate priorities or matters of local concern. Recent in-depth scrutiny projects have also been aligned with the ambition and outcomes arising from the Southend 2050 programme. The in-depth scrutiny projects lead to the development of reports and recommendations which advise the Executive and the Council on its policies, budget provision and service delivery. Participation in the in-depth projects enable councillors to be actively involved in a specific topic and to influence and shape proposals around service improvement that will result in improved outcomes.
- 2.2 In considering options for the approach to in-depth scrutiny activity for 2021/22, the scrutiny committees considered the benefits of undertaking a joint scrutiny project around the effectiveness of the current 'Councillor Queries' portal, which had generated a mixed experience for councillors since its implementation, particularly around the way that the councillor queries arrangements worked and enabled them to deliver their democratic mandate to local residents. The scrutiny committees considered that the nature of such scrutiny activity should be broadened to reflect the theme of 'Enabling Councillors to be Effective' and that the scoping of the project should incorporate other appropriate matters of importance to councillors within this theme, alongside the effectiveness of the 'Councillor Queries' portal.

3. FRAMEWORK OF THE IN-DEPTH SCRUTINY PROJECT

- 3.1 At the cycle of meetings in July 2021, the People Scrutiny Committee, the Place Scrutiny Committee and the Policy and Resources Scrutiny Committee each agreed that a single in-depth scrutiny project be undertaken on behalf of the three committees during the 2021/22 municipal year on the theme of 'Enabling Councillors to be Effective', as part of the scrutiny work programme for the year.

- 3.2 There were a number of reasons for the identification of the in-depth scrutiny project. In addition to the concerns raised in regard to the effectiveness of the current 'Councillor Queries' arrangements for the handling of enquiries and questions that councillors raised with officers of the Council, other matters were agreed for inclusion as part of the in-depth scrutiny project, including problem reporting, requests for information, councillors' contact and engagement with the Council and residents and the effectiveness of the 'My Southend' platform.
- 3.3 In agreeing the nature of the in-depth scrutiny project for 201/22, the scrutiny committees acknowledged that a separate review of the Council's Constitution was taking place and that any recommendations arising from the project around constitutional matters could feed into that review process to avoid duplication. In considering the proposed scope of the in-depth scrutiny project, it was also recognised that design group was currently looking at councillor development as part of the leadership programme and that appropriate recommendations arising from the project could also contribute to that separate work activity.
- 3.4 The agreed scope of the in-depth scrutiny project was:
- (a) To identify and review current arrangements for the provision of support that councillors need to carry out their elected role, focusing on the "Councillor role" rather than the specific requirements of members of the Cabinet, the Shadow Cabinet or the chairs of committees.
 - (b) To identify any 'quick wins' in terms of aspects of the main areas of focus of the project and to understand other ongoing activity that relates to the aims of the project to ensure joined-up arrangements.
 - (c) Where relevant, to feed into the separate review to be undertaken of the Council's Constitution by the General Purposes Committee, to which all members of the Council will have a separate opportunity to contribute.
 - (d) To complement the work of the design group currently looking at councillor development as part of the leadership programme.
- 3.5 The review was set within the context of the Council's 2050 ambition and priorities and the Project Team was tasked with reviewing relevant issues and to report back to the Cabinet with appropriate findings and recommendations.
- 3.6 As a number of elements of the in-depth scrutiny project also covered issues that were considered as part of the scrutiny project undertaken by the Policy and Resources Scrutiny Committee for 2019-2021, we received a progress update on the implementation of each of the recommendations arising from that scrutiny project for 2020/21, to assist the consideration of aspects of the current in-depth scrutiny project and the formulation of appropriate recommendations arising from the project.

4. METHODOLOGY

- 4.1 The review was undertaken on behalf of the three scrutiny committees by a Project Team comprising the following members appointed by the Council on 15 July 2021:
- Councillors B Beggs, K Buck, T Cowdrey, K Evans, A Line, J Moyies, D Nelson, I Shead and A Thompson.
- 4.2 Councillor J Moyies was appointed Chair of the Project Team at its meeting on 19 August 2021.

4.3 The Project Team was supported by relevant officers including S Meah-Sims (Interim Executive Director (Strategy, Change and Governance)), T Row (Principal Democratic Services Officer) and S Tautz (Principal Democratic Services Officer/Project Co-ordinator). Other officer support was provided in respect of specific elements of the in-depth scrutiny project:

J Astle (Digital Communications Advisor)
C Foster (Head of IT Delivery)
A Keating (Strategic Communications Manager)
M Medina (Community Capacity Advisor)
P Moyo (Internal Communications Officer)
K Pachalko (Engagement and Participation Manager)
J Painter (Service Manager (Customer Services))
D Skinner (Intelligence Officer (Planning and Compliance))
C Thomas (Director of Digital and ICT)

4.4 The Project Team met on six occasions between August 2021 and April 2022. Although the progress of the in-depth scrutiny project was delayed as a result of unfortunate local events that occurred in October 2021, efforts were made by the Project Team to ensure that the timescale for the delivery of the project was maintained and that the project was completed within the 2021/22 municipal year.

4.5 The project was undertaken using an evidence-based approach to the consideration of service options, through a mixture of experiences presented by councillors and informative presentations that supported the understanding of the current provision of services to support councillors. No witness sessions or site visits were held in respect of the project, although some examples of service provision in other local authorities were presented to the Project Team. The Project Team reviewed guidance published by the Local Government Association in relation to effective councillors and the handling of casework.

4.6 A project plan and work programme for the in-depth scrutiny project was agreed by the Project Team in September 2021 and by each of the scrutiny committees during the October 2021 cycle of meetings. The project plan and work programme set out the scope and framework for the project, alongside a programme of thematic evidence-gathering activities around the following specific areas identified as key to the desired outcomes for the project:

- First Contact (resident queries dealt with by councillors and the experience of residents when contacting the Council).
- Councillor Queries (review of improvements to arrangements for the handling of councillor queries).
- Officer/Councillor Engagement (practical arrangements and the operation of the Councillor/Officer Protocol).
- Councillor Casework and Support (the benefits of a casework system to improve the management of resident issues, other support for all councillors).
- Cross-Service, External Partners and Outsourced Services (ensuring that services provided by external organisations/agencies are handled seamlessly).
- Enabling Non-Aligned Councillors (ensuring that non-aligned councillors have the ability to be effective).

4.7 The following sources of evidence were considered as part of the in-depth scrutiny project:

- (a) Councillor 'case studies', experiences and feedback.
- (b) Specific examples of issues within the scope of the project where things have not gone well.

- (c) Relevant data etc. held by the Council or obtained from published sources or benchmarking arrangements.
- (d) Performance information on key issues (e.g., response times, call handling etc.).
- (e) Customer feedback (e.g., contact with the Council, contact with councillors, use of the website etc.).
- (f) Information/feedback from relevant officer teams (e.g., 'Councillor Queries')
- (g) Benchmarking information (e.g., around member support services and the use of casework systems at other local authorities).
- (h) The presentation/demonstration of relevant systems and processes.
- (i) A review of recommendations arising from the in-depth scrutiny project undertaken by the Policy and Resources Scrutiny Committee for 2019/20-2020/21.

5. FIRST CONTACT

5.1 At the meeting of the Project Team in December 2021, we considered aspects of the work programme for the joint in-depth scrutiny project, around the 'First Contact' theme.

(a) 'My Southend'

5.2 We received a presentation from the Director of Digital and ICT and the Head of IT Delivery, on current plans for the replacement of the 'My Southend' interactive self-service portal for residents.

5.3 Self-service facilities offer residents a convenient way of managing their Council services, reporting issues and contacting the authority with service requests or comments, without having to wait in a phone queue or navigate websites. The Council has introduced the 'My Southend' platform as its interactive self-service portal for residents.

5.4 The Project Team was advised that the 'My Southend' platform was five years old and had been designed as a replacement for paper-based forms. The Director of Digital and ICT advised us that the current platform was at end of life and that the supplier had no plans to replace or enhance the platform any further. The Director of Digital and ICT reported that ICT had been tasked with investigating options for a replacement system in July 2021, as this approach offered an opportunity to rethink the way online services were packaged and to transform service delivery, and that funding for investigation into the scope and business case for a replacement platform had been agreed by the Investment Board in September 2021, alongside the introduction of a new Revenues and Benefits portal to be integrated into the 'My Southend' platform. The Director of Digital and ICT reported that the replacement of 'My Southend' had the potential to improve the current customer engagement experience and that integration with waste management services was also planned to be introduced as part of the implementation of the new platform.

5.5 We understand that the business case agreed in September 2021 proposed the undertaking of discovery and consultation activity with councillors, officers and residents to inform the production of a full business case for the new platform. A service provider has been appointed and discovery and design is due to commence in July 2022, so that the full business case for the new platform can be submitted to the Investment Board in November 2022 and considered by the Cabinet in January 2023.

5.6 We were also advised of a number of challenges with the current 'My Southend' platform, including digital exclusion, the use of some complicated forms that did not cover all service areas, the inability to track the progress of service requests and reports, the lack of a casework management facility for councillors, a lack of ability to identify common areas of service request, and limited integration with other systems. The Director of Digital and ICT indicated that, subject to full compliance with relevant data protection legislation and the consideration of safeguards for personal data held in different service areas, it was

intended that the functionality of the new 'My Southend' portal would also extend to the Council's partners that were involved in service delivery for residents, so that services were handled seamlessly.

- 5.7 The Director of Digital and ICT advised us that the replacement of the 'My Southend' platform was currently in the discovery phase and that work had already been undertaken to understand the digital abilities of residents and improve their system experience, to understand the current use of 'My Southend' through analysis of service requests and complaints, and to develop ward-level analysis of demographics and the use of 'My Southend' using data from the 2011 Census.
- 5.8 The Project Team was assured that full programme governance would be established around the replacement of the 'My Southend' portal and that councillors and service users would be fully involved in the development of the vision and functional specification for the new portal, which was not intended to move away from the continued provision of human contact for residents.
- 5.9 We were advised that it was also intended to secure some 'quick wins' from the replacement of 'My Southend', including improvements to the language used in some on-line forms, the investigation of options for validation to enable correct enquiries to be raised first time and to reduce the level of duplicate cases, and the use of analytics and customer feedback to review existing forms and user interfaces to improve customer experience and ease of completion.
- 5.10 We welcome the plans for the replacement of the 'My Southend' interactive self-service portal for residents and have requested that the Project Team be kept up to date with ongoing progress on the replacement of the portal.

(b) Website

- 5.11 The Council's website is a suite of related web pages used to store and provide service information to external users, located under the single domain www.southend.gov.uk. The Project Team received a presentation from the Digital Communications Advisor on current plans for the development of the website.
- 5.12 We were advised that the corporate website consisted of information relating to over 400 services, complemented by additional linked websites such as 'My Southend', the Planning Portal and the Modern.Gov democratic services facility. The Digital Communications Advisor reported that extensive work had been undertaken to improve the main website, including a full relaunch in May 2020 and that accessibility and user-journeys had been a major consideration for the re-development of the website.
- 5.13 The Project Team noted that the website had recently been completely overhauled to comply with accessibility law and featured drop-down menus in line with modern websites, whilst also working better on mobile devices and providing shorter user-journeys to key content.
- 5.14 The Digital Communications Advisor reported that the updated website had an in-built ability to show results even if search criteria were mis-typed and could route straight to relevant content rather than simply displaying a list of search results. The Project Team was advised that analytics indicated that people were now able to find content far quicker and having to visit fewer pages before they found the information they required and that comments related far less to finding content than with the previous website.
- 5.15 We were advised that the website had been subject to several accessibility ranking and audit evaluations and was currently rated 87/100 (excellent) for accessibility by

SiteImprove. The Digital Communications Advisor reported that the Government Digital Service had audited and passed the website in January 2021 and that the recommendations arising from a Shaw Trust accessibility audit undertaken by people with a range of disabilities and needs when accessing information online, were currently being implemented to further improve the website.

- 5.16 The Project Team was informed that the introduction of search functionality for the linked websites was also being investigated, alongside further data-driven improvements using analytics from the website and on-site searches, and future tools to improve usability and customer experience, such as a live chat function. We strongly consider that any introduction of live chat functionality for the website should only be on the basis of human interaction rather than being automated by any form of artificial intelligence.
- 5.17 We would encourage councillors to provide details of any specific search enquiries that had proved problematic in terms of identifying information on the Council's website, directly to the Corporate Communications Team.
- 5.18 We welcome the plans for the for the development of the Council's website.

(c) Resident Queries and Experience

- 5.19 Although we did not consider the 'Councillor Queries' theme of the work programme for the in-depth scrutiny project at our meeting in December 2021, we discussed the increase in the number of resident queries being dealt with by councillors that had been perceived at the commencement of the in-depth scrutiny project, although it was currently generally felt that the level of such queries had since reduced for some members. We also received current call handling performance information.
- 5.20 We were advised that no 'Mystery Caller' type exercises around the provision of customer services have been previously commissioned but did not consider that this was necessary as part of the in-depth scrutiny project at the current time. However, we do believe that appropriate forms of 'mystery caller' or other review arrangement should be introduced wherever necessary to ensure that arrangements already put in place to ensure that the quality of the experience offered to residents when contacting the Council are being met.

6. COUNCILLOR QUERIES

- 6.1 At the meeting of the Project Team in January 2022, we considered aspects of the work programme for the joint in-depth scrutiny project around the 'Councillor Queries' theme.
- 6.2 We received a presentation from the Service Manager (Customer Services)) on the current performance of the 'Councillor Queries' portal for members and ongoing plans for the development of the portal.
- 6.3 The Project Team was advised that the 'Councillor Queries' portal had originally been established at the start of the COVID-19 pandemic in 2020, as a means of providing responses and information to councillors in respect of service enquiries around the Council's ongoing response to the impact of the pandemic. In August 2021, a team of seven officers from various service areas across the Council was established as an interim arrangement to manage the Councillor Queries arrangements, to address the lack of consistent service being experienced by councillors when submitting enquiries. The aim of the officer team was to take responsibility for the provision of responses to enquiries, whilst ensuring that responses were also consistent with a more personal approach.
- 6.4 We were advised that some aspects of 'Councillor Queries' were now considered to be working well, including the ability of the officer team to direct enquiries to the correct service

area, acting as a single point of contact for progress chasing and liaison with service areas on behalf of councillors. However, we understand that efforts will continue to be made to improve the service further, including engagement with councillors to ensure that all enquiries are directed to the dedicated 'Councillor Queries' inbox rather than directly to officers, to ensure a consistent approach. The Project Team was also advised that improved engagement with all of the political groups around the operation of the 'Councillor Queries' portal was to be developed, as only limited attendance had so far been seen at events to promote the use of the portal, and that the councillor queries team occasionally encountered difficulties in obtaining responses to enquiries from some service areas but were working with the relevant Executive Directors to improve this issue. The Service Manager (Customer Services) advised us that efforts also continued to be made to provide responses to enquiries submitted through the 'Councillor Queries' portal, within the five-day service level agreement.

- 6.5 We reviewed data on the level of enquiries submitted through the 'Councillor Queries' portal between August and December 2021, which indicated that the main areas of enquiry related to highways, parks, waste management, regulatory services and licensing. During that period, 1427 enquiries had been received through the 'Councillor Queries' portal, with smaller numbers of queries submitted by councillors through 'My Southend' (131) and Velocity (the corporate portal for the reporting of ICT related issues) (17). It was reported that the level of queries submitted through the 'Councillor Queries' portal had shown a decrease over this period, although it was likely that councillors might be raising queries directly with relevant officers, or through alternative means of contact, in some situations.
- 6.6 The Project Team considered that it was important that appropriate guidelines were in place so that councillors were clear on the best approach to use when raising enquiries, particularly when these often contained personal or sensitive information, or might concern safeguarding matters, and that members needed to exercise judgement on the best means of contact given the circumstances of specific enquiries. The Service Manager (Customer Services) advised the Project Team that the Customer Care Team also exercised judgement in terms of the 'urgency' allocated to specific enquiries received from councillors.
- 6.7 The Interim Executive Director (Strategy, Change and Governance) indicated that member support arrangements (including the 'Councillor Queries' portal) was part of the ongoing corporate review of business support functions, which would also consider the need for the provision of dedicated support for councillors and options to support member casework through the procurement or in-house development of appropriate casework management arrangements.
- 6.8 The Project Team suggested that arrangements for the improvement of existing reporting arrangements of local incidents by councillors over weekends, bank holidays and at times of other significant national or local events should be investigated, and that details of the 'Gold' command arrangements for response to an emergency or major incident available to councillors, needed to be updated. We consider that it is essential that appropriate officers of the Council and representatives of key service areas are always available given the nature of Southend as a 'weekend' destination. We consider that this information could usefully be available on the area of the new intranet proposed to be dedicated to the provision of information for councillors.
- 6.9 We support the continued use of the 'Councillor Queries' portal and consider that the Council should continue to pursue the introduction of appropriate enhancements to the portal.

7. OFFICER/COUNCILLOR ENGAGEMENT

- 7.1 We recognise that councillors and officers are indispensable to one another and mutual respect and communication between both is essential for good local government. Together, councillors and officers bring the critical skills, experience and knowledge required to manage an effective public sector organisation.
- 7.2 Although elements of the work programme for the in-depth scrutiny project contained proposed activity relating to officer/councillor engagement, we have requested the Interim Executive Director (Strategy, Change and Governance) to ensure that these aspects of the project instead be aligned with the separate work being undertaken with all councillors to implement the actions arising from the review of the Member/Officer Protocol in 2021, to avoid duplication of effort in the completion of the project by the Project Team.
- 7.3 We have therefore made no specific recommendations on this aspect of the work programme for the in-depth scrutiny project.

8. COUNCILLOR CASEWORK & SUPPORT

(a) Casework Management

- 8.1 At the meeting of the Project Team in March 2022, we received a presentation from the Interim Executive Director (Strategy, Change and Governance) with regard to current and future member casework management arrangements.
- 8.2 Dealing with enquiries from local residents is a key part of a councillor's democratic role and a significant large part of Members' time is spent responding to enquiries from the public. We considered that being able to deal with residents and understand the issues and concerns they faced, whilst being equipped with the skills, confidence and ability to take action in response to their queries, was an important and valued role of councillors. The issues that local people raise with councillors are often referred to as 'casework' and usually deal with the resolution of an individual problem.
- 8.3 The Project Team considered examples of the types of contact with councillors that could be regarded as 'casework', which can arise from a variety of sources:
- Letters, phone calls, email and social media.
 - Councillor surgeries, advice sessions and doorstep calls.
 - Campaigning and other political activity
- 8.4 Dealing with casework requires councillors to develop and maintain their own arrangements for managing information and tracking progress. The amount of casework that a councillor receives depends on the nature of the area they represent, although research suggests that the higher the level of deprivation in an area, the more casework there is likely to be. We consider that the Council currently only provides very limited casework support facilities for councillors and that there is room for improvement in current arrangements for handling casework.
- 8.5 We believe that it is important to be able to define what 'casework' means to the Council, but that this could include any query made to a councillor or any query that a councillor might have but might also include helping people to help themselves to avoid members taking on too much personal responsibility in seeking to resolve matters for constituents. We received a copy of guidance published by the Local Government Association in 2017 in relation to effective councillors and the handling of casework, which we found to be helpful.
- 8.6 We received initial details of two commercial casework management systems that were currently in use by other local authorities. Members considered that it was important to

ensure that, whilst any adopted casework management system enabled councillors to securely track and manage constituent casework efficiently and effectively, it was essential that any such system was compatible with the Council's existing ICT infrastructure and could integrate fully with other relevant systems in use across the authority. The Project Team was advised of the general findings of discussions in respect of casework management systems that Councillor Cowdrey had undertaken with other councillors across the country and suggested that it would be beneficial for access to specific cases within any adopted system, to be able to be shared between ward members. Councillors also highlighted the need for any adopted casework management system to be fully compliant with data protection legislation.

- 8.7 In terms of the resource implications of the procurement and implementation of a casework management system for councillors, the Interim Executive Director (Strategy, Change and Governance) indicated that it would be important to consider whether the development of an appropriate facility could be managed in-house or alongside existing member support arrangements and that it would also be necessary to identify capacity within the ICT Section to implement any adopted system, as well as efficiencies that could be generated through the adoption of a casework management system and its delivery as part of the ongoing review of existing business support arrangements across the Council.
- 8.8 We strongly believe that the implementation of a casework management system would significantly improve the effectiveness of councillors through the provision of a more efficient service to residents and would make casework easier to deal with for both councillors and officers. The introduction of such a system would also supplement the Council's ability to identify patterns and themes around issues of service provision or performance.
- 8.9 If an appropriate casework management system is introduced, we consider that it will be necessary to encourage all councillors to fully utilise the facility. Additional training may be required for members and for those officers across the Council who will be required to support the roll-out and operation of the system. The introduction of a casework management system arising from the recommendations of the Project Team will, if endorsed by the scrutiny committees and agreed by the Cabinet, lead to significant investment and commitment to strengthening the quality of service and experience for councillors. The success of this work will be partly dependent upon all councillors using the proposed casework management arrangements.
- 8.10 We suggest that it might be appropriate for any adopted system to be rolled-out on a phased basis. We also consider that it is important that a range of accessible channels are always made available to facilitate contact with councillors, including support for members of the public and constituents that might not be able to utilise electronic or web-based methods of contact.
- 8.11 The Project Team considered that it would be beneficial to councillors in terms of supporting them in the effective handling of constituency casework, for a regular survey (or similar) exercise to be undertaken to assess current casework levels and the type and nature of resident queries received by councillors. We also supported a suggestion that a comprehensive 'library' of frequently asked questions (FAQs) could be developed for councillors, as a means of supporting members to deal with common types of issue raised by the public and constituents, and that such facility could also provide for the development of 'model' responses/answers to frequently raised issues.
- 8.12 The Project Team considers that the Council should therefore pursue the introduction of an appropriate web-based system to facilitate effective casework management arrangements, through the development of a fully costed business case for the adoption of the eCasework casework management system.

(b) Member Support Arrangements

- 8.13 The Project Team also reviewed options presented by the Interim Executive Director (Strategy, Change and Governance) for the future provision of member support arrangements, arising from opportunities and efficiencies identified by the corporate review of business support arrangements.
- 8.14 We believe that the Council should seek to improve the effectiveness of councillors through the development of enhanced member support arrangements to provide administrative assistance to all councillors to enable them to be effective within their roles. We consider that the establishment of any new resource for councillors should provide support for all members of the Council, alongside specific support services for the Leader and Cabinet, across areas such as casework activity, learning and development, communications and service signposting etc.
- 8.15 The Project Team expressed support for an option presented by the Interim Executive Director (Strategy, Change and Governance) for the establishment of a member support team utilising resources identified by the review of business support arrangements, based on a Member Support Office structure. In supporting this approach, we requested that any such member support team should be located in the existing members area of the Civic Suite once established and have a 'visible' on-site presence at all times, whilst also accepting the ongoing principle of remote working arrangements. The Interim Executive Director (Strategy, Change and Governance) advised that appropriate training would need to be provided for officers of the member support team in order that it could function effectively in support of all councillors.
- 8.16 We also considered whether the establishment of a new support resource for councillors should include any form of political assistant service. Whilst we recognise the potential value of political assistants to undertake research activities for the main political groups within a local authority and allow the separation of professional officer and political roles to enable the provision of advice to councillors that officers are prevented from providing as a result of political restriction, we do not consider that this approach would be appropriate or necessary for the Council at the current time.
- 8.17 We consider that the introduction of a dedicated member support team would also help to improve the effectiveness of councillors and that the Council should pursue the introduction of the proposed member support arrangements for all members of the Council.

9. CROSS-SERVICE, EXTERNAL PARTNERS AND OUTSOURCED SERVICES

- 9.1 At our meeting in March 2022, we also considered the aspect of the work programme theme around 'Cross Service, External Partners and Outsourced Services'.
- 9.2 We were keen to ensure that appropriate arrangements were in place to ensure that enquiries received from local residents that concerned services provided by partner organisations or other external agencies, are always passed on seamlessly rather than being referred back as not the responsibility of the Council.
- 9.3 The Interim Executive Director (Strategy, Change and Governance) advised us that it was intended that the establishment of the dedicated member support resource supported by the Project Team as part of our consideration of the future provision of member support arrangements, would help to deliver the aspiration of the in-depth scrutiny project that queries concerning services provided by other organisations were effectively handled through a 'right first time' approach. The Interim Executive Director (Strategy, Change and Governance) indicated that it was equally important for officers of the Council to be aware

of how queries concerning services provided by external organisations should be handled and that appropriate training would therefore need to be provided around the establishment of the new member support resource to ensure that officers had ready access to appropriate information on service provision by the Council and other organisations.

- 9.4 Whilst we recognised that the establishment of the dedicated member support resource would help to ensure that queries concerning services provided by other organisations were dealt with on a 'right first time' approach, we consider that going forward, efforts should also be made to continue to improve customer engagement experiences through the integration of relevant systems with those of the Council and its service providers, as part of the procurement or replacement of relevant systems.
- 9.5 We considered that it was important that the Council was able to respond flexibly to queries that involved external organisations and that responses were coordinated with other organisations involved in a particular issue, where appropriate. We suggested that the proposed development of a library of frequently asked questions and model responses proposed as part of our discussions around the introduction of a casework management system for councillors, would also help to support members to deal with issues that involved services provided by external organisations.

10. ENABLING NON-ALIGNED COUNCILLORS

- 10.1 The work programme for the in-depth scrutiny project made provision for the project to ensure that non-aligned councillors had the ability to be effective and to identify any barriers that restricted the ability of non-aligned councillors to represent residents effectively, through discussion with non-aligned councillors.
- 10.2 As a result of the delay caused to the progress of the in-depth scrutiny project as a result of the unfortunate local events of October 2021, it was not possible for us to complete this aspect of the work programme before the end of the municipal year. However, representation on the Project Team by a non-aligned councillor was maintained throughout the delivery of the in-depth scrutiny project and no specific issues in this regard were brought to the attention of the Project Team for consideration.
- 10.3 We are aware that the allocation of seats on the Council's committees etc. is undertaken in accordance with Sections 15 and 17 of the Local Government and Housing Act 1989, whereby the authority is required to allocate seats to 'political groups' and that non-aligned councillors are not therefore included in the calculation for the allocation of seats on committees.
- 10.4 Our recommendations later in this report in respect of councillor casework and member support, recognise the need for effective support services to be provided for all councillors.
- 10.5 The provision of support and assistance to all councillors applies equally to those members that are not aligned to a political (or other) group on the Council. We consider that the identification of barriers that restricted the ability of non-aligned councillors to represent residents effectively could therefore be raised as part of the separate ongoing review currently being undertaken of the Council's Constitution, to which all members have an opportunity to contribute.

11. OTHER ISSUES

- 11.1 At the meeting of the Project Team in April 2022, we considered several matters that arose from previous consideration of aspects of the work programme for the joint in-depth scrutiny project:

(a) Intranet

- 11.2 The intranet is the private internal network used by the Council to store information and to help collaboration. We received a presentation from the Strategic Communications Manager and the Internal Communications Officer with regard to current plans for the development of the Council's new intranet, which went live in early May 2022.
- 11.3 The Project Team recognised that the previous intranet was not now fit for purpose, as it didn't serve multiple audiences in an intuitive way and, with particular relevance to the in-depth scrutiny project, did not have a dedicated section for the provision of information for councillors. We were advised that the current intranet facility could not be accessed 'on the move' and that the existing platform was old, unsupported by Microsoft, and had significant limitations. We had also received concerns from councillors that the internal telephone directory facilities within the current intranet were not fit for purpose.
- 11.4 We were advised that action to ensure that the contact telephone numbers and email addresses of all officers of the Council were available in the internal telephone directory had been addressed as part of the development of the new intranet, which would also act as a repository for the Council's policy documents in order to increase the availability of such policies to members.
- 11.5 The new intranet has been designed to fully support officers and councillors to carry out their roles effectively and incorporates a dedicated and exclusive area for councillors alongside an improved 'active directory' to enable councillors to search for contact details for officers and service areas, together with a range of quick links to enable councillors to find and access information easily. We have been advised that the new cloud-based intranet will be fully integrated with Microsoft 365, Microsoft Teams and other systems, so that officers and councillors will be able to access it on any device where they are logged in and 'on the move.'
- 11.6 We were advised that there were tangible benefits to be achieved from the new intranet, in that it aimed to be much more intuitive and simpler to navigate, particularly around contact details for individual officers and team structures and finding documents and links to specific information. We consider however, that it is important for the new intranet to have an effective search function, to enable the identification of relevant strategies and policies. In this respect, we consider that it is necessary for all strategies and policies to be able to be searched using tags appended to each individual document, and which also contains details of relevant publication/review dates and responsible officers.
- 11.7 The Project Team considers that it would be helpful for the dedicated councillor's area of the intranet to also reflect links to national policy information and contain frequently asked questions with regard to individual service areas. We have also suggested that the intranet should additionally include an expanded 'Councillors' section to provide details of Cabinet membership and portfolio responsibilities, appropriate links to ward profile data and access to the Pentana corporate performance management system.
- 11.8 The Interim Executive Director (Strategy, Change and Governance) has advised us that part of the rationale for the new intranet is that it will become a useful tool to help officers and councillors in delivering services effectively and we welcome the opportunity for councillors to work with officers to develop the new intranet further and to champion its use as a tool for councillors.
- 11.9 We welcome the plans for the replacement of the Council's intranet, including the provision of a dedicated area for councillors. We understand that the new intranet will continue to be developed and would encourage all councillors to use the intranet and to identify whether

the dedicated area for councillors covers everything that members need and whether the addition of further links to specific information should be considered.

(b) 'Your Say Southend'

- 11.10 We received a joint presentation from the Engagement and Participation Manager, the Community Capacity Advisor and the Intelligence Officer (Planning and Compliance), with regard to the 'Your Say Southend' engagement and consultation platform.
- 11.11 The 'Your Say Southend' platform was launched in November 2020 to provide residents with an opportunity to participate in engagement and consultation across Southend-on-Sea. The platform offers residents a way to provide feedback, share ideas and influence decisions that matter to them and to facilitate engagement with individuals that might otherwise be hard to reach. The platform is used to complement, but not replace, traditional face-to-face methods of engagement and consultation activity and is designed to support the outcomes of engagement and consultation based on the following objectives:
- Informing decisions, providing opportunities for the community to contribute to decision-making processes.
 - Building capacity, educating the community on a specific theme or issue to increase knowledge or change behaviours.
 - Strengthening relationships, building new relationships and/or improving relationships with the community.
- 11.12 The 'Your Say Southend' platform can be used to facilitate any form of local engagement, not just formal types of consultation exercise, through the use of tools to gather ideas, create forums and mapping and also helps the Council to establish and share good practice, use resources effectively, maximise the use of consultation findings and to co-ordinate effort and avoid duplication.
- 11.13 We have asked the Engagement and Participation Manager to explore the links between 'Your Say Southend', the Council's Petitions Scheme and the 'My Southend' platform, to improve the journey of local residents through the various portals. We consider that the petition scheme should be signposted within the 'Your Say Southend' platform.
- 11.14 The Project Team understands that, at the time of the development of 'Your Say Southend', it was not possible for the portal to be facilitated as part of an existing platform or via a joint procurement arrangement with the development of 'My Southend.' We have also asked the Engagement and Participation Manager to work with the Director of ICT to review this approach going forward when the contract for 'Your Say Southend' is next due for renewal, to enable consideration to be given to the integration of 'Your Say Southend' and 'My Southend' and the possible development of a joint gateway to these systems.
- 11.15 We have been advised that the sharing of results of consultation and engagement activity will also now be available on the Council's new intranet as well as through the 'Your Say Southend' platform. The Project Team additionally considered that it would be helpful for appropriate benchmarking information to be prepared around the effectiveness of 'Your Say Southend' and for a simple profile of registered users of the platform to be prepared, to support its continued development. We have also suggested that promotion of the opportunities for involvement presented by 'Your Say Southend' should be included within the information booklet produced for inclusion with the annual Council Tax bills.
- 11.16 The Project Team was pleased to be advised by the Interim Executive Director (Strategy, Change and Governance) that the Local Government Information Unit had expressed interest in working with the Council to promote the success of the 'Your Say Southend' platform.

11.17 We welcome and support the continued development of the 'Your Say Southend' platform alongside traditional forms of engagement and consultation and would encourage all councillors to consider how best they can use the platform to support local engagement and consultation activity. Relevant officers have indicated that they would be able to provide a one-to-one demonstration of the uses of the platform to any councillor that would appreciate this.

12. RECOMMENDATIONS

12.1 We consider that the review was undertaken within the context of the Council's 2050 ambition and priorities and that, whilst allowing for the impact of the local circumstances that arose in October 2021, the proposed outcomes for the project have been achieved.

12.2 We have identified some 'quick wins' in terms of aspects of the work programme for the in-depth scrutiny project as set out in this report, alongside other substantive recommendations to improve the effectiveness of councillors. We therefore recommend as follows:

'My Southend'

- (1) That the current plans for the replacement and improvement of the 'My Southend' interactive self-service portal for residents be welcomed.
- (2) That the Director of Digital and ICT and the Head of IT Delivery progress the holding of appropriate engagement and evidence gathering sessions for councillors to inform the development of the specification for the replacement of the 'My Southend' portal.
- (3) That the Director of Digital and ICT and the Head of IT Delivery investigate the possible rebranding of the 'My Southend' portal to complement appropriate opportunities for corporate rebranding as part of the award of city status to Southend-on-Sea.

Website

- (4) That progress to date and current plans for the further development of the Council's website be welcomed.
- (5) That the Strategic Communications Manager investigate appropriate opportunities for the provision of user feedback as part of the updated website experience. To inform the further improvement of the website
- (6) That the Strategic Communications Manager consider whether the presentation received by the Project Team should be made to the wider cohort of councillors and, if appropriate, to newly elected members of the Council as part of the member induction process.

Resident Queries and Experience

- (7) That the suite of the Council's policy documents be published on the website and/or intranet and that arrangements be made for specific policy documents to be provided to councillors on request.
- (8) That the Interim Executive Director (Strategy, Change and Governance) investigate appropriate opportunities for the holding of a regular member survey to assess casework levels and the type and nature of resident queries received by councillors.

Councillor Queries

- (9) That the current performance of the 'Councillor Queries' arrangements for members be noted and that the plans for the development of the portal as part of the proposed introduction of a casework management system for councillors, be supported.
- (10) That the Service Manager (Customer Services) consider options for the possible development of a 'template' form for enquiries submitted through the current 'Councillor Queries' portal, for use until a casework management system for councillors has been implemented.
- (11) That the Interim Executive Director (Strategy, Change and Governance) progress the proposed improvements to the 'Councillor Queries' arrangements, that we have outlined in this report.
- (12) That the Interim Executive Director (Strategy, Change and Governance) and the Service Manager (Customer Services) consider options for improved reporting arrangements of local incidents by councillors, over weekend and bank holiday periods and the inclusion of appropriate contact information on the proposed councillor's area of the new intranet.

Casework Management

- (13) That options for the development of a comprehensive library of frequently asked questions and 'model' responses/answers to support members to deal with common types of issues, be investigated.
- (14) That the implantation of a casework management system for councillors be progressed and that the Interim Executive Director (Strategy, Change and Governance) undertake the development of a fully costed business case for the adoption of the eCasework casework management system.
- (15) That the Interim Executive Director (Strategy, Change and Governance) progress the areas of functionality for the implementation of a casework management system that we have outlined in this report, as part of the development of the business case for the eCasework casework management system
- (16) That the Director of ICT and Digital consider options for the possible in-house development of an appropriate casework management system and the integration of such in-house or externally procured system with the Council's ICT infrastructure and relevant systems already in use by the Council to support councillor casework.

Member Support Arrangements

- (17) That the proposed establishment of a new support resource for all councillors and the suggested support offer based on a Member Support Office structure, be endorsed.
- (18) That the Interim Executive Director (Strategy, Change and Governance) progress the development of a business case for the new support resource for councillors as part of the corporate review of business support arrangements.
- (19) That the Interim Executive Director (Strategy, Change and Governance) include the preferences expressed by the Project Team for the location of the new support resource for councillors, within the development of the appropriate business case.

- (20) That the proposed new support resource for councillors should not include any form of political assistant service.

Cross Service, External Partners and Outsourced Services

- (21) That the establishment of the proposed member support resource supported by the Project Team at Recommendation (17) above, be utilised to deliver the aspiration of the in-depth scrutiny project that enquiries concerning services provided by the Council and relevant external organisations are handled seamlessly.
- (22) That, wherever possible, customer engagement experiences be improved through the integration of relevant systems with those of the Council and its service providers, as part of the procurement or replacement of relevant systems.

Enabling Non-Aligned Councillors

- (23) That the identification of barriers that restrict the ability of non-aligned councillors to represent residents effectively, be considered as part of the review currently being undertaken of the Council's Constitution.

Intranet

- (24) That progress to date and current plans for continued development of the new intranet, including provision for the incorporation of a dedicated area for councillors, be welcomed.
- (25) That the Interim Executive Director (Strategy, Change and Governance) progress the proposed additional areas of functionality for the new intranet, including matters for inclusion within the dedicated area for councillors, that we have outlined in this report.
- (26) That all councillors be requested to consider whether the dedicated councillor area of the new intranet covers everything that members need and whether the addition of further links or access to specific documents should be implemented.

'Your Say Southend'

- (27) That progress to date and current plans for the continued development of the 'Your Say Southend' engagement and consultation platform, be supported.
- (28) That the Interim Executive Director (Strategy, Change and Governance) progress the proposed additional areas of functionality for the platform, that we have outlined in this report.
- (29) That all councillors be encouraged to promote the use of 'Your Say Southend' as an opportunity for residents to participate in ongoing engagement and consultation activity.

12.3 Although the scope of the in-depth scrutiny project provided an opportunity for it to feed into the review of the Constitution where relevant, we have made no specific recommendations on constitutional matters as part of our work.

12.4 We have similarly made no recommendations around councillor development, which is currently being considered as part of the leadership programme, although some of the recommendations that we have made will have implications for ongoing training and

development requirements for councillors, particularly in terms of induction arrangements for new members.

Southend-on-Sea City Council

Report of Executive Director for Adults and Communities

To
Cabinet
On 26 July 2022

Report prepared by: Scott Dolling,
Director for Culture and Tourism

Agenda
Item No.

10

UK City of Culture bid 2029

Relevant Scrutiny Committee(s) Place
Executive Councillor: Councillor Mulroney
Part 1

1. Purpose of Report

- 1.1 To inform Cabinet on the potential opportunities, risks and likely resources required for Southend should it be decided to prepare a bid for the 2029 UK City of Culture competition.

2. Recommendation

- 2.1 That Cabinet agrees to initial research and engagement with the Southend resident community to assess the level of support for a bid to become the 2029 UK City of Culture with a further report back to Cabinet on the outcome of the engagement.

3 Background

3.1 In November 2020 the Council adopted its culture vision strategy setting out its ambitions for the Borough (now City) in relation to culture. Recognising all the benefits that culture brings to a place such as wellbeing, social and economic value and a means to reach communities and subjects in a creative way, the vision engaged with hundreds of residents to develop a truly co-produced base.

3.2 In June 2021 the Council also approved its Culture led Regeneration of the High Street policy.

3.3 In March 2022, Southend was made a city and through its creation and the legacy of Sir David Amess, Culture has been at the heart of commemorations throughout the inaugural City year. A committee comprising council, commercial and cultural members along with both MPs has overseen the city year celebrations which have demonstrated the uniting value of culture in all its forms. This group is of a consistent view that as an onward aspiration for our new city, Southend should work towards becoming the UK City of Culture for 2029.

3.4 The City of Culture initiative has made a lasting and significant change to previous winners (Derry 2013, Hull 2017) . A report by Hull University in March 2018 found Hull's status as the UK City of Culture attracted more than five million people, £220 million of investment and 800 new jobs. The impact of the city of culture was felt far beyond the obvious arts and creative sector and demonstrated a renewed confidence to Hull and improved economic and social value (report on link) [University of Hull reveals UK City of Culture 2017 evaluation | University of Hull](#) .

3.5 Since 2009 there have been 71 expressions of interest in the UK City of Culture programme. 44 places have submitted full bids; 17 cities and regions have been shortlisted and 4 awarded the UK City of Culture title. The majority of the shortlisted and title cities and regions are younger, more diverse, and have higher levels of multiple deprivation than the UK average.

3.6 The value of the competition is on an upward spiral and the most recent City of Culture, Coventry in 2021 is still receiving national media coverage. The benefits from the positive impact of success are increasingly measurable far beyond an economic perspective and demonstrated through regeneration, social change, and civic pride.

3.7 In May 2022 Bradford was announced as the winner of the 2025 competition and now begins three years of preparations to fulfil its bid ambitions. Bradford allocated £1.4M over 3 years to develop its winning bid. This level of commitment and resource adds further evidence of the increased value that winning the competition brings.

3.8 However, against these levels of return on successful bids and the rewards that winning the competition can bring, we also need to analyse the unsuccessful bidders and what, if any, uplift just making the bid made to their economic and cultural wellbeing.

3.9 Southend's MPs arranged a fact finding initial meeting for the Council with the Department for Culture. It was established that all bids to date have had very different perspectives and focused on addressing the individual circumstances set out by the bidding city. The relevant council in all cases would need to take a civic lead in such bids, but the wider community's involvement is essential too. This would need to be demonstrated in both participation, funding and in-kind support. The bidding process itself provides a galvanising opportunity for the community to be part of the developing bid and even if not successful, brings significant benefits (see paras 3.4 and 3.6 above)

3.10 The expectation is that a similar process will take place as it did for the 2025 competition with an initial light touch expression of interest. This would be followed by long listing then to short listing of around 6 cities where a worked-up plan and visit by the competition panel would take place. Financial support to deliver the full bid for shortlisted cities may be offered again with £40k. Early preparation work involving the community now would strengthen the later stages in the process.

3.11 The competition will be high as the tangible benefits of culture and this competition are becoming more understood by cities. The process of bidding itself is also shown to demonstrate value for communities to unite and provide focus. (see para 3.6 above)

3.12 A successful bid would attract major investment, media coverage and significant economic outcomes but would need additional resource to facilitate delivery. Other successful cities have allocated multi million-pound investments – though much of this is permanent transformational regeneration in associated public realm projects and cultural assets.

3.13 External funding and in-kind support from interested partners would be needed alongside the council's resources to strengthen the project if progressed to full bid preparation.

3.14 The initial stages will involve engagement with the community to develop ideas and priorities that our residents, creative sector practitioners and partners would like to see achieved.

3.15 The benefits of culture led regeneration are now well documented with LGA report in 2019 (appended) highlighting many aspects from civic pride to health benefits. A bid to the city of culture process whether successful or not is likely to have a positive and long-lasting effect for Southend as a new city and supports the co-production principles set out in our culture vision strategy.

3.16 The impact of cultural regeneration is recognised by central government with the first two Levelling Up fund featuring cultural outcomes as key components for submissions. Progressing towards a City of Culture would enable a cohesive approach to deliver some key milestones towards the regeneration of Southend. However, recent events show that there are other considerations which need to be taken into account in deciding whether or not a bid should be submitted.

3.17 The cost-of-living crisis is deepening and the Council has to seriously consider value for money of a bid submission for the residents of Southend. Increased pressure on public finances is now being experienced and will intensify over the coming months and years coupled with further significant burdens on local authorities.

3.18 The Council should therefore consider the business case in order to be a serious contender for the award and carry out engagement with the community of Southend through an online survey and direct communication with other key stakeholders.

3.19 The Council should also seek the views of cultural practitioners and the business community to gauge the level of support and commitment for a bid and what they and other organisations can contribute in terms of resources and creative approach.

3.20 The Council cannot progress a bid on its own without considerable additional financial and other resources to be a serious contender.

3.21 It should also be noted that if it were decided to bid and the bid was successful this would have a profound effect on the Council's current and future capital investment programme due to the financial and resource input required for both.

4. Other Options

The council could decide not to pursue a city of culture bid without any evidence gathering of the benefits/disbenefits and community engagement. However,

until such time as the outcome of that engagement is known, the Council is unable to make an informed decision.

5. Reasons for Recommendations

- 5.1 The proposal is to reach out to our community to test their appetite before committing significant public finances to progress a bid.

6. Corporate Implications

- 6.1 Contribution to Council's 2050 vision

Pride and Joy, Active and Involved, Opportunity and prosperity, Safe and well, connected and smart.

6.2 Financial Implications

- 6.2.1 There is no direct financial ask at this stage as the proposal is to engage input from the community.

- 6.2.2 Shortlisted cities in previous rounds have been given some financial support (£40k) to develop the full bid.

- 6.2.3 Significant project funding formed part of Bradford's successful bid for 2025, They allocated £1.4M on the bid over the three year period. A successful application would require investment, however major rewards, regeneration, profile and job creation have been evidenced in successful cities.

- 6.2.4 If successful an appraisal and reprioritisation of the Council's current and future capital investment programme will be required.

6.3 Legal Implications

N/A

6.5 Property Implications

N/A at this stage though some of the cultural asset base may need to be a new focus in capital programme if successful.

6.6 Consultation

Co-production of our bid will be essential in these early stages in determining resident's priorities.

6.7 Equalities and Diversity Implications

Co-production would include specific work with diverse community groups to ensure inclusion and relevance across all parts of the community

6.8 Risk Assessment

N/A

6.9 Value for Money

There is no direct impact at this stage.

6.10 Community Safety Implications

N/A

6.11 Environmental Impact

Colleagues and partners will be included to ensure that developing plans take account of environmental considerations and our climate emergency.

Culture-led regeneration

Achieving inclusive and sustainable growth

Forewords

The role that local government plays in the leisure, sports, heritage and culture fields is huge. We all know what huge industries the cultural industries are, as well as the visitor economy. Between them they account for over £200 billion of economic activity.

But we will also know, from our own council budgets, the huge pressure there is on budgets that are seen as ‘non-statutory’ and can therefore be cut.

In 2017/18, the LGA Culture, Tourism and Sport Board decided to look at cultural-led regeneration, so that councils across the country can learn from each other and drive economic success through culture. The more we have looked at this, the greater the variety of ways we have found to achieve it. The UK City of Culture activities in Hull have been a huge success, and in 2021 Coventry will follow. I am sure again it will be a huge success.

Other areas have seen galleries come to Margate, Conwy and Wakefield. Festivals have made a big impact on the economies in Glastonbury, Powys and Great Yarmouth. There are many more examples across the country.

We commissioned this guide to look at many different examples of how this cultural-led regeneration can be done, so councils across the country can look at examples that work for them and possibly do something similar. I am delighted that the Calouste Gulbenkian Foundation has been able to support this important work.

We have looked at different types of councils – urban and rural, unitary, county and district, as well as the wider landscape represented here by the excellent New Anglia Local Enterprise Partnership. We have looked at different types of activity, from those councils using existing assets in different ways, to creating new anchor organisations for cultural regeneration, to festivals and pop-up activities, to strategic planning and skills investment. I hope you will be inspired by the examples found in this guide.

Councillor Gerald Vernon-Jackson CBE

Chairman, LGA Culture, Tourism and Sport Board

At the UK branch of the Calouste Gulbenkian Foundation, we believe that arts and cultural activities can transform the lives of individuals and communities. That's why for more than 60 years we have worked with others to help pioneer new approaches, whether to arts education or participation. From enhancing confidence and skills, to increasing employment and strengthening neighbourhood cohesion, arts and culture are much more than a 'nice to have'. Rather, they are an integral part of community wellbeing and we believe they should touch the lives of everyone.

In 2017, we published the first report from our Inquiry into the Civic Role of Arts Organisations. We know this means different things to different people but, for us, it means arts which are relevant to the lives of people and reflect the places in which they live. It is about relevance, not resilience for its own sake. The inquiry uncovered many examples of the ways arts and culture are transforming places. From festivals enlivening derelict town centres to museum exhibitions bringing in entirely new audiences, it is clear there are rich opportunities to build on these successes and take them further.

We are pleased that local authorities are increasingly recognising the ability of the arts and culture sector to generate positive change in their areas. They play an important role in supporting the civic role of arts organisations, yet this has become more challenging.

Despite very real funding pressures, many councils across England and Wales continue to invest in arts and culture in innovative ways, recognising the social and economic benefits to their local areas.

We have partnered with the Local Government Association (LGA) to capture examples of local authority good practice and innovation and share the lessons from their work. The 15 case studies examined reveal the range of benefits that can be achieved when arts and culture are put at the heart of local activity. They also demonstrate the levels of commitment and energy from communities, local organisations and the private sector to support and collaborate on these kinds of approaches.

This report provides guidance and sets out key considerations for councils and other partners seeking to invest in cultural infrastructure and activity. We hope this publication will encourage more councils to employ a culture-led approach to regeneration in their areas, and lead to yet more arts organisations taking their civic role seriously.

Introduction

Culture-led regeneration as a local policy has been around for many years, but arguably has a higher profile now than at any earlier time. Councils across England and Wales, along with their partners, have competed hard in recent years to be awarded the titles of UK City of Culture, European Capital of Culture and London Borough of Culture. Major national programmes, such as Arts Council England's 'Creative People and Places' and the Arts Council and Heritage Lottery Fund's 'Great Place Scheme', are supporting economic and social regeneration through culture, while the positive force of key cultural institutions and community-based cultural programmes is delivering regeneration outcomes right across the country.

There is now a clear acknowledgement of the social and economic value of the cultural sector, and its ability to deliver growth and drive regeneration. These impacts can range from growth in tourism, creative and cultural sectors, to enhancing individual skills, knowledge and confidence, to strengthening community pride and place image. For example, culture-led regeneration approaches covered by the case studies in this document have:

- facilitated two million annual visitors to Portsmouth's Historic Dockyard, with £51 million of annual visitor spending
- increased community pride for 90 per cent of local audience members in Stoke-on-Trent, as part of the Appetite programme
- created or safeguarded 1,300 jobs by the NewcastleGateshead Initiative in 2017, with 22 new businesses attracted by the initiative's inward investment activities

- generated £40 million of economic impact through the Manchester International Festival across Greater Manchester in 2017.

The Local Government Association (LGA) and Calouste Gulbenkian Foundation are working together to capture local authority good practice in this area. This publication brings together 15 case studies demonstrating different approaches to culture-led regeneration across England and Wales, and the positive impacts they can deliver.

Local government is a major funder of culture and understands local needs, making it well placed to coordinate and deliver outcomes around culture and regeneration. With a context of reducing funding, councils must find innovative ways to use cultural activity and form strategic partnerships to deliver these positive social and economic impacts.

While some of the projects contained in these case studies began before the economic downturn, all have been either partially or fully delivered over the more challenging funding conditions of the last decade, at a time when councils have faced the need to cut core budgets and have found arts and cultural funders also facing tighter budgets. The lessons arising should therefore remain relevant in the current delivery context.

The aim of this publication is to share a better understanding of how culture-led regeneration can be delivered in different ways, the potential economic and social impacts that can be derived from this investment, and how councils and their partners can seek to maximise these benefits in their area.

The economic and social impacts of culture-led regeneration

Through the evidence collected for this study, culture-led regeneration has been shown to deliver a broad range of social and economic impacts, including:

Creating employment

Enhancing community cohesion and pride

Attracting more visitors, boosting the tourism sector

Supporting enhanced resident health

Stimulating town centre footfall, boosting local business

Bringing enjoyment for residents

Stimulating and supporting creative sector growth

Attracting inward investment

Developing the skills, knowledge and confidence of residents

Enhancing the area's image, helping to attract skilled people and business investment

Typology of approach

The case studies in the following sections have been structured in a way which enables transferable lessons to be drawn, and to provide useful insights from a range of different authorities across England and Wales.

The typology of culture-led regeneration approaches adopted in this publication is explained below, and should enable councils to consider a range of approaches for their area.

Individual cultural institutions and attractions

Cultural institutions can act as a hub and driving force for regeneration, often representing a focal point for cultural investment and activity, particularly in smaller towns and rural areas. For some areas, channelling investment through a main cultural hub can be the most effective way to generate economic and social impacts. The case studies we've studied are:

- Dreamland and Turner Contemporary, Margate
- Storyhouse, Chester
- Peckham Levels, Southwark
- Portsmouth cultural infrastructure
- MOSTYN, Conwy.

Community-focused cultural programmes

Revenue-based investment in cultural programmes can deliver very different types of social and economic impacts, often being targeted at areas where engagement with the arts has historically been low. This is likely to have been a key approach used in areas receiving funding from the Arts Council England 'Creative People and Places' scheme or the Heritage Lottery Fund and Arts Council England 'Great Place Scheme'. The case studies studied are:

- Walthamstow Creative Connections, Waltham Forest
- First Art programme, Ashfield, Bolsover, Mansfield and North East Derbyshire
- Appetite, Stoke-on-Trent
- Culture Works, North East Lincolnshire.

Strategic organisation/coordination of cultural activity

Several areas have invested in a long-term strategic body or partnership to coordinate, develop and deliver cultural infrastructure and activities across their area, in order to increase the positive economic and social impacts arising from culture-led regeneration. The case studies studied are:

- NewcastleGateshead Initiative
- New Anglia Local Enterprise Partnership – 'Culture Drives Growth' strategy
- Cornwall 365.

Arts/cultural festivals

Recurring arts festivals often act as a focal point for culture-led regeneration in a range of urban and rural areas. The motivations for delivering festivals will differ depending on context, and the economic and social impacts generated can depend on what these motivations are, and whether the festival has been designed and delivered to maximise economic and social benefits. The case studies studied are:

- Manchester International Festival
- Out There international festival of street arts and circus, Great Yarmouth
- Green Man Festival, Powys.

Case studies

Individual cultural institutions and attractions

A more detailed overview of each case study can be found at www.local.gov.uk/culture-led-regeneration

Dreamland and Turner Contemporary, Margate

Thanet District Council responded to active community campaigns to restore and develop major cultural and visitor attractions in Margate.

300 jobs supported directly and indirectly by Dreamland and the Turner

1 million new visitors to Margate directly due to the Turner Contemporary

19% tourism growth between 2013-15, with annual tourism value rising to £293 million

Peckham Levels, Southwark

Southwark Council identified and enabled the transformation of an underused multi-storey car park into a major cultural and creative hub and workspace.

over 450 full-time and part-time jobs supported within Peckham Levels

20% of studios rented on less-than-market rent to support creative start-ups

helping to **boost Peckham's cultural identity** and attracting new visitors to the area

Storyhouse, Chester

An innovative cultural centre in the heart of Chester with an award-winning design, focused on encouraging the community and visitors to spend time there.

1 million visitors recorded one year after opening

15% increase in footfall in key location in Chester city centre attributed to Storyhouse opening

100 full-time, part-time and casual staff, plus 160 volunteers

Portsmouth cultural infrastructure

Portsmouth City Council has led or supported cultural investment over two decades to transform closed naval sites into a major visitor and employment hub.

250 full-time equivalent jobs supported at Portsmouth Historic Dockyard

2 million annual visitors, spending £51 million each year

Spinnaker Tower used extensively in Portsmouth marketing and to attract inward investment

MOSTYN Gallery, Conwy

With support from Conwy County Borough Council, MOSTYN Gallery completed a refurbishment in 2010 and now acts as an important community, visitor and creative/cultural sector hub.

generates over **£600,000 of economic value** in the local area each year

over 100,000 annual visits, with two-thirds of visitors from outside the local area

5,000 learners engaged in the education programme each year

Case studies

Community-focused cultural programmes

A more detailed overview of each case study can be found at www.local.gov.uk/culture-led-regeneration

Appetite, Stoke-on-Trent

The three-year 'Appetite Stoke' programme has engaged more people in arts and culture, helping to boost local pride, town centre footfall and perceptions of Stoke-on-Trent.

100,000 more day visitors to Stoke-on-Trent in 2016

2/3 of the budget spent in the local area, directly supporting local jobs

audience feedback shows 90% felt an increase in community pride

Culture Works, North East Lincolnshire

Set up by grassroots cultural organisations, Culture Works has provided leadership and coordination for the sector and worked with the council to push culture up the local political agenda.

£3.8 million secured for cultural regeneration

attracting **new visitors** through events such as the Grimsby Arts Festival

developing a more distinctive identity for North East Lincolnshire

Walthamstow Creative Connections, Waltham Forest

Waltham Forest Council is currently delivering a three-year cultural programme with a focus on demonstrating how culture can improve people's quality of life, their wellbeing and their prosperity.

a commitment to spend at least half of the programme budget in the local area, which will support local jobs

support for community-level culture, micro-projects and large-scale events designed to bring communities together

using culture as part of the approach to **tackling health conditions** such as early-onset dementia

First Art programme, Ashfield, Bolsover, Mansfield and North East Derbyshire

First Art has delivered over 200 events in former Derbyshire and Nottinghamshire coalfield areas, delivering social and economic benefits in areas where arts engagement is historically very low.

80,000 people engaged across 200 events in 2015-17

high-quality cultural activity delivered in local areas, increasing community pride and cohesion

joining up a network of cultural organisations to share knowledge and reach new audiences

Case studies

Strategic organisation/ coordination of cultural activity

A more detailed overview of each case study can be found at www.local.gov.uk/culture-led-regeneration

NewcastleGateshead Initiative

Since its set-up in 2000, the Newcastle Gateshead Initiative has spearheaded strategic project delivery and marketing to visitors and investors, with cultural activity at the heart of this work.

Newcastle-Gateshead attracts **17 million visitors** per year

22 new businesses attracted to the area in 2017, creating or safeguarding 1,300 jobs

Great Exhibition of the North expected to add **£184 million** to the local economy

Cornwall 365

Cornwall 365 has spearheaded an innovative approach to marketing Cornwall as a distinctive cultural destination, supporting growth in the visitor, cultural and creative sectors.

1/3 of the £165,000 annual budget spent with local artists and businesses

2/3 of businesses attracted more visitors as a result in engaging with Cornwall 365

cultural sector development including cross-marketing between attractions

New Anglia Local Enterprise Partnership – ‘Culture Drives Growth’ strategy

New Anglia Local Enterprise Partnership (LEP) is supporting sector leadership and employing innovative approaches to support local economic growth through its creative and cultural sector strengths.

349 cultural and creative individuals or businesses supported through StartEast

16% rise in the number of cultural tourists visiting the region

cross-sector economic growth through work to develop collaboration between the cultural and technology sectors

Case studies

Recurring arts/cultural festivals

A more detailed overview of each case study can be found at www.local.gov.uk/culture-led-regeneration

Manchester International Festival

Manchester's biennial festival has attracted major artists and delivered large-scale and innovative events and activities, which have put the city on the national and international cultural map.

total economic impact of **£40 million** across Greater Manchester in 2017

300,000 attendees, creating a spending boost for city centre businesses and the tourism sector

over 4,000 people engaged in the creative learning programme through 68 education providers

Green Man Festival, Powys

Running since 2003, the Green Man Festival has attracted 20,000 visitors a year to Powys, as well as providing training, promoting local food and drink suppliers and fundraising for local causes.

over 20,000 attendees, 5% from outside the UK

1/2 of the visitors also visit an additional site or attraction in Wales

the 'settler's pass' **generates £500,000 per year** for the local tourist and retail economies

'Out There' international festival of street arts and circus, Great Yarmouth

An annual street arts and circus festival attracting more than 40,000 attendees to Great Yarmouth every September, supporting the visitor economy and creative sector development in the town.

the festival created over £1.1 million of total economic activity in 2017

more than 40,000 participants attended, including 2,000 overnight stays in paid accommodation

supports skills development for circus and street arts performers through new facilities at Drill House

Lessons learnt and relevance for local authorities across the UK

The case studies collected here demonstrate the broad range of quantifiable economic and social benefits that can arise from investing in cultural infrastructure and activity, as well as the enormous energy and resource existing in communities, local organisations and the private sector to support this.

For councils or other partners seeking to do more to employ culture-led regeneration approaches in their area, the report can help in considering four key questions to support that strategy or planning process.

Which economic and social impacts are highest priority for your area?

This report has demonstrated the broad range of economic and social impacts that can be achieved through culture-led regeneration approaches. Identifying which are the greatest priorities for your area is important in considering the most appropriate strategic approach to investing in culture. The list below summarises those key impact types:

- creating employment
- attracting more visitors, boosting the tourism sector
- stimulating town centre footfall, boosting local business
- stimulating and supporting creative sector growth
- enhancing the area's image, helping it attract skilled people and business investment

- developing the skills, knowledge and confidence of residents
- enhancing community cohesion and pride
- supporting enhanced resident health
- bringing enjoyment for residents.

What are the strengths you can build on, or weaknesses you want to address, in delivering culture-led regeneration?

Every local authority area starts from a different base in terms of cultural infrastructure and existing activities, so the most appropriate approach to culture-led regeneration will depend on a baseline understanding of these strengths and weaknesses. Based on the case studies set out in this document, this analysis might consider the factors below:

- existing cultural institutions and attractions
- available buildings/infrastructure which could house cultural/creative activities
- creative/cultural sector business base
- visitor economy business base
- existing annual investment in cultural activity from the local authority, Arts Council, national portfolio organisations or other partners
- existing arts and culture festivals and events

- historic arts and cultural associations with the area
- levels of cultural participation among residents
- culturally-engaged community groups
- local appetite for volunteering
- existing culture/tourism partnership structures.

Which approaches to culture-led regeneration might be most effective?

The case studies in this document have been set out under four different types of approach to investing in culture-led regeneration. For some areas, one of these approaches may be suitable; for other areas, two or more may be employed together, and in some areas an entirely different approach may be used.

By having clarity about the most important impacts to be achieved in the area and an understanding of the existing relevant strengths and weaknesses of the area, it may be easier to develop and deliver approaches that can have greatest local impact. The tables below summarise the common impacts delivered by each culture-led regeneration approach considered in this report.

Cultural institutions and attractions

Impacts	Examples from case studies
Creating employment	<ul style="list-style-type: none"> • 300 jobs are supported by Margate's Dreamland and Turner Contemporary, including direct jobs as well as jobs supported in their supply chain and through induced spending effects. • 450 full- and part-time jobs are supported in the creative and cultural workspace at Peckham Levels.
Stimulating town centre footfall, boosting local business	<ul style="list-style-type: none"> • Footfall counts around Chester Storyhouse show a 15 per cent increase following the opening of the venue. • Through enhancing area image, Peckham Levels has helped attract new visitors to Peckham town centre which will increase town centre spend.
Attracting more visitors, boosting the visitor economy	<ul style="list-style-type: none"> • The Turner Contemporary has attracted almost one million extra visitors to Margate since 2011 who would not otherwise have visited. • The range of attractions developed at Portsmouth Historic Dockyard now attract two million annual visitors.
Stimulating and supporting creative sector growth	<ul style="list-style-type: none"> • 20 per cent of studios at Peckham Levels are rented at around one-third of market rent on a six to 12-month fixed term lease, to support start-ups. • MOSTYN gallery in Llandudno acts as an important sales outlet for the local creative sector, through showcasing in gallery exhibitions and sales in the shop.
Enhancing the area's image, helping it attract skilled people and business investment	<ul style="list-style-type: none"> • Following major cultural investments, Margate is now strongly associated with artists by visitors to the town, and is attracting new investment, including Tracy Emin's new studio. • The Portsmouth cultural infrastructure investments have helped to catalyse new investment in this area of town, including the Ben Ainslie Racing HQ.
Developing the skills, knowledge and confidence of residents	<ul style="list-style-type: none"> • Chester's Storyhouse has 160 volunteers supporting the venue and benefitting from training and enhanced confidence. • 5,000 learners engaged annually through MOSTYN's education programme delivered to pupils, students and lifelong learners.

Community-focused cultural programmes

Impacts	Examples from case studies
Enhancing community cohesion and pride	<ul style="list-style-type: none"> • 90 per cent of attendees to the Stoke-on-Trent's Appetite programme felt an increase in community pride as a result of attendance. • First Art has brought together communities, often in geographically isolated areas, through high-quality local cultural activity.
Stimulating and supporting creative sector growth	<ul style="list-style-type: none"> • Walthamstow Creative Connections has sought to support local creative business growth and provide creative sector skills/apprenticeships for individuals, especially young people. • Culture Works in North East Lincolnshire has supported knowledge sharing, joint working and cross-promotion of arts and cultural activities within the sector.
Stimulating town centre footfall, boosting local business	<ul style="list-style-type: none"> • The Stoke-on-Trent Appetite programme saw a 20 per cent increase in city centre footfall on the weekend of the Big Feast Festival. • Through support for larger-scale activity such as the Grimsby Arts Festival, Culture Works will increase town centre footfall.
Creating employment	<ul style="list-style-type: none"> • Walthamstow Creative Connections has a commitment to spend 50 per cent of the £1.4 million programme budget in the local area, supporting local jobs. • The Stoke-on-Trent Appetite programme aimed to spend around two-thirds of the £3 million programme budget in the local area, supporting local jobs.
Bringing enjoyment for residents	<ul style="list-style-type: none"> • First Art has engaged 80,000 people across 200 events during 2015-17, supporting enhanced wellbeing and quality of life. • 500,000 people were engaged in the first six months by Walthamstow Creative Connections, enhancing local resident quality of life.
Supporting enhanced resident health	<ul style="list-style-type: none"> • Walthamstow Creative Connections has invested in targeted programming, using culture as part of the approach to tackling health conditions such as early-onset dementia.

Strategic coordination of cultural activity

Impacts	Examples from case studies
Attracting more visitors, boosting the tourism sector	<ul style="list-style-type: none"> • The NewcastleGateshead Initiative secured the Great Exhibition of the North to the area, which is expected to generate £184 million economic value in the area. • Two-thirds of businesses engaging with the Cornwall 365 project attracted more visitors as a result of their engagement.
Stimulating and supporting creative sector growth	<ul style="list-style-type: none"> • 235 cultural and creative individuals or businesses were supported through the New Anglia LEP culture board's StartEast programme. • Cornwall 365 has helped support cultural sector skills development, better coordinated marketing and more cross-marketing between cultural and tourist attractions.
Enhancing the area's image, helping it attract skilled people and business investment	<ul style="list-style-type: none"> • Inward investment secured by the NewcastleGateshead Initiative helped create or safeguard 1,300 jobs in 2017, supported by the image and offer of the area's cultural facilities.

Recurring arts and cultural festivals

Impacts	Examples from case studies
Attracting more visitors, boosting the tourism sector	<ul style="list-style-type: none"> • There were 300,000 attendees at the 2017 Manchester International Festival, providing a major spending boost for the tourism sector. • Green Man Festival supported £0.5 million additional economic impact (gross value added) beyond the festival site, as a result of their programme encouraging people to extend their stay to one week.
Stimulating and supporting creative sector growth	<ul style="list-style-type: none"> • Over 4,000 people engaged in Manchester International Festival's creative learning programme, enthusing a future generation of artists and creatives. • The Out There Festival provides inspiration, networking and skills development for circus and street arts performers, particularly through the new facilities at Drill House.
Developing the skills, knowledge and confidence of residents	<ul style="list-style-type: none"> • Green Man Festival runs programmes to train and mentor vulnerable young adults, and has 100 local volunteers working at the festival each year. • 450 volunteers support the Manchester International Festival, all receiving training, and many learn new skills and build confidence.
Enhancing community cohesion and pride	<ul style="list-style-type: none"> • The Out There Festival aims to develop a stronger sense of vibrancy in Great Yarmouth, enhancing the external image and sense of community pride in the town.
Enhancing the area's image, helping it attract skilled people and business investment	<ul style="list-style-type: none"> • 88 per cent of attendees felt the Manchester International Festival strengthened Manchester's status as a world-class cultural city.

What lessons can we learn in delivering culture-led regeneration?

The case studies have revealed a range of useful lessons and good practice in delivering culture-led regeneration that can help councils, councillors and their partners to derive greatest benefit from their investment in this area. A selection of these are summarised below.

A shared vision is an important foundation

Delivering economic and social regeneration through any approach requires the input and buy-in of a wide range of public, private and third sector partners. Development of a shared vision and action plan with partners can be critical to realising ambitions.

- The development of a shared vision was seen as a critical foundation for successful delivery of the long-term regeneration of Portsmouth Harbour, which required the energy, skills and commitment of a wide range of organisations.
- Developing a shared strategy and action plan across partners was recognised as critical by the New Anglia LEP culture board. The 'Culture Drives Growth' strategy builds on the assets and capabilities of a range of partners to achieve common goals.

The cultural offer needs to be authentic

Several of the case studies have developed attractions, events and festivals that paid close attention to the history and heritage of their area, building on these as a foundation for a cultural offering that felt authentic. This was seen as important to visitors who want to feel a genuine sense of place, but also residents who wanted their cultural offering to be a true reflection of their place and a source of local pride.

- Portsmouth's cultural infrastructure investments provide a coherent set of naval-related attractions, building on the history of this area of the city.
- Out There took inspiration from the performative history of Great Yarmouth,

helping to make the event feel authentic and secure greater community buy-in and local pride in the festival.

Councils may need to commit to cultural investment over the long term

Many of the case studies demonstrate that significant culture-led regeneration impacts have only followed on from long-term planning and commitment by the council(s) and its (their) partners.

- In Margate, it was 10 years between the formation of the Turner Contemporary organisation and its opening, and 12 years between the formation of the 'Save Dreamland' campaign and its reopening.
- The NewcastleGateshead Initiative has continued to receive significant core funding from the two councils, even during the current challenging funding climate, reflecting their long-term commitment and the value they recognise that the body generates.

Councils can employ different operational models

Local authorities can play a range of different roles in delivery of culture-led regeneration approaches, which require different levels of resource investment, and which equally offer different levels of control or influence.

- Walthamstow Creative Connections is being directly delivered by the council, in collaboration with other external partners.
- Southwark Council owns and lets Peckham Levels, so is not involved in day-to-day operations, but has a place on the board to retain the ability to influence the development of the facility.
- Gateshead and Newcastle councils provide core funding each year to the NewcastleGateshead Initiative and each sits on the board, however this is run independently from the two councils.
- Norfolk and Suffolk county councils provide funding and support for the New Anglia 'Culture Drives Growth' strategy, but delivery is coordinated at a strategic local enterprise partnership level.

- Powys County Council supports and enables the delivery of the Green Man Festival through regulatory support and promotion, however is not involved in delivery.

Cultural investment can require boldness and ambition

Some of the case studies which have achieved the greatest impacts are ones where bold, creative decisions were taken in order to realise a vision.

- The innovative design and multi-functional approach to the new Chester Storyhouse required a willingness to take risks, as well as political and financial backing from Cheshire West and Chester Council.
- Manchester International Festival highlights the ‘can do’ nature of the council, and its boldness in new activities and initiatives that help attract attention to the city, seeing this as a key enabler of the growth and enhanced reputation of the festival.

Shorter-term investment for local festivals can enable the development of institutions that will yield longer-term sustainable impacts

Organisations involved in two of the festival case studies have sought to establish more permanent bases to allow greater year-round culture-led regeneration impacts in these areas.

- Manchester International Festival will become the managing body for Manchester’s new cultural hub, the Factory, enabling year-round arts and cultural outputs, in addition to continuation of the biennial festival.
- Out There secured Arts Council funding to establish a permanent space which they have refurbished into the UK’s only creative production centre for street arts and contemporary circus, with an aim to deliver greater year-round cultural activity.

Positive outcomes can be achieved with limited budgets

In a challenging funding climate, a number of the case studies have demonstrated that positive impacts can be achieved with very limited initial budgets.

- Culture Works started up with no initial funding, operating to bring cultural partners together and work with the council to support the development of a cultural strategy for the area, and has now helped to secure £3.8 million for local cultural regeneration.
- Out There also receives very limited external funding, but through engaging with an Interreg European network, securing funding from a local tourism business association and a small grant from Arts Council England, has been able to gradually build its high-quality circus and street arts festival.
- New Anglia Local Enterprise Partnership’s culture board also started without any significant funding, but through bringing strategic partners together behind a shared ambition, has now been able to secure Arts Council and European Regional Development Fund funding to deliver a first project, and is planning to build activity from there.

National cultural bodies can be important local partners

Several of the case studies demonstrate the benefits gained by councils engaging more closely with nationally significant arts organisations, drawing on their skills, expertise and resources to enhance local cultural project delivery.

- Walthamstow Creative Connections has been produced in collaboration with the Barbican and Soho Theatre as delivery partners.
- The Manchester International Festival programme is part-funded by contributions from external co-producers such as national cultural bodies, which also adds prestige and enhances the quality of the cultural offer of the festival.

Community involvement can be a powerful driver for culture-led regeneration

Local communities can play a major role in culture-led regeneration, providing ideas, time and energy into projects, as well as applying pressure and helping to demonstrate local backing for projects which can help in case-making and securing funds.

- In Margate, both the Turner Contemporary and Dreamland were developed following active campaigning and development work by local community groups.
- The Stoke-on-Trent Appetite programme has sought to build community involvement and ownership of the programme, through regular events to input to and shape the cultural programme.

Careful design and delivery can help to maximise impacts

In several of the case studies, it can be seen that the careful design and delivery of projects and activities has sought to maximise the local economic and social benefits delivered, highlighting that it is not just where the investment is made, but the details of how it is implemented that can affect the impacts achieved.

- Green Man Festival has a programme encouraging attendees to extend their stay beyond the festival period in order to spend more in the local economy, and sources many of its food and drink stalls from within Wales.
- The Out There Festival in Great Yarmouth was strategically timed in September to extend Great Yarmouth's summer tourist economy, and holds night-time events to encourage visitors to stay overnight.
- To ensure local community benefits were embedded into delivery, Peckham Levels has made it a requirement of all tenants that they offer at least one hour per week of their skills and knowledge to a community resource fund.

Cultural programme brand and identity can be very important

Several of the case studies highlighted the importance of a clear brand being associated with high-quality cultural activities, particularly in areas where cultural engagement has historically been lower.

- The Appetite Stoke programme identified the importance of this so people would relate the brand with interesting and high-quality activity, and allowing the organisers to build a strong social media presence around the brand.
- Culture Works has similarly invested in having a strong social media and online marketing strategy that reaches out to a diverse demographic and the local community.

Building the cultural network in rural areas can help enhance impacts

Some of the rurally focused case studies highlight the additional challenges faced in these areas, with residents often based a greater distance from cultural venues and events, and often having lower levels of cultural engagement as a result. By building links between cultural venues and events in rural areas, a greater critical mass of activity can be built and jointly marketed, to the benefit of all partners.

- Cornwall 365 has helped to demonstrate the benefits of collaboration to cultural and visitor economy businesses, showing that cooperation and shared marketing can bring mutual benefits across the sector.
- First Art, covering areas of Derbyshire and Nottinghamshire, has helped local cultural bodies work together, sharing knowledge and resources and helping to build audiences for local activity.

Appendix

Consultations undertaken

Consultations undertaken for case study research

Case study	Consultations
Margate, Dreamland and Turner Contemporary	Madeline Homer , Chief Executive, Thanet District Council Councillor Robert Bayford , Leader, Thanet District Council Marvia Roach , Media Officer, Thanet District Council
Storyhouse, Chester	Alex Clifton , Artistic Director, Storyhouse Councillor Louise Gitten , Cabinet Member for Communities and Wellbeing, Cheshire West and Chester Council
Peckham Levels, Southwark	Neil Kirby , Head of Regeneration South, Southwark Council Sophie Hall-Thompson , Regeneration Manager, Southwark Council
MOSTYN, Conwy	Councillor Louise Emery , Cabinet Member for Economy, Venue Cymru, Marketing and Events, Conwy County Borough Council Alfredo Cramerotti , Director, MOSTYN
Walthamstow Creative Connections	Lorna Lee , Head of Culture and Heritage Services, London Borough of Waltham Forest
Portsmouth cultural infrastructure	Councillor Gerald Vernon-Jackson , Leader, Portsmouth City Council Stephen Baily , Director of Culture and City Development, Portsmouth City Council Jane Singh , Visitor Services and Development Manager, Portsmouth City Council
First Art Programme, North East Derbyshire	Madeline Holmes , Creative Director, First Art Councillor Tom Hollis , Deputy Leader, Ashfield District Council
Appetite, Stoke-on-Trent	Karl Greenwood , Director, Appetite Councillor Abi Brown , Deputy Leader, Stoke-on-Trent City Council Paul Bailey , Cultural Development Officer, Stoke-on-Trent City Council
Culture Works, North East Lincolnshire	Councillor Jane Hyldon-King , Portfolio Holder for Health, Wellbeing and Adult Social Care, North East Lincolnshire Council Charlotte Bowen , Founder, Culturehouse
Manchester International Festival	Councillor Luthfur Rahman , Executive Member for Schools, Culture and Leisure, Manchester City Council Fiona Gasper , Executive Director, Manchester International Festival Alex Byars, Chief Operating Officer, Manchester International Festival

Southend-on-Sea City Council

Report of Executive Director for Adults and Communities to Cabinet

on
26 July 2022

Report prepared by: Sharon Wheeler
Head of Libraries and Physical Wellbeing

Agenda
Item
No.

Future Leisure Options

Place Scrutiny Committee
Cabinet Member: Councillor Carole Mulroney
A Part 1 Agenda Item

1. Purpose of Report:

- 1.1. To provide Members with a way forward for the long-term future delivery of the council's leisure provision following an options appraisal.

2. Recommendations:

- 2.1 That Members note the options within this paper and agree to proceed with a procurement exercise to appoint a provider to be the council's leisure operator, which should consider and factor in the following key principles:
 - i. A 10 -15 year contract to allow for investment in the facilities and provide the Council with both the best return and also the most attractive proposition for the market.
 - ii. The Council should seek investment from the market within SLTC as described and also the condition survey investment, on the basis that this will generate additional revenue to fund the capital through prudential borrowing undertaken by the Council.
 - iii. Seek a financial offer from the market to deliver a new improved contract with a revenue position that enhances that under the existing leisure contract with innovation in offer and method of operation.
 - iv. Structure the procurement on a lot-based approach, providing the opportunity for the relevant schools to bid and operate their own facilities where appropriate.
 - v. Include utilities benchmarking
 - vi. Build into the specification the delivery of
 - a. The overall health and wellbeing strategic aims and vision to ensure that the operator is required to support the Council in delivering these
 - b. The strategic management of Garon Park in partnership with the Garon Park Trust

- vii. Develop a dialogue-based approach to procurement to enable the Council to discuss approaches through competitive dialogue with the market

3. Background

- 3.1. Leisure facilities provide vital health, leisure, and wellbeing services to local communities and have been a key re-engagement service for those communities post the COVID-19 pandemic.
- 3.2. Over the past 2 years, several operators have ceased to exist, whilst some local authorities have decided to bring service provision in-house to ensure their residents continue to have access to services and provide those authorities with greater control and direction in the way their services can be delivered.
- 3.3. The Council's current leisure provision is delivered under a 10-year contract by Fusion Lifestyle.
- 3.4. The contract is due to expire on 30 June 2025 and whilst the ability to extend that by a further 5 years to 2030 exists, Cabinet agreed on 13 January 2022 that an automatic extension would not take place and that further work would be undertaken to develop a range of options to determine the future delivery of leisure provision across the City.
- 3.5. The Council have agreed with Fusion Lifestyle a revised contract position until 30 June 2025 which still provides the Council with the contracted management fee but over a different profile.
- 3.6. It is appropriate that the council considers its own leisure provision to ensure that it is arranged in such a way to meet the changing needs of residents and provide the best value for money it can going forward.

4. Future Leisure Provision

- 4.1 Currently Fusion operates 4 leisure centres and 2 parks-based tennis sites on behalf of the Council which include the following facilities:

Current Facilities

Facility	Facility Mix
Southend Leisure & Tennis Centre (SLTC)	<ul style="list-style-type: none"> • Sports Halls • Indoor Tennis Courts • Outdoor Tennis Courts • Swimming Pools (including diving pool & fun pool) • Athletics Track • Gym & Studios • Outdoor Netball Courts
Belfairs Swimming Centre (BSC)	<ul style="list-style-type: none"> • Swimming pool and learner pool

Facility	Facility Mix
Chase Sports & Fitness Centre (CSFC)	<ul style="list-style-type: none"> • Sports Hall • Gym & Studios
Shoeburyness Leisure Centre (SLC)	<ul style="list-style-type: none"> • Sports Hall • Swimming Pool • Gym & Studios
Parks based Tennis	<ul style="list-style-type: none"> • Outdoor courts at Chalkwell Park & Priory Park

4.2 One of the considerations in the future operation of the facilities is whether the current mix of facilities meets the needs of the population. The Council undertook an indoor built facilities strategy and action plan in 2018 which identified the following vision and strategic aims

- Vision

“For Southend-on-Sea to be a healthy, active City; making participation in an active healthy lifestyle the social norm for people who live and work in Southend-On-Sea, particularly for underrepresented and inactive groups”

- Strategic Aims

- To reduce inactivity and increase participation in physical activity for everyone, giving priority to the more inactive populations and to look at more ways for people in Southend-on-Sea to be more active more often at work, at home and during leisure time.
- To improve marketing and communications about physical activity and to increase the knowledge, awareness and understanding of people of all ages in Southend-on-Sea about the health benefits of physical activity, and where and how to be active.
- To promote the built and natural environment and its contribution to supporting people to be more active in daily life, promoting facilities and the active travel network that enhance opportunities for people to get and stay active.
- To work collaboratively with a wide range of partners, including statutory organisations, businesses, the third sector and community groups, to help people to be more active, strengthening partnership working and making effective use of combined resources.

4.3 The sports facility plan also identified several key actions (particularly in relation to the facilities above), including

- The development of a hierarchy of facilities from regional facilities (such as SLTC) to more local and community facilities (such as CSFC, SLC, BSC)

- There is a need identified for additional swimming provision in the City to meet the growing population by 2037
- The key challenge for SLTC is to continue to invest and maintain the facility as the main indoor sports provision in the City and deliver the best standard possible. In addition, the focus should be to work with clubs and National Governing Bodies of Sport (NGBS) to deliver an effective sporting offer across the full talent pathway
- Continue to invest and maintain the three smaller facilities with a focus on
 - CSFC – maximise community use, invest in the gym and work with Badminton England to develop programmes
 - SLC – prioritise the maintenance of the facility and work with the School to devise an investment strategy for the swimming pool
 - BSC – develop an investment strategy for the pool to maintain the quality of the pool and changing facilities.

4.4 In addition to this, the strategy references several other facilities such as schools and smaller community facilities which provide the overall network of leisure provision in the City. The overall summary is that apart from the need for additional swimming provision there should be a focus on maintaining and improving existing facilities and enhancing the breadth of the sporting offer including

- Continue to work across a range of agencies including Public Health and Active Southend to support progress in increasing physical activity and sport
- Ensure that all school facilities are made fully available for community use
- Ensure that SCC facilities make a greater contribution to reducing health inequalities and are fully accessible through targeted initiatives, programming and training

4.5 As part of the approach to consider the long-term options, SLTC is a key facility for the delivery of sport and leisure in Southend.

4.6 Currently there are several issues for SLTC in terms of future development that need considering to develop the overall sporting provision and potentially improve the future sustainability

- The focus of SLTC is on sporting facilities and there are limited opportunities for other leisure activities, for example, many facilities are delivering additional leisure activities such as adventure play, clip n climb, tag active etc. All of these activities provide additional usage and attract customers who wouldn't normally access Leisure Centres.
- The current gym offer is fragmented with different spaces, meaning there is not a co-ordinated offer and it is also more costly to be utilised. The potential to consider an approach that seeks to relocate the gym to the second floor and studios to the existing gym on the first floor could refresh and deliver a more customer-focused service

- The existing small hall is currently underutilised, and activities could be relocated into the main sports hall.
- There is limited activity in the reception area and the existing café space has been developed from a corridor – the potential to consider how the front of house is delivered should be developed.
- The moveable floor in the diving pool was out of action for some months. Whilst this has since been repaired, it will be important to ensure maintenance of key activity areas and in particular things like the moveable floor, which impact income. Any future contract arrangement could seek to transfer the full lifecycle responsibility over to the operator
- The bar area on the first floor is tired and would benefit from a redesign of the whole area.

4.7 In considering the future opportunities, **Appendix 1** illustrates some examples of other facilities that have been developed which could address some of the issues identified at SLTC in particular. These examples illustrate the potential for what is possible and being delivered in the market.

4.8 There are several opportunities which could be considered for Southend in terms of future options, which could include.

- Investment in SLTC to develop the facility and align it with other facilities in Garon Park (such as the new Padel Courts) to create more leisure opportunities through
 - Reuse of the small hall to deliver adventure play/clip n climb/tag active which has the ability to create a café linked and activity for park users to be encouraged to the site
 - Reuse of the second floor to create a gym facility which is co-ordinated and located in one place
 - Freeing up space on the first floor for effective studio space and potential spa to deliver new activities
- Consideration of the redevelopment of Belfairs Swim Centre to create a new purpose-built pool with fitness which delivers improved participation and revenue.
- Changes in the contract operation to consider several factors including
 - Full transfer of life cycle and maintenance costs to ensure the responsibilities sit with the partner, which provides for greater accountability
 - Consideration of the school sites and whether the future operation should sit with the schools
 - Development of a strategic approach to the Garon Park through effective liaison and co-ordination

4.9 Investment in SLTC has the potential to deliver significant revenue enhancement through improved health and fitness and other activities (such as clip n climb/tag active). Examples elsewhere indicate that improvements in revenue across these activities of £500 - £750,000 per annum are achievable and would be expected.

4.10 These issues and potential opportunities are considered further in the evaluation of the options.

5 Current Market Position

5.1 It should be recognised that Fusion Lifestyle is not unique in the market and the majority of operators (and standalone Trusts) are being supported by Councils to enable them to recover from Covid-19 during 2022/23.

5.2 This is also true of in-house services where Councils have had to fund the future operation to ensure facilities have been able to reopen.

5.3 Equally operators are mindful that they need to look forward to future business and most business development teams are operational and looking to bid on new opportunities.

5.4 There have been some confidential market discussions with other operators as part of this review, through which it has emerged that there is interest in the potential for a long-term partnership with the Council.

5.5 The key issue for the market is the approach to risk particularly across the following areas

- The risk of Covid 19 (or similar pandemic) will mean that most operators will be seeking to include this risk as part of any contract negotiations for future contracts. It could be argued that this has effectively been covered through change in law provisions however operators will be looking carefully at any contract clauses to ensure they aren't taking risks.
- Utility risk – the current volatility in the marketplace is such that operators are unwilling to take any significant risk on utility pricing. This can be dealt with through an effective utilities benchmarking approach which would enable the market to be comfortable with the proposed risk approach.
- Staffing challenges – the sector is currently facing challenges in attracting and retaining staff. This is in line with the general economy and can provide some challenges for operators.

5.6 Based on discussions with operators, there is a sense of optimism about the long-term future of the sector. With the current awareness of health and wellbeing and the significant contribution that physical activity can play in helping to, address both health inequalities and the levelling up agenda, there is confidence that the sector could perform well in the long term.

5.7 There are real opportunities for the leisure sector to adopt a system-wide approach with health; given the long NHS waiting lists for treatment we are seeing a focus on 'prehabilitation' activities to ensure that at the point patients access treatment they are as fit and healthy as they can be to ensure better outcomes and recovery times.

- 5.8 In addition to this the issues with staffing and utilities may well have been resolved or significantly improved by 2025.
- 5.9 There is a clear appetite in the market for bidding for contracts. A recent procurement launched in April 2021 saw 7 expressions of interest submitted and 5 bidders were taken through to the tender stage.
- 5.10 In addition to the national market there are other potential options for Southend including
- The Garon Trust which operates Garon Park may be interested in operating SLTC
 - Chase School and Shoeburyness School both have the potential to take on the operation of the school sites.
 - South Essex College may be interested in a form of a partnership agreement with the operator at SLTC to support increased demand for their Football Academy, sports courses, and apprenticeships.
- 5.11 It will be important to consider both the structure of the procurement and the timing to ensure that the Council receives good quality submissions. The number of tenders forthcoming over the next couple of years is significant and it will be important to maximise the opportunity.

6 Leisure Options for Consideration

- 6.1 Within the leisure market there are several different management options.
- **In-house option** – where the service is continued to be managed through an organisation on which the Council has control, either direct management or a Local Authority Trading Company (LATC).
 - **A new Not for Profit Distributing Organisation (NPDO)** – where the service is managed by a newly established NPDO specifically set up to run the Council services. The NPDO could be one of several different types including a CLG, IPS, CIC, or CIO and could be a co-operative or mutual.
 - **An existing NPDO** – where the service is managed by an existing NPDO which operates services for other Councils. Typically, these trusts have developed following an initial transfer of services through the creation of NPDO to deliver leisure services. They are usually either a CLG or an IPS but can be other types of NPDO and could be considered to be a co-operative. Examples of these include Freedom Leisure, GLL and Fusion Lifestyle
 - **Educational Establishment, Community Association or Sports/Leisure Club** – where the service is managed by an educational establishment, community association or local sports group. Typically, this is undertaken where the group is the primary user and often sits with

sports clubs, such as Bowls, Rugby, Cricket and Football. In the context of Southend, this would be operated by the school or Garon Park Trust.

- **Hybrid Trusts** – where the service is operated by a private sector Leisure Management Contractor, such as 1Life, Operators, SLM, through an NPDO organisation. It should be noted that within the private sector all of the major operators also have different operating models which enable the benefits of NNDR savings and VAT to be realised, commonly known as Hybrid Trusts. Indeed, some of the organisations are now established as registered charities, such as Active Nation. Typically, these organisations are Companies Limited by Guarantee (often charitable)
- **Private Sector** – where the service is operated by a private sector Leisure Management Contractor, such as 1Life, Places for People, or SLM, without the use of an NPDO organisation. All the operators offer this potential as well as their NPDO organisation (Hybrid Trusts). In addition, there are several major FM companies running services such as libraries and other facilities as part of a major outsourcing approach. A joint venture approach could also fall into this category

6.2 There are several advantages and disadvantages to each of the options presented. It should however be recognised that of the options set out above the following approaches are not considered appropriate for the Council's services, in the context of the current situation, as set out below

- Private Sector – tend not to be utilised anymore as all of the leisure management contractors operate through hybrid trusts (to benefit from tax advantages), however, if the Council decided to procure a partner, then the private sector would be able to bid

6.3 As a result, the Council has several alternative management options available to it when considering its future delivery, as set out below.

Table 6.1 – Options

Option	Description
A. Extension to the existing Contract	<ul style="list-style-type: none"> • Extend the existing contract with Fusion for a five-year period
B. In House	<ul style="list-style-type: none"> • Directly operate the service through the Council Structure
C. LATC	<ul style="list-style-type: none"> • Set up a Local Authority Trading Company (LATC) • Would be controlled by the Local Authority and established under TECKAL exemption • Potential use of the existing LATC's that Southend has established
D. Operator	<ul style="list-style-type: none"> • Appoint an operator to take on the service, which could be an existing NPDO, a hybrid NPDO or the private sector • This is likely to require a procurement exercise

Option	Description
E. A new Trust	<ul style="list-style-type: none"> Establish a new not for profit distributory organisation (NPDO) or Trust for Southend
F. Local Operation	<ul style="list-style-type: none"> Facilities to be operated by the schools The potential for Garon Park Trust to operate SLTC
G. Mixed Economy	<ul style="list-style-type: none"> An option (such as Leisure Operator, In-house) to operate SLTC and BSC Schools operate SLC and CSFC This could also be a varied option with schools operating only one of the facilities for example

6.4 It should also be noted that the Council has 2 existing LATCs (Southend Care and South Essex Homes (ALMO)). South Essex Homes has a sub-section, South Essex Property Services (SEPS) which provides FM, security, and café facilities.

6.5 Initial discussions have been had with both organisations and there is some interest in considering operating leisure centres through them, but both recognised they would need to bring in senior level leisure expertise and recruit someone with direct experience in turning businesses around.

Option Advantages & Disadvantages

6.6 For each of the options there are a range of advantages and disadvantages which are summarised below:-

Option A – Extend Contract with Fusion

Advantages	Disadvantages
<ul style="list-style-type: none"> Extend current contract with Fusion Lifestyle by 5 years to 2030 	<ul style="list-style-type: none"> It has already been determined that this is not an option the council wishes to take up without exploring alternative options available to it. (Cabinet decision January 2022)

Option B – In House

Advantages	Disadvantages
<ul style="list-style-type: none"> The Council will have full control of the Centres and be able to determine the approach to use and operation. 	<ul style="list-style-type: none"> It is unlikely that the Council will be able to benefit from NNDR relief as currently required (currently Fusion is eligible for 80% NNDR relief) The Council would be taking the full risk on the performance of the Centres and income risk Council will be responsible for all operational aspects of the leisure centres. Staff would be transferred to the Council and as a result, there may be additional costs such as pension costs and harmonisation costs The Council will need to incur support costs for the operation, which may be greater than the operator's support costs The Council would take on full liability for all repairs and maintenance, condition surveys and lifecycle costs. There would be no economies of scale and leisure management expertise from partnering with an operator

Option C – LATC

Advantages	Disadvantages
<ul style="list-style-type: none"> The Council will have full control of the Centres and be able to determine the approach to use and reopening. It is likely that a LATC will be able to claim discretionary rate relief as a not for profit organisation There could be the potential to enable the LATC to continue with Operators' staff terms and conditions and not harmonise staff with the Council's terms and conditions, although this may not be guaranteed 	<ul style="list-style-type: none"> The Council will have to pick up the full costs of operating the Centres There will be a cost to establishing the LATC and setting up an infrastructure to support the company. This is likely to be greater than Operators due to the lack of economies of scale The LATC would require more senior management to support the business over and above the contract manager The Council would be taking on the risk of the operation, in that any changes in income would directly impact the net position, thus meaning the Council as the sole owner will be required to pick up any shortfall. The Council would take on full liability for the condition surveys and lifecycle costs There would be no economies of scale and leisure management expertise from partnering with an operator

Option D – Operator

Advantages	Disadvantages
<ul style="list-style-type: none"> • A new operator would have the infrastructure to deliver the service and bring in economies of scale and leisure expertise to deliver improved revenue • Any new operator will be able to claim discretionary rate relief as a not-for-profit organisation • Staff would be transferred to the operator who would be able to continue with the terms and conditions and not incur additional pension or harmonisation costs • In the long term, an operator is likely to be able to deliver a greater return through improved income and savings on costs through economies of scale. The operator's structure is geared to delivering leisure services and maximising the opportunities for revenue generation • The Council will be able to transfer significant risk of the operation to the operator, in the long term. Whilst risks in situations like Covid 19 are unlikely to be transferred there is the opportunity to transfer risk of normal operational fluctuations. • By undertaking a market procurement for operators then the Council can be confident in achieving best value 	<ul style="list-style-type: none"> • There may not be any operators willing to bid for a contract although current experience suggests there is still a market. • Whilst operators will take on the income and operating risk for the contract, they will not take on Covid or similar risk. • Depending on the market position in 2025, the operators may also not take on utility pricing risk.

Option E – Establish New Trust

Advantages	Disadvantages
<ul style="list-style-type: none"> • It is likely that a new Trust will be able to claim discretionary rate relief as a not-for-profit organisation • The new Trust would be independent and operate as a charity 	<ul style="list-style-type: none"> • There will be a cost to establishing the Trust and setting up an infrastructure to support the company. This is likely to be greater than Operators due to the lack of economies of scale • The Trust would require more senior management to support the business over and above the contract manager • The Council would be taking on the risk of the operation in the early stages of the contract, in that any changes in income

	<p>would directly impact the net position, thus meaning the Council as the main funder is likely to pick up any shortfall.</p> <ul style="list-style-type: none"> • The Council would need to recruit Trustees which may not be forthcoming in the current market • There would be a lack of economies of scale and a need to recruit a Chief Executive of the trust to operate • The Council is likely to have limited control over the operation as it would need to be an independent trust to deliver the NNDR savings
--	---

Option F – Local Operation

Advantages	Disadvantages
<ul style="list-style-type: none"> • Current issues with school use and community access will be managed by the school • Potential for more streamlined service • Opportunity for local input into the operation and to deliver on local agendas 	<ul style="list-style-type: none"> • Possible reductions in community access – it will be important to agree community use agreements • There may still be a need for Council financial support for the operation • Focus of school and local operation may be on school use as opposed to community use (other than for income generating activities) • The school may not be interested in operating the facilities • Potential different operators within the City leading to inability to have complementary programmes and increased ‘competition’ for members • Potential to reduce current multi-centre benefits some existing members enjoy

Option G – Mixed Economy

Advantages	Disadvantages
<ul style="list-style-type: none"> • Current issues with school use and community access will be managed by the school • Opportunity for local input into the operation and to deliver on local agendas • Potential to bring in advantages of an operator (such as revenue generation and better cost) 	<ul style="list-style-type: none"> • Possible reductions in community access – it will be important to agree community use agreements • There may still be a need for Council financial support for the operation • Focus of school and local operation maybe on school use as opposed to community use (other than for income generating activities) • The school may not be interested in operating the facilities • Different operators within the City leading to inability to have complementary programmes and increased ‘competition’ for members • Potential to reduce current multi-centre benefits some existing members enjoy

6.7 As a result of the advantages and disadvantages set out above there are several specific issues which will influence any decision the Council make which include

6.7.1 Set Up Costs

Any of the options other than an extension to Fusion Lifestyle will result in potential set-up costs.

All of the options would require the transfer of staff and significant timescales for the establishment of support structures and transfer of assets.

In addition, if the Council were to establish a LATC or indeed a new Trust then this would require the Councils to undertake a full process to establish the organisation and develop support structures that would enable the LATC or new Trust to operate effectively. It is estimated this would take 9 – 12 months.

An alternative operator would need to be procured. It is estimated that this would take circa 6 - 9 months to procure an alternative operator, depending on the scale of the contract.

For example, if an operator was brought in under emergency powers for a short-term contract then this timescale could be shortened significantly.

6.7.2 Staff Costs and TUPE

TUPE would apply in the transfer to any new management option and this has potential implications for the in-house or possibly the LATC option, in that there may be pension costs or harmonisation costs which would increase the cost of the staff.

In particular, this could be significant in that an operator may pay the National Minimum Wage as opposed to the Council's commitment to paying the Real Living Wage.

6.7.3 NNDR Relief

Currently, Operators claim NNDR relief on the Centres. Under Option A this would continue, as it would under Option D, assuming the new operator was a charity or not for profit organisation.

Option B would not be able to claim this relief as the Centres would be directly operated by the Council.

There is the potential to claim this relief through Option C. Whilst it is unlikely that any LATC could claim charitable status due to it being controlled by the Local Authority, it could still be granted discretionary relief due to it being a company involved in the delivery of recreation and sport. However, this is not certain as it will depend on the structure of the company and its objectives.

6.7.4 Operating Market

The current operating market for Leisure Centres has been suffering similar issues with the enforced closure and restrictions on reopening. The majority of operators are however recovering from the pandemic through release from restrictions and forecasting recovery in 2022/23.

Currently, operators are still keen to bid for contracts, both short-term emergency contracts and longer-term contracts. For example, a recent procurement for a new leisure contract received 7 expressions of interest from operators.

The main issue with operators will be capacity in the marketplace as there are a significant number of procurements planned over the next 24 months, however, as long as the procurement exercise is timed in accordance with other projects and made attractive to operators then there should be significant interest from the market, based on discussions to date.

6.7.5 Control & Governance

Options B and C are both effectively directly controlled by the Council and decisions can be made on the service operation. It should however be recognised that any decisions to change the service may have cost implications.

Options A, D and E would typically be controlled through a specification which enables the Council to control prices and other aspects of the specification, such as programming and opening hours and how the Centres are used. In return the Council will pay or receive a fixed management fee. Any changes in the specification potentially have a cost implication but the Council can make changes in the same way they can to the service under Options B & C.

Of particular importance will be the relationship with the schools and Garon Park Trust for the delivery of the service to make sure that there is an approach that recognises the local inputs and delivers effective dual use provision and a strategic approach for Garon park.

6.7.6 Commercial Approach

For options A and D there are commercial benefits of appointing an operator to manage the service in terms of income generation and economies of scale, with specialist operators (such as Fusion Lifestyle) demonstrating that they can deliver greater income and a commercial position which is likely to give a better return for the Council. In particular across the following areas

- The corporate approach to sales and marketing and in particular membership sales for both fitness and swim lessons.
- Utilisation of Apps and a digital strategy and enables use across its portfolio
- Economies of scale from operating 70 plus Centres across the UK, which potentially leads to more effective buying power
- An approach to staffing which is likely to build in bonuses and links to performance

This has been demonstrated through a number of procurements where operators have delivered greater returns for Councils, than the in-house operation.

6.7.7 Risk

Whilst in all options the risks associated with the Covid 19 situation (or similar situations) are likely to be broadly similar, in that any costs are likely to fall on the Council or central Government, there are differences in the risk positions for the options during normal operation.

Options B and C mean that effectively the Council pick up any risk of over or under performance in terms of the operation as the net position will impact on the Council's finances directly. Although with Option C there may be the opportunity to move deficits and surpluses between financial years.

Options A and D provides the opportunity for the Council to transfer the operating and financial risk to the operator and agree a fixed management fee. It should however be recognised that the appetite for risk amongst operators may not be as great as it was before the Covid 19 crisis.

Option E (New Trust) in effect means that the Council is likely to pick up any shortfall in performance (particularly in the early years) where the Trust is unlikely to have any reserves to enable it to manage any shortfall.

Options F & G are likely to mean that the Council will take more risk depending on the operating model used and the agreement reached, however the schools and also the Garon Park Trust are unlikely to bring full leisure management expertise.

6.7.8 All of the options have the potential to deliver the services and bring different advantages and disadvantages. Prior to undertaking a detailed evaluation of the options there are two options which are not considered worth progressing, which include

6.7.9 Option A (Fusion Contract Extension)

Discussions have been held with Fusion over a potential extension which were considered as part of the short-term options report in January 2022. These proposals were not sufficiently attractive to the Council to warrant progressing with.

As a result, Fusion will be able to bid for any contract should the Council decide to progress with procuring and alternative operator and the Council will then be confident that any future operation is based on market positions.

6.7.10 Option E (Establishment of a New Trust)

The establishment of a new Trust would require significant set up costs and also result in the Council effectively taking the risk (at least in the early years) whilst the Trust being independent would mean that the Council has limited control in its operation.

As a result, and due to these factors (loss of control and significant risk) this option has not been considered further.

6.7.11 The remaining options (in house, LATC, operator, local operation and mixed economy) have been reviewed with their financial implications for each below.

7 Options Evaluation

7.1 This section has presented an overview of the options available to the Council and also the indicative financial implications. An evaluation of the options has been undertaken against a number of factors including

- Delivery of Strategic Outcomes and Vision – as illustrated earlier how well the option can deliver against the strategic vision and outcomes
- Financial Sustainability – the financial implications and ongoing sustainability
- Transfer of Risk – the ability to transfer risk
- Control – what control does the Council have over the service

7.1 These factors have been considered for each of the options and been given a score based on the following scale.

Score	Description
0	Highly unlikely to be able to deliver on this outcome
1	May possibly be able to deliver on this outcome but likely to be difficult to achieve
2	Should achieve the outcome, but the overall position could be improved
3	Likely to deliver extremely well on the outcome and deliver significant added value against the outcome

7.2 The results of the evaluation are presented in the table below.

Option	Strategic Vision	Financial Sustainability	Risk transfer	Control	Total Score
Option B - In House	2	1	0	3	6
Option C - LATC	2	1	0	3	6
Option D - Operator	2	3	2	2	9
Option F - Local Operation	1	1	1	1	4
Option G - Mixed Economy	2	2	2	2	8

7.3 The overall evaluation of the options illustrates that Option D (Operator) scores the highest and we present the rationale below

- Strategic Vision

All of the options have the ability to deliver the strategic vision and the overall delivery of this can be factored into any specification or management agreement. Ultimately in all the options the Council will determine the policy and the overall strategic framework within which the option works.

The main area of concern would be the delivery through local operation where potential strategic focus will be on other aspects.

- Financial Sustainability

The financial implications presented earlier have indicated that the operator option will deliver the best financial position for the Council.

Should the Council decide on any other option then it is likely that there will be a significant additional cost for the operating of the leisure service.

- Risk Transfer

Whilst there will still be an element of risk for the Council within the operator option (particularly around Utilities and any future Covid/Pandemic risk), there is the ability to transfer significant operating risk to the operator.

Within the in-house and LATC, the Council will be taking all the risk on the delivery of the service.

The local operation and the mixed economy present a balance of risk with some risk able to be transferred but unlikely to be as significant as the operator option.

- Control

The in-house and LATC provide the greatest control for the service in that they are directly managed, however, it should be recognised that any decisions that are taken will impact costs.

The other options can be controlled through an effective specification which enables flexibility and puts a focus on the operator or local operation to deliver the strategic outcomes and also enables the focus on non-commercial aspects. Recent developments in specifications and contracts have delivered significant improvements in delivery.

7.4 All of the options have the potential to deliver the service and the Council will need to take into account the financial sustainability as well as other factors.

7.5 The operator option has the potential to deliver the best financial position for the Council and also through an effective specification and contract provide the Council with significant control over the operation. In addition, there is the opportunity to deliver significant risk transfer.

8 Corporate Implications

8.1 Financial Implications

8.1.1 The Council has undertaken condition surveys of the buildings. The table below summarises the key financial impacts of these.

Condition Survey Outputs

Facility	Condition Survey Requirements (£'000's)				
	Immediate	1-2 yrs	3-5 yrs	6-10 yrs	Total
SLTC	252	181	31	337	802
BSC	97	8	-	26	131
SLC	169	36	-	59	264
CSFC	57	31	52	-	140
Totals	575	256	83	422	1,337

- 8.1.2 Overall, the condition survey has identified circa £1.3 million of works that are required, with circa £575,000 of these being immediate requirements. The vast majority of the investment required is at SLTC, although the other facilities do require some immediate investment.
- 8.1.3 These levels of investment are considered when the future options are analysed. For each of the options, there are a number of financial implications for the future delivery and it will also depend on the potential for investment (particularly in SLTC).

Indicative Financial Implications

- 8.1.4 A base operating cost has been developed for the service based on the Pre Covid performance with uplifts included for improved revenue to reflect the potential market by 2025 and improvements in expenditure as a result of analysis of key benchmarks, such as staffing costs. This has also included the potential improvement in revenue through investment as described earlier in the report.
- 8.1.5 For each of the options the following potential additional costs or savings have been then factored into the base operating costs
- 8.1.6 Additional support costs for the options (except operator option) based on the requirement to introduce HR, finance and other supporting costs to manage and operate the delivery of the service
- 8.1.7 Increased staffing costs through the need for senior management staff which currently are provided by Fusion across a variety of contracts
- 8.1.8 In the case of the in-house (and potentially the LATC) the additional costs of Business Rates (NNDR) which would not be able to claim relief
- 8.1.9 Increases to the base operational costs through the lack of commercialism and economies of scale outlined earlier which all of the options would incur to a greater or lesser extent
- 8.1.10 Savings in profit through the options (other than the operator option) being not for profit
- 8.1.11 In addition to this there are set up costs for each of the options which resolve around either a procurement exercise or establishing a company and in-house model
- 8.1.12 It is likely based on experience elsewhere and the factors above that the best financial option will be entering into a partnership with an existing operator, and this has been demonstrated through other Council as illustrated below where the in-house option has required significant additional costs.

- Welsh Authority – costs of circa £2 million to bring the service back in-house through additional support costs and non-delivery of revenue positions
- Exeter City Council – identified in their executive report (July 2020) a revenue budget of circa £1.5m for the transfer of services and additional costs on top of this

8.1.13 The financial aspects presented, whilst indicative at this stage do illustrate that there are likely to be significant additional costs to the Council should they decide to pursue options other than an alternative operator.

8.1.14 For all the options there is the potential to improve the position through investment in facilities (particularly SLTC) and the generation of revenue to deliver savings enabling the capital investment to be funded and provide a return.

8.1.15 It should however be recognised that with this investment there is risk of delivery and the Operator option does provide the opportunity to transfer this risk to the operator.

8.2 Legal Implications

8.2.1 The existing contract with Fusion Lifestyle will come to a natural end by 30 June 2025 and arrangements will be made for the cessation of the contract and implementation of the new arrangements.

8.2.2 The preferred option D, will see the council undertake a full procurement process to enable a new contract to be awarded.

8.2.3 The table below sets out the procurement approach the council will need to adopt to ensure compliance with procurement rules

Stage	Description	Timescale
Pre-Procurement Planning	<ul style="list-style-type: none"> • Development of Procurement Documentation • Stakeholder discussions (including service users) • Sign off approach and detailed specification 	Jan – Jul 2023
Standard Selection Questionnaire (SSQ)	<ul style="list-style-type: none"> • Launch of procurement including bidders' day • Seek expressions of interest from the market • Evaluate their experience, economic standard and technical expertise • Select shortlist (typically maximum of 5) 	Sep - Dec 2023
Invitation to Submit Tenders	<ul style="list-style-type: none"> • Invite shortlist to submit their proposals for the future contract and service • Including investment proposals and financial offer 	Jan – Jun 2024

	<ul style="list-style-type: none"> • Dialogue with bidders to enable the best bids and also to consider options • Evaluate and shortlist to a maximum of 3 bidders 	
Final Tender Stage	<ul style="list-style-type: none"> • Invite shortlisted bidders to submit their final tenders based on the Council's preferred option • Evaluate and select preferred bidder 	Jul – Dec 2024
Contract Award & Mobilisation	<ul style="list-style-type: none"> • Finalisation of contract with preferred bidder and contract signature • Mobilisation of the new contract including TUPE transfer 	Jan – Jun 2025
Contract Starts	<ul style="list-style-type: none"> • Commencement of contract with new Operator 	1 July 2025

8.2.4 The timetable and approach set out above will enable the Council to consider options and develop discussions with both local stakeholders and the market to ensure the future contract reflects the ambitions of the Council.

8.3 *People Implications*

8.3.1 As set out above, TUPE is likely to apply in all the options.

8.4 *Property Implications*

8.4.1 Currently Fusion operates 4 leisure centres on behalf of the Council which include the following facilities, operation of those facilities will transfer to whichever Leisure Operator successful via the tender process.

8.4.2 Leisure centres can contribute as much as 40 per cent of a council's carbon footprint due to the number of physical assets involved, their long operating hours and the functions delivered within each building. Subsequently, the Leisure sector faces a significant challenge in setting Net Zero targets and implementing the changes required to meet them. There will be a clear expectation for a new leisure operator to actively work with the council to support the council's 2030 net zero targets.

8.5 *Consultation*

8.5.1 As part of the review discussions have been held with a number of key stakeholders including

- Garon Park Trust
- Shoeburyness School
- Chase School
- Belfairs School
- South Essex College
- Potential Operators

8.5.2 The key findings from the stakeholder discussions are as follows

- There is interest from the schools in the future operation of the facilities. If this was the case consideration would be given to community access arrangements.
- In general, the schools are keen that any future arrangements reflect the needs of the schools and are also able to be flexible to as the service changes.
- Discussion with the Garon Park Trust have identified a number of issues including
 - There is limited co-ordination and approach to the overall use of the site and there are often conflicts between events
 - Management of the car park needs to identify greater clarity on who is managing it and also the use of the car park to ensure it is effective in the delivery of the overall site
 - It takes significant time to implement any new initiatives (for example the Padel courts, which took several years to deliver the outputs)
 - There are a number of different operators on the site including a management company who manages the golf course and a CIC operating the cricket ground
 - It is considered important that the overall strategic management for the site is delivered and this needs to involve SLTC and its interrelationship with the park.
 - Any future leisure operator would need recognise that the overall strategic management of the site is critical. There would need to be flexibility within the contract to ensure co-ordination and a focus on delivering the future of the park.

8.5.3 All stakeholder feedback will be taken into account when considering the future options for the Council. In addition, further work will be undertaken to determine user needs with the wider public.

8.6 *Equalities and Diversity Implications*

8.6.1 The recently published Levelling Up White Paper (February 2022) details 12 levelling up missions - two of which are narrowing the gap in Healthy Life Expectancy between the areas where it's highest and lowest, and improving the wellbeing of every area in the country - with the gap between the areas currently rated for wellbeing and other areas, decreasing.

8.6.2 One of the key factors in making these missions a reality will be making sport and physical activity a normal part of life for everyone in the city.

8.6.3 Sport and physical activity has a central role to play in levelling up – especially tackling health inequalities in communities and improving long-term health and wellbeing outcomes. It also has much wider benefits for society too, including

connecting communities and creating a sense of pride, reducing social isolation, and bringing in new skills and job opportunities to boost the economy, which is why it has a vital role to play in levelling up.

- 8.6.4 The Council's overall health and wellbeing strategic aims and vision will be built into the new service specification and contract to ensure that the operator is required to support the Council in delivering these.

8.7 *Risk Assessment*

- 8.7.1 Whilst in all options the risks associated with the Covid 19 situation (or similar situations) are likely to be broadly similar, in that any costs are likely to fall on the Council or central Government, there are differences in the risk positions for the options during normal operation.

- 8.7.2 Options B and C mean that effectively the Council pick up any risk of over or under performance in terms of the operation as the net position will impact on the Council's finances directly. Although with Option C there may be the opportunity to move deficits and surpluses between financial years.

- 8.7.3 Options A and D provides the opportunity for the Council to transfer the operating and financial risk to the operator and agree a fixed management fee. It should however be recognised that the appetite for risk amongst operators may not be as great as it was before the Covid 19 crisis.

- 8.7.4 Option E (New Trust) in effect means that the Council is likely to pick up any shortfall in performance (particularly in the early years) where the Trust is unlikely to have any reserves to enable it to manage any shortfall.

- 8.7.5 Options F & G are likely to mean that the Council will take more risk depending on the operating model used and the agreement reached, however the schools and also the Garon Park Trust are unlikely to bring full leisure management expertise.

8.8 *Value for Money*

- 8.8.1 Value for money will form part of the key assessment criterion within any future procurement activity. This will also include any potential value generated via Social Investment Activities delivered as part of the contract

8.9 *Community Safety Implications*

- 8.10 N/A

9. **Background Papers** Built Facility Strategy 2018

10. **Appendices** Appendix 1: Examples of Facility Development Opportunities

This page is intentionally left blank

Appendix 1 – Examples of Facility Development Opportunities

Example 1 – Wigan Leisure & Culture Trust

Summit Indoor Adventure

Developed next to Selby Leisure Centre it offers a range of adventure activities including

- Climbing
- Skate Park (BMX/Scooter/Skateboard)
- Ten Pin Bowling
- High Ropes
- Soft Play

It is operated by Wigan Leisure and Cultural Trust and opened in May 2016.

Example 2 – Furzefield Leisure Centre, Hertsmere Borough Council

Furzefield Leisure Centre

Through partnership with Hertsmere Borough Council, Inspire All leisure trust developed a spa and clip n climb/soft play.

The clip n climb and soft play were developed within the Sports Hall to reduce the size of the hall and create a facility which delivers an added attraction and diversifies the customer base.

Situated at the heart of the Centre the new spa has utilised unused space and transformed the approach to include a range of thermal saunas and steam rooms together with treatments to enhance customers' health and wellbeing.

Appendix 1 – Examples of Facility Development Opportunities

Example 3 – Camberley Arena

Camberley Arena

The Council undertook a DBOM development to replace a 1970's ageing facility with a new purpose-built facility.

The new facility included pools, sports hall, health and fitness, clip n climb, and adventure play.

In particular, the site development provided a new facility with greater activities but on a smaller footprint

Southend-on-Sea City Council

Report of Strategic Director for Adults and Communities

To

Cabinet

On

26 July 2022

Report prepared by: Scott Dolling

Director of Culture and Tourism

Agenda
Item No.

12

Re-ballot of Southend Business Improvement District Ltd

Relevant Scrutiny Committee(s) Place
Cabinet Member: Councillor Martin Terry
Part 1 (Public Agenda Item)

1. Purpose of Report

- 1.1 To update Cabinet on the success of the Southend Business Improvement District (BID) since its launch in April 2013 and re-ballot in 2017.
- 1.2 To seek agreement from Cabinet to provide the support required, subject to approval of the BID Proposal, for a renewal ballot of Southend City centre businesses regarding to further five-year term of the Southend BID. To inform the ballot process, the BID must produce a BID Proposal. The Business Improvement Districts (England) Regulations 2004 require that a BID Proposal is submitted to the local authority to ensure that it meets the requirements of the regulations, and a ballot can therefore proceed.

2. Recommendations

- 2.1 That the progress and impact of the BID is noted.
- 2.2 That Cabinet agrees that the Director of Culture and Tourism, in consultation with the portfolio holder, be given delegated authority to:
 - 2.2.1 Consider on behalf of the Council as billing authority, whether the proposal conflicts with any formally adopted policy of the Council, and, if it does, give notice of this in accordance with the BID regulations.
 - 2.2.2 Determine whether the Council should support the BID's proposal decided by the majority of BID Directors and businesses and if so, to vote yes on its behalf in the BID ballot. If a 'no' vote is proposed, this will be referred to Cabinet for further consideration
 - 2.2.3 Formally manage the ballot process in accordance with BID regulations.
 - 2.2.4 That subject to a 'yes' vote at ballot by the relevant BID business community, the Council as relevant local billing authority will manage the billing and collection of

the additional levy, and its transfer to the BID company. In the event of a ‘no’ vote, that the costs of the ballot be recovered from the BID Company as per the BID regulations.

2.2.5 Review and update the Operating Agreement, as required, which details the billing, collection and enforcement provisions as well as the arrangements for transmitting the BID receipts to the BID in consultation with the Executive Director for Finance and Resources.

2.2.6 Enter into a revised service level agreement with the BID company regarding the operation of the BID and delivery of Council requirements and baselines.

3 Background

On 4th September 2012 Cabinet considered and agreed a report regarding the establishment of the BID in Southend town centre and central seafront area (Report DETE12053, Minute 227). In accordance with the BID regulations (2004), a “renewal” ballot took place in towards the end of the initial five-year term in October/November 2017 The existing BID term ends on 31st March 2023 and therefore another ballot is required which will take place in October/November 2022.

3.1 Results from a 2022 survey of BID levy paying businesses show that the BID is providing a good return on investment. Results show that of the respondents, 91% would vote yes for Southend BID to continue for another 5 year term (3% would vote no, 5% don’t know).

3.2 The BID is governed by a board of directors and a wider committee. Both groups are made up of levy paying businesses. Its aim is to work with local businesses and the Council to enhance and add value to the area covered by the BID in line with the priorities of the business community which are set out in a business plan for the term of the BID.

3.3 Since its launch the Southend BID has:

- Embedded a team of Street Rangers – a uniformed team on hand to welcome visitors. Extremely valued by local businesses and have assisted Police and businesses to tackling crime and antisocial behaviour. This team was extended during the 2017 term.

Street Ranger Figures April 2013 to May 2022

Visitor Enquiries	30,359
Rough Sleeper Engagement/Relocation	6,528
Retail Crime Assists	8628
Unauthorised Buskers Relocated	643
Unauthorised Collectors / Events	961
First aid Incidents	660
Anti-Social Behaviour Intervention	10,596

- Child Safety Scheme ('Keeping Together') has reunited in excess of 500 children with their parents. Police have confirmed this scheme has reduced the number of reported missing child incidents in the BID area and has allowed them to allocate available police resources to other reported incidents.
- Providing access to DISC – a secure online information sharing system to enable businesses to report incidents and view the latest intelligence.
- Evening Economy - £11k additional night time policing funded by the BID since 2013.
- Annual events programme for Term 1 included, Outdoor Cinema, Italian Festival, Purple Festival, Southend Seafront Fireworks Programme, Christmas Lights Switch On, Christmas 4D Light Show. Also, one of very few BIDs in the UK to secure Arts Council funding for events - Southend Charabanc/Disco Turtle event. In Term 2, Christmas Lights Switch on and autumn seafront Fireworks continued, with the addition of Chinese New Year Celebrations, Southend's annual Cocktail Week, various themed trails for families, the upcoming City Jam Street Art Festival, LuminoCity Light Festival (in collaboration with Southend City Council) and more. Since 2013 BID events have attracted in hundreds of thousands of visitors to the BID area as well as increasing visitor spend and improving public image. As an example, the day of the Chinese New Year event, footfall figures recorded the highest amount of visitors to Southend High Street in the month of January 2022.
- Delivery of rebranded Visit Southend website to promote the BID area in partnership with the Council. The website updates visitors on upcoming events, promotions and attractions as well as including listings for businesses. Since the rebrand, web traffic to Visit Southend from London IP addresses has increased over 300%.
- Successful PR campaigns for various projects, services and events raised the profile of the City as well as promoting it as an attractive place to visit. There is now a combined following across Southend BID's social media channels of over 7,000 people which is continuing to grow.
- Improvements to public space by improving the appearance of empty premises the High Street as well as implementing a regular schedule of street art pieces adding vibrancy and creating points of cultural interest.

During Term 1, bespoke wicker planters were added to the seafront. Enhancement of the existing hanging basket scheme by introduction of a third container to all High Street columns as well as extending the scheme to include side streets. This has continued in Term 2, along with the installation of bunting to the High Street and side streets to further enhance aesthetics.

- Christmas Lighting upgrade incorporating twinkling lights and festive lighting for side streets as well as taller bespoke 40ft Christmas tree each year.

- In Term 1, over £70,000 was acquired through sponsorship and Friends of the BID scheme in addition to levy collected. In Term 2, the BID has utilised the Government's Reopening High Streets Safely Fund (RHSSF) and the Welcome Back Fund (WBF), acquiring over £50,000. Sponsorship and Friends of the BID scheme income has continued with all this additional income being invested back into the BID zone.

BIDs are established for a five-year term at which point a renewal ballot must take place in order for the BID to continue. To inform the ballot process, the BID must produce a BID Proposal. The Business Improvement Districts (England) Regulations 2004 require that a BID Proposal is submitted to the local authority to ensure that it meets the requirements of the regulations, and a ballot can therefore proceed.

- 3.4 The Council therefore has a multi-layered relationship with the BID. It must review the proposal and, if it is agreed, then manage the ballot process and undertake the billing and collection of the BID levy should the vote be in favour of the BID. As a landowner within the BID area the Council is a BID member and levy payer. The Council also has places on the BID committee – now occupied by the Cabinet Member for Public Protection and Director of Culture and Tourism. There is a service level agreement with the BID articulating how the Council, as a key strategic partner, and BID will work together over the five-year term.
- 3.5 The local authority has a statutory responsibility to support the development of BIDs and facilitate their establishment and successive re-ballots. This includes conducting the ballot and collecting and enforcing the levy. The authority must also confirm that the proposed BID does not conflict with area plans and schemes. If the local authority is of the opinion that the Business Improvement District arrangements are likely to conflict to a significant extent with an existing policy, place a financial burden on rate payers or the burden from the levy is unjust, it can decide to veto the proposals. The local authority can only veto proposals within 14 days from the date of the ballot.
- 3.6 The Council must consider the respective roles that it may play in the process of developing the BID renewal process in line with BID legislation as a billing authority, as a landowner/occupier in the BID area and as a ballot holder. The local authority ballot holder remains legally responsible for the ballot process as set out within government regulations.
- 3.7 The Council must also work with the BID Company to ensure that the ballot process follows a thorough research and consultation phase that focuses on the needs and requirements of the potential contributors within the area of the BID.
- 3.8 It is a requirement of the BID Regulations that the BID proposals include a statement of the existing baseline services provided by the Council and any other public authority in the proposed BID area. This statement will form part of the BID proposals which demonstrate to businesses voting for the BID that the proposed BID services are additional to the baseline services provided by the public authorities.

- 3.9 The Council is required to manage the collection and enforcement of the BID levy charges known as an Operating Agreement.
- 3.10 Part 4 of the Local Government Act 2003 (“the Act”) introduced BIDS. The creation, regulation and operation of BIDs is governed by the provisions of the Act and Regulations made under the Act, the Business Improvement Districts (England) Regulations 2004 (“the Regulations”) which have been amended by the Business Improvement Districts (England) Amendment Regulations 2013. The government has also issued the following guidance:
- *Guidance on the Business Improvement Districts (England) Regulations 2004*
 - *Business Improvement Districts: technical guidance for local authorities (“the Technical Guidance”)*
 - *Business Improvement Districts: guidance and best practice (“the Guidance”)*.

4. Other Options

- 4.1 There are certain functions within the BID ballot process which can only be undertaken by the local authority. Therefore, if the Council is to support a third term of the BID, subject to approval of the Proposal, it must be willing to undertake these activities.

5. Reasons for Recommendations

- 5.1 The Southend BID company has leveraged funding from businesses in the BID area which wouldn’t otherwise have been available to invest in the town (now city) centre. Paragraph 3.4 provides an overview of the impact the BID has made in the town (now city) centre and central seafront area funded through the levy and additional contributions. These interventions and value adding activities have been to the benefit of the area and could not have been delivered under the previous Town Centre Partnership / Management arrangement.
- 5.2 A third term is subject to a positive outcome from the business ballot and therefore the decision to progress is one that is led by the business community to meet their needs and is recognised as good practice by Government.
- 5.3 The detail of the Proposal, Operating Agreement and SLA will be negotiated over the coming months prior to ballot. Delegated authority is sought in order that these discussions can be undertaken in a timely manner which allows the process to progress. No additional funding would be granted as part of these negotiations.

6. Corporate Implications

- 6.1 Contribution to Council’s 2050 vision

Active and Involved – The initiative is business led and sees a greater participation of a wider group of stakeholders from around the City. Additional funding would be invested over the further five years of the BID to enhance the City centre led on by the business community through its management committee and board.

Pride and Joy - The City centre would continue to be a more attractive proposition for residents, visitors and investors.

Safe and well – One of the key objectives for the businesses is to continue with the on-going safety of the City centre environment. Initiatives with additional security measures will continue to be a priority and have been highlighted in the business plan preparations.

Opportunity and prosperity – The rationale for a BID is to put local stakeholders and their financial contribution in a position of taking ownership of the defined area. The Council is demonstrating support for a business led initiative enhancing the opportunities for the City centre environment.

6.2 Financial Implications

- 6.2.1 The billing, collection and enforcement of BID levies will be undertaken using a module of the current Revenues & Benefits system - Northgate. This software was purchased by the Council and the BID repaid the cost at £5,000 per year. Therefore if the BID is successful at renewal all costs for this software would have already been recovered and this will not be a financial implication for the Council during the 2023-2028 BID term. The utilisation of a similar software arrangement ensures that the procedures used to successfully collect Business Rates are extended to cover the proposed BID scheme. This also assists in minimising costs.
- 6.2.2 The ongoing costs incurred by the Revenues & Benefits Service for the billing, collection and enforcement arrangements for the BID will also need to be fully reimbursed by the BID. The likely cost of this annual support is £35 per hereditament as per BID legislation.
- 6.2.3 The administration process for operating the BID scheme will be set out in an Operating Agreement that details the billing, collection and enforcement provisions as well as the arrangements for transmitting the BID receipts to the BID. It is essential to keep the arrangements to a realistic level so that the cost of delivering them is efficient. In the event that the BID demands a level of monitoring that is not proportionate to the scale of the BID scheme then the Council's right to charge for such additional monitoring is reserved.
- 6.2.4 The Council will continue to maintain a separate BID revenue account in accordance with Section 47 Local Government Act 2003. This account is similar to the Council's Collection Fund in terms of ring-fencing the receipts for specific purposes, namely the BID, so that they can use monies to carry out their stated objectives.
- 6.2.5 The BID levy is based on the rateable value (RV) of a hereditament.
- 6.2.6 Funding under the third term of the BID will be agreed through a revised SLA which will be developed in preparation for the ballot but will not increase the financial contributions to the BID.

6.3 Legal Implications

- 6.3.1 The legislation supporting BID schemes was introduced by the Local Government Act 2003 and the billing, collection and enforcement arrangements

are governed by legislation and the BID levy rules as set out in the Business Improvement Districts (England) Regulations 2004.

- 6.3.2 The BID requires a ballot, and the rules also require notice must be given to the Secretary of State of the intention to ballot businesses. Failure to do this at the correct time or comply with the ballot and levy procedure rules could invalidate the BID.
- 6.3.3 Prior to a ballot of businesses taking place, the Council will need to formally accept and support the BID proposal.
- 6.3.4 If there is a successful ballot and a BID in place the levy collection would need to be enforced through usual business rates collection channels. In the event that the BID ballot is unsuccessful, then the scheme will fail.
- 6.3.5 If there is a successful ballot, the Council will need to enter into with the BID Company Baseline Agreements, a Service Level Agreement and an Operating Agreement which will define:
1. The method of operating the BID scheme
 2. The billing, collection, and enforcement regime
 3. Any complementary services that are contracted by the Council to the BID Company
- 6.3.6 There are statutory provisions under which the Council may, as the billing authority, in prescribed circumstances, veto the proposals. This is generally where the BID's proposed work programme is already being carried out or if the scheme is considered to be unworkable.

6.4 People Implications

The current arrangements are proposed to continue with the BID Manager remaining as an employee of the Council. The BID Manager will deliver the BID business plan objectives on behalf of Southend BID Ltd. The BID retains the right to consider direct employment of the BID manager at a future date subject to appropriate conditions and approvals at the time.

6.5 Property Implications

Council owned properties within the BID area whose rateable value exceed the minimum threshold will be subject to the levy.

6.6 Consultation

In order for the BID to be granted a third term, a majority of businesses votes need to be achieved. Consultation is essential with the businesses and organisations in the BID area and will be delivered as part of the preparation process. Throughout the current BID term, all businesses have been consulted via an annual survey as well as substantive one to one meetings with Street Rangers which feed into the proposed business plan. The Southend BID has

been engaging and consulting with businesses within the BID area throughout the term and feedback from hereditaments continues to be favourable.

6.7 Equalities and Diversity Implications

The BID is a separate entity to the Council and provides services that are over and above those undertaken by the Council. The BID's aims and objectives are likely to help the Council in advancing equality of opportunity and fairness and that will maximise opportunity for all Southend residents to benefit from economic growth in BID area.

6.8 Risk Assessment

6.8.1 The BID now almost 10 years of track record and the initial identified risks were mitigated.

6.8.2 The BID process is seen by the government as an innovative process of enabling business communities to contribute significantly to the future economic development of their local area and regenerate high streets. The risk of an area not embracing this potential is that investment needed to retain businesses, increased footfall and attract inward investment in a local district centre may not be forthcoming, compared with neighbouring areas where this opportunity is being exploited.

6.9 Value for Money

Via the BID levy, additional funding is made available for investment in the city centre. The BID provides value for money in the short and medium term as the project will continue to see more ownership by a wider group of stakeholders. The additional c£2.5M investment over the first five-year term resulting from the BID would not be otherwise realised. In addition to the levy, many BIDs attract voluntary contributions from interested partners and businesses as well as grants and profile via national schemes. Since the BID started trading in April 2013 it has successfully delivered a range of services and activities which have met both the businesses and the public's expectations – see section 3.4

6.10 Community Safety Implications

Safety has been one of the priorities of the BID's first term with the introduction of Street Rangers and child wrist bands among other interventions. It is anticipated that a key focus of the new BID proposal will include additional local safety and security initiatives to add to the Council's on-going commitment. In this way, a BID will play a part in orchestrating business led solutions to criminal and anti-social behaviour.

6.11 Environmental Impact

The Council will ensure that all environmental considerations are given appropriate assessment at all levels of the delivery of projects which deliver more employment opportunities for the borough's residents.

Southend-on-Sea City Council

**Report of Executive Director
Neighbourhoods and Environment
to
Cabinet
On
26 July 2022**

Agenda
Item No.
15

Report prepared by: Alistair Turk
Senior Policy Manager, Traffic & Highways

Reports approved under the Delegated Authority Report process

Relevant Scrutiny Committee(s): Place Scrutiny
Cabinet Member: Councillor Steven Wakefield

1. Purpose of Report

- 1.1 Cabinet at its July 2021 meeting agreed changes to the constitution (minute No. 226) that enabled certain decisions to be taken by Officers. This was ratified by Council at its September 2021 meeting (minute No. 309).
- 1.2 In order for decisions taken under delegated authority to be transparent and recorded it was agreed that the Head of Traffic and Highways will produce a summary report of the decisions made under the Delegated Authority Report (DAR) process for Cabinet.
- 1.3 The report is presented **for information only**.

2. Recommendation

- 2.1 **Cabinet are recommended to note the decisions taken under Delegated Authority that are summarised in the body of the report with the DAR for each decision set out in the Appendices.**

3. Background to policy decisions taken under DAR

- 3.1 Local authorities that are traffic/highway authorities are required to formulate and regularly review policies on matters relating to the discharge of its statutory and operational functions.
- 3.2 Southend has a number of legacy policies which were originally introduced by Essex County Council when it was the traffic/highway authority for the Southend borough/city area and have remained in place after Southend became a Unitary

authority. There are a number of other policies which set out how the operational processes the Council will apply when carrying out statutory functions under the Highways Act 1980 and/or Road Traffic Regulation Act 1984.

Policies approved under DAR

3.3 The existing policies listed below have been reviewed and updated and were approved under the Delegated Authority procedure. The link to the updated policies is **set out in Appendix 1 of this report.**

1. Advanced payment code policy; (review)
2. Consent of excavations policy; (review)
3. Conversion of public rights of way to cycle tracks policy; (review)
4. Road adoption policy. (review)

4. Background to scheme decisions taken under Delegated Authority

4.1 The operational decision making aspects of scheme progression that already have Cabinet approval are now progressed under the DAR process. The Matters that have received delegated authority are summarised below and the link to the DAR is **set out in Appendix 2 of this report.**

5. Corporate Implications

5.1 Contribution to the Southend 2050 Road Map

The implementation of the constitutional changes and the delegation of certain decisions to Officers is seen as key contributors to the Road Map particularly in the ability to deliver a programme of work more efficiently and to reduce potential delays in decision making.

6. Financial Implications

6.1 None. Cabinet have already approved funding for these schemes.

7. Legal Implications

7.1 The delegation of decision making to Officers is in accordance with the constitutional amendments approved by Council in September 2021 (minute No. 309 relates).

8. Consultation

8.1 The Portfolio Holder and appropriate Ward Councillors have been consulted as part of the delegated authority process.

9. Equality analysis

9.1 The equality analysis is set out in **Appendix 3** to the report.
