SOUTHEND-ON-SEA CITY COUNCIL

Place Scrutiny Committee

Date: Monday, 13th March, 2023

Time: 6.30 pm

Place: Jubilee Room (Committee Room 1), Civic Suite

Contact: Tim Row - Principal Democratic Services Officer

Email: committeesection@southend.gov.uk

AGENDA

- 1 Chair's Announcement**
- 2 Apologies for Absence**
- 3 Declarations of Interest**
- 4 Questions from Members of the Public**
- 5 Minutes of the meeting held on Monday, 30th January, 2023**

****** PART I ITEMS CALLED-IN/REFERRED DIRECT BY CABINET HELD ON TUESDAY 21ST FEBRUARY 2023**

- 6 Air Quality Action Plan 2022-2027 (Pages 9 - 104)**
Minute No. 722 (Cabinet Book 2, Agenda Item No. 12 refers)
Called-in By Councillors Cowdrey & Woodley
- 7 Proposed Community Infrastructure Levy (Pages 105 - 160)**
Minute No. 723 (Cabinet Book 2, Agenda Item No. 13)
Called-in by Councillors Cowdrey and Woodley

****** PART I ITEMS CALLED-IN/REFERRED DIRECT BY CABINET COMMITTEE HELD ON 20TH FEBRUARY 2023**

- 8 Traffic Regulation Orders - Junction Protection (Pages 161 - 166)**
Minute No. 706 (Cabinet Committee Agenda Item No. 5 refers)
Called-in by Councillors Cowdrey and Woodley
- 9 School Streets (West Leigh School - Ronald Hill Grove) (Pages 167 - 172)**
Minute No. 707 (Cabinet Committee Agenda Item No. 6 refers)
Called-in by Councillors Cowdrey and Woodley
- 10 Prittle Brook Greenway TRO (Traffic Regulation Order) (Pages 173 - 180)**
Minute No. 709 (Cabinet Committee Agenda Item No. 8 refers)
Called-in by Councillors Cowdrey and Woodley

****** ITEMS CALLED-IN FROM THE FORWARD PLAN**

None

****** ITEMS FOR PRE-CABINET SCRUTINY**

None

****** OTHER SCRUTINY ITEMS**

- 11 In-depth Scrutiny Project 2022/23 - Preparing Southend for the EV Revolution - Update**

TO: The Chair & Members of Place Scrutiny Committee:

Councillor J Courtenay (Chair),

Councillors J Warren (Vice-Chair), M Berry, M Borton, K Buck, S Buckley, M Davidson, M Dent, L Hyde, D Jarvis, A Jones, M Kelly, J Moyies, A Thompson, N Ward, P Wexham and R Woodley

SOUTHEND-ON-SEA CITY COUNCIL

Meeting of Place Scrutiny Committee

Date: Monday, 30th January, 2023

Place: Jubilee Room - Civic Suite

5

Present: Councillor J Courtenay (Chair)
Councillors J Warren (Vice-Chair), M Berry, M Borton, K Buck,
S Buckley, T Cox*, M Davidson, M Dent, L Hyde, A Jones, M Kelly,
J Moyies, A Thompson, P Wexham and R Woodley
(*Substitute in accordance with Council Procedure Rule 31.)

In Attendance: Councillors S George, P Collins, C Mulroney, M Terry, S Wakefield
(Cabinet Members) and K Evans
J Burr, A Richards, G Gilbert, N Hoskins, P Rabbitts, K Waters and
T Row

Start/End Time: 6.30 pm - 11.00 pm

638 Apologies for Absence

Apologies for absence were received from Councillor Jarvis (substitute: Councillor Cox) and Councillor Ward (no substitute).

639 Declarations of Interest

The following interests were declared at the meeting:

(i) Councillors Collins, George, Mulroney, Terry and Wakefield (Cabinet Members) - Interest in the items referred direct; attended pursuant to the dispensation agreed at Council on 19 July 2012, under S.33 of the Localism Act 2011;

(ii) Councillor Berry – Minute No. 643 (Use of Section 106 Contributions) – Southend City Council appointed board member of Southend on Sea Forum Management Ltd. which was mentioned during the debate on the basis that the Forum/Focal Point Gallery had submitted the planning application;

(iii) Councillor Borton – Minute No. 644 (Grassland Management Policy) – Trustlinks was one of the charities supported by her during her Mayoral year (2021-22) which was mentioned during the debate;

(iv) Councillor Buck – Minute No. 644 (Grassland Management Policy) – Allotment holder;

(v) Councillor Buck – Minute No. 645 (Thorpe 20mph Neighbourhood) – Has had significant levels of contact from local residents on this matter;

(vi) Councillor Dent – Minute No. 645 (Thorpe 20mph Neighbourhood) – Has had contact from multiple local residents on this matter;

(vii) Councillor K Evans – Minute No. 644 (Grassland Management Policy) – Chair of Leigh Town Council and son works for Trustlinks both of which were mentioned during the debate;

(viii) Councillor Hyde – Minute No. 644 (Grassland Management Policy) – Allotment holder;

(ix) Councillor A Jones – Minute No.640 (Questions from Members of the Public) – Son works in the Council’s Strategic Transport Team which was mentioned;

(x) Councillor A Jones – Minute No. 644 (Grassland Management Policy) – Mention of bus stop greening, son works in the Council’s Strategic Transport Team and antisocial behaviour in Toledo Road was mentioned in the debate, which is near to her property;

(xi) Councillor Mulroney – Minute No. 646 (Thorpe 20mph Neighbourhood) – Mention of Leigh 20mph scheme which is located where she lives;

(xii) Councillor Thompson – Minute No. 643 (Use of Section 106 Contributions) – Southend City Council appointed board member of Southend on Sea Forum Management Ltd. which was mentioned during the debate on the basis that the Forum/Focal Point Gallery had submitted the planning application;

(xiii) Councillor Warren – Minute No. 644 (Grassland Management Policy) – Allotment holder; and

(xiv) Councillor Woodley – Minute No. 646 (Thorpe 20mph Neighbourhood) – Member of BERA which was mentioned during the debate.

640 Questions from Members of the Public

The Committee noted the responses of the Cabinet Member for Public Protection and the Cabinet Member for Highways, Transport & Parking to two questions from by Mr David Webb.

641 Minutes of the Special Meeting held on Thursday, 10th November, 2022

Resolved:-

That the Minutes of the special meeting held on Thursday, 10th November 2022 be received, confirmed as a correct record and signed.

642 Minutes of the Meeting held on Monday, 28th November, 2022

Resolved:-

That the Minutes of the meeting held on Monday, 28th November 2022 be received, confirmed as a correct record and signed.

643 Use of Section 106 Contributions

The Committee considered Minute No. 616 of Cabinet held on 12th January, 2023, which had been called-in to scrutiny, together with the report of the Executive Director (Growth & Housing) setting out the legality and wider implications of the motion of the Opposition Councillors (“Opposition Business”), referred to Cabinet by the Council on held on 15th December 2022.

The Committee discussed the matter in some detail and asked a number of questions which the Cabinet Member for Environment, Culture and Tourism and the Director of Planning responded to.

Resolved:-

1. That the matter be referred back to Cabinet for reconsideration on the basis that the report considered by Cabinet does not appear to address the points included in the motion in respect of the Development Control Committee being used to as a means implement Council policy and, in particular, the consultation and decisions should have been taken before the matter was referred to Development Control Committee for determination.

2. That, in accordance with Council Procedure Rule 39.2, the matter be referred to full Council for consideration. ||

Note: This is an Executive Function
Cabinet Member: Cllr Mulronev

644 Grassland Management Policy

The Committee considered Minute No. 621 of Cabinet held on 12th January 2023, which had been called-in to scrutiny, together with the report of the Executive Director (Neighbourhoods and Environment) presenting the Grassland Management Strategy which provides a framework for Southend-on-Sea City Council to improve the overall status and reduce losses in the diversity of pollinator species within the City.

The Committee discussed the matter in some detail and asked a number of questions that were responded to by the Cabinet Member for Environment, Culture & Planning and the Council’s Head of Parks and Open Spaces. The Committee felt there were a number of anomalies in the report, particularly in respect of cost savings and the lack of consultation with Ward Councillors and Residents’ Associations regarding the identification of appropriate areas prior to any decision being taken.

Resolved:-

1. That the matter be referred back to Cabinet for reconsideration.

2. That, in accordance with Council Procedure Rule 39.2, the matter be referred to full Council for consideration. ||

Note: This is an Executive Function
Cabinet Member: Cllr Mulroney

645 Southchurch Park Lake - Removal of Post and Rail

The Committee considered Minute No, 624 of Cabinet held on 12th January 2023, which had been called-in to scrutiny, together with the report of Executive Director (Neighbourhoods and Environment) seeking approval to replace small sections of the shin rail around the eastern section of the lake in Southchurch Park based on an agreed risk assessment.

The Committee discussed the matter in some detail and asked a number of questions that were responded to by the Cabinet Member for Environment, Culture & Planning and the Council's Head of Parks and Open Spaces.

In response to questions regarding the breakdown of the cost of replacing the fencing in terms of the labour and material costs, the Cabinet Member for Environment, Culture and Tourism undertook to circulate the details after the meeting.

In response to questions regarding the possibility of allocating £15,000 capital funding to the scheme, the Cabinet Member undertook to speak with the Executive Director (Finance & Resources) on this matter.

Resolved:-

That the matter be referred back to Cabinet for reconsideration to enable discussions between the Cabinet Member and the Executive Director (Finance & Resources) to take place on the possibility of allocating capital funding to enable the fencing to be installed around the lake.

Note: This is an Executive Function
Cabinet Member: Cllr Mulroney

646 Thorpe 20mph Neighbourhood

The Committee considered Minute No. 593 of Cabinet Committee held on 21st December 2022, which had been called-in for scrutiny, together with the report of the Executive Director (Neighbourhoods & Environment) that presented the results of the public consultation in respect of 20mph scheme proposals in Thorpe Ward.

Resolved:-

That the following decision of Cabinet Committee be noted:

“That neither Option A or B as set out in the public consultation be taken forward for construction at this time.”

Note: This is an Executive function
Cabinet Member: Cllr Wakefield.

647 In-depth Scrutiny Project - Preparing Southend for the EV Revolution - Update

The Committee noted an oral update on the progress that had been made in respect of the in-depth scrutiny project entitled "Preparing Southend for the EV Revolution."

Resolved:-

That the report be noted.

This is a Scrutiny function.

648 Council Procedure Rule 44.2

During consideration of Minute No. 645 (Southchurch Park Lake – Removal of Post and Rail) and upon the hour of 10.00pm having been reached, the Committee:

Resolved:-

That, in accordance with Council Procedure Rule 44.2, all remaining items of business be dealt with at the meeting.

Chair: _____

21 February 2023

Report prepared by: Elizabeth Georgeou, Head of Regulatory
Services

Agenda
Item No.

6

Adoption of Air Quality Action Plan 2023-2027

Cabinet Member: Councillor Mulroney

Part 1

1. Purpose of Report

- 1.1 To seek adoption by Cabinet of the Air Quality Action Plan (AQAP) 2023-2027 (**Appendix 1**), detailing targeted measures to try to improve air quality within Air Quality Management Area (AQMA) 2 (**Appendix 2**) and by extension applying the measures to AQMA 1 (**Appendix 3**) and the rest of the City of Southend. The adoption of AQAP2 has been developed to meet the Council's statutory duty to develop an Air Quality Action Plan following the declaration of AQMA2.

2. Recommendations

- 2.1 **To approve and adopt the Air Quality Action Plan 2023-2027 (Appendix 1) for the Air Quality Management Area 2 (Appendix 2) Air Quality Management Area 1 (Appendix 3) and across the City of Southend-on-Sea.**

3. Background

- 3.1 Part IV of the Environment Act 1995 ('the Act') introduced the system of Local Air Quality Management (LAQM), placing a duty on local authorities to periodically review and assess the air quality within their areas. The provisions in Part IV of the Act are largely enabling and give local authorities the flexibility to take forward local policies to suit local needs. Local circumstances will also determine the content of air quality strategies, the designation of AQMAs and the content of AQAPs.
- 3.2 The air quality objectives for the protection of human health were set by Air Quality Directives 2008/50/EC and 2004/107/EC. These were transposed into UK law via the Air Quality Standards Regulations 2000.

- 3.3 Section 83(1) of ‘the Act’ states that a local authority must designate AQMAs for those parts of the local authorities’ area where air quality objectives (AQOs) are unlikely to be met.
- 3.4 Section 83(A) of ‘the Act’ states that where an AQMA is designated, a local authority shall prepare an AQAP to demonstrate how the authority intends to achieve and maintain the air quality objectives in the AQMA. Local authorities should also have regard of the statutory guidance published by the Department of Environment, Feed and Rural Affairs (DEFRA)
- 3.5 The Government has developed strategies which aim to improve the environment and air quality on a national basis:
- The Industrial Strategy which has been replaced by the Build Back Better: our plan for growth, March 2021;
 - The Clean Growth Strategy October 2017;
 - A Green Future: Our 25 Year Plan to Improve the Environment 2018;
 - Clean Air Strategy 2019.
- 3.6 On a local level, guidance is provided to local authorities through Local Air Quality Management (LAQM) Policy Guidance (PG22) and LAQM Technical Guidance (TG22). The aim of which is to shift towards evidence-based action planning for the benefit of public health and wellbeing.
- 3.7 The AQMA1 and AQMA2 in Southend-on-Sea were declared because the annual objective for Nitrogen Dioxide (NO₂) had been exceeded.
- 3.8 Where there are exceedances in the air quality objectives, the Council must declare an AQMA. Once declared, the Council is then required to develop an AQAP which must be accepted by DEFRA as being adequate to bring the AQMA into compliance.
- 3.9 The UK Plan for Tackling Roadside Nitrogen Dioxide Concentrations 2017 outlines measures that are in place to improve air quality nationally and recognises the local nature of air quality requires action at a local level, with local authorities having a leading role.
- 3.8 Regulatory Services will continue to ensure that air quality is monitored after the implementation of the AQAP 2023-2027 and will report regularly on progress against it through the Air Quality Steering Group locally and the Annual Status Report to DEFRA.
- 3.9 The UK Plan for Tackling Roadside Nitrogen Dioxide Concentrations 2017 states ‘that air pollution predominantly affects those living in our major towns and cities due to the concentration of vehicles and other sources of pollution. This continues to have an unnecessary and avoidable impact of people’s health, particularly amongst the elderly, people with pre-existing lung and heart conditions, the young, and those on lower incomes.
- 3.11 The Air Quality “A Briefing for Directors of Public Health March 2017” reports that both long and short-term exposure to air pollution is known to adversely affect health. Studies have shown that long-term exposure (over several years) reduced life-expectancy, mainly due to increased risk of mortality from cardiovascular and respiratory causes and from lung cancer. The Joint Strategic Needs Assessment (JSNA) 2019, reported that 6 in 100 deaths locally in Southend were attributable to poor air quality.

- 3.13 The main source of air pollution in the City is road traffic emissions from major roads, notably the A127, A13 and A1159. Other pollution sources including commercial, industrial, and domestic sources also contribute to background pollutant concentrations.
- 3.14 Nationally the most immediate air quality challenge is tackling the exceedances of nitrogen dioxide (NO₂) concentrations around roads.
- 3.15 The Action Plan 2023-27 is an up-dated version of the AQAP, which was adopted in July 2018, and includes some specific targeted actions for the AQMA2.
- 3.16 The purpose of AQAPs is to develop measures that will provide the necessary emissions reductions to achieve the air quality objectives.

4. Other Options

None.

The Local Authority has a statutory duty to adopt an AQAP where an AQMA has been declared. Cabinet may choose to amend the proposed AQAP [in accordance with section 83 (6) of the Act].

5. Reasons for Recommendation

The Council has a statutory duty to put in measures to improve local air quality through the development and implementation of an AQAP, to reduce the impact on the health of those living and working within Southend-on-Sea City Council area.

6. Corporate Implications

6.1 Contribution to the Southend 2050 Road Map

6.1.1 The action plan aligns with and reflects the Southend 2050 objectives and has been divided into the following 6 key priorities:

- Road Transport
- Land Use Planning
- Connected and Smart City
- Public Health and Raising Awareness
- Climate Resilience and Sustainable Innovation
- Air Quality Monitoring

6.2 Environmental Impact

6.2.1 Air pollutants from transport include nitrogen oxides and fine particles. These can have a damaging impact on the health of fauna and flora. The actions in the AQAP do not directly reduce carbon emissions however, none of the proposed actions have a detrimental impact on the City's carbon footprint. Many of the actions that mitigate the impact of air pollution also improve climate resilience. The AQAP positively supports the Council's Corporate Climate Change Programme and the climate resilience focus area of the Green City Action Plan.

6.2.2 The implementation of the AQAP to improve air quality will have a positive impact on vulnerable groups, providing a clear focus for the actions outlined in the AQAP. There is no known negative impact to the priorities of the Council.

6.3 Financial Implications

6.3.1 The AQAP consists of existing initiatives, as detailed in AQAP, as well as new actions. Implementation of most of these actions will be met by existing budgets, consideration having already been given to the funding of air quality initiatives. Those actions identified as new, will be met through securing new (National) funding streams, and again consideration will be given when making grant applications to improvements to air quality.

6.4 Legal Implications

6.4.1 Under Part IV of the Environment Act 1995 (as amended by the Environment Act 2021), the Council has a statutory duty to review air quality in the City and if required designate an AQMA and adopt an AQAP in line with DEFRA LAQM Policy Guidance (PG22) and DEFRA LAQM Technical Guidance (TG22) to try to improve air quality with the AQMA.

6.5 People Implications

6.5.1 There are no People implications associated with this report.

6.6 Property Implications

6.6.1 There are no Property Implications associated with this report.

6.7 Consultation

6.7.1 Stakeholder consultation is a fundamental aspect of Local Air Quality Management, and the requirements are set out at paragraph 1 Schedule 11 of the Act.

6.7.2 The consultation took place between 7 May and 12 August 2021

- The appropriate relevant bodies were consulted in line with the requirements listed above.
- Public opinion via the Southend-on-Sea City Council's website
- Letters were distributed directly to households within the AQMA2

6.7.3 The response to the consultation is appended to the AQAP 2023-27 as Appendix 4.

6.8 Equalities and Diversity Implications

6.8.1 The Equalities Assessment did not identify any negative effect on any of the protected groups.

6.9 Risk Assessment

6.9.1 The DEFRA Policy Guidance 22 at Section 5.3 states that the Local Authority should produce their AQAP within 18 months of an AQMA being declared.

AQMA2 was declared on 10 November 2020. To discharge the Council's statutory duty to manage local air quality and the health risks associated with poor air quality an AQAP should be adopted as quickly as possible.

6.10 **Value for Money**

6.10.1 Measures contained within the AQAP will be fully costed in line with financial requirements and available resources.

6.11 **Community Safety Implications**

6.11.1 There are no Community Safety implications associated with this report.

7. **Background Papers:**

- Defra technical Guidance (TG22).
- Air Quality Action Plan 2018
- Joint Strategic Needs Assessment (JSNA) Summary Report 2019
- Defra Policy Guidance (PG22)
- Air Quality - A Briefing for Directors of Public Health March 2

8. **Appendices**

- **Appendix 1** Air Quality Action Plan 2023-2027
- **Appendix 2 AQMA** (Southend on Sea Borough Council) No. 2 Order
- **Appendix 3 AQMA** (Southend on Sea Borough Council) No. 1 Order
- **Appendix 4** Consultation responses

Southend-on-Sea City Council

Air Quality Action Plan

In fulfilment of Part IV of the Environment Act 1995

Local Air Quality Management

December 2022

Southend-on-Sea City Council

Information	Southend-on-Sea City Council Details
Local Authority Officer	Elizabeth Georgeou
Department	Regulatory Services
Address	Civic Centre, Victoria Avenue, Southend-on-Sea, Essex, SS2 6ER
E-mail	airquality@southend.gov.uk
Report Reference Number	AQAP_AQMA 2
Date	December 2022

Executive Summary

This Air Quality Action Plan (AQAP) has been produced as part of our statutory duties required by the Local Air Quality Management (LAQM) framework. It outlines the action we will take to improve air quality in Southend-on-Sea between 2023-2027.

The purpose of this action plan is to address the air quality concerns associated with the Air Quality Management Area (AQMA) along Victoria Avenue and the junctions of East Street, West Street, Priory Crescent and Fairfax Drive. The AQMA 2 Victoria Avenue was declared in 2020 for exceedances of the annual mean limit for nitrogen dioxide (NO₂); NO₂ emissions in this area are predominantly derived from road traffic.

Air pollution is associated with a number of adverse health impacts. It is recognised as a contributing factor in the onset of heart disease and cancer. Additionally, air pollution particularly affects the most vulnerable in society: children and older people, and those with heart and lung conditions. There is also often a strong correlation with equalities issues because areas with poor air quality are also often the less affluent areas^{1,2}.

The annual health cost to society of the impacts of particulate matter alone in the UK is estimated to be around £16 billion³. Southend-on-Sea City Council is committed to reducing the exposure of people in Southend-on-Sea to poor air quality in order to improve health.

This action plan primarily aims to tackle the main causes of poor air quality within Southend-on-Sea, namely emissions from combustion engines, particularly diesel vehicles. We have developed actions that can be considered under various topics:

- Promoting alternatives to private vehicle use;
- Policy guidance and development control;

¹ Environmental equity, air quality, socioeconomic status and respiratory health, 2010

² Air quality and social deprivation in the UK: an environmental inequalities analysis, 2006

³ Defra. Abatement cost guidance for valuing changes in air quality, May 2013

- Promoting low emission transport;
- Public information;
- Transport planning and infrastructure;
- Traffic management; and
- Vehicle fleet efficiency.

Southend-on-Sea City Council have identified a number of priorities to help achieve these actions, which are aligned with the corporate Southend 2050 vision, containing themes of “Pride and Joy”, “Safe and Well”, “Active and Involved”, “Opportunity and Prosperity”, and “Connected and Smart”. These priorities involve the following:

- **Promoting Public Health and Wellbeing:** Providing information and guidance so that people are educated and understand the impacts of poor air quality, as well as actions they can take to bring about improvements in air quality.
- **Reducing the Need to Travel:** Supporting sustainable development/initiatives that support the local economy, services and facilities.
- **Active Travel, Public Transport and Low Emission Vehicles:** Encouraging people to use their private vehicle less by improving infrastructure to promote walking/cycling, supporting sustainable public transport, car clubs, and travel plans. Improvements are also to be made to electrical vehicle (EV) charging infrastructure, to encourage the uptake of EVs.
- **Local Planning Policy and Development Management:** Ensure that any new development does not have an adverse negative impact on air pollution and, where this is unavoidable, adequate mitigation measures must be provided.
- **Transport Planning and Traffic Management:** Work with partners to mitigate existing areas of traffic and transport.

In this AQAP we outline how we plan to effectively tackle air quality issues within our control. However, we recognise that there are a large number of air quality policy areas that are outside of our influence (such as vehicle emissions standards agreed in Europe), but for which we may have useful evidence, and so we will continue to work with regional and central government on policies and issues that are beyond the direct influence of Southend-on-Sea City Council.

Responsibilities and Commitment

This AQAP was prepared by Bureau Veritas and the Regulatory Services department of Southend-on-Sea City Council, with the support and agreement of the following officers and departments:

- Neil Hoskins (Head of Civil Engineering)
- Sharon Harrington (Head of Traffic, Asset Management & Highways Network)
- Denise Wenn (Health Improvement Practitioner)
- Jo Gay (Interim Head of Waste and Climate Change)

This AQAP has been approved by:

- Cllr Carole Mulronee (Cabinet Member Environment, Culture and Tourism)
- John Burr (Executive Director for Neighbourhoods and Environment)

This AQAP has been signed off by a Director of Public Health.

This AQAP will be subject to an annual review, appraisal of progress and The Air Quality Steering Group. Progress each year will be reported in the Annual Status Reports (ASRs) produced by Southend-on-Sea City Council, as part of our statutory LAQM duties.

If you have any comments on this AQAP please send them to Elizabeth Georgeou at:

1 Introduction

- 1.1 This report outlines the actions that Southend-on-Sea City Council will deliver between 2023-2027 in order to reduce concentrations of air pollutants and exposure to air pollution; thereby positively impacting on the health and quality of life of residents and visitors to Southend-on-Sea. It has been developed in recognition of the legal requirement on the local authority to work towards Air Quality Strategy (AQS) objectives under Part IV of the Environment Act 1995 and relevant regulations made under that part and to meet the requirements of the Local Air Quality Management (LAQM) statutory process.
- 1.2 It should be noted that the Environment Act 1995 has recently been amended (2021). The Environment Act 2021 establishes a legally binding duty on government to bring forward at least two new air quality targets in secondary legislation by 31 October 2022. New legally binding targets are to be set for PM_{2.5}. This Plan will be reviewed every five years at the latest and progress on measures set out within this Plan will be reported on annually within Southend-on-Sea City Council's air quality Annual Status Report (ASR).
- 1.3 The main focus of this action plan is on reducing concentrations of NO₂ in [AQMA 2 Victoria Avenue](#) (illustrated in Figure 1.1 below). However, the measures will also help reduce NO₂ across wider areas of Southend-on-Sea and in [AQMA 1 The Bell Junction](#).

Bureau Veritas | C2 - Internal

2 Summary of Current Air Quality in Southend-on-Sea City Council

- 2.1 Southend-on-Sea is located in south-east Essex, 42 miles from London, and has a population of 180,700 (2021 census), largely living in the main urban areas of Southend, Westcliff and Leigh-on-Sea. The main source of air pollution within these areas originates from road traffic emissions from major roads, notably the A13, A127 and A1159. Other pollution sources that contribute to the background concentration include commercial, industrial and domestic sources.
- 2.2 Southend-on-Sea City Council has declared two AQMAs, both for exceedances of the NO₂ annual mean. These include:
- [AQMA 1](#): Centred at the junction between Prince Avenue, Hobblythick Lane, and Rochford Road (known as ‘The Bell Junction’) – declared 2016.
 - [AQMA 2](#): Short section of the A127 Victoria Avenue, adjacent to the junctions with Priory Crescent, Fairfax Drive, East and West Street – declared 2020.
- 2.3 This AQAP is designed to tackle the exceedance of the NO₂ annual mean identified within with AQMA 2 Victoria Avenue.
- 2.4 In accordance with LAQM Policy Guidance (22)), the approximate population within the boundary of AQMA 2 Victoria Avenue is 353 people, based on the total area of the AQMA being approximately 0.08 km² and the population density⁴ of Southend-on-Sea being 4,336 per km².

2.1 NO₂ Concentrations within Southend-on-Sea

NO₂ is the primary pollutant of concern for Southend-on-Sea City Council, due to the known health effects of exposure to high concentrations. During 2021, NO₂ was passively monitored at 45 diffusion tube sites and one automatic site, which is operated as part of the Automatic Urban and Rural Network (AURN). The monitoring network

⁴ Office for National Statistics. (2022). Population and Household Estimates, England and Wales.

Southend-on-Sea City Council

serves as an ongoing indicator for changing NO₂ trends to identify any hotspot areas and is essential for the assessment of the implementation of the measures detailed within this AQAP. The monitoring network also provides an initial evidence base for consideration of the requirement to revoke, amend or declare any AQMAs.

With regards to the AQMA of interest in this AQAP (AQMA 2 Victoria Avenue), there are two diffusion tube sites located within the AQMA boundary: SOU38 and SOU39. Monitoring data for the past five years (2017-2021) is presented in Table 2.1 so that the trends and the frequency of any exceedances can be identified. The numbers in bold indicate an exceedance of the 40 µg/m³. It should be noted that there is a degree of uncertainty with regard to the 2020 and 2021 monitoring data, owing to the impact that the COVID-19 pandemic had on the level of traffic activity during lockdown periods.

Table 2.1 – Monitored NO₂ Concentrations within Southend-on-Sea

Site ID	Location	Annual Mean NO ₂ Concentration (µg/m ³)				
		2017	2018	2019	2020	2021
Within AQMA 2 Victoria Avenue						
SOU38	West Street	40.9	38.5	33.7	37.4	36.8
SOU39	Victoria Avenue 3	41.5	42.0	38.4	39.1	32.6

From the monitoring undertaken by Southend-on-Sea City Council, it is evident that there have been exceedances of the NO₂ annual mean within both AQMAs over the last five years, and no exceedances outside of the current AQMA boundaries. With regards to AQMA 2 which this AQAP, there were exceedances in 2017 and 2018, and no exceedances since. However, this is likely due to the impact of the COVID-19 pandemic severely reducing vehicular emissions during lockdown periods. However, even during 2020 when vehicle activity was significantly reduced, the NO₂ concentration measured at the diffusion tube site SOU39 within AQMA 2 was still within 10% of the annual mean objective of 40 µg/m³. Therefore, based on current monitoring, it is evident that the current designation for AQMA 2 Victoria Avenue should remain, hence the purpose of this AQAP is to outline measures to ensure future compliance.

3 Southend-on-Sea City Council's Air Quality Priorities

This section presents the main drivers and the approach taken by Southend-on-Sea City Council for the development and subsequent selection of measures included within this AQAP. Reference is also made in this section to the existing strategies and policies that are in place and have an impact on air quality within Southend-on-Sea.

The Council's priorities have also been informed by results from an air quality assessment. As part of this, a source apportionment study has been completed across the modelled area, focusing particularly on AQMA 2 Victoria Avenue. This study has allowed the most significant sources of oxides of nitrogen (NO_x) vehicle contributors to be identified. Primarily, NO_x is emitted into the atmosphere in the form of nitric oxide (NO) which is then converted to nitrogen dioxide (NO₂) through chemical processes in the atmosphere. Under most atmospheric conditions, the dominant pathway for NO₂ formation is via the reaction of NO with ozone (O₃).

In conjunction with the strategies and policies that are currently in place, the findings of this source apportionment exercise have been used to inform and prioritise the measures presented within Section 5.

3.1 Public Health Context

There is increasing scientific evidence that poor air quality has a significant negative impact on human health. Research shows that the most common pollutants of concern (NO₂, PM₁₀, and PM_{2.5}) are linked to various health complications, primarily impacting the cardiovascular and respiratory systems, but also impacting other bodily organs. Short-term exposure to these pollutants can bring about symptoms such as nose and throat irritation, followed by bronchoconstriction and dyspnoea, alongside increased reactivity to natural allergens, increasing the risk of respiratory infections through the interaction of pollutants with the immune system. Long-term exposure may lead to reduced lung function, hampering development in young children, alongside reducing life expectancy due to cardiovascular and respiratory diseases.

Local authorities are under pressure from members of the public to demonstrate that action is being taken to actively tackle and reduce air pollution in their area. Previously,

there had been no deaths linked to air pollution, however in 2020 the first person in the UK had 'air pollution' listed as the cause of death. Although there are currently no legislative outcomes as a result of this, it further increases the pressure and duty of care that local authorities have in order to protect their residents.

Local authorities have a range of powers which can effectively help to improve air quality. However, the involvement of public health officials is crucial in playing a role to assess the public health impacts and providing guidance on taking appropriate action to reduce exposure and improve the health of everyone within Southend-on-Sea.

The Air Quality Indicator in the Public Health Outcomes Framework (England) provides further impetus to join up action between various local authority departments which impact on the delivery of air quality improvements. The "Air Quality – A Briefing for Directors of Public Health" document (published March 2017) provides a one-stop guide to the latest evidence on air pollution, guiding local authorities to use existing tools to appraise the scale of the air pollution issue in their area⁵. It also provides advice for local authorities on how to appropriately prioritise air quality alongside other public health priorities to ensure it is on the local agenda.

The document comprises the following key guides:

- Getting to grips with air pollution – the latest evidence and techniques.
- Understanding air pollution in your area.
- Engaging local decision-makers about air pollution.
- Communicating with the public during air pollution episodes.
- Communicating with the public on the long-term impacts of air pollution.
- Air pollution: an emerging public health issue – briefing for elected members.

Besides NO₂, there is an increasing focus on fine particulate matter. PM_{2.5} is another pollutant of concern, mean particulate matter which is 2.5 microns or less in diameter.

⁵ Local Government Association, Air Quality: A Briefing for Directors of Public Health, March 2017. Available at: <<https://www.local.gov.uk/publications/air-quality-briefing-directors-public-health>>

The Public Health Outcomes Framework data tool⁶ compiled by Public Health England quantifies the mortality burden of PM_{2.5} within England on a county and local authority level. The 2020 fraction of mortality attributable to PM_{2.5} in Southend-on-Sea is 6.1%, which is above both the national and regional (East of England) averages of 5.6% and 5.8%, respectively. It should be noted that this figure only accounts for one pollutant (PM_{2.5}) for which stronger scientific evidence on links with mortality exist, and not NO₂, for which the AQMA of interest (AQMA 2 Victoria Avenue) is declared.

With regards to the health impacts as a result of air pollution within Southend-on-Sea, (particularly within AQMA 2 Victoria Avenue) this is predominantly associated to the concentrations of NO₂ exceeding the annual mean AQS objective. It is expected that some of the measures implemented in this AQAP for the achievement of reductions in NO₂ will have co-benefits in additionally reducing concentrations of PM₁₀ and PM_{2.5}.

3.2 Planning and Policy Context

This AQAP outlines Southend-on-Sea City Council's plan to effectively tackle air quality issues within its control. There are numerous existing and impending policies adopted at all levels (local, regional, and national) that can exert significant effects, both positive and negative, on air quality across Southend-on-Sea. It is important to identify and consider these plans and strategies at an early stage of the development of the plan, as these will aid the establishment of the context in which specific actions for improving air quality can be implemented. Whilst certain policies and/or strategies may be outside of the influence of Southend-on-Sea City Council, there are a number of related policies and strategies at local and regional levels that can be tied directly with the aims of this AQAP. Some of these have a primary air quality focus, whilst others relate to transportation issues and therefore have the additional benefit of contributing to overall improvements in air quality across Southend-on-Sea.

⁶ Public Health Outcomes Framework: D01 – Fraction of Mortality Attributable to Particulate Air Pollution. Available at: <https://fingertips.phe.org.uk/profile/public-health-outcomes-framework/data#page/1/gid/1000043/pat/15/ati/402/are/E06000033/iid/93861/age/230/sex/4/cat/-1/ctp/-1/yrr/1/cid/4/tbm/1>

The review of these strategies and policies also assists in preventing duplication of work within the AQAP but can instead work in concordance for mutual benefit whilst also focusing on direct measures outside those considered within the already developed strategies and policies. This section outlines the strategies and policies that have the most significant potential to impact pollutant concentrations within the city. Given their importance, most measures listed below have been included as action measures within this AQAP. The most relevant policies are detailed in the following:

3.2.1 Association of South Essex Local Authorities

Southend-on-Sea City Council are currently working together with the five other local authorities in South Essex (Basildon, Brentwood, Castle Point, Rochford and Thurrock) and Essex County Council across local authority boundaries. In January 2018, the local authorities formed the Association of South Essex Local Authorities (ASELA) to ensure implementation of the ambition has strong leadership and is managed on a truly collaborative basis. This collective effort addresses a range of strategic issues and initiatives.

3.2.2 Southend-on-Sea City Council Local Plan

A local plan that is shaped through community engagement provides an important tool to help manage future development proposals which may negatively impact air quality.

The plan is divided into three parts: (1) Aims and Objectives, (2) Spatial Strategy, and (3) Southend Neighbourhoods. Consultation has been undertaken in 2019 and 2021 on 'Issues and Options' and 'Refining the Plan Options', respectively. A consultation will be undertaken in the third quarter of 2023 (Q3) on the 'Preferred Approach', with full public consultation on the proposed submission taking place in the third quarter (Q3) of 2024, and submission of the final adopted local plan in the final quarter of the same year.

Once adopted, the local plan sets out the long-term planning strategy and forms the main basis for Southend-on-Sea City Council making decisions on any future planning application. The local plan includes detailed policies and site proposals for housing, employment, leisure and infrastructure up to 2040.

Consideration of air quality issues at the plan-making stage can provide a strategic overview and help to secure net improvements in overall air quality. It can identify the

type, scale and location of development most appropriate to the area, the potential cumulative impact of smaller developments on air quality and opportunities to improve air quality or mitigate impacts.

3.2.3 Southend-on-Sea City Council Local Transport Plan

The local transport plan (LTP) steers the implementation of national transport policies at the local level. As a strategic document the LTP does not contain details of schemes, but sets out a long-term transport strategy, a shorter-term implementation plan and several supporting strategies. Air quality is closely linked to how people and goods travel, and how we would like them to travel in the future. The transport strategy and air quality teams will work closely to ensure policies and plans align.

To reduce the potential for the transport sector to negatively impact air quality, links need to be made to the wider economic, social, and environmental objectives. The LTP3 has therefore been developed within the context provided by a range of policy documents, including the Southend Core Strategy. The LTP3 implementation plan 2021/22 has been extended to cover 2022/23 and updated to state how it achieves the Southend 2050 vision. The actions in the plan will achieve the following outcomes:

- It is easier for residents, visitors, and workers to get around the city.
- People have a wide choice of transport options.
- Leading the way in making public and private travel smart, clean and green.
- More people have physically active lifestyles, including through the use of local open space.

Local Transport Plan (LTP4) is currently under preparation with an aim of completion by the end of 2023. This will include a range of policies and proposals that it is anticipated will include measures to manage the impacts of congestion on air quality, promotion of active travel and facilitation of electric vehicles.

3.2.4 Transport East Transport Strategy

Transport East is the sub-national transport body for Norfolk, Suffolk, Essex, Thurrock and Southend-on-Sea, providing a single voice for councils on the region's transport strategy and strategic transport investment priorities. The transport strategy has an overarching framework of decarbonising transport to reach net-zero emissions.

3.2.5 Land Use Planning – Air Quality Assessments

A key priority for Southend-on-Sea City Council is to integrate air quality considerations into other policy areas such as land use planning. Primarily, this is because many new developments have the potential to increase the pollution burden and it is appropriate that these developments are required to mitigate or offset this to help to achieve an overall reduction in air pollution. Therefore, it is clear that there is a need to identify air quality considerations in the planning process at the earliest possible stage. It is no longer satisfactory to simply demonstrate that a development is no worse than the existing or previous land use on a particular site.

Where a development is proposed to take place in or adjacent to an AQMA or could have a significant impact on air quality, an air quality assessment (AQA) is required, and the resultant mitigation measures must be considered as standard practice. This is particularly the case where the development is new and does not simply replace an existing use, and has the provision for parking spaces that will significantly increase the number of vehicle trips. Where relevant, guidance for dust management on construction sites and medium combustion plant should be incorporated. In some cases, it may be necessary to recommend refusal when a development is so contrary to the objectives of the AQAP and Low Emission Strategy (LES). The LES provides a comprehensive plan detailing mechanisms for reducing road transport emissions across hotspot areas in Southend-on-Sea.

3.2.6 Green City Action Plan

Southend-on-Sea City Council is launching a new set of strategies, which combined will help support the ambition of becoming a green city and the 2050 vision. A new Green City Action Plan has been created, together with a programme of energy and greening projects that target our school estate and would have the co-benefit of improving air quality. In addition will be the Climate Resilience and Urban Green Strategy 2021-2025. The strategy identifies how the Council can build resilience to the future impacts of climate change and will prioritise action to deliver an ambitious urban greening programme. This will also have the added benefit of helping to improve air quality and reduce the impact of pollutants by increasing the amount of vegetation, green infrastructure and green spaces within Southend-on-Sea.

In urban areas, some research suggests trees, vegetation and green spaces can help to reduce the level of pollutants and improve air quality by absorbing gaseous pollutants, lowering ambient temperatures and by producing oxygen during photosynthesis. In addition to using green infrastructure to mitigate the effects of poor air quality, opportunities exist for individuals to change their transport behaviours and adopt a modal shift by utilising walking and cycling network, or consider travelling around Southend-on-Sea by public transport. Green infrastructure therefore has a twofold benefit in terms of air pollution: (1) directly absorbing gaseous pollutants and (2) encouraging changes in travel patterns by encouraging cycling and walking. Southend-on-Sea City Council are seeking funding for the following green infrastructure projects:

- Chalkwell Avenue;
- Victoria Circus; and
- Phase one of 'Better Queensway' – a multi-million pound regeneration scheme.

Southend-on-Sea City Council directly manages thousands of trees growing along its roads, in its parks and gardens, and woodlands. The new tree policy (2020-2030) reaffirms Southend-on-Sea City Council's ongoing commitment to responsible tree management and to maintaining and enhancing tree canopy covers, along with other green planting.

There will be a continuation of street tree planting to help maintain and extend the tree canopy cover across Southend-on-Sea, with a target to increase overall canopy cover from 12% to 15% by 2050 by planting more trees each year than are removed. The policy will be reviewed and updated regularly to reflect changes in national legislation.

3.2.7 Financial Air Quality Improvement Schemes

Southend-on-Sea City Council are in the process of creating a public procurement framework and facilitation service that will enable local authorities and other public sector bodies to procure 'healthy' buildings (including indoor air quality) and net-zero retrofits. By combining 'healthy' buildings with net-zero targets it provides local authorities with an opportunity to bundle investments together, enabling air quality to become an integral aspect of all net-zero investments and decarbonation programmes. This approach is designed to overcome a major barrier for local authority led air quality improvement schemes, specifically how air quality programmes can be funded without

the need for government grants or subsidies. By linking air quality to the net-zero agenda, the project will create routes to finance that local authorities have previously not had access to, linking it to national targets to become net-zero carbon by 2050.

The project is intended to address the critical issues of reducing carbon emissions to support national, regional, and local net-zero targets; it takes positive actions to make buildings 'healthy' and create safe environments for education and working. Moreover, local authorities have considerable property estates which will need upgrading to meet net-zero targets. This upgrade is likely to inadvertently bring about an improvement to air quality. The project will establish a clear pathway for local authorities to deliver an investment programme that combined the net-zero and 'healthy' building retrofits, resulting in projects that achieve high levels of carbon reduction and improvements in air quality, and will initially focus on school buildings. Project partners will develop the public procurement framework to identify how air quality improvement projects can be linked to existing net-zero programmes. Enabling the integration of air quality schemes with existing net-zero programmes is key to facilitating the most efficient strategy to achieve the required reductions. This will enable the new framework and facilitation service to be developed in line with planned energy efficiency, and renewable generation projects in four initial primary schools in Southend-on-Sea. Each pilot will integrate air quality improvement solutions into the net-zero carbon project, highlighting how the model can work in practice and be replicated by local authorities throughout the Southeast Local Enterprise Partnership region, and will be supported by the development of a new air quality modules for Better Planet Schools.

In 2019, Southend-on-Sea City Council declared a climate emergency which was a commitment to leading action to becoming net-zero by 2030. This requires substantial energy efficiency work across Southend-on-Sea City Council's property estate, whilst working with communities, residents and business to identify opportunities to increase the volume of renewable energy in Southend-on-Sea. Shifting to renewable energy and electric vehicles will have a significant impact on improving air quality and will be a strong feature throughout the Net-Zero Carbon Strategy (released in early 2021).

3.2.8 Planning Development ('Better Southend')

Southend-on-Sea City Council received £25 million from central government to use on key projects to help with any regeneration and redevelopment work. There are many

transport policies, projects, and schemes that have been developed and implemented already to improve the travel activity. The projects cover driving, public transport, cycling, and walking – all of which, if improved, can have a positive effect on air quality.

Kent Elms Project: The completed Kent Elms project junction improvements have provided maximum benefit with three lanes heading eastward, and a right-hand turn lane providing improved capacity through the junction. An additional lane is provided heading westward, again increasing the capacity through the junction. These changes make it easier for people with reduced mobility and those with pushchairs to cross the highway to access amenities. The majority of the funding for the Kent Elms junction improvement (£5.1 million) was from the Local Growth Fund via the South East Local Enterprise Partnership, with the remainder coming from the Southend-on-Sea's capital budget. Together, with a new footbridge, the scheme helps to deliver an improved local environment and contributes positively towards sustainable transport objective.

The Bell: The Local Growth Fund, via the South East Local Enterprise Partnership, has provided £4.3 million in support of improvements to The Bell junction. There is also a £720,000 contribution from Southend-on-Sea City Council, meaning the total funding for the project is approximately £5 million. The junction improvement works involved:

- A new dedicated left-hand turn onto Rochford Road;
- Extending the right-hand turn onto Hopleythick Lane;
- Better pedestrian facilities on Rochford Road by providing a traffic-signal pedestrian crossing;
- Better pedestrian facilities on Hopleythick Lane by providing a new pedestrian island;
- Preventing a right-hand turn onto Rochford Road in order to free up more “green light” time for motorists going straight ahead along the A127 in both directions, and improve pedestrian facilities; and
- Removing the footbridge which does not comply with disability discrimination legislation because of the lack of ramps.

For more information, please email bettersouthend@southend.gov.uk.

3.2.9 Additional Policies

Core Strategy (2007) Policy KP2 (Development Principles): This policy seeks to ensure that all new developments, including transport infrastructure, contributes to economic, social, physical and environmental regeneration in a sustainable way, including:

- Reducing the need to travel;
- Respecting, conserving, enhancing and, where required, adequately mitigating the effects on the natural environment;
- Facilitating the use of travel modes other than the private vehicle;
- Promoting improved and sustainable modes of travel, including appropriate measure in design, layout, operation and materials to achieve, avoidance or appropriate mitigation of actual and potential pollution impacts of development enhancements to the ecological and amenity value of the environment.

Core Strategy Policy KP3 (Implementation and Resources): This policy states that in planning obligations, Southend-on-Sea City Council will enter the discussion to ensure the provision of infrastructure and transportation measures (that have an air quality benefit) such as improvements to:

- Cycling, walking and passenger transport facilities and services, open spaces, and green grid enhancements; and
- Requiring all developments to have regard to and, where appropriate, contribute to the delivery of the Southend Local Transport Plan.

Core Strategy Policy KP3 (Transport and Accessibility): This policy makes provision for improvements to transport infrastructure and services, in partnership, to secure a step change in provision to achieve a modern integrated transport system, necessary to unlock key development sites and secure sustainable regeneration and growth. This includes Policy CP3.6 'Safeguarding and Enhancing the Environment of Environmental Rooms', as defined in the Local Transport Plan.

4 Source Apportionment

Source apportionment is the process by which different pollutant sources in relation to existing ambient concentrations are quantified. A source apportionment exercise was carried out using a baseline year prior to 2020 to discount any changes arising as a result of the effects of COVID-19 restrictions causing significant changes in vehicle patterns, which may not be representative of future year concentrations. Therefore, using pre-pandemic traffic levels would more likely represent the normalised level of vehicle activity in Southend-on-Sea. However, on the professional recommendation of the transport consultant (Mott MacDonald), 2018 data was used instead of 2019. The measures presented within this AQAP are targeted towards the predominant sources of emissions within Southend-on-Sea.

The source apportionment process has been completed in order to:

- Quantify the proportions of NO_x that are attributable to both background concentrations and to local road emissions. The total concentration of a pollutant comprises those from explicit local emission sources such as roads, chimney stacks, etc., and those that are transported into an area by the wind.
- Determination of the relative contributions from different vehicle types (cars, heavy good vehicles (HGVs), light good vehicles (LGVs), buses and coaches, and motorcycles).
- Determination of whether action plan measures would need to be on a local, regional, and/or national scale to have a significant impact upon reducing NO_x emissions within the AQMA.

The source apportionment exercise was carried out using detailed dispersion modelling software (ADMS-Roads Version 5.0) to identify and assess the emission profile of vehicles within Southend-on-Sea, based upon traffic data and sensitive receptors. To complete this exercise, NO_x and NO₂ concentrations have been predicted at a number of receptors within, and close to AQMA 2 Victoria Avenue. This was undertaken to determine which vehicle type(s) represent the most significant source of NO_x pollution within the AQMA. The study used the split of vehicle fleet emissions contained in the Emissions Factors Toolkit provided by Defra and are in line with predictions from the National Air Emissions Inventory.

Emission sources of NO₂ are dominated by a combination of different NO₂ (f-NO₂) and oxides of nitrogen (NO_x), the latter of which is chemically unstable and rapidly oxidised upon release to form NO₂. NO_x, once emitted from vehicles, undergoes a number of chemical reactions and disperses to form the NO₂ concentrations that are measured at roadside monitoring locations. Reducing levels of NO_x emissions therefore reduces the levels of NO₂. As a consequence, the source apportionment study has considered NO_x emissions which are assumed to be representative of the main sources of NO₂.

The findings of the above are summarised in Figure 4.1 and Figure 4.2

below. **Figure 4.1 – Source Apportionment of NO_x (All Receptors)**

Figure 4.2 – Source Apportionment of NO_x (NO₂ > 40 µg/m³ & Maximum NO_x)

The figures detail the source apportionment results for NO_x concentrations at modelled receptors for three scenarios:

- The average NO_x contributions across all modelled locations representative of sensitive human exposure (called ‘receptors’). This provides useful information when considering possible action measures to test and adopt.
- The locations where the NO₂ annual mean objective of 40 µg/m³ has been predicted to be exceeded. This will inform potential prominent NO_x contributors present within the identified area of exceedances and, therefore, be useful when testing and adopting action measures.

- The location where the maximum road NO_x concentration has been predicted within the AQMA. This is likely to be in the area of most concern within the AQMA and so acts as a good place to test and adopt action measures. Any gains predicted by the action measures are likely to be greatest at this location and so would not represent the greatest gains across the whole modelled area.

As the NO₂ annual mean concentration of 40 µg/m³ was only predicted to have been exceeded at one modelled receptor location, the source apportionment analysis results are the same for receptor locations where the NO₂ concentration is above 40 µg/m³ and the receptor location of the maximum NO_x concentration.

The percentage contributions of each vehicle class are relatively similar for the average of all modelled receptors and at receptor locations where the annual mean is predicted to exceed the 40 µg/m³ annual limit. As the annual mean threshold was only exceeded at one receptor location, the source apportionment results for receptor locations above 40 µg/m³ also applies to the receptor location with the maximum NO_x concentration.

The NO_x source apportionment exercise demonstrates a relative consistent ranking of contributing vehicle classes exhibited through each scenario, with diesel cars and diesel LGVs found to be the main contributors to total road NO_x concentrations across Southend-on-Sea. This suggests that the volume of traffic is considered to be the key contributor to elevated levels of NO₂ annual mean concentrations within the AQMA.

4.1 Required Reduction in Emissions

In line with the methodology presented in Box 7.6 of Technical Guidance(22), the necessary reduction in road NO_x emissions required to bring the current AQMA into compliance is shown in Table 4.1. This has been completed at the maximum annual mean concentration location, either monitored or modelled within the AQMA. The procedure calculates the required reduction of road NO_x to achieve a total NO₂ concentration of 40 µg/m³. However, to account for uncertainties with dispersion modelling and the degree of potential inaccuracy with diffusion tube monitoring, a more stringent figure of 36 µg/m³ has been used (10% lower than the annual mean AQS objective). This will ensure that the AQMA 2 Victoria Avenue is revoked once Southend-on-Sea City Council are confident that the NO₂ concentrations are sufficiently below the AQS objective. In order to achieve a concentration of 36 µg/m³,

the road NO_x concentration needs a reduction of 20.2 µg/m³ (37.0%). The calculation to obtain such value is shown in Table 4.1.

Table 4.1 – NO_x Reduction Required within AQMA 2 Victoria Avenue

Metric	Concentration (µg/m ³)
Background NO ₂ Concentration	18.8
Road NO _x at 45 µg/m ³ NO ₂	54.5
Road NO _x at 36 µg/m ³ NO ₂	34.3
Required Reduction	20.2 (37.0%)

5 Key Priorities

Based on the information presented within Section 4, and the measures listed within Section 7, the following have been defined by Southend-on-Sea City Council as key areas for action.

5.1 Priority 1 – Road Transport

The main source of air pollution leading to the declaration of AQMA 2 Victoria Avenue is road transport emissions. Therefore, reducing the emissions from road transport is the key priority. The approach focuses on areas that Southend-on-Sea City Council have direct control over, so that measures can be implemented without restriction.

Although the roads contributing to high pollutant levels which result in exceedances of the annual average NO₂ objective are not managed by National Highways, this relevant public authority has been engaged with whilst for the purposes of preparing this AQAP.

Transport planning and infrastructure improvements can be achieved through both the Association of South Essex Local Authorities and 'A Better Southend'. Workplace and school travel plans are also to be promoted by Southend-on-Sea City Council. In order to directly reduce the emissions from road transport, alternative forms of transport are to be encouraged (i.e., walking/cycling) and facilitated through infrastructure improvements (i.e., installation of electrical vehicle (EV) charging points to promote the uptake of EVs). Emissions from road transport are also reduced through measures contained within the local transport plan, which ensures air quality and transport policies are aligned. In specific relation to AQMA 2 Victoria Avenue, the aim is to reduce vehicle emissions by enforcing an anti-idling policy. This is to be specifically effective along areas of Victoria Avenue, in particular the section adjacent to Roots Hall Football Stadium, where there is a section along the road for vehicles to park and idle their engines. This area is likely to be frequently used by vehicles idling their engines as the Smartway Driving School is located along this section of road.

5.2 Priority 2 – Land Use Planning

The local plan and its policies set out the considerations that will be applied by Southend-on-Sea City Council for all development proposals. Southend-on-Sea City

Council will work with developers and partner organisations to ensure the delivery of infrastructure, services and community facilities necessary to develop and maintain sustainable communities. This will not only apply to air quality but also all other relevant environmental aspects. Furthermore, Southend-on-Sea City Council will look to secure funding support for initiatives aimed at reducing air pollution either directly or indirectly via S106 agreements and the Community Infrastructure Levy.

5.3 Priority 3 – Connected & Smart City

Southend-on-Sea City Council are exploring the use of future network technologies, which will form the foundation of future smart service and smart city developments. Full fibre technology is being installed by City Fibre, in partnership with Vodafone, in over 64,000 homes across Southend-on-Sea. Key to this is the implementation of the strategic platform, which will form the basis of future deployments and be the prime enabler for moving towards a smart, digital city, whilst hosting and analysing the data feeding into the Smart Southend Portal.

Initiatives that have a beneficial impact on air quality include measures such as ‘smart parking’. By being able to find a parking space with ease reduces the need for driving around looking for somewhere to park, which therefore reduces the emissions from road traffic. Smart solutions such as this are effective measures that, although not primarily designed to, indirectly reduces the pollutant concentration.

5.4 Priority 4 – Public Health & Raising Awareness

As detailed within Section 3.1, air pollution has a detrimental impact on public health. Therefore, improving air quality within the borough is a key priority. The main sources of air pollution in areas of existing exposure in Southend-on-Sea are from vehicle emissions. Aside from restricting vehicle usage through measures such as Clean Air Zones and Low Emission Zones, the most effective way to achieve a reduction in the level of vehicle activity is to influence, and change, the attitudes and behaviours of the population towards travel. By raising awareness of the health impacts of an individual’s choice of travel (i.e., private vehicle use over public transport), Southend-on-Sea City Council hope the residents of Southend-on-Sea will be motivated to change their mode of transport to a more sustainable form of travel. Raising awareness of the health impacts of air pollution, especially to high risk and vulnerable groups, will be done

through Southend-on-Sea City Council's website and social media pages, as well as via the 'Livewell Southend' page. Southend-on-Sea City Council also plan to issue alerts and messages to people on poor air quality days.

Measures will include education and awareness raising, alongside schemes which incentivise change. Improving air quality to protect public health requires changes to be made across the whole of Southend-on-Sea, not just within the AQMA.

5.5 Priority 5 – Climate Resilience & Sustainable Innovation

Southend-on-Sea City Council are committed to building resilience and facilitating sustainable innovation against the impacts of future climate change. Key to this is the implementation of the 'Green City Action Plan' and the 'Climate Resilience and Urban Green Strategy (2021-2025)'. These two strategies are a key priority in delivering an ambitious urban greening programme to resilience to climate change. Despite the fact that increasing the number of green spaces is primarily to reduce the impacts of climate change, there is also an additional co-benefit to air quality. This can be either directly through absorbing gaseous pollutants or indirectly by encouraging a modal shift in travel behaviour (i.e., green spaces to encouraging walking and cycling).

5.6 Priority 6 – Air Quality Monitoring

Currently, the concentration of NO₂ is monitored by Southend-on-Sea City Council across a passive diffusion tube network at 45 locations and an automatic monitoring station at Chalkwell Park, which forms part of the Automatic Urban and Rural Network (AURN). Air quality monitoring is a useful way to continually assess the extent of air pollution and identify any area of concern within Southend-on-Sea. It also helps to measure the success of the measures implemented as part of this AQAP, and thus acts as an evidence base for the AQMA to be revoked once the monitoring shows compliance with the AQS objective for which the AQMA was declared for.

6 Development and Implementation of Southend-on-Sea City Council’s AQAP

6.1 Consultation and Stakeholder Engagement

In developing this AQAP, Southend-on-Sea City Council have worked with other local authorities, agencies, businesses and the local community to improve air quality. Schedule 11 of the Environment Act 2021 requires local authorities to consult the bodies listed in Table 6.1. The responses provided to Southend-on-Sea City Council’s consultation stakeholder engagement on the development of this AQAP are given in Appendix A.

Table 6.1 – Consultation Undertaken by Southend-on-Sea City Council

Consultee	Consultation Undertaken
The Secretary of State	Yes
The Environment Agency	Yes
The highways authority	Yes
All neighbouring local authorities	Yes
Other public authorities as appropriate, such as Public Health officials	Yes
Bodies representing local business interests and other organisations as appropriate	Yes

Given the size and nature of the AQMA 2 Victoria Avenue, the above consultation is considered appropriate, engaging with the relevant bodies as necessary. In addition, Southend-on-Sea City Council also undertook the following stakeholder engagement:

- Public opinion via Southend-on-Sea City Council’s website.
- Letters distributed directly to households within AQMA 2 Victoria Avenue.

6.2 Steering Group

Once the AQAP has been adopted, a new Steering Group will be established, and will be composed mainly of Southend-on-Sea City Council officers from those services with an interest or potential impact on air quality. The Steering Group will also include those who may have an influence on the measures being considered. The members of the Steering Group will include:

- Senior officers from strategic transport planners;
- Local highway authorities;
- Land use planners;
- Environmental protection; and
- Climate Change officers.

It is the aim of this steering group to continue to communicate at regular intervals following the adoption of the AQAP. This is essential to provide progress reports on individual actions in relation to the AQAP measures, discuss any key lessons learnt from the continual implementation of the measures and continue to discuss any new ideas in terms of future measures and actions. Of utmost importance, the steering group should discuss and reasons for why some actions are not working as effectively as intended or why some actions are proving more difficult to implement than expected.

7 AQAP Measures

Through the development of the AQAP, a wide range of measures aimed at improving air quality within AQMA 2 Victoria Avenue have been considered. It is important to note that although the primary focus is on the AQMA, these measures should contribute to improving air quality across wider areas of Southend-on-Sea and in AQMA 1 The Bell Junction. TG(22) states that an AQAP should be adapted to every local situation and, most importantly, should be seen as part of an integrated package of measures, particularly in relation to linking with other key policy areas.

After having undertaken a source apportionment exercise to determine the vehicle classes which are predominantly responsible for air pollution within the AQMA, the resultant action measures contained within this AQAP are considered to be the most effective. These measures are also the most feasible to implement and cost-effective to pursue in terms of the potential air quality improvements within the AQMA and across wider areas of Southend-on-Sea. Given that road traffic has been identified as the principal source of NO_x emissions and, therefore, NO₂ concentrations within the AQMA, the measures presented within Table 7.1 focus on the promotion of sustainable transport, traffic management improvements and improving community awareness to facilitate behavioural changes.

Table 7.1 shows the Southend-on-Sea City Council AQAP measures. It contains:

- A list of the actions that form part of the plan;
- The responsible individual and departments/organisations who will deliver this action;
- Estimated cost of implementing each action (overall cost and cost to the local authority);
- Expected benefit in terms of pollutant emissions and/or concentration reduction, where possible;
- The timescale for implementation; and
- How progress will be monitored.

NB: Please see future ASRs for regular annual updates on implementation of these measures

Responses to Consultation

183 (33 online)

No Response to Consultation

333

Key Questions:

1) Are any significant actions/initiatives already being undertaken or committed to that could improve air quality? **No = 76%**

Majority answering no shows limited awareness. Of those saying yes, mention of road improvements, such as ‘The Bell Junction’ and ‘Kent Elms Project’.

3) Are any significant actions/initiatives missing that could improve air quality? **Yes = 91%**

Suggested measures for inclusion included encourage uptake of EVs, better cycle lanes, and preserving/enhancing the number of green spaces.

5) Are any of the actions listed within the AQAP no longer of any relevance? **Yes = 9%**

Majority answering no indicates need for a range of new measures to be considered as public feel current measures not working or are not applicable.

7) Are there any barriers that need to be overcome for us to take up these measures in the plan? **Yes = 70%**

Barriers that need to be overcome included road infrastructure improvements to ease traffic flow and public awareness of air quality issues is very low.

Appendix B: Reasons for Not Pursuing Action Plan Measures

Table B.1 – Action Plan Measures Not Pursued and the Reasons for that Decision

Action category	Action description	Reason action is not being pursued
Sustainable Innovation	Urban Innovation Action (UIA) Innovate Air Quality Initiatives	Funding Bid Unsuccessful
Public Health	Health Impact Assessment	Effective Alternative Exists

56

Glossary of Terms

Abbreviation	Description
AQAP	Air Quality Action Plan - A detailed description of measures, outcomes, achievement dates and implementation methods, showing how the local authority intends to achieve air quality limit values'
AQMA	Air Quality Management Area – An area where air pollutant concentrations exceed / are likely to exceed the relevant air quality objectives. AQMAs are declared for specific pollutants and objectives
AQS	Air Quality Strategy
ASR	Air quality Annual Status Report
Defra	Department for Environment, Food and Rural Affairs
EU	European Union
HGV	Heavy Goods Vehicles
LAQM	Local Air Quality Management
LGV	Large Goods Vehicles
NO ₂	Nitrogen Dioxide
NO _x	Nitrogen Oxides
PM ₁₀	Airborne particulate matter with an aerodynamic diameter of 10µm (micrometres or microns) or less
PM _{2.5}	Airborne particulate matter with an aerodynamic diameter of 2.5µm or less

Air Quality Management Area Order

Southend on Sea Borough Council ("The Council"), in exercise of the powers conferred upon it by Section 83(1) of the Environment Act 1995, hereby makes the following Order.

1. This Order may be referred to as the Air Quality Management Area (Southend on Sea Borough Council) (No.2) Order 2020 and shall come into effect on *10th November 2020*
2. The effect of the Order is to designate an Air Quality Management Area ("the AQMA"), in respect of the area shown edged purple on the plan in Schedule 1 which includes the properties listed in Schedule 2 attached.
3. Where the AQMA includes any part of a property, it shall be taken to include the whole of that property (buildings and associated open space) within the same curtilage.
4. This area is designated in relation to a likely breach of the Nitrogen Dioxide (NO₂) Annual Mean Objective as specified in the Air Quality Regulations 2000.
5. This Order shall remain in force until it is varied or revoked by a subsequent Order.

The Common Seal of SOUTHEND-ON-SEA BOROUGH COUNCIL was hereto affixed

in the presence of:

DATED: *10th November 2020*

SIGNED:

Giles W. Gilbert Attesting Officer

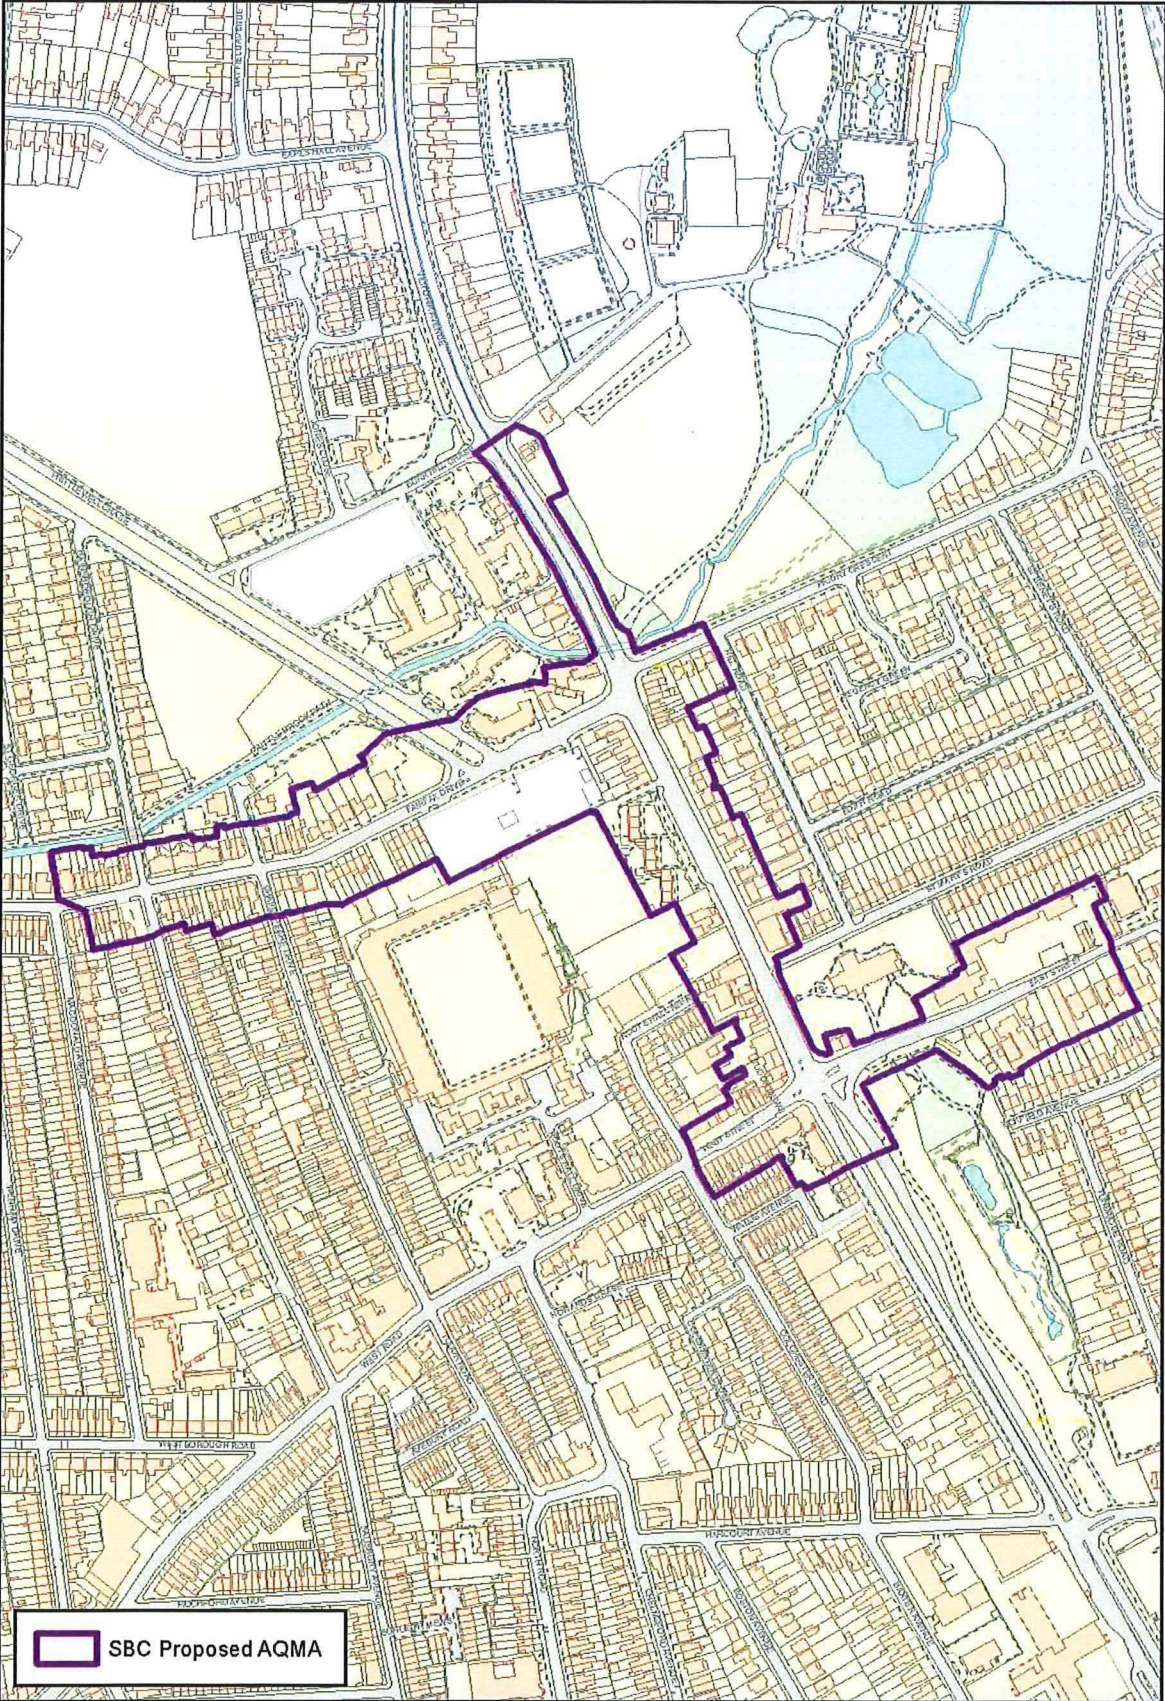

Address for all communications:

Southend on Sea Borough Council, Civic Centre
Victoria Avenue, Southend, Essex SS2 6ER

Notes: A copy of this Order and associated plan have been deposited and may be seen, free of charge, at the above address during normal working hours. It is also available on the Council's website www.southend.gov.uk/airquality. Enquiries should be directed to Regulatory Services at the above address, via telephone on 01702 215000 or else via the website.

Air Quality Management Area Order

Southend on Sea Borough Council ("The Council"), in exercise of the powers conferred upon it by Section 83(1) of the Environment Act 1995, hereby makes the following Order.

1. This Order may be referred to as the Air Quality Management Area (Southend on Sea Borough Council) (No.1) Order 2016 and shall come into effect on 7th November 2016. The Cabinet confirmed the making of this Order on 20th September 2016 (Minute 276 refers) and this was noted at Council on 20th October 2016 (Minute 400 refers).
2. The effect of the Order is to designate an Air Quality Management Area ("the AQMA"), in respect of the area shown edged green on the plan in Schedule 1 which includes the properties listed in Schedule 2 attached.
3. Where the AQMA includes any part of a property, it shall be taken to include the whole of that property (buildings and associated open space) within the same curtilage.
4. This AQMA is designated in relation to a likely breach of the Nitrogen Dioxide (NO₂) Annual Mean Objective as specified in the Air Quality Regulations 2000.
5. This Order shall remain in force until it is varied or revoked by a subsequent Order.

The Common Seal of Southend on Sea Borough Council was hereto affixed in the presence of:

Proper Officer

Address for all communications:

Southend on Sea Borough Council, Civic Centre
Victoria Avenue, Southend, Essex SS2 6ER

243 / 16

Notes: A copy of this Order and associated schedules may be seen, free of charge, at the above address during normal working hours. It is also available on the Council's website www.southend.gov.uk/airquality. Enquiries should be directed to Customer Services at the above address, via telephone on 01702 215000 or else via the website.

Air Quality Consultation Submissions with Council Responses

Question	Comment	Council response
Q1 and Q2 - Are any significant actions/initiatives already being undertaken or committed to that could improve air quality? (if yes please tell us more)		
No		No response required
Yes	I would be interested to see the air quality plans from the airport alongside the one from the council - the air around my local community was surely affected severely before the pandemic due to the volume of planes taking off on a daily basis.	
Yes	Closing roads off outside schools	The Council is expanding its Safer Streets programme, ensuring that unsuitable traffic volumes and vehicle types are not directed onto smaller, quiet residential streets.
No		No response required
No		No response required
No		No response required
No		No response required
No		No response required
No		No response required
Yes	The Bell Junction is underway; however overall the action plan appears to have many actions with little headway or measurable outcomes.	Details of the Bell Junction can be found at The Bell Junction Improvements – The Bell Junction – Southend-on-Sea City Council with further information available through emailing bettersouthend@southend.gov.uk
No		No response required

No		No response required
No		No response required
No		No response required
Yes	No use spending money if current building programmes are pursued, sort out the infrastructure first. The current policy I view as a nice little earner for councils and will be a good excuse to introduce congestion charging. The roads claimed to be pollution hotspots are those that are already busy and will even more so with the current building	Major development proposals are required to be supported by a range of technical assessments so that impacts on matters such as traffic and transportation, including the

83

Question	Comment	Council response
	programmes. It will become obvious the electric cars will be a failure and will cost more overall in pollution from producing lithium to the 'recycling of the batteries	effect on the highway network, can be taken carefully into account. All planning applications are assessed against relevant planning policies set out in national and local plans and guidance. The government policy on electric vehicles can be accessed UK electric vehicle infrastructure strategy - GOV.UK (www.gov.uk)
No		No response required
No		No response required
No		No response required
Yes	as described in the plan. Unfortunately many are dependent on cultural change which is not easy to implement.	Details of how the Council tries to influence modal shift is contained in the AQAP.
Yes	The A127 AQAP has been a failure and appears to only be a money grab for speeding not anything to do with traffic management or air pollution This should be reviewed and published results before taking on a further “project”	There have been no additional speed cameras installed as a result of the AQAP for the AQMA1. Action plans will be reviewed and reported to DEFRA via the Air Quality Status Report and through the Air Quality Steering Group.

No		No response required
Yes	Maybe I have misunderstood this question - but clearly SBC has a number of initiatives underway such as the A127 Kent Elms Strategic Highway Improvement that should make a difference going forward? If you are talking about me personally, then apart from working with West Leigh Schools on the Safer Streets scheme and moving the bus stand from outside the school I have not.	No response required

84

Question	Comment	Council response
Yes	1000 new trees planted. Traffic calming areas with schools. Some public green spaces left to grow. Electric vehicle charging points to increase and form a requirement in planning applications. Cycling and healthy lifestyles promoted. Green energy in public buildings developed.	No response required. All suggestions already contained in policy.
No		No response required
No		No response required
No		No response required
Q3 and Q4 - Are any significant actions/initiatives missing that could improve air quality? (if yes please tell us more)		
Yes	Extensive EV charging network within the whole of the borough. SBC currently has a very low charger to population, with a large density of houses without off-street parking. Leigh-on-Sea town centre has 0 charging points. Until this is dealt with, residents will either be forced to continue to purchase polluting ICE cars or carry on using their existing vehicles.	The installation of installing EV on the carriageway is being considered by the Working Party Preparing Southend for the EV revolution.
No		No response required
Yes	Outside all schools . More cycling/ electric scooters	An application for a grant has been made to DEFRA to support travel plans for schools.
Yes	ask all the residents living near the Bell including Hampton Gardens to plant lots of trees in their gardens for canopy cover and even provide them for the residents to plant.	It should be noted that within the canopy cover report there are many areas Southend-on-Sea City Council do not own which have low tree cover. Some of these cover substantial areas of land. Existing land use can also influence the availability of land for planting which Southend-on-Sea Borough Council do own, for example, the airport and its flight approaches. The canopy cover report commissioned in October 2019 will be used to inform future planting. Initially planting undertaken until 2023 will be focused on wards with the lowest cover where it is practically viable to plant new trees with planting above that which is normally carried out. After 2023 tree planting will continue to

Question	Comment	Council response
		be programmed based on the overall canopy cover of the city. The council is committed to maintaining and enhancing tree canopy cover in the city and it is our aim to increase the canopy cover to a city average of at least 15% by 2050.
Yes	The recycling plant on stock road must be looked at as it smells very bad for miles around	Any waste recycling sites (except for the Anglian Water Recycling Centre) require Environmental Permits to operate which are issued and regulated by the Environment Agency. Any complaints about sites in Stock Road or anywhere else should be made to the EA to 0800 80 70 60 and at incident_communication_service@environment-agency.gov.uk
Yes	The plan is essentially a tactical sticking-plaster project, that MAY deliver some short-term local improvements. At a strategic level Southeast Essex needs a new arterial road from the A130 to feed into the north part of Southend with new park-and-ride systems. This would obviously take time to plan and build, by which time electric/hydrogen vehicle use would have risen and better 24-hour green public transport would be in place – well I suppose we can all dream! Britain is heading towards the 22nd century but this plan gives no indication where SBC is going and consequentially how it would get there? Short term fixes are just kicking the can down the road until national emission restrictions solve the problem for you.	The Council is undertaking work on the Transport East Strategy which will be aligned to the LTP4, which is in development.
Yes	Better bus service. Some sort of congestion charge. Park & ride service.	Bus services are independently delivered. The Council aims to influence the emissions through the Bus Service Improvement Plan and the Enhanced Partnership.
No		No response required

Question	Comment	Council response
Yes	get all residents near main junctions and main roads to plant lots of trees to provide air purification through the leaves, don't know scientific terms.	The Council continues to plan more trees than those removed, and planted over 600 in the last year, which more planned this season.
Yes	Do not build 7000 new homes on green belt land between Bournes Green Chase and Rochford. The road infrastructure is not able to withstand such a development. It is already a grid lock to reach Shoeburyness. Example, 1530 hours, 11June 2021, it took 60 minutes to complete a 35 minute journey. No accidents, just pure weight of traffic.	Major development proposals are required to be supported by a range of technical assessments so that impacts on matters such as traffic and transportation, including the effect on the highway network, can be taken carefully into account. All planning applications are assessed against relevant planning policies set out in national and local plans and guidance.
Yes	Air quality in the Marine Parade / Thames Drive area relating to air traffic when the airport resumes full working pattern	The Council has 45 diffusion tubes sited across the City which are located in line with the DEFRA Technical Guidance.
Yes	Shut the airport, biggest polluter in the town	London Southend Airport has an Air Quality Monitoring Programme agreed with Southend-On-Sea City Council and Rochford District Council. The results of the monitoring are submitted regularly to the councils for review and currently are within their targets. For more information on their monitoring programme please contact the airport at General enquiry - London Southend Airport
Yes	Proposed passenger and freight growth plans for Southend Airport will significantly add to air pollution and mitigate any AQAP improvements. That needs to be properly recognised and acted upon. Aside from traffic pollution, there is the problem of significant, and health-damaging, emissions from aircraft, particularly from the very old planes used for freight.	London Southend Airport has an Air Quality Monitoring Programme agreed with Southend-On-Sea City Council and Rochford District Council. The results of the monitoring are submitted

87

Question	Comment	Council response
		regularly to the councils for review and currently are within their targets. For more information on their monitoring programme please contact the airport at General enquiry - London Southend Airport
Yes	<p>Proper commitment to protecting green spaces / green belt in Southend and surrounding areas. More mature trees protected & planted.</p> <p>Less new houses therefore less cars & rubbish, not so much strain on old outdated sewers, drains, etc.</p> <p>Limit airport flights especially at night, therefore limiting freight containers travelling on the roads.</p>	<p>The Council has a commitment to increase the tree canopy cover to a city average of at least 15 by 2050.</p> <p>Major development proposals are required to be supported by a range of technical assessments so that impacts on matters such as traffic and transportation, including the effect on the highway network, can be taken carefully into account. All planning applications are assessed against relevant planning policies set out in national and local plans and guidance.</p> <p>London Southend Airport has an Air Quality Monitoring Programme agreed with Southend-On-Sea City Council and Rochford District Council. The results of the monitoring are submitted regularly to the councils for review and currently are within their targets. For more information on their monitoring programme please contact the airport at General enquiry - London Southend Airport</p>

Question	Comment	Council response
	Encourage businesses into the area so less people have to commute especially to out of town workplaces therefore cutting down on the need for car travel.	The Council has opportunity and prosperity outcomes planned, which are contained in The Local Plan. There are projects and schemes, including development of the High Street.
Yes	<p>Much greater concentration and Action on preserving green spaces, not cutting verges/hedgerows during seeding time to encourage pollinators. Doubling the tree planting commitment (at least). Encouraging public spaces (schools, commercial spaces, factories etc to plant trees)</p> <p>Look to marine conservation of sea grasses etc to catch carbon</p> <p>Greater concentration on providing SAFE cycling routes. Ban cars from town centre.</p> <p>Every new housing or commercial development needs to consider how to make their buildings carbon neutral and a risk assessment completed to ensure that the eventual buildings will not increase traffic.</p>	<p>The Council continues to plant more trees than are removed, over 600 were planted last year, which more planned this season. The Grassland Management Policy will be considered by Cabinet, which if adopted will increase the number of areas for longer grass.</p> <p>Contained in the AQAP</p> <p>Major development proposals are required to be supported by a range of technical assessments so that impacts on matters such as traffic and transportation, including the effect on the highway network, can be taken carefully into account. All planning applications are assessed against relevant planning policies set out in national and local plans and guidance.</p>
Yes	From the figures I have read the whole thing is based on the wrong premise and are biased. The pressure for all of this is from financial interests - there is no altruism.	No response required.
Yes	Banning petrol cars older than 15 years and diesel cars over 5 years as diesel cars are very bad polluters. Converting buses and civic and refuse vehicles to electric. Ban any new house building as new houses always results in increase traffic . Take action on the roads to make traffic move more smoothly egs more filter lanes such as at Tesco from west to east when a left turn is required and install intelligent traffic lights that give greater times to the busiest road at a junction. Ban wood burning fires. Plant many more trees.- sadly	<p>There is a government strategy on older cars, there is a partnership in place for influencing the bus fleets, and a Green Fleet Strategy for the Council.</p> <p>Traffic is already controlled through intelligent signalling.</p>

06

Question	Comment	Council response
	<p>the tree planting policy appears to have currently petered out Allow grass verges to grow much longer rather than regularly cutting them. More average speed cameras would reduce unnecessary speeding up and slowing down when passing a fixed speed camera eg Royal Artillery Way and by getting the traffic running smoothly less fumes are emitted. Extend the 2 small areas in the AQAP to cover many more bad pollution areas.</p>	<p>The AQAP also contains details of our proposed action regarding wood burners. The Council continues to plant more trees than are removed, over 600 were planted last year, which more planned this season. The Grassland Management Policy will be considered by Cabinet, which if adopted will increase the number of areas for longer grass. Speed cameras are generally in areas renowned for accidents or where drivers are known to drive at high speeds. The cameras act as a deterrent. AQMAs are statutorily declared in response to air quality not meeting the air quality objectives. The modelling undertaken confirms that the air quality outside the AQMA's is within the air quality objectives.</p>
<p>Yes</p>	<p>Encouraging more people to take up electric vehicles (EVs). Currently there are no incentives in the borough for drivers of EVs. These could include: free parking at the weekends; £5 off their Council Tax bill; access to the town centre (like in other European countries) and the banning of ICE vehicles on certain days, Allow EV owners to charge their vehicles in the council car park, Install more chargers, Stop all of the widening of the A127 in a bid to encourage more people commuting by cars in and out of the town. We should be trying to stop long range commuting not encouraging it, Introduce a park and ride system for non-residents.</p>	<p>The parking strategy addresses thee need for increased electric vehicle charging points at key locations.</p> <p>Details of the aims of the schemes can be obtained by emailing bettersouthend@southend.gov.uk</p> <p>The Council is developing an updated LTP4.</p>
<p>Yes</p>	<ol style="list-style-type: none"> 1. Banning the use of high polluting vehicles on our busiest roads and in our town centres. 2. There could be a similar action to London's ULEZ that is being extended in October this year. 	<p>There are a number of items raised here, many of which have already been responded either in the AQAP or in consultation responses above.</p>

Question	Comment	Council response
	<ol style="list-style-type: none"> 3. Also banning of large polluting SUV’s and older polluting cars. 4. Encouraging more EV take up by supplying the necessary infrastructure through government grants. 5. plant more Street trees and hedgerows along our verges to help absorb and filter local air pollution. 6. Encourage cycling by creating designated space on our roads for cyclists and supplying on-street cycle parking that would take up a whole car space, similar schemes are being used in Lambeth for example. 7. restrict car use to certain times of the day. 8. increase parking costs and fines to discourage car use 9. Encourage e-car clubs to be more prevalent across the whole town 10. install signage across the whole town to encourage people to switch off their engines so that it becomes antisocial behaviour to idle engines unnecessarily 11. start a campaign to explain the aims objectives of a new green vision to tackle air pollution within our town 12. totally rethink Southend airport, its activities are as polluting as a major trunk road, of which Southend has only one 13. encourage out of town daytrippers to use public transport rather than their cars when travelling to Southend - unless they are in electric vehicles, this could also include a park and ride scheme – 14. where possible - encourage all companies that deliver within our town to use electric vehicles rather than their polluting diesel counterparts 15. devise an action plan that will deal with the highly polluting freight traffic on the River Thames where much of the emissions will be blown across to Southend by the south-westerly winds.... 16. Think about tree canopy cover along the coast to offer some protection against this – 17. also large ships could be made to turn their main engines off and towed from the Isle of Sheppey to port by new high-tech electric tugboats this would cancel out a major and growing source of pollution for Southend. 18. phase out all combustion engine taxis and only allow new licences for EV taxis offer financial support to do so. 	<p>Consideration will be given to working with businesses on their fleets and the impact on the surrounding local air quality.</p>

91

Question	Comment	Council response
	<p>19. encouraging EV take up by implementing on street EV parking bays and increasing charging infrastructure starting with lamp-post conversion in partnership with Siemens or similar</p> <p>20. immediately implementing “twenty is plenty” 20mph speed restrictions in pollution hotspots</p> <p>21. Enforcing “all” local retail delivery vans to be fully EV or zero emissions by 2023</p> <p>22. Encouraging local businesses to switch to EV or zero emission vehicles ASAP with the help of government grants</p> <p>23. Enforcing bus companies to use the latest clean Technologies in their fleets</p>	
Yes	<p>Hydrogen fuel.</p> <p>Bus lanes and more cycle routes</p> <p>Better and more secure cycle parking - feedback in our organisations indicates that insecure cycle parking is one of the biggest deterrents to cycling.</p> <p>More carbon capture elements</p>	Cycle routes and provision are contained in the AQAP as is the green infrastructure.
Yes	Better quality of road surfaces allowing for smoother driving and less stop start due to potholes/road surface sinkage/unkept roads.	The local authority undertakes a pothole repair programme to improve road conditions and safety.
Yes	<p>Better cycle lanes across Southend that doesn't keep stopping.</p> <p>Better link paths along seafront</p> <p>Parks lit at night to enable evening running/walking</p>	Cycle routes and provision are contained in the AQAP.
No		No response required
Yes	banning night flights and stopping the expansion of southend airport	LSA has an air quality monitoring programme which is operating within its targets.
Yes	<p>Improve traffic flow.</p> <p>Traffic lights in particular, should ALWAYS be 30secs and not on occasions 8 secs.</p>	Intelligent signalling is used to improve the traffic flow across the city.
Yes	If you really want to here from constituents don't ask them to read 68 pages of jargon first! This is one of the finest examples of a non survey I've ever had the misfortune to come across! One might almost feel it's deliberate or would that be cynical of me?!?	No response required.
Yes	Stop using contractors that use diesel vehicles when alternatives are available. Give concessions to drivers of electric vehicles.	The Council is implementing a Green Fleet Strategy
Yes	In addition to proposing 20mph speed limits on roads consider making more roads one way. This would enable free flowing traffic in the congested roads of Southend, Westcliff	Noted

Question	Comment	Council response
	and Leigh. I am aware that the thinking is that one way streets would encourage rat runs but in my experience the success of North, South and Central Avenues in Southchurch proves that it is successful in preventing vehicles having to frequently stop to let other vehicles pass.	
Yes	Making sure that the buses can move through the town more efficiently - looking at where buses are stopping in terms of schools and residential homes.	There is a Bus Service Improvement Plan in place as part of the Enhanced Partnership
Yes	Wild flower verges. Increased cycle network. Education and incentives car clubs. Green and accessible public transport. Green walls and roofs included in local plan to support SUDs. Electric bike hubs Reduction in air travel education Business partnership to incentives visitors to access Southend by public transport.	There is a proposed Grassland Strategy. Other items contained in the AQAP.
Yes	A scheme that does connects to other council services in order to align regulations with increasing concern for health risks would prove more farsighted and cost effective Whole streets suffer in silence; cement paved parking areas fully replaced front gardens. Isn't it time to consider regulations in the borough that prioritise the convenience of parking (lowering the kerb) over maintaining a percentage of green spaces in our streets? Without setting limits to the extinguishing of nature's 'green' lungs, wherever vehicles run, lower air quality eventually follow.	The Green City Action Plan aims to integrate services across the City
Yes	The plan rightly emphasises the impact of nitrogen dioxide but underemphasises the impact of particulate matter pollution, which is proven to be very harmful to human health when inhaled, particularly to children. Research from BLF (https://www.blf.org.uk/take-action/clean-air/map) found illegal PM pollution in 97% of schools and colleges in Southend West so more needs to be done about this. Particularly more action is needed to reduce air pollution from transport, including transition to electric vehicles, mode shift to public transport and active travel, and measures to restrict car use, such as school streets.	The AQAP was developed in response to the AQMA which was declared for NO2. By extension actions contained in the AQAP aims to improve air quality, both for NO2 and particulates.
Yes	There are currently huge conflicts of interest with building more infrastructure, building thousands more houses , extending existing roads to cater for more vehicles, likely support to extend Southend Airport further, the owners have made clear they intend to target expand to up to 8/10 million customers, as this will lead to poorer air quality.	Noted, and consideration, where the Council is able to influence will be given.

93

Question	Comment	Council response
	<p>To reduce reliance on petrol/diesel there should be planned infrastructure for the most efficient and future proof electric vehicle charging, extensive new safe cycle lanes, including a plan with other boroughs along Thames path</p> <p>Incentives to use electric train network more such as reduced ticket costs. Flexible season tickets/smart cards are hardly discounted for commuters, some commuters can no longer afford to use the network at £25+ per day.</p> <p>Plan with the government to reduce gas boilers, replace with green recycled hydrogen or discounted heat pump run boilers</p> <p>Borough wide plan to install solar panels, domestic and businesses for recyclable power</p> <p>Build wind farms offshore to use green energy which could be utilised by the borough</p>	
Yes	<p>banning night flights and stopping the expansion of southend airport</p>	<p>London Southend Airport has an Air Quality Monitoring Programme agreed with Southend-On-Sea City Council and Rochford District Council. The results of the monitoring are submitted regularly to the councils for review and currently are within their targets. For more information on their monitoring programme please contact the airport at General enquiry - London Southend Airport</p>
Q5 and Q6 - Are any of the actions listed in the AQAP Report no longer relevant (if yes, please tell us more)		
Yes	Car club has been trailed and not been a success. This should be omitted.	The Council is still committed to car clubs.

Q7 and Q8 - Are there any barriers that need to be overcome for us to take up these measures in the plan? (if yes, please specify)		
Yes	Charging infrastructure needs to dramatically improve.	Noted

95

Question	Comment	Council response
Yes	The road infrastructure of Southend means that many major roads, such as the A127 have an excess of traffic, including many diesel vehicles. I don't know how the measures will really improve this - there is such limited ways to get in and out of the borough.	The Council is committed to modal shift, and actions to assist with this are contained in the AQAP.
Yes		No response required
No		No response required
Yes	Contract with Veolia	No information around the topic provided.
Yes	There seems to be a thought barrier to long term strategic vision ?	Noted
No		No response required
Yes		No response required
Yes	get all residents near main junctions and main roads to plant lots of trees to provide air purification through the leaves, don't know scientific terms.	It should be noted that within the canopy cover report there are many areas Southend-on-Sea City Council do not own which have low tree cover. Some of these cover substantial areas of land. Existing land use can also influence the availability of land for planting which Southend-on-Sea City Council do own, for example, the airport and its flight approaches. The canopy cover report commissioned in October 2019 will be used to inform future planting. Initially planting undertaken until 2023 will be focused on wards with the lowest cover where it is practically viable to plant new trees with planting above that which is normally carried out. After 2023 tree planting will continue to be programmed based on the overall canopy cover of the city. The council is committed to maintaining and enhancing tree canopy cover in the city and it is our aim to increase the canopy cover to a city average of at least 15% by 2050.

Question	Comment	Council response
Yes	Most of this draft plan is not specific and often does not show actions to be taken rather what the potential hazard is with no quantifiable evidence.	Quantification provided in AQAP
No		No response required
Yes	The council don't believe in protecting residents health, it's all about money with them.	No response required
Yes		No response required
Yes	Greedy Landlords & construction firms.	No response required
Yes	Cost - need to factor in the cost to nhs of chronic lung conditions and the loss of education and work hours (productivity)	Noted
Yes	Sort out infrastructure and don't blame everyone else for planning shortcomings.	Contained in LTP.
Yes	A lot of people will not be happy with these plans so they need to be well sold to the public which the Council has a poor record of doing	Noted
Yes	Decisions being made about the wrong parts of Southend and only benefiting the commuters.	Noted
No		No response required
Yes	Cultural shift/change Finance/resources	Noted
Yes	Improve current road network and infrastructure around the area before altering already working non issue routes! Improve current public transport and bus networks as they're dated, always breaking down and continually late.	Details of the aims of the schemes can be obtained by emailing betersouthend@southend.gov.uk Enhanced partnership in place with bus services
No		No response required
No		No response required
Yes	Perhaps the council could order a backbone and take notice of residents views.	No response required
No		No response required
No		No response required
Yes	More attention needs to be given to traffic control and traffic flow.	There is intelligent signalling in place
No		No response required

Question	Comment	Council response
Yes	A lack of understanding in the general population about what air pollution is and who is causing it and that a large proportion of making this better needs to come from our community.	Education contained in AQAP
Yes	Public perception of car ownership and visibly viable alternatives.	Influencing modal shift contained in AQAP.
No		No response required
Yes	Public awareness of the dangers of air pollution is very low. I regularly encounter parents idling their engines at the school gates and when I shared the BLF research above with parents, they were shocked air quality was so bad. The council must do much more to raise awareness and foster personal responsibility.	Education contained in AQAP
Yes	Government housing policy to build 20,000 plus homes, including loss of green belt land. Continued support to expand Southend Airport to increase number of flights Funding to build new roads without a joined up plan to reduce number of car journeys High cost of electric train travel [5x the cost in UK versus central Europe] Please see Leeds as a comparable example, recently approving airport expansion	Noted
Q9 - Please tell us about anything else you feel is necessary as part the Air Quality Action Plan		
	We need to be as ambitious and forward thinking as possible in the AQAP. We should not be just trying to hit the basic standard, but be confident to exceed and have the best quality air in the whole of the UK	Noted
	ask all the residents living near the Bell including Hampton Gardens to plant lots of trees in their gardens for canopy cover and even provide them for the residents to plant. I have already got three large trees in my back garden towards the rear of the Bell junction which all help.	Addressed above.
	The quality of air is very poor in the area. New developments go up and all around the smell of stock road recycling centre	Any waste recycling sites (except for the Anglian Water Recycling Centre) require Environmental Permits to operate which are issued and regulated by the Environment Agency. Any complaints about sites in Stock Road or anywhere else should be made to the EA to 0800 80 70 60 and at

86

Question	Comment	Council response
		incident_communication_service@environment-agency.gov.uk
	An implementation plan for green public transport. There needs to be a strategic transport plan that will reduce east-west vehicular traffic through the residential areas of the Borough - reduce vehicle mileage and consequentially idling times and you reduce emissions. Acknowledge that the east-west routes comprise the A127, A13 and associated rat-runs through residential streets and treat these as one.	The Council has a Green Fleet Strategy and the Green City Action Plan. Idling is addressed in the AQAP.
See question 3		No response required
	get all residents near main junctions and main roads to plant lots of trees to provide air purification through the leaves, don't know scientific terms, perhaps the council could provide some of them as an incentive.	It should be noted that within the canopy cover report there are many areas Southend-on-Sea City Council do not own which have low tree cover. Some of these cover substantial areas of land. Existing land use can also influence the availability of land for planting which Southend-on-Sea City Council do own, for example, the airport and its flight approaches. The canopy cover report commissioned in October 2019 will be used to inform future planting. Initially planting undertaken until 2023 will be focused on wards with the lowest cover where it is practically viable to plant new trees with planting above that which is normally carried out. After 2023 tree planting will continue to be programmed based on the overall canopy cover of the city. The council is committed to maintaining and enhancing tree canopy cover in the city and it is our aim to increase the canopy cover to a city average of at least 15% by 2050.

66

Question	Comment	Council response
	<p>A decent cycle network that links throughout the Borough. Impact of emissions from standing traffic moving from west to east of the Borough. Greater impact of building in the east of the Borough.</p>	<p>Contained in AQAP. Major development proposals are required to be supported by a range of technical assessments so that impacts on matters such as traffic and transportation, including the effect on the highway network, can be taken carefully into account. All planning applications are assessed against relevant planning policies set out in national and local plans and guidance.</p>
	<p>Start monitoring the real impact of the airport. Not a token gesture by offering monitors when there are no planes running... AND include the night flights. Old planes pollute more.</p>	<p>London Southend Airport has an Air Quality Monitoring Programme agreed with Southend-On-Sea City Council and Rochford District Council. The results of the monitoring are submitted regularly to the councils for review and currently are within their targets. For more information on their monitoring programme please contact the airport at General enquiry - London Southend Airport</p>
Budget		Noted
	<p>What are other the things that determine climate? (Which has always changed). Volcano's, earth tilt, rotation relative to the sun and moon. Don't pick on an easy target, you would have us all living in caves</p>	No response required
	<p>Very strong and swift action is needed to start improving the air quality in Southend and action needs to be taken in the next year. If we await much longer we will see a massive increase in number of deaths and hospital admissions for people with acute breathing problems</p>	<p>The AQAP is the process by which the local authority can influence air quality</p>
	<p>Encouraging more people to take up electric vehicles (EVs). Currently there are no incentives in the borough for drivers of EVs. These could include: free parking at the weekends; £5 off their Council Tax bill; access to the town centre (like in other European countries) and the banning of ICE vehicles on certain days, Allow EV owners to charge their vehicles in the council car park,</p>	<p>Answered above.</p>

Question	Comment	Council response
	<p>Install more chargers, Stop all of the widening of the A127 in a bid to encourage more people commuting by cars in and out of the town. We should be trying to stop long range commuting not encouraging it, Introduce a park and ride system for non-residents.</p>	
	<ol style="list-style-type: none"> 1. Banning the use of high polluting vehicles on our busiest roads and in our town centres. 2. There could be a similar action to London’s ULEZ that is being extended in October this year. 3. Also banning of large polluting SUV’s and older polluting cars. 4. Encouraging more EV take up by supplying the necessary infrastructure through government grants. 5. plant more Street trees and hedgerows along our verges to help absorb and filter local air pollution. 6. Encourage cycling by creating designated space on our roads for cyclists and supplying on-street cycle parking that would take up a whole car space, similar schemes are being used in Lambeth for example. 7. restrict car use to certain times of the day. 8. increase parking costs and fines to discourage car use 9. Encourage e-car clubs to be more prevalent across the whole town 10. install signage across the whole town to encourage people to switch off their engines so that it becomes antisocial behaviour to idle engines unnecessarily 11. start a campaign to explain the aims objectives of a new green vision to tackle air pollution within our town 12. totally rethink Southend airport, its activities are as polluting as a major trunk road, of which Southend has only one 13. encourage out of town daytrippers to use public transport rather than their cars when travelling to Southend - unless they are in electric vehicles, this could also include a park and ride scheme – 14. where possible - encourage all companies that deliver within our town to use electric vehicles rather than their polluting diesel counterparts 15. devise an action plan that will deal with the highly polluting freight traffic on the River Thames where much of the emissions will be blown across to Southend by the south-westerly winds.... 16. Think about tree canopy cover along the coast to offer some protection against this – 	<p>Answered above</p>

101

Question	Comment	Council response
17.	also large ships could be made to turn their main engines off and towed from the Isle of Sheppey to port by new high-tech electric tugboats this would cancel out a major and growing source of pollution for Southend.	
18.	phase out all combustion engine taxis and only allow new licences for EV taxis offer financial support to do so.	
19.	encouraging EV take up by implementing on street EV parking bays and increasing charging infrastructure starting with lamp-post conversion in partnership with Siemens or similar	
20.	immediately implementing “twenty is plenty” 20mph speed restrictions in pollution hotspots	
21.	Enforcing “all” local retail delivery vans to be fully EV or zero emissions by 2023	
22.	Encouraging local businesses to switch to EV or zero emission vehicles ASAP with the help of government grants	
23.	Enforcing bus companies to use the latest clean Technologies in their fleets	
	Addition of carbon capture activities. Support to enable people to change to lower carbon energy options at home.	Green City Action Plan
	Improve current local public transport services instead of using 20+ year old busses polluting local areas multiple times a day.	Contained in bus service improvement plan and enhanced partnership.
	Cut the subsidy to the airport and use the money elsewhere (not a salaried economic executive position to 'encourage' companies to go green	Noted
	Improve traffic flow. Monitoring traffic specifically during schools runs.	Intelligence traffic controls In place.
	An up front and honest attempt to actually gather opinion and more to the point take some action to reduce the two main scourges of air pollution in Southend, motorised traffic and aviation. First lockdown would have given everyone an indication of how effective that can be and how pleasant it is to breathe clean air.	Noted
	More positive action regarding vehicles used by the council to move to electric vans etc.	Contained in the Green Fleet Strategy
	Fundamentally I agree with the need for the strategy however a lot of the congestion in Southend, Leigh and Westcliff is caused by overuse of cars for short journeys and the apparent need for school children to be dropped of and picked up every day! If there was safe, reliable and reasonably priced public transport the number of cars could be drastically reduced, plus of course a campaign to dissuade parents from driving their offspring to school. It would need some re-education and maybe some penalties?	Contained in AQAP, Safer Streets programme and influencing modal shift.

102

Question	Comment	Council response
	<p>You need to find a way to make this much less jargon led and much clearer for the general public. This survey isn't brilliant - I feel that I don't really understand what you are asking in many of the questions and that's not a great place to be if this is a community survey.</p>	<p>Noted</p>
	<p>The key is not to keep promoting car travel, this needs to be on an essential basis. Because of the geography of Southend public transport has many gaps and a modal shift can only be obtained when there are alternative and manageable ways of getting from A to B</p>	<p>Noted</p>
	<p>The goals and general sentiment of this outline deserve praise: a wider, cross Borough approach to improve air quality, "focussing on prevention rather than just tackling hot-spots." Its plan of action appears far less ambitious, however. The proposals to affect changes raise more questions than they answer about their likely impact on improving air quality across the borough." Below are some such queries and an example.</p> <p>Where are the details of an inspiring scheme to protect all residents' health in their homes, especially the most vulnerable ?</p> <p>What provisions tend to the long-term (unexpected) challenges that the pandemic added? Do these measures safeguard the respiratory health of increasing numbers of people at the streets where they live, not just during travel in the main roads?</p> <p>How does the scheme relate to other council services? A stand alone plan unconnected to other departments would be curious. To illustrate, recently, the highways team updated its policies to facilitate applications for dropping kerbs, but seemed to include little in way of protecting slices of garden space.</p> <p>Would not adopting a programme to align regulations with increasing concern for health risks, prove more farsighted and cost effective?</p> <p>Whole streets suffer in silence; cement paved parking areas fully replaced front gardens. Isn't it time to consider regulations in the borough that prioritise the convenience of parking (lowering the kerb) over maintaining a percentage of green spaces in our streets?</p> <p>Without setting limits to the extinguishing of nature's 'green' lungs, wherever vehicles run, lower air quality eventually follow. Why not create incentives to preserving, albeit tiny, green areas in house fronts, instead of giving greater weight to the expediency of easier parking?</p> <p>Should not the climate plan for a subsidence-prone Southend take note of the recent floods across the world, including London?</p> <p>Preventive steps to protect everyone in their homes would go a long way to address the unfair disadvantage that the most vulnerable have long suffered without redress, besides rhetoric.</p>	<p>The AQAP has been developed as required by DEFRA following the declaration of the AQMA2. It does however address broader issues and by extension aims to improve air quality across the whole of the Borough.</p> <p>The Council has a Green City Action Plan which co-ordinates the activities across the whole organisation</p>

103

Question	Comment	Council response
	<p>To summarise: Proactive, bold measures that touch every resident in the borough would allow Southend to lead the way. It could provide a successful blue print for other councils across Britain.</p>	
	<p>More specific actions and measurable KPIs. For example, it's good that the plan mentions school streets but not how many will be implemented and in what timeframe. Will it be up to individual schools and groups of parents to initiate a campaign or will the council gradually roll out school streets across all schools. Please also require schools to raise awareness of air quality among parents. It should be required as part of the curriculum to make use of materials like these (https://www.cleanairday.org.uk/free-resources/schools) and to educate parents and children on the benefits of walking and cycling to school (https://www.sustrans.org.uk/professionals/education/how-schools-can-promote-an-active-school-run; https://www.livingstreets.org.uk/wow?gclid=EA1aIQobChMI8sGDjdyz8gIVyBoGAB2QdA4EEAMYASAAEgLAFFD BwE).</p> <p>The plan also wants to encourage cycling and walking via Forward Motion initiatives but this would be fruitless unless accompanied by safe infrastructure throughout the borough, especially key corridors like London Road and Broadway/ Leigh Road. People in the borough want to be active and many own bikes but the only way to cycle is to load up the bikes in a car and drive to the leisure routes such as to Hadleigh Castle. I used to be a keen cyclist in London and don't have a car, but feel unable to cycle in Southend for work or leisure. If there were segregated cycle lanes along London Road and similar, I and people like would be able to cycle to the shops and to do chores.</p> <p>Also, please allow car clubs to operate in the borough. We are a family of 4 (2 kids aged 4 and 6), recently moved over from London and we don't own a car and frequently we feel trapped, not being able to access shops or leisure facilities further away like in Hadleigh or Chelmsford. It feels like we are being pushed to buy a car even though we don't need it daily for work, shops, the park or the school run. If there were car clubs available, we'd be able to access this for occasional day trips rather than buy a car that sits parked 99% of the time. Similarly many families may be able to get rid of a second or third car.</p>	<p>Safer Streets is not suitable for all schools across the city as the scheme cannot push unsuitable traffic volumes and vehicle types onto smaller, quiet residential roads. The Council has a programme of working with schools or air quality and is captured in the AQAP. Cycling is also addressed through actions contained within the AQAP.</p> <p>The Council is also committed to car clubs.</p>
	<p>This is a once in generation opportunity with the climate change emergency to build a really ambitious long term plan to make a real difference in improved air quality, such as the period after first pandemic lockdown between March to June 2020.</p>	<p>Noted</p>

Southend-on-Sea City Council

Report of Executive Director of Neighbourhoods &
Environment and Interim Executive Director for Growth &
Housing
To
Cabinet
On

21 February 2023

Report prepared by:
Neil Hoskins (Head of Civil Engineering)
and Mark Sheppard (Service Manager – Strategic Planning)

Agenda
Item No.
7

Proposed Community Infrastructure Levy (CIL) spending – Cycle Infrastructure Improvement Programme

Place Scrutiny Committee

Cabinet Members: Councillor Steven Wakefield and Councillor Carole Mulroney

A Part 1 (Public Agenda Item)

1. Purpose of Report

- 1.1 To seek agreement to spend up to £1million from the Community Infrastructure Levy (CIL) CIL Main Fund on enhancing cycle infrastructure within the city. The business case for agreeing this spend is set out in the proposed 'Cycle Routes & Path Improvement Programme – CIL Main Fund Application' (**Appendix A**) together with further details in **Appendix A1-A3**.
- 1.2 The Infrastructure Funding Statement 2021-22 (**Appendix B**) sets out the total amount in the CIL Main Fund as at the 31 March 2022. It is noted that at the [12 January 2023 Cabinet](#) members agreed to allocate £1million of this funding to a Parks Improvement Programme. However, it is confirmed that sufficient funds remain available for the proposed 'Cycle Routes & Path Improvement Programme – CIL Main Fund Application' also.

2. Recommendation

- 2.1 Note the 'Cycle Routes & Path Improvement Programme – CIL Main Fund Application' (**Appendix A**) together with further details in **Appendix A1-A3**.
- 2.2 Agree that up to £1million from the CIL Main Fund is spent on enhancing cycle infrastructure within the city of Southend.
- 2.3 Agree to delegate authority to the Director for Planning, in consultation with the Cabinet Member for Environment, Culture and Tourism, to take all necessary steps to ensure compliance with the objectives of the CIL

Governance Framework (Background Paper – 7.5) when spending the sum agreed under Recommendation 2.2 of this report.

3. Background

- 3.1 Southend City Council has an adopted Community Infrastructure Levy Charging Schedule (“CIL”), which came into effect on 27th July 2015.
- 3.2 At the end of the financial year 2021-22 the council held **£2,766,558** in the CIL Main Fund (See Appendix B); and these funds continue to accrue as development is implemented.
- 3.3 The spending and reporting arrangements for CIL are set out in the council’s CIL Governance Framework (July 2015) (Background Paper – 7.5).
- 3.4 The initial intention was to prepare an Infrastructure Business Plan (IBP), identifying the project(s) from the Regulation 123 Infrastructure List that would benefit from CIL receipts within the CIL Main Fund, for consideration by Cabinet each year. However, to date, an IBP has not been required because Cabinet has agreed to carry forward monies in the CIL Main Fund with a view to accumulating a bigger ‘pot’ that may be more effective in enabling the council to meet strategic infrastructure needs. This position is reviewed annually when the Southend Infrastructure Funding Statement is presented to Cabinet.
- 3.5 The 2019 amendments to the CIL Regulations removed the requirement for authorities to publish a CIL Regulation 123 Infrastructure List. Regulation 123 lists previously set out the projects that may be funded through CIL and included a list of infrastructure required for the delivery of the council's adopted Development Plan Documents. Although the requirement for the list has now been removed, it is noted that when Southend published its list it included ‘Local walking and cycling measures to upgrade network’.
- 3.6 Regulation 123 lists have now been replaced by Infrastructure Funding Statements, which are updated annually. The Southend Infrastructure Funding Statement (Appendix B) includes ‘public realm and environment’ as an infrastructure category that can be delivered through developer contributions, including those secured through CIL.
- 3.7 The purpose of the CIL Main Fund is for it to be spent on strategic infrastructure that is considered essential to deliver the growth identified in the city’s Local Development Plan. This infrastructure was initially identified in the Infrastructure Delivery Plan (IDP) where it states that ‘*measures to improve walking and cycling infrastructure connectivity to planned growth*’ are required.
- 3.8 In Appendix A, the highway team state that ‘*To support and reinforce work that is already in the process of being delivered through the Active Travel Fund, we have taken this opportunity to review the Cycling Delivery Report (Background Paper – 7.4) This report has been produced from the results of the holistic cycle audit, public consultation, and engagement with the cycling community. The report has a proposed programme of future phased (short, medium and long term) cycling measures to be delivered across the city. It should be noted that the*

*report looks at all opportunities for cycling provisions and that not all recommendations are agreed with. As an example, there is currently no intention to implement cycling measures on the A13 or Southchurch Road.’ Furthermore, ‘By utilising the CIL funding, it will be possible to expedite the delivery of the cycling measures within the report. These improvements will address a number of identified network deficiencies and also network improvement requests from the cycling community. Taken together, these two cycling improvement programmes will provide the added impetus to net zero by enabling our citizens who are able to travel around the city sustainably.’ This CIL bid is in three phases: short, medium and long-term projects (as set out in **Appendix A1-A3**).*

- 3.9 The Proposed Cycle Infrastructure Improvement Programme set out in **Appendix A** is considered sufficiently detailed to constitute a sound and reasonable business case for spending **up to £1million** of the CIL Main Fund on enhancing the cycle infrastructure within the city. This aligns to the evidenced need for infrastructure as set out in the IDP and shows that the works are still relevant. While an IBP has not yet been prepared in the format fully envisaged in the original CIL Governance Framework, national legislation has since moved on and compliance with the objectives of the CIL Governance Framework will be met through subsequent work, as set out in paragraph 2.3 of the Recommendation in this report.

4. Other Options

- 4.1 Do not agree to spend up to £1million from the CIL Main Fund on improving and enhancing cycle infrastructure. Whilst other funding sources may become available at some point, there is no guarantee as to if this would occur, when it would take place and the sums provided.

5. Reasons for Recommendation

- 5.1 The proposed works set out in the Cycle Infrastructure Improvement Programme (**Appendix A**) fall within the definition of infrastructure that can be CIL funded in accordance with the CIL Regulations 2010 (as amended) and the provision of cycling measures was evidenced as an infrastructure priority within the Southend IDP.
- 5.2 At a time when the financial position is particularly challenging and funding may not be available from other sources, CIL funding that has previously been secured from new development in the city, can make a significant difference to the well-being of our residents by delivering the infrastructure needed to support development in the area.
- 5.3 If the use of CIL funding is agreed, it is the intention to commence works by March 2023. They will deliver substantial improvements to our cycle infrastructure across the city over a relatively short implementation period.

6. Corporate Implications

6.1 Contribution to the Southend 2050 Road Map

6.1.1 CIL income is to be spent on community infrastructure that supports development in the city. The proposed CIL spending will support the delivery of several of the council's corporate priorities as identified in the Southend 2050 ambition, particularly those under the themes of Connected and Smart and Safe and Well, through promoting active travel and associated benefits.

6.2 Financial Implications

6.2.1 A proposed CIL main spend of £1million would use 36% of the CIL Main Fund as it stood at the end of the financial year 2021-22. It is considered that this is appropriate use of CIL funding. The provision of improved cycle routes will ensure that revenue maintenance costs are minimised. Where revenue costs are required, this is to be funded by the Traffic and Highways maintenance budget.

6.2.2 Other common sources of income for improving cycle infrastructure, may be included through the capital programme, S106 and specific funding bids. However, apart from the identified Local Transport Plan funding there is no guarantee of funding through other sources.

6.3 Legal Implications

6.3.1 All procedures in relation to CIL implementation, collection, reporting and spending must adhere to the Planning Act 2008 (as amended) and the Community Infrastructure Levy Regulations 2010 (as amended). The proposed spending is fully compliant with the relevant legislation.

6.4 People Implications

6.4.1 Staff resources, particularly within the Neighbourhoods and Environment Team, will be required to liaise with procurement, stakeholders and to effectively project manage the proposed works to ensure the infrastructure is delivered in a timely manner and within the agreed budget. Planning staff resource will also be needed to administer the spending of CIL Main Fund monies.

6.5 Property Implications

6.5.1 The Neighbourhoods and Environment Team may need to liaise with the Property and Estate Management Team as work goes ahead in relation to enhancing any council assets.

6.6 Consultation

6.6.1 Spending of the CIL Main Fund does not require statutory consultation. The identification of necessary infrastructure to support growth identified in adopted Local Development Plan Documents as set out by Southend IDP was subject to stakeholder engagement. In addition, the highway team state in **Appendix A**, that they have undertaken a '*city-wide holistic cycle audit, which included public consultation*'.

6.7 Equalities and Diversity Implications

6.7.1 CIL funding contributes towards infrastructure and community needs across a wide spectrum of businesses and residents within the city. Any decisions in relation to CIL spending must be made taking into consideration issues of equality and diversity. Correct procurement procedures would need to be followed and the infrastructure provided should be accessible to all. This can be ensured through the appropriate detailed design of the cycle infrastructure as it is developed.

6.8 Risk Assessment

6.8.1 There is a possible risk that spending the CIL Main Fund as set out above is not delivered in a timely manner. Appropriate management of the process by the council highways team should provide adequate mitigation for such risk.

6.9 Value for Money

6.9.1 Appropriate council procurement/tendering processes will ensure value for money in delivering the proposed cycle infrastructure improvements.

6.10 Community Safety Implications

6.10.1 Community safety can be improved and ensured through the appropriate detailed design of the cycle infrastructure as it is developed.

6.11 Environmental Impact

6.11.1 The proposed Cycle Routes & Path Improvement Programme will support increased cycling in the city, which in turn will help tackle some of the most challenging issues we face as a society including improving air quality, combatting climate change, improving health and wellbeing, addressing inequalities, and tackling congestion on our roads.

Cycle Routes & Path Improvement Programme CIL Main Fund Application

In 2020 the UK Government launch the cycling and walking strategy for England. Stating that: 'Increasing cycling and walking can help tackle some of the most challenging issues we face as a society – improving air quality, combatting climate change, improving health and wellbeing, addressing inequalities and tackling congestion on our roads'.

In response the Council bid for and was awarded capital funding as part of the Active Travel Fund, which is being used to install sustainable lighting along the Prittlebrook Greenway, install secure cycle parking and introduce further School Streets projects. Furthermore, following the completion of the city-wide holistic cycle audit, which included public consultation, a short, medium and long-term programme of future works has been developed. To support this Southend also receives Capability Funding to encourage behavioural change as part of the government's commitment to ensure 'that understanding of transport users' needs, motivations and behaviours is central to what we do, in order to maximise our chances of success'. The government have also indicated that there will be further rounds of Capability Funds to reinforce the commitment to behavioural change.

In addition, as part of the Council's development of the Local Transport Plan 4, a Local Cycling and Walking Infrastructure Plan (LCWIP) is being produced. This will build on the work undertaken since Southend was awarded Cycle Town status in 2008. Southend's 2050 ambition states that we will 'continue to work to ensure that our residents, visitors, and those who work in Southend-on-Sea can easily get in, out of and around our city'. As part of this the Council is working to 'facilitate a wide choice of transport that improves accessibility, connectivity and mobility to all residents. Including, working with public transport providers to deliver these long-term aspirations'.

To support and reinforce work that is already in the process of being delivered through the Active Travel Fund, we have taken this opportunity to review the Cycling Delivery report. This Report has been produced from the results of the holistic cycle audit, public consultation, and engagement with the cycling community. The report has a proposed programme of future phased (short, medium and long term) cycling measures to be delivered across the City.

By utilising the CIL funding, it will be possible to expedite the delivery of the cycling measures within this report. These improvements will address a number of identified network deficiencies and also network improvement requests from the cycling community. Taken together, (the Active Travel Fund & CIL) these two cycling improvement programmes will provide the added impetus to net zero by enabling our citizens who are able to travel around the city sustainably.

This CIL bid is in three phases: short, medium and long-term projects.

Short Term

Following a review of the existing cycle facilities there are several areas of existing cycle lanes where the road markings and delineation has become worn. This can cause uncertainty for all road users and discourage those existing or would be cyclists from using the facilities that already exist as well as potentially reduce the uptake of any new facilities that may be constructed.

Seafront Cycle Track Infrastructure Improvement Scheme

The entire cycle track length from Chalkwell Avenue to Shoebury Common Road requires considerable improvement works. Those items that require the earliest intervention have been summarised below.

The work will cost in the region of £40,000 and will include:

- Replace all missing cycle signs
- Replace / refresh all existing cycle track line markings
- Replace all missing bollards

Chalkwell Avenue to Western Esplanade

- Most of the cycle signs to TSRGD Diag. No. 955 are missing in most of the bollards.
- Most cycle track line markings need refreshing
- 'GIVE WAY' cycle signs to TSRGD Diag. No. 955 are missing in most bollards

- The majority of the cycle track markings on Western Esplanade (near the Southend Pier) need refreshing.

- Additionally, the existing green high friction surface treatment is almost gone from cycle track from Chalkwell Avenue to Western Esplanade. It will cost in the region of £210,000 to re-apply the green high friction surface treatment on the cycle track from Chalkwell Avenue to Western Esplanade.

Near Lifstan Way (Eastern Esplanade)

- All cycle track line markings need refreshing.
- Ponding on cycle track, either kerb gully is blocked, or cycle track profile needs reprofiling.

Opposite property No. 173 Eastern Esplanade

- Cycle track in poor condition
- Missing signage
- All cycle track line markings need refreshing
- Missing bollards and signs on existing island

Opposite Camper Road, Eastern Esplanade

- Numerous cracks on the cycle track
- Cycle track line markings needs refreshing
- Lots of missing signs

Opposite Premier Inn, Eastern Esplanade

- Lots of cracks on the cycle track
- Cycle track needs resurfacing & cycle line markings refreshing

- Additionally, this area of cycle track requires cycle track reconstruction, the cost is estimated in the region of £110,000 to undertake this work from Forge Way to Plas Newydd (Eastern Esplanade).

Thorpe Esplanade

- Refresh all cycle lane markings
- Replace all missing cycle signs

Eastern Esplanade – Shoebury Common Road

- Refresh all cycle lane markings
- Replace all missing cycle signs
- Replace all missing and defective bollards

Short-term scheme estimate is £360,000.00

(Please note, no intrusive investigations have been undertaken in terms of carriageway coring or CCTV drainage surveys at the present time).

For proposed scheme drawings, please see Appendix A1.

Medium Term

There are a number of existing roads that do not attract significant levels of motorised vehicles and therefore are ideal for use by less confident cyclists to either link between existing off road cycle facilities or provide relatively 'car free' routes to destinations within the city. These quieter routes will be signed and minimally lined (where required).

The first of these routes will be:

- Leigh to Central Southend Quietway (Southern Spur)
- Leigh to Southend Victoria Quietway (Northern Spur)
- Shoeburyness to Southend Victoria Quietway

The emerging LCWIP will build on these routes along with introducing others.

The estimated cost for these three quieter routes are as follows

Leigh to Central Southend Quietway	£39,000.00
Leigh to Southend Victoria Quietway	£45,000.00
Shoeburyness to Southend Victoria Quietway	£65,000.00

Medium-Term scheme estimate is £149,000.00

For proposed scheme drawings, please see Appendix A2.

Long Term

An off-carriageway cycle route is proposed, utilising the boulevard areas within the central reserve. The proposed route is Blenheim Chase to Prittlewell Chase via Kenilworth Gardens.

An additional route is also proposed, which would connect the proposed Blenheim Chase to Prittlewell Chase route to the existing A127 route, via Mountdale Gardens.

This design will be developed whilst the short and medium terms items are being introduced and their usage monitored.

This work will be subject to a public consultation through the formal Traffic Regulation Order (TRO) process. Following the TRO process, and once the design is developed further, a second report to Cabinet will follow.

The estimated costs for this long-term scheme is as follows

	Boulevard (off-carriageway)	Boulevard (off-carriageway)
	<i>Asphalt Surface</i>	<i>Granular Surface</i>
Blenheim to Prittlewell Chase	£600,000.00	£1,000,000.00

For proposed scheme drawings, please see Appendix A3.

Price and Programme Summary for CIL Cycling Improvements Bid

Depending on which long-term proposed option is chosen, the total price of the works varies, please see below.

Short Term Scheme	£360,000.00
Medium Term Schemes	£149,000.00
Long Term Scheme – off carriageway	£600,000 to £1,000,000.00 (dependant on surface type chosen)

Whilst it is clear from the summary table above that the estimated cost of the whole proposed scheme is in excess of the £1,000,000.00 currently available from CIL funding, it is proposed that LTP funding, spanning two financial years (23/24 & 25/25) will be utilised to address the shortfall in funding.

For this reason, and to also allow sufficient time to develop the detailed design of the proposed off and on carriageway routes, (including time for consultations, Cabinet reports, statutory traffic orders) the proposed programme is below.

Scheme	Commence	Complete
Short Term	March 2023	April 2023
Medium Term	March 2023	May 2023
Long Term – preliminary design	March 2023	August 2023
Long Term – detailed design	September 2023	January 2024
Long Term – construction	February 2024	May/June 2024

1. Introduction

Local authorities are required to publish an annual infrastructure funding statement (IFS) providing details of developer contributions to infrastructure¹ from the Community Infrastructure Levy (CIL)² and Section 106 (S.106) planning obligations³.

Southend-on-Sea City Council became a CIL Charging Authority, and commenced CIL charging, in July 2015; and has been securing developer contributions through planning obligations since the introduction of Section 106 of The Town and Country Planning Act 1990 (as amended).

For the purpose of this IFS, the Reported Year is the financial year from 1 April 2021 to 31 March 2022.

Further information regarding CIL and S.106 planning obligations can be found on the [Council's website](#) or obtained from the [Planning Portal](#) or the Government's online [Planning Practice Guidance](#).

¹ Regulation 121A of the Community Infrastructure Levy (CIL) Regulations 2010 (as amended). The matters included in this IFS reflect the requirements set out in Schedule 2 of the regulations.

² The Community Infrastructure Levy (CIL) is a charge which can be levied by local authorities on new development in their area. It is an important tool for local authorities to use to help them deliver the infrastructure needed to support development in their area.

³ Planning obligations under Section 106 of the Town and Country Planning Act 1990 (as amended), commonly known as S.106 agreements, are a mechanism which make a development proposal acceptable in planning terms, that would not otherwise be acceptable. They are focused on site specific mitigation of the impact of development.

2. Executive Summary

Summary Table 1: Community Infrastructure Levy (CIL) Funds 2021 to 2022

Reported Year 2021 to 2022		Amount
	Total value of CIL set out in all Demand Notices issued in the reported year	£1,127,607.67
	Total amount of CIL receipts carried over from previously reported years	£1,979,577.69
	Total amount of CIL receipts in reported year	£1,296,881.50
	Total amount of CIL expenditure (including admin expenses) in reported year	£74,797.63
	Total overpayments returned ⁴ in reported year	£31,408.68
	Total amount transferred to other organisations in reported year	£37,678.73
	Total amount of CIL allocated but unspent in reported year	£94,878.39
	Total amount of CIL collected in any year yet to be allocated and remaining to be spent at the end of the reported year	£3,037,695.76

Summary Table 2: Section 106 (S.106) Planning Obligation Funds 2021 to 2022⁵

Reported Year 2021 to 2022		Amount
	Total amount of money to be provided under any planning obligations which were entered into during reported year ⁶	tbc
	Total amount of money under any planning obligations carried over from previously reported years which had not been allocated and was available to spend at the start of reported year	£1,726,797.35
	Total amount of money under any planning obligations carried over from previously reported years which was allocated but not spent at the start of the reported year	£2,325,106.42
	Total amount of money under any planning obligations which was received in reported year	£141,825.94
	Total amount of money under any planning obligations which was spent in reported year	£1,207,751.34
	Total amount of money under any planning obligations transferred to other organisations in reported year	£0.00
	Total amount of money under any planning obligations which was allocated but not spent at the end of the reported year	£1,304,351.44
	Total amount of money under any planning obligations yet to be allocated and remaining to be spent at the end of reported year	£1,681,626.93

⁴ Payments are returned under CIL Regulation 75 (Overpayments) if the amount paid proves to be greater than the amount due.

⁵ Figures correct at time of preparation of this report but may be subject to adjustments.

⁶ This figure relates to either development that has yet to commence or implemented schemes for which the due date for contributions has not yet been reached i.e. the contributions have not been received and cannot be guaranteed to be received. The figure cannot be confirmed as the developments concerned included an outline planning permission, details of which have yet to be agreed.

3. Community Infrastructure Levy (CIL) contributions for 2021 to 2022

3.1 CIL Funding Summary

Table 1 sets out the CIL financial summary for 2021 to 2022 for the period from 1 April 2021 to 31 March 2022.

Table 1: Total CIL Summary

Total CIL receipts carried over from previously reported years⁷	£1,979,577.69
Total CIL receipts⁸ in reported year including:	£1,296,881.50
CIL receipts in CIL Main Fund in reported year	£1,046,563.55
CIL receipts in CIL Neighbourhood Allocation in reported year (15% of total receipts less surcharges)	£185,473.87
CIL received for administrative expenses in reported year (5% of reported year total)	£64,844.08
Total CIL receipts carried over from previously reported years and received in reported year	£3,276,459.19
Total overpayments returned in reported year ⁹	£31,408.68
Balance of CIL receipts after overpayments returned	£3,245,050.51
Total amount of CIL applied to administrative expenses in the reported year ¹⁰	£63,273.64
Total expenditure from CIL Ward Neighbourhood Allocation in reported year ¹¹	£11,523.99
Total amount of CIL transferred to Leigh Town Council (LTC) from the reported year (Local Council Neighbourhood Allocation)	£37,678.73
Total CIL receipts in CIL Main Fund and CIL Ward Neighbourhood Allocation unspent at the end of the reported year¹²	£3,132,574.15
Total CIL Ward Neighbourhood Allocation amount allocated but unspent in the reported year ¹³	£94,878.39
Total CIL receipts in CIL Main Fund and CIL Ward Neighbourhood Allocation yet to be allocated and remaining available to spend at the end of the reported year¹⁴	£3,037,695.76

⁷ This includes all unspent receipts within the CIL Main Fund and CIL Ward Neighbourhood Allocation.

⁸ This figure comprises total funds received in financial year 2021 to 2022 only i.e. does not include the value of any unpaid invoices raised in the reported year. In addition, CIL receipts include the value of land payments and infrastructure payments made in respect of CIL charges.

⁹ Payments are returned under CIL Regulation 75 (Overpayments) if the amount paid proves to be greater than the amount due.

¹⁰ Receipts to CIL Admin Fund reduced by £ 1,570.43 to take into account overpayments returned in reported year.

¹¹ See Table 2 for a detailed breakdown.

¹² This figure can include the value of acquired land on which development consistent with a relevant purpose has not commenced OR the acquired land has been used or disposed of for a purpose other than the relevant purposes and the amount deemed to be CIL by virtue of regulation 73(9) has not been spent AND the value of infrastructure if the infrastructure has not been provided.

¹³ See Table 2 for a detailed breakdown.

¹⁴ £0.01 difference to table in section 3.2 and 3.3 due to rounding differences.

3.2 CIL Main fund

The CIL Main Fund is to be spent on strategic infrastructure that is considered essential to deliver the growth identified in the city's Local Development Plan. This infrastructure was initially identified in the CIL Infrastructure Delivery Plan 2015 ('IDP') but is under review as part of the new Southend Local Plan.

CIL Main Fund (summary)	
Main Fund carried over from previously reported years	£1,745,122.24
Main Fund receipts for the reported year	£1,046,563.55
Total overpayments returned in the reported year ¹⁵	£25,126.94
Main Fund expenditure for the reported year	£0.00
Main Fund retained at the end of the reported year	£2,766,558.85

3.3 CIL Neighbourhood Allocation

Neighbourhood Allocation (summary)	
Neighbourhood Allocation carried over by Southend-on-Sea City Council from previously reported years	£234,455.46
Total Neighbourhood Allocation receipts for the reported year including funds to be transferred to LTC	£185,473.87
Total CIL receipts to be transferred to LTC for the reported year	£37,678.73
Total overpayments returned in the reported year ¹⁶	£4,711.30
Neighbourhood Allocation expenditure for the reported year excluding funds transferred to LTC	£11,523.99
Total CIL Ward Neighbourhood Allocation unspent at the end of the reported year¹⁷	£366,015.31
Total CIL Ward Neighbourhood Allocation amount allocated but unspent in the reported year ¹⁸	£94,878.39
Total CIL Ward Neighbourhood Allocation yet to be allocated and remaining to spend at the end of the reported year¹⁹	£271,136.92

3.3.1 CIL Local Council Allocation

¹⁵ Payments are returned under CIL Regulation 75 (Overpayments) if the amount paid proves to be greater than the amount due.

¹⁶ Payments are returned under CIL Regulation 75 (Overpayments) if the amount paid proves to be greater than the amount due.

Leigh-on-Sea Town Council's CIL Annual Reports, setting out details of expenditure, are published on the Parish Council's website: <http://www.leighonseatowncouncil.gov.uk>

²⁰ Payments are returned under CIL Regulation 75 (Overpayments) if the amount paid proves to be greater than the amount due.

3.3.2 CIL Ward Neighbourhood Allocation

The CIL Ward Neighbourhood Allocation must be spent on schemes that will help support development of the ward area by funding either: a) the provision, improvement, replacement, operation or maintenance of infrastructure; or b) anything else that is concerned with addressing the demands that development places on an area.

Details relating to expenditure of the Neighbourhood Allocation within Southend-on-Sea City Council Wards in the reported year are set out in Table 2 below.

The contribution this CIL expenditure makes to particular Southend 2050 Outcomes²¹ is shown in Figure 1 below, which reflects column 6 ('Total budget allocated to each itemised project (£)') of Table 2 above. The main focus of investment has been on a range of projects to ensure that 'Our streets and public spaces are valued and support the mental and physical wellbeing of residents and visitors.'

More information on Southend 2050 is provided in Appendix 1, including a list of all the 2050 Outcomes.

²¹ See www.southend.gov.uk/southend2050 for further details.

Figure 1: CIL Ward Neighbourhood Allocations by 2050 Outcomes

- Our streets and public spaces are valued and support the mental and physical wellbeing of residents and visitors.
- A range of initiatives help increase the capacity for communities to come together to enhance their neighbourhood and environment.
- People in all parts of the borough feel safe and secure at all times.

4. Section 106 (S.106) planning obligation contributions for 2021 to 2022

The total amount of money under any planning obligations carried over from previously reported years, which had not been allocated and was available to spend at the start of the reported year was £1,726,797.35 ²².

The total amount of money received through planning obligations, agreed in any year, retained at the end of the reported year (less £1,304,351.44 allocated funds) was £1,681,626.93 ²³.

4.1 S.106 financial contributions received

Income received during the reported year 2021 to 2022 amounted to £141,825.49.

Figure 2 below indicates the contribution of S.106 income received towards achieving 2050 Outcomes²⁴. Most of the contributions are to be targeted towards the outcome ‘We are well on our way to ensuring that everyone has a home that meets their needs’. Other outcomes that will benefit from S.106 income are ‘Our children are school and life ready and our workforce is skilled and job ready’, and ‘People have a wide choice of transport options’.

Figure 3 below indicates the expenditure of S.106 income spent by 2050 Outcomes.

Figure 3: S.106 expenditure by 2050 Outcomes

4.3 S.106 financial contributions not required and returned

It is confirmed that in financial year 2021 to 2022 no S.106 financial contributions were returned as a consequence of not being required.

4.4 S.106 financial contributions allocated but not yet spent

The funds set out in Table 5 have been allocated to projects but not yet spent. All of the S.106 contributions set out in Table 5 have been allocated to either the Strategic Housing or Education service areas. They will contribute towards the 2050 Outcomes 'We are well on our way to ensuring that everyone has a home that meets their needs' and 'Our children are school and life ready and young people are ready for further education, training or employment'. The Southend 2050 Outcomes are set out in full in Appendix 1.

Total amount of money under any planning obligations which was allocated but not spent at the end of the reported year was £1,304,351.44.

5. Estimated future income from developer contributions

5.1 Value of CIL set out in all Demand Notices issued in the reported year

The total value of CIL set out in all Demand Notices issued in the reported year (i.e. between 1 April 2021 and 31 March 2022) was £1,127,607.67.

5.2 Value of S.106 planning obligations entered into in the reported year²⁵

Table 6 below sets out the details of the planning obligations that were entered into during the reported year (i.e. between 1 April 2021 and 31 March 2022). The total amount of money to be provided under planning obligations, which were entered into in the reported year, cannot yet be confirmed as the developments concerned included an outline planning permission (dwelling numbers to be agreed as part of a reserved matters planning application, at which point formulae will be applied to developer contributions).

Table 6 includes details of non-monetary contributions such as affordable housing, open space provision, travel plans and highway works. No monetary value has been attributed to these contributions for the purpose of this report but the infrastructure benefits are noted and are set out in each Section 106 agreement as part of the planning file for each development.

It should be noted that there is no guarantee that the developer contributions set out in this section of the report will be delivered as they may relate to either development that has yet to commence or implemented schemes for which the due date for contributions has not yet been reached.

²⁵ These amounts include some contributions that are stated in Section 106 agreements as a maximum and are subject to agreement between the parties depending on final cost of infrastructure provision required; and also exclude some contributions that are subject to viability assessment or final costing post-commencement.

6. Planning for infrastructure expenditure

6.1 What do developer contributions deliver?

Developer contributions, secured through CIL and S.106 planning obligations, provide strategic and site specific infrastructure to support development and growth in the city. The projects that will be funded, wholly or partly by developer contributions fall within the following infrastructure and affordable housing categories:

- education
- health and social wellbeing
- coastal flood protection
- social and community
- leisure and recreation
- public realm and environment
- affordable housing

6.2 Future spending priorities

The categories listed in paragraph 6.1 above reflect the infrastructure needs identified in the Council's [Infrastructure Delivery Plan \(February 2015\)](#) as identified for the Development Plan period. The current Southend Development Plan covers the period up until 2021 and a review is underway as part of the new [Southend Local Plan](#). This review will comprise a detailed assessment of infrastructure requirements to support growth.

More detail will be provided in subsequent infrastructure funding statements regarding what infrastructure will be delivered, including when and where once the new Local Plan is adopted. The current CIL Main Fund (as at the end of the financial year 2021 to 2022) is therefore carried forward and it is proposed that its spending will be prioritised as part of the Development Plan review, which will identify essential infrastructure required to deliver growth set out in the new Southend Local Plan. S.106 planning obligations will continue to meet the statutory tests in [regulation 122](#) of the CIL Regulations 2010 (as amended) and as policy tests in the National Planning Policy Framework. They must be:

- necessary to make the development acceptable in planning terms;
- directly related to the development; and
- fairly and reasonably related in scale and kind to the development.

In accordance with the CIL Regulations 2010 (as amended), the Council will continue to allocate 5% of total CIL receipts to administrative expenses associated with CIL; and 15% of total CIL receipts (less surcharges) to localised neighbourhood projects.

Details relating to the governance arrangements (including spending and reporting arrangements) for CIL can be found in the [CIL Governance Framework \(July 2015\)](#).

Decisions relating to S.106 planning obligation requirements are made by the Development Control Committee. Further details in relation to the Council's approach and priorities in respect of seeking planning obligations when considering planning applications can be found in the Supplementary Planning Document '[Planning Obligations: A Guide to Section 106 and Developer Contributions 2015](#)'.

7. Conclusion

Southend-on-Sea City Council is committed to working with its partners to ensure that CIL and S.106 developer contributions are used in a fair and transparent way to maximise the benefits and opportunities arising from development, such as new affordable homes, community infrastructure, jobs and environmental improvements.

If you have any further queries or comments about this statement, please do not hesitate to contact us via email:

S106andCILadministration@southend.gov.uk

Appendix 1: Southend 2050 Outcomes

Southend 2050 is the city's ambition for the future. It was developed following extensive conversations with those that live, work, visit, do business and study in Southend-on-Sea. These conversations asked people what they thought Southend-on-Sea should be like in 2050 and what steps are needed now, and in the coming years, to help achieve this. The ambition is grounded in the values of Southenders. It is bold and challenging and will need all elements of our community to work together to make it a reality.

The Southend 2050 programme is not about one single publication or statement. It is a mind-set – one that looks to translate the desires of local people and stakeholders into action, something that looks to the long term, but also at the action that is needed now and in the medium-term.

Southend 2050 is made up of the ambition, associated themes and the outcomes we want to achieve. Our Road Map²⁶, and all future delivery plans, strategies and policies will reflect this. The Road Map builds on our existing achievements and outlines what the Council wants to achieve in the coming five years. Our delivery plans will focus on achieving desired outcomes that reflect our ambition.

All the investment set out in this Infrastructure Funding Statement will contribute to achieving the 2050 Outcomes. Please see next page for a breakdown of the 2050 Themes and Outcomes.

²⁶ See www.southend.gov.uk/downloads/file/6148/southend-2050-ambition for further details.

Southend 2050 Themes & Outcomes

	<p>Pride and Joy By 2050 Southenders are fiercely proud of, and go out of their way, to champion what our city has to offer.</p>	<ol style="list-style-type: none"> 1. There is a tangible sense of pride in the place and local people are actively, and knowledgeably, talking up Southend. 2. The variety and quality of our outstanding cultural and leisure offer has increased for our residents and visitors and we have become the region's first choice coastal tourism destination. 3. We have invested in protecting and nurturing our coastline, which continues to be our much loved and best used asset. 4. Our streets and public spaces are valued and support the mental and physical wellbeing of residents and visitors.
	<p>Safe and Well By 2050 people in Southend-on-Sea feel safe in all aspects of their lives and are well enough to live fulfilling lives.</p>	<ol style="list-style-type: none"> 1. People in all parts of the city feel safe and secure at all times. 2. Southenders are remaining well enough to enjoy fulfilling lives, throughout their lives. 3. We are well on our way to ensuring that everyone has a home that meets their needs. 4. We are all effective at protecting and improving the quality of life for the most vulnerable in our community. 5. We act as a Green city with outstanding examples of energy efficient and carbon neutral buildings, streets, transport and recycling. 6. Residents feel safe and secure in their homes

	<p>Opportunity & Prosperity By 2050 Southend-on-Sea is a successful city and we share our prosperity amongst all of our people.</p>	<p>The Local Plan is setting an exciting planning framework for the city.</p> <ol style="list-style-type: none"> 1. We have a fast-evolving, re-imagined and thriving town centre, with an inviting mix of shops, homes, culture and leisure opportunities. 2. Our children are school and life ready and young people are ready for further education, training or employment. 3. Key regeneration schemes, such as Queensway, seafront developments and the Airport Business Park are underway and bringing prosperity and job opportunities to the city. 4. Southend is a place that is renowned for its creative industries, where new businesses thrive and where established employers and others invest for the long term. 5. Southend provides fulfilling careers for our residents, and enough job roles to match the needs of the population. 6. Southend businesses feel supported to respond to economic shock; adapt to evolving global markets; and, have the tools to preserve their businesses by responding effectively and positively to change.
	<p>Active & Involved By 2050 we have a thriving, active and involved community that feel invested in our city.</p>	<ol style="list-style-type: none"> 1. Even more Southenders agree that people from different backgrounds are valued and get on well together. 2. Residents feel the benefits of social connection, in building and strengthening their local networks through common interests and volunteering. 3. Residents are routinely involved in the design and delivery of services. 4. A range of initiatives help increase the capacity for communities to come together to enhance their neighbourhood and environment. 5. More people have physically active lifestyles, including through the use of open spaces.

Connected & Smart

By 2050 people can easily get in, out and around our city and we have a world class digital infrastructure.

1. Working with the public transport providers to enhance and encourage the use of the existing provision moving towards a long-term aspiration to open new routes, enabling a wider accessibility to public transport options.
2. People have a wide choice of transport options.
3. We are leading the way in making public and private travel smart, clean and green.
4. Southend is a leading digital city with world class infrastructure that reflects equity of digital provision for the young, vulnerable and disadvantaged.

Southend-on-Sea City Council

Report of Executive Director
(Neighbourhoods & Environment)

to

Traffic Regulations Working Party
and Cabinet Committee

on

20th February 2023

Agenda
Item No.

8

Report prepared by:

Rachel Murphy
Traffic Regulations Co-Ordinator

Traffic Regulation Orders (Junction Protection)

Cabinet Member: Steven Wakefield – Cabinet Member for Highways, Transport & Parking
Public Agenda Item

1. Purpose of Report

- 1.1 To inform the Traffic Regulations Working Party and the Cabinet Committee of the commencement of consultation and implementation of the Traffic Regulation Orders in respect of one junction – Blatches Chase / Whitehouse Road – which is to be included in the Junction Protection Project schemes across the City. However, this particular junction is across the boundary of two wards, Eastwood Park ward and St Laurence ward and therefore requiring TRWP agreement.

2. Recommendation

- 2.1 Approve the advertising of draft traffic regulation orders for the proposed junction protection measure set out in this report; and,
- 2.2 Where there are no objections make the appropriate traffic regulation order and implement the restrictions on site through delegated authority to the Head of Service.

3. Background

- 3.1 The Traffic Regulations Working Party and Cabinet Committee at its September 2021 meeting considered a report setting out the response to

public consultation on proposals for the introduction of city-wide no waiting and no loading at any time junction protection safety measures (Report No.4).

- 3.2 The Cabinet Committee agreed the extent of the junction protection measures to be implemented at each location would be discussed and agreed with the relevant Ward Members based on the default length of the restrictions is a maximum length of 10 metres.
- 3.1 The Cabinet Committee agreed to delegate to the Executive Director (Neighbourhoods and Environment) in consultation with the Cabinet Member for Highways, Transport and Parking for the final confirmation of the traffic order for the measures.

4. Reasons for Implementation of Junction Protection

- 4.1 Junction protection measures are proposed to reinforce the Highway Code (rule 243) that vehicles should not park within 10m (32 feet) of a junction, for avoiding danger to persons or other traffic using the road or any other road or for preventing the likelihood of any such danger arising, and for facilitating the passage on the road or any other road of any class of traffic including pedestrians being seen and wishing to cross the road at the junction.

5. Corporate Implications

5.1 Contribution to the Southend 2050 Road Map.

- 5.1.1 Ensuring parking and traffic is managed while maintaining adequate access for emergency vehicles and general traffic flow and improved sightlines at the various junctions is consistent with the Council's vision and corporate priorities of safety, prosperity, and health.

5.2 Financial Implications

- 5.2.1 Costs for the advertising of the Orders and implementation of the measures will be met from the capital funding which was agreed for the junction protection project.

5.3 Legal Implications

- 5.3.1 The statutory consultative process for Traffic Regulation Orders will be followed. Any objections received will be responded to by the service area. Members will be included in the circulation of the notice and any comments received will be considered in the consultation process.

5.4 People Implications

- 5.4.1 Works required to implement the agreed scheme will be undertaken by existing staff resources.

5.5 Property Implications

- 5.5.1 None

5.6 Equalities and Diversity Implications

- 5.6.1 Any implications have been taken into account in designing the schemes.

5.8 Risk Assessment

- 5.8.1 The proposals are designed to improve highway safety and traffic flow and as such, is likely to have a positive impact.

5.9 Value for Money

- 5.9.1 Works associated with the scheme will be undertaken by the Council's term contractors, selected through a competitive tendering process to ensure value for money.

5.10 Community Safety Implications

- 5.10.1 The proposals, if implemented, is likely to lead to improved community safety.

5.11 Environmental Impact

- 5.11.1 There is no significant environmental impact as a result of introducing the Traffic Regulation Order.

6. Background Papers

- 6.1 None

7. Appendices

- 7.1 **Appendix 1** – The draft notice for the Traffic Regulation Order advertisement.

Appendix 1: The draft notice for the Traffic Regulation Order advertisement.

CITY OF SOUTHEND-ON-SEA
THE SOUTHEND-ON-SEA CITY COUNCIL (WAITING, LOADING, STOPPING AND
PARKING PLACES) (CONSOLIDATION) ORDER 2023

PTO1059 – Blatches Chase / Whitehouse Road junction protection

1. NOTICE IS HEREBY GIVEN that Southend-on-Sea City Council proposes to make the amendments to the above Order under the Road Traffic Regulation Act 1984 as amended.

2. The general effect of the Orders will be:

To introduce junction protection; no waiting at any time (double yellow lines) **AND** no loading or unloading at any time (double yellow kerb blips) for approximately 10 metres at each of the locations in below:

a) Blatches Chase with White House Road

3. Copies of the draft Order, plan and Statement of Reasons may be viewed at the Civic Centre (address below) during normal office hours, the documents can also be viewed online at: <https://www.southend.gov.uk/tro> or <http://www.southendtraffweb.co.uk/consult/main.html> from the date of this notice.

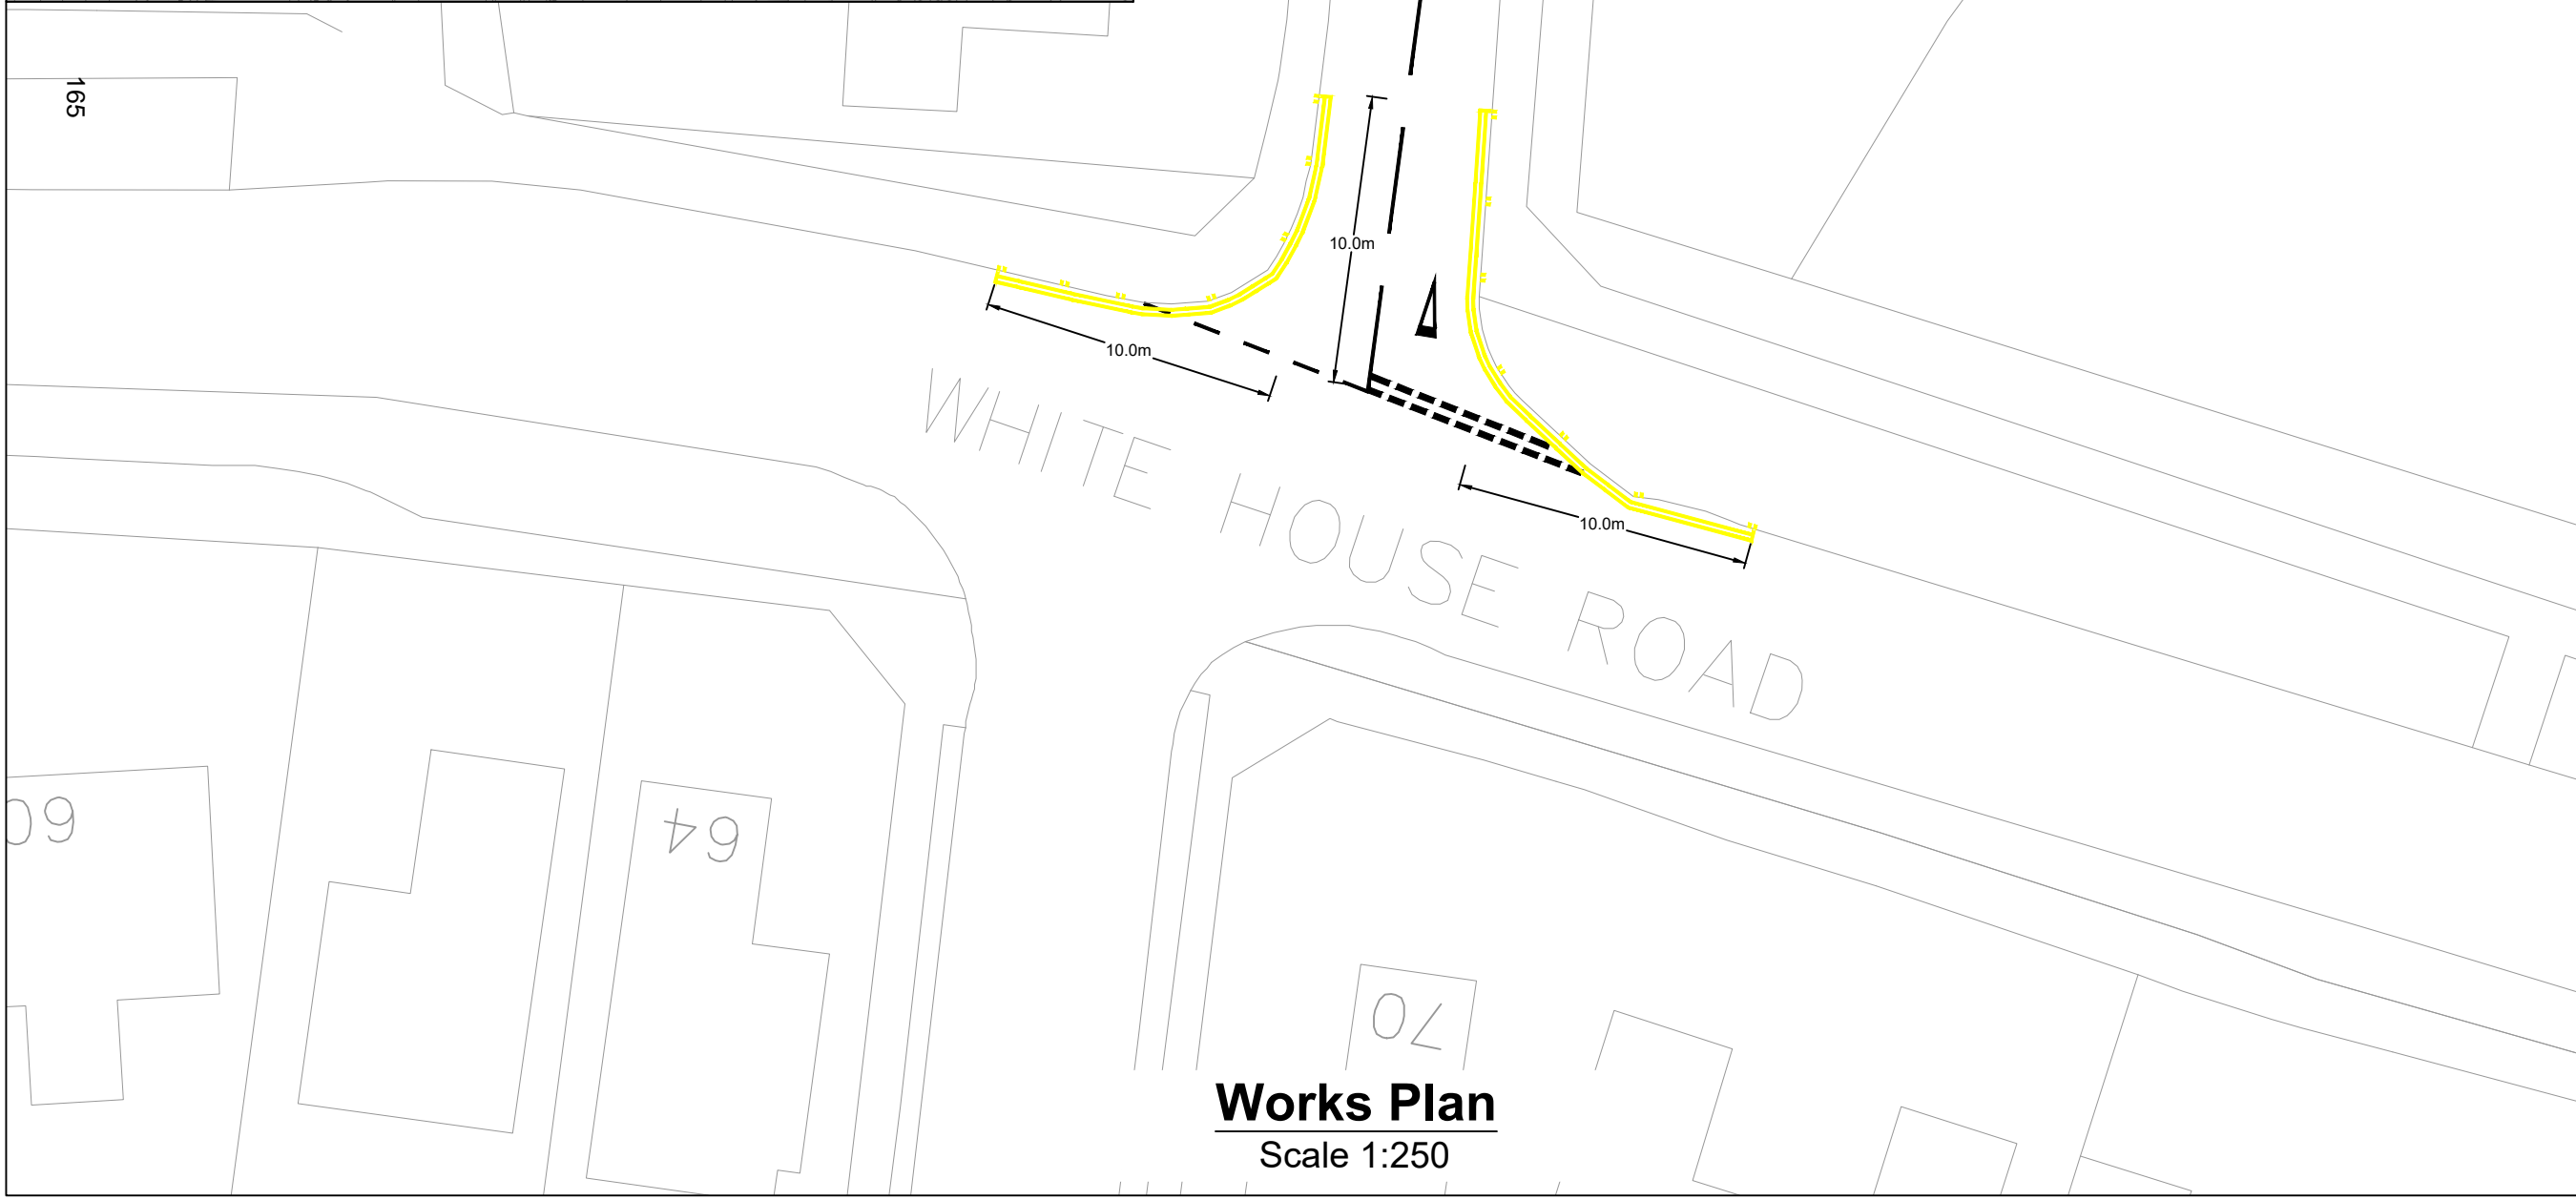

4. Comments on the proposals together with the reasons for which they are made must be in writing to the Business Change and Development Team at the address below or by email to traffweb@southend.gov.uk by no later than **(date to be agreed)**.

5. All written representations received concerning Traffic Regulation Orders are public documents that may be inspected by any person on demand.

Dated: **(Dates to be agreed)**

Sharon Harrington
Head of Traffic Management & Highways Network

Civic Centre, Victoria Avenue,
Southend-on-Sea, Essex
SS2 6ER

DIMENSIONS:

Length of Proposed Double Yellow Line as indicated on plan.

100mm Wide yellow markings
3m center kerb blips or less to avoid short length at end

KEY:

NOTES:

1. Do not scale. This drawing is to be read in conjunction with all other contract drawings and documents.
2. All works to be in accordance with the Department of Transport's Specification for Highway Works and Standard Construction Drawings.
3. All traffic signs and lines are to comply with The Traffic Signs Regulations and General Directions. Markings are to be thermoplastic screed with applied solid glass beads unless otherwise stated.

Agenda
Item No.

9

West Leigh 'School Street' – Ronald Hill Grove

**Cabinet Member: Councillor Steven Wakefield – Cabinet Member for Highways,
Transport & Parking
(Public Agenda Item)**

1. Purpose of Report

- 1.1 To inform the Traffic Regulation Working Party and Cabinet Committee of the commencement of the statutory consultation of the Traffic Regulation Order in respect of Ronald Hill Grove (West Leigh School Street) and implementation of the scheme should the Traffic Regulation Order be made.
- 1.2 The scheme is capital funded by Active Travel Tranche 2 which was resolved at Cabinet on 13th January 2022 and Place Scrutiny on the 7th February 2022.

2. Recommendations

- 2.1 **That the report be noted**

3. Background

- 3.1 A 'School Street' is a scheme which restricts access of motorised traffic to the roads outside schools, during school drop-off and pick-up times during term time only with the aim of creating a safer and less congested street around the school to encourage alternative and greener modes of transport, such as cycling and walking, and improving air quality in and around our local schools.
- 3.2 The first tranche of funding was announced by the Secretary of State for Transport in May 2020 as part of the work to combat the COVID-19 pandemic. The initial grant funding supported local transport authorities with producing cycling and walking facilities.
- 3.3 As part of this initiative the school streets pilot schemes were introduced to 4 schools in the City; Greenways, North Street, West Leigh and Bournes Green.

4. Scheme Details

- 4.1 Following consultation with a number of schools across the City, an experimental scheme was introduced which banned vehicles from using the roads during the schools during drop off and pick up times.
- 4.2 Volunteers were trained by our Traffic Management contractor and barriers were placed in the road to secure the closure which was supported by signage either end of the street in accordance with TSRGD and other design standards.
- 4.3 The experimental scheme lasted 18 months; and this allowed the scheme to be monitored and any comments made and considered during the first 6 months in operation. Although the scheme was very well received, the deadline for transition from experimental order to permanent order was missed and therefore we now plan to advertise a permanent Traffic Regulation Order for West Leigh School Street.
- 4.4 The scheme proposals for West Leigh School Street can be found in Appendix 1.

5. Corporate Implications

5.1 Contribution to the Southend 2050 Road Map

Safe & Well - This scheme contributes to the Council's visions, particularly in terms of moving towards a safer City by improving safety for pedestrians and school children whilst ensuring residents feel safe and secure in their neighbourhoods. This is in line with the Policy 16, taken from the Councils Local Transport Plan, which highlights the need to "carry out a programme of measures designed to improve road safety and to promote road safety for all road users."

Active & Involved – By improving safety, the ambition of the scheme is to encourage our residents to use active and sustainable transport options. This will be achieved by improving the perceived safety for pedestrians, who would be more inclined to use active travel options if it was their belief that these options were safe enough for use by both adults and children. This is in line with the Councils Green City Action Plan sub-priority 2.4, which highlights the need to enable sustainable transport within the City and the actions that can be taken to achieve this

5.2 Financial Implications

The costs for the advertising of the Orders and implementation of the measures will be met from the capital funding which was agreed for the project.

5.3 Legal Implications

The statutory consultation process for Traffic Regulation Orders will be followed. Any objections received will be responded to by the service area. Ward members will be included in the circulation of the notice and any comments received will be considered in the consultation process.

5.4 People Implications

Works required to implement the agreed scheme will be undertaken by existing staff resources.

5.5 Property Implications

None

5.6 Consultation

Consultation with all Council Members has taken place to agree the measures. A report on the Active Travel Plan went to Cabinet on 13th January 2022 where it was referred to Place Scrutiny on the 7th February 2022. It was resolved with authority be delegated to the Executive Director (Neighbourhoods and Environment), in consultation with the Cabinet Member for Highways, Transport and Parking.

A residential and stakeholder consultation was carried out on *Your Say Southend* which ran from 12th October to 11th November 2022 for the School Streets at West Leigh and Bournes Green:

- A total of 1,200 people accessed the campaign of that 244 responded online, the rest were informed, but chose not to comment on the survey. The consultation included a survey with questions and a free text box for further comments requesting feedback on certain elements of the whole project. Not every respondent answered all the questions.
- The consultation was promoted across social media and was available on the Councils interactive consultation portal <https://yoursay.southend.gov.uk/> it was also made available in a hardcopy format if requested. Letters were sent to those properties that fall under the proposed schemes. The results were as follows:
 - The overall consensus from those responding was that they understood and supported what the Council is trying to achieve in considering making permanent the School Street Scheme.
 - Of those responding 81% agree that it has enabled more people to walk and cycle to school in a safer environment, 5% were unsure if it had made a difference.
 - 77% agreed that the School Street scheme has created a healthier environment, only 17% didn't think this was the case.
 - 71% agreed that School Street Scheme has encouraged them to leave the car at home.
 - 86% of the respondents would support the implementation of the School Streets Scheme permanently.

The statutory consultation will be carried out in accordance with primary legislation including advertisement of the proposals in the local press, on-street at each location and letter drops to the adjacent properties. The information will also be accessible on-line via the Councils website and can be inspected at the Civic Centre reception during normal office hours.

5.7 Equalities and Diversity Implications

Any implications have been taken into account in designing the schemes.

5.8 Risk Assessment

The proposals are designed to improve highway safety with the aim of creating a safer and less congested street around the school to encourage alternative and greener modes of transport such as cycling and walking, and improving air quality in and around our local schools.

5.9 Value for Money

Works associated with the draft scheme in Appendix 1 will be undertaken by the Council's term contractors, selected through a competitive tendering process to ensure value for money.

5.10 Community Safety Implications

The proposals in Appendix 1, if implemented, are likely to lead to improved community safety.

5.11 Environmental Impact

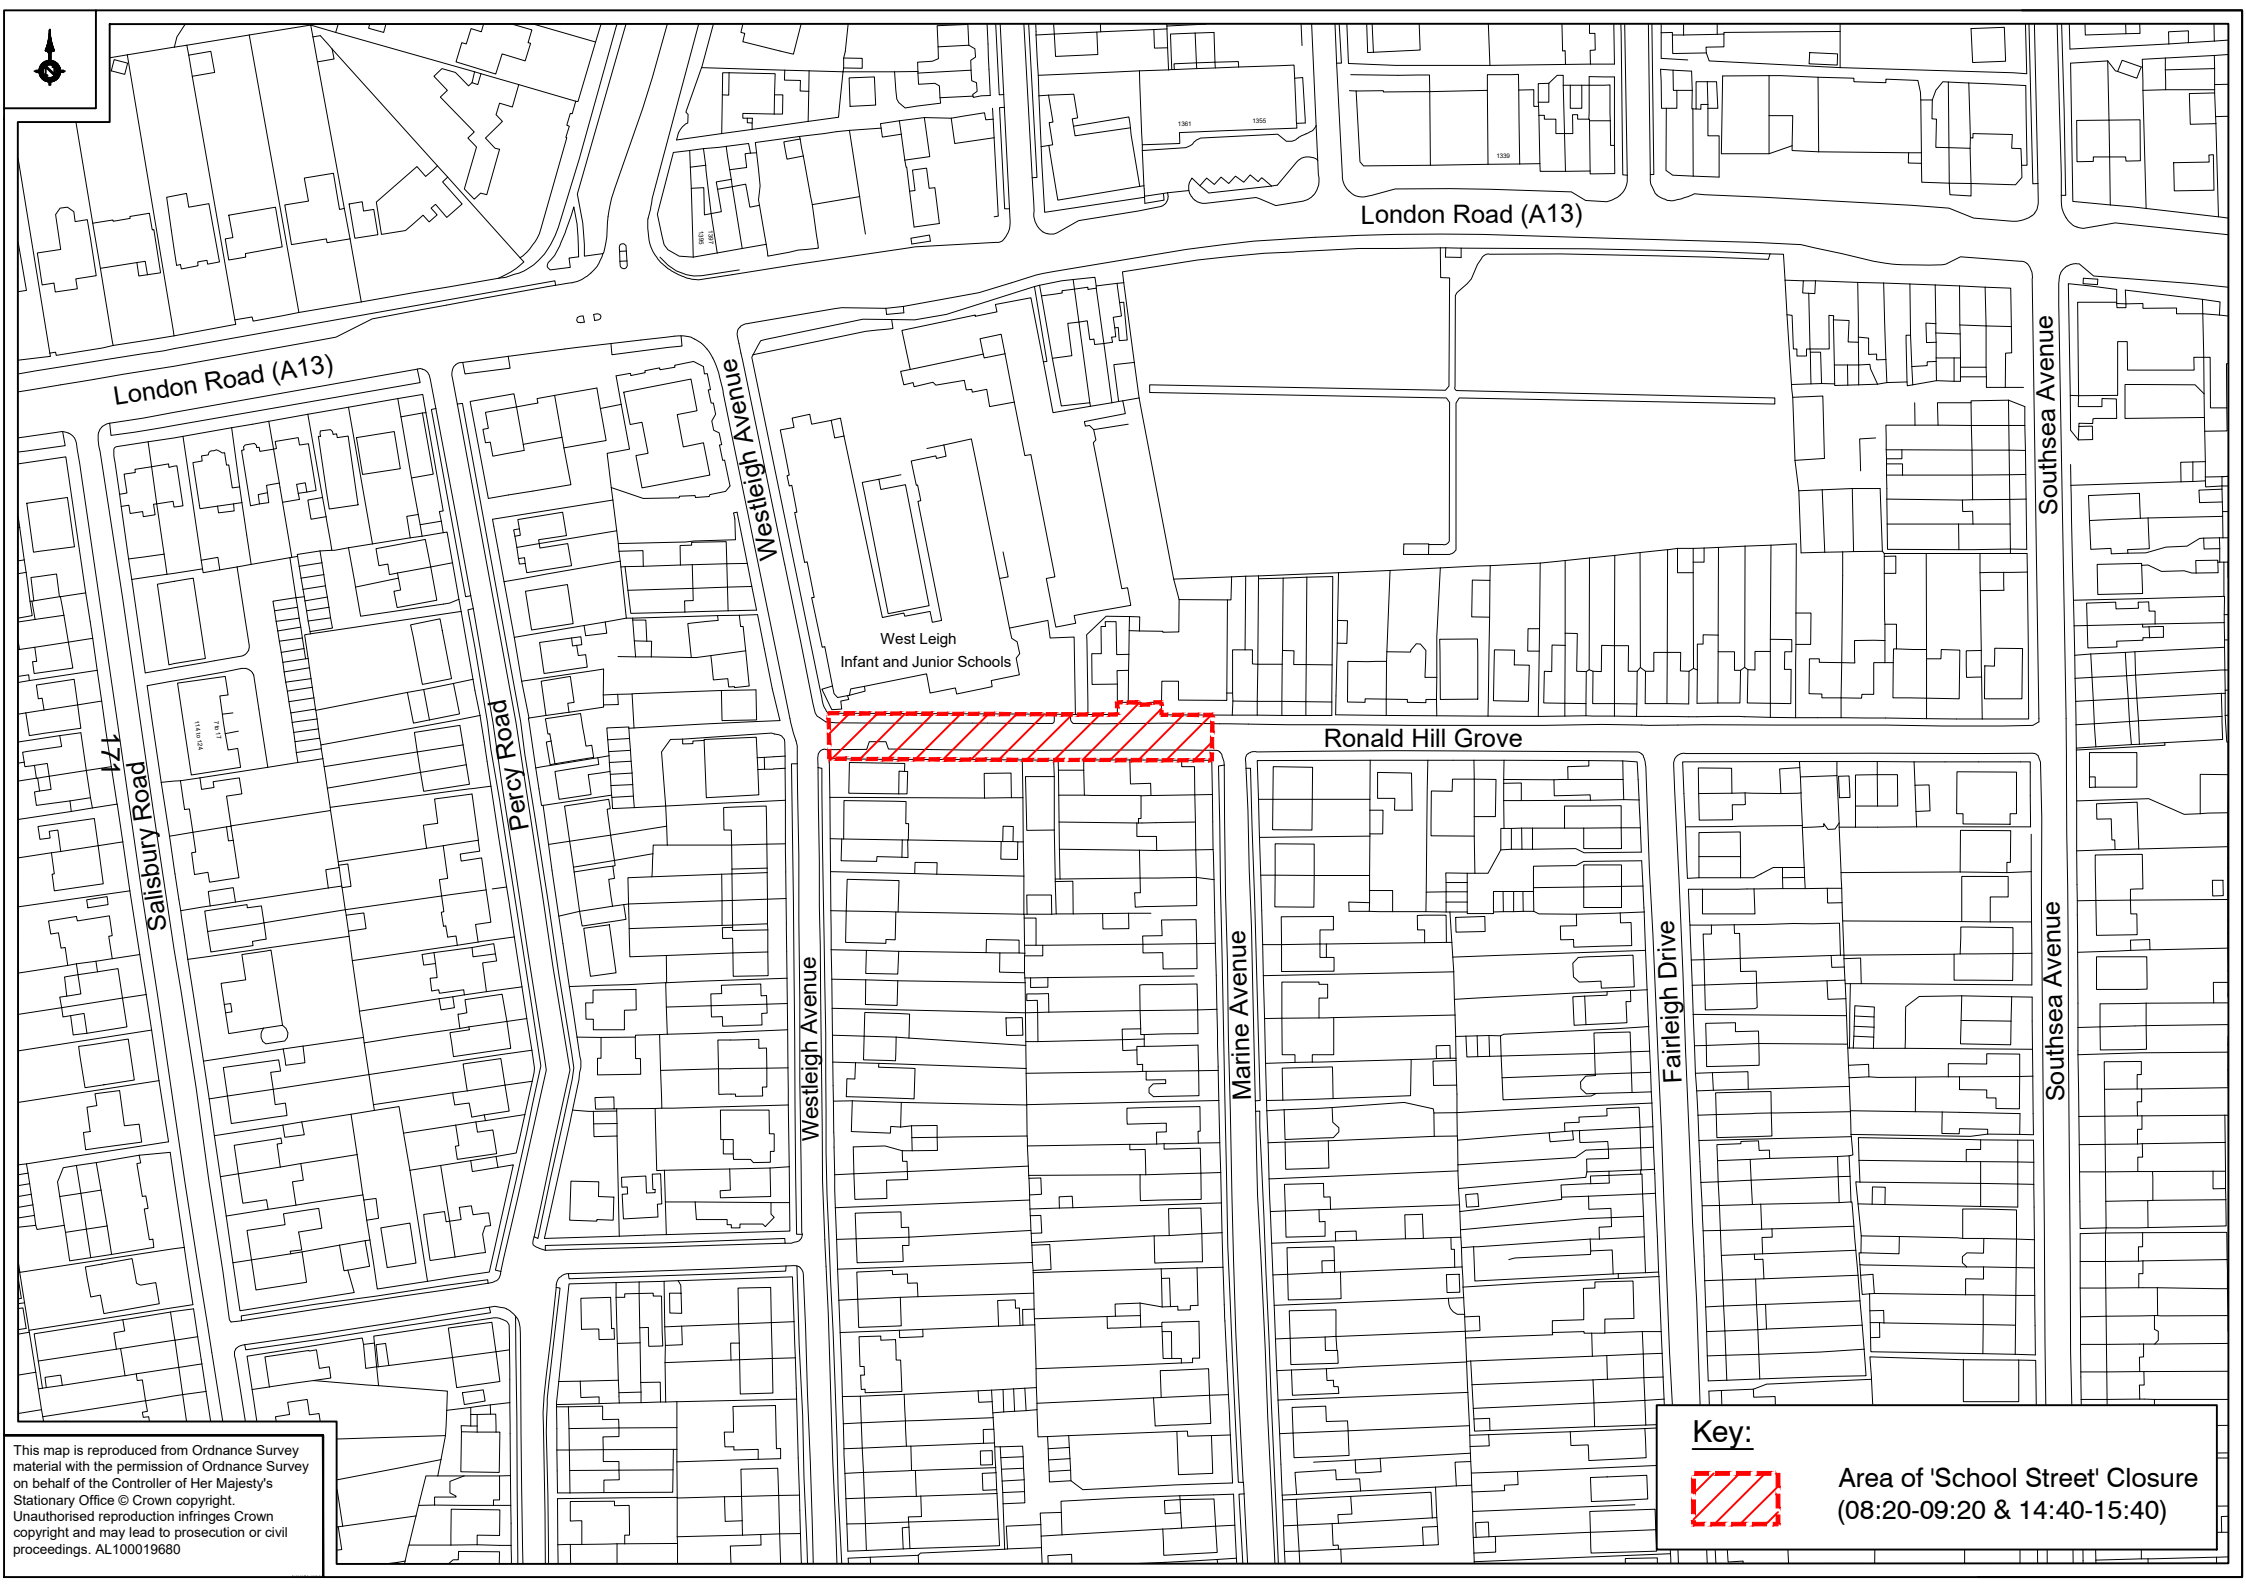

The proposals in Appendix 1, if implemented, are likely to lead to improved air quality.

Report of Executive Director
(Neighbourhoods and Environment)

To

Traffic Regulation Working Party & Cabinet Committee
on

Monday 20th February 2023

Report prepared by: Shavna Carty, Engineer, Civil
Engineering

Prittle Brook Greenway TRO (Traffic Regulation Order)

Place Scrutiny Committee

Cabinet Member: Councillor Steven Wakefield – Cabinet Member for Highways,
Transport & Parking
Part 1 (Public Agenda Item)

1. Purpose of Report

- 1.1 To advise members of the proposals for conversion of existing pedestrian only footway to shared use cycle track in various locations as described below to improve the continuity of Prittle Brook Greenway cycle track.
- 1.2 For members of the Traffic Regulation Working Party to discuss the proposals and approve the advertising of the draft traffic regulation orders.

2. Recommendations

- 2.1 The conversion of existing pedestrian only footway areas, to shared use cycle track suitable for pedestrians and cyclist and,
- 2.2 Where there are no objections delegate authority to the Head of Service to make the appropriate traffic regulation order to facilitate the implementation of the restrictions on site

3. Background

- 3.1 The Traffic Regulations Working Party and Cabinet Committee at its January 2022 meeting considered the submission of a public consultation/survey results to the Department For Transport, to continue the work to encourage active transport and implementation of the Tranche 2 project for creation of permanent projects; following the cabinets approval of the construction of temporary interventions to create an environment that is safe for walking and cycling during the Covid-19 pandemic and the period directly after (Tranche 1).
- 3.2 The Cabinet Committee agreed to endorse the bid awarded to Southend by the DfT on 20 November 2020 for Tranche 2 funding from the Active Travel Fund. The Prittle Brook Greenway is part of Tranche 2, and is a strategic active travel

link well used by pedestrians and cyclists owing to its close proximity to schools, residential and retail areas, parks, and the hospital.

Scheme Details

- 3.3 The proposal is to convert and or widen areas of the existing pedestrian only footway to shared use cycle track as **detailed on the plan in the Appendix of this report**. Certain short sections of the existing route will not allow for off road or quiet road use, so in these sections, a shared a use cycle track provision is needed to allow safe and efficient travel. To provide this facility safely, it is intended that the existing footway is widen in certain places; there by allowing an increased width for shared space to reduce the risk of conflicts between cyclists and pedestrians. It is proposed that once widened, the footway status will be removed pursuant to S66(4) of the Highways Act 1980 and simultaneously replaced with a cycle track per S65(1) of the same Act.

The section locations are as follows:

(Must be read in conjunction with plan in the Appendix of this report):

- Prittlewell Chase - Both footways and central verge
- Gainsborough Drive - Both sides
- Highfield Crescent - Both sides of the carriageway and both arms
- Springfield Drive - Both sides
- Westbourne Grove - Both sides
- Southbourne Grove – Both sides
- Eastwood Boulevard - Both sides
- Manchester Drive - South side – From the junction with Eastwood Boulevard to a point 175 metres west
- Darlington Grove - Both sides
- Pavillion Drive - Both sides
- Manchester Drive - Both sides
- Blenheim Crescent - Both sides
- Elmsleigh Drive - Both sides
- Station Road / Manchester Drive - Both sides – From the junction with Station Road westwards to the junction with Tankerville Drive
- Tankerville Drive - Both sides
- Flemming Avenue - Both sides
- Eastwood Drive - Both sides

4. Consultation

- 4.1 A 6-week survey was conducted on the YourSay Southend online platform, to consult with those who work, live, and visit Southend on active travel options in the Borough. The consultation conclude that the public are in favour of introducing a more connected and active City. Participants expressed a strong desire for the Council to introduce the right measures towards helping Southend-On-Sea to facilitate more active travel options, with an emphasis on cycling and walking.
- 4.2 Consultation with Ward Members has taken place to agree the location and extent of the shared use cycle track that are shown on the drawings in the Appendices.

5. Reasons for Recommendations

To supply active travel improvements that further encourage increased walking and cycling activity in the borough.

6. Corporate Implications

6.1 Contribution to the Southend 2050 Road Map

6.1.1 **Safe & Well** - This scheme contributes to the Council's visions, particularly in terms of moving towards a safer borough by improving walking and cycling infrastructure that supplies active travel improvements; that further encourage increased walking and cycling activity in the borough. In line with the Policy 21, taken from the councils Local Transport Plan (which highlights the need to "tackle health and inequalities by increasing the number of adults and children who walk and cycle for work, education and leisure"); and Policy 2 which, "encourage and facilitate the use of sustainable modes and public transport for travel".

6.1.2 **Active & Involved** – By improving safety, the ambition of the scheme is to encourage our residents to use active and sustainable transport options. This will be achieved by improving the perceived safety for pedestrians, who would be more inclined to use active travel options if it were their belief that these options were safe enough for use by both adults and children. This is in line with the councils Green City Action Plan sub-priority 2.4, which highlights the need to enable sustainable transport within the city and the actions that can be taken to achieve this

6.2 Financial Implications

6.2.1 DfT funding from Active Travel Fund Tranche 2.

6.3 Legal Implications

6.3.1 The scheme would require a Traffic Order.

6.4 People Implications

No people implications have been identified at this time

6.5 Property Implications

6.5.1 None

6.6 Consultation

6.6.1 For results of the consultation refer Department for Transport (DfT) Tranche 2 - Active Travel Fund Report 26/01/2022.

6.7 Equalities and Diversity Implications

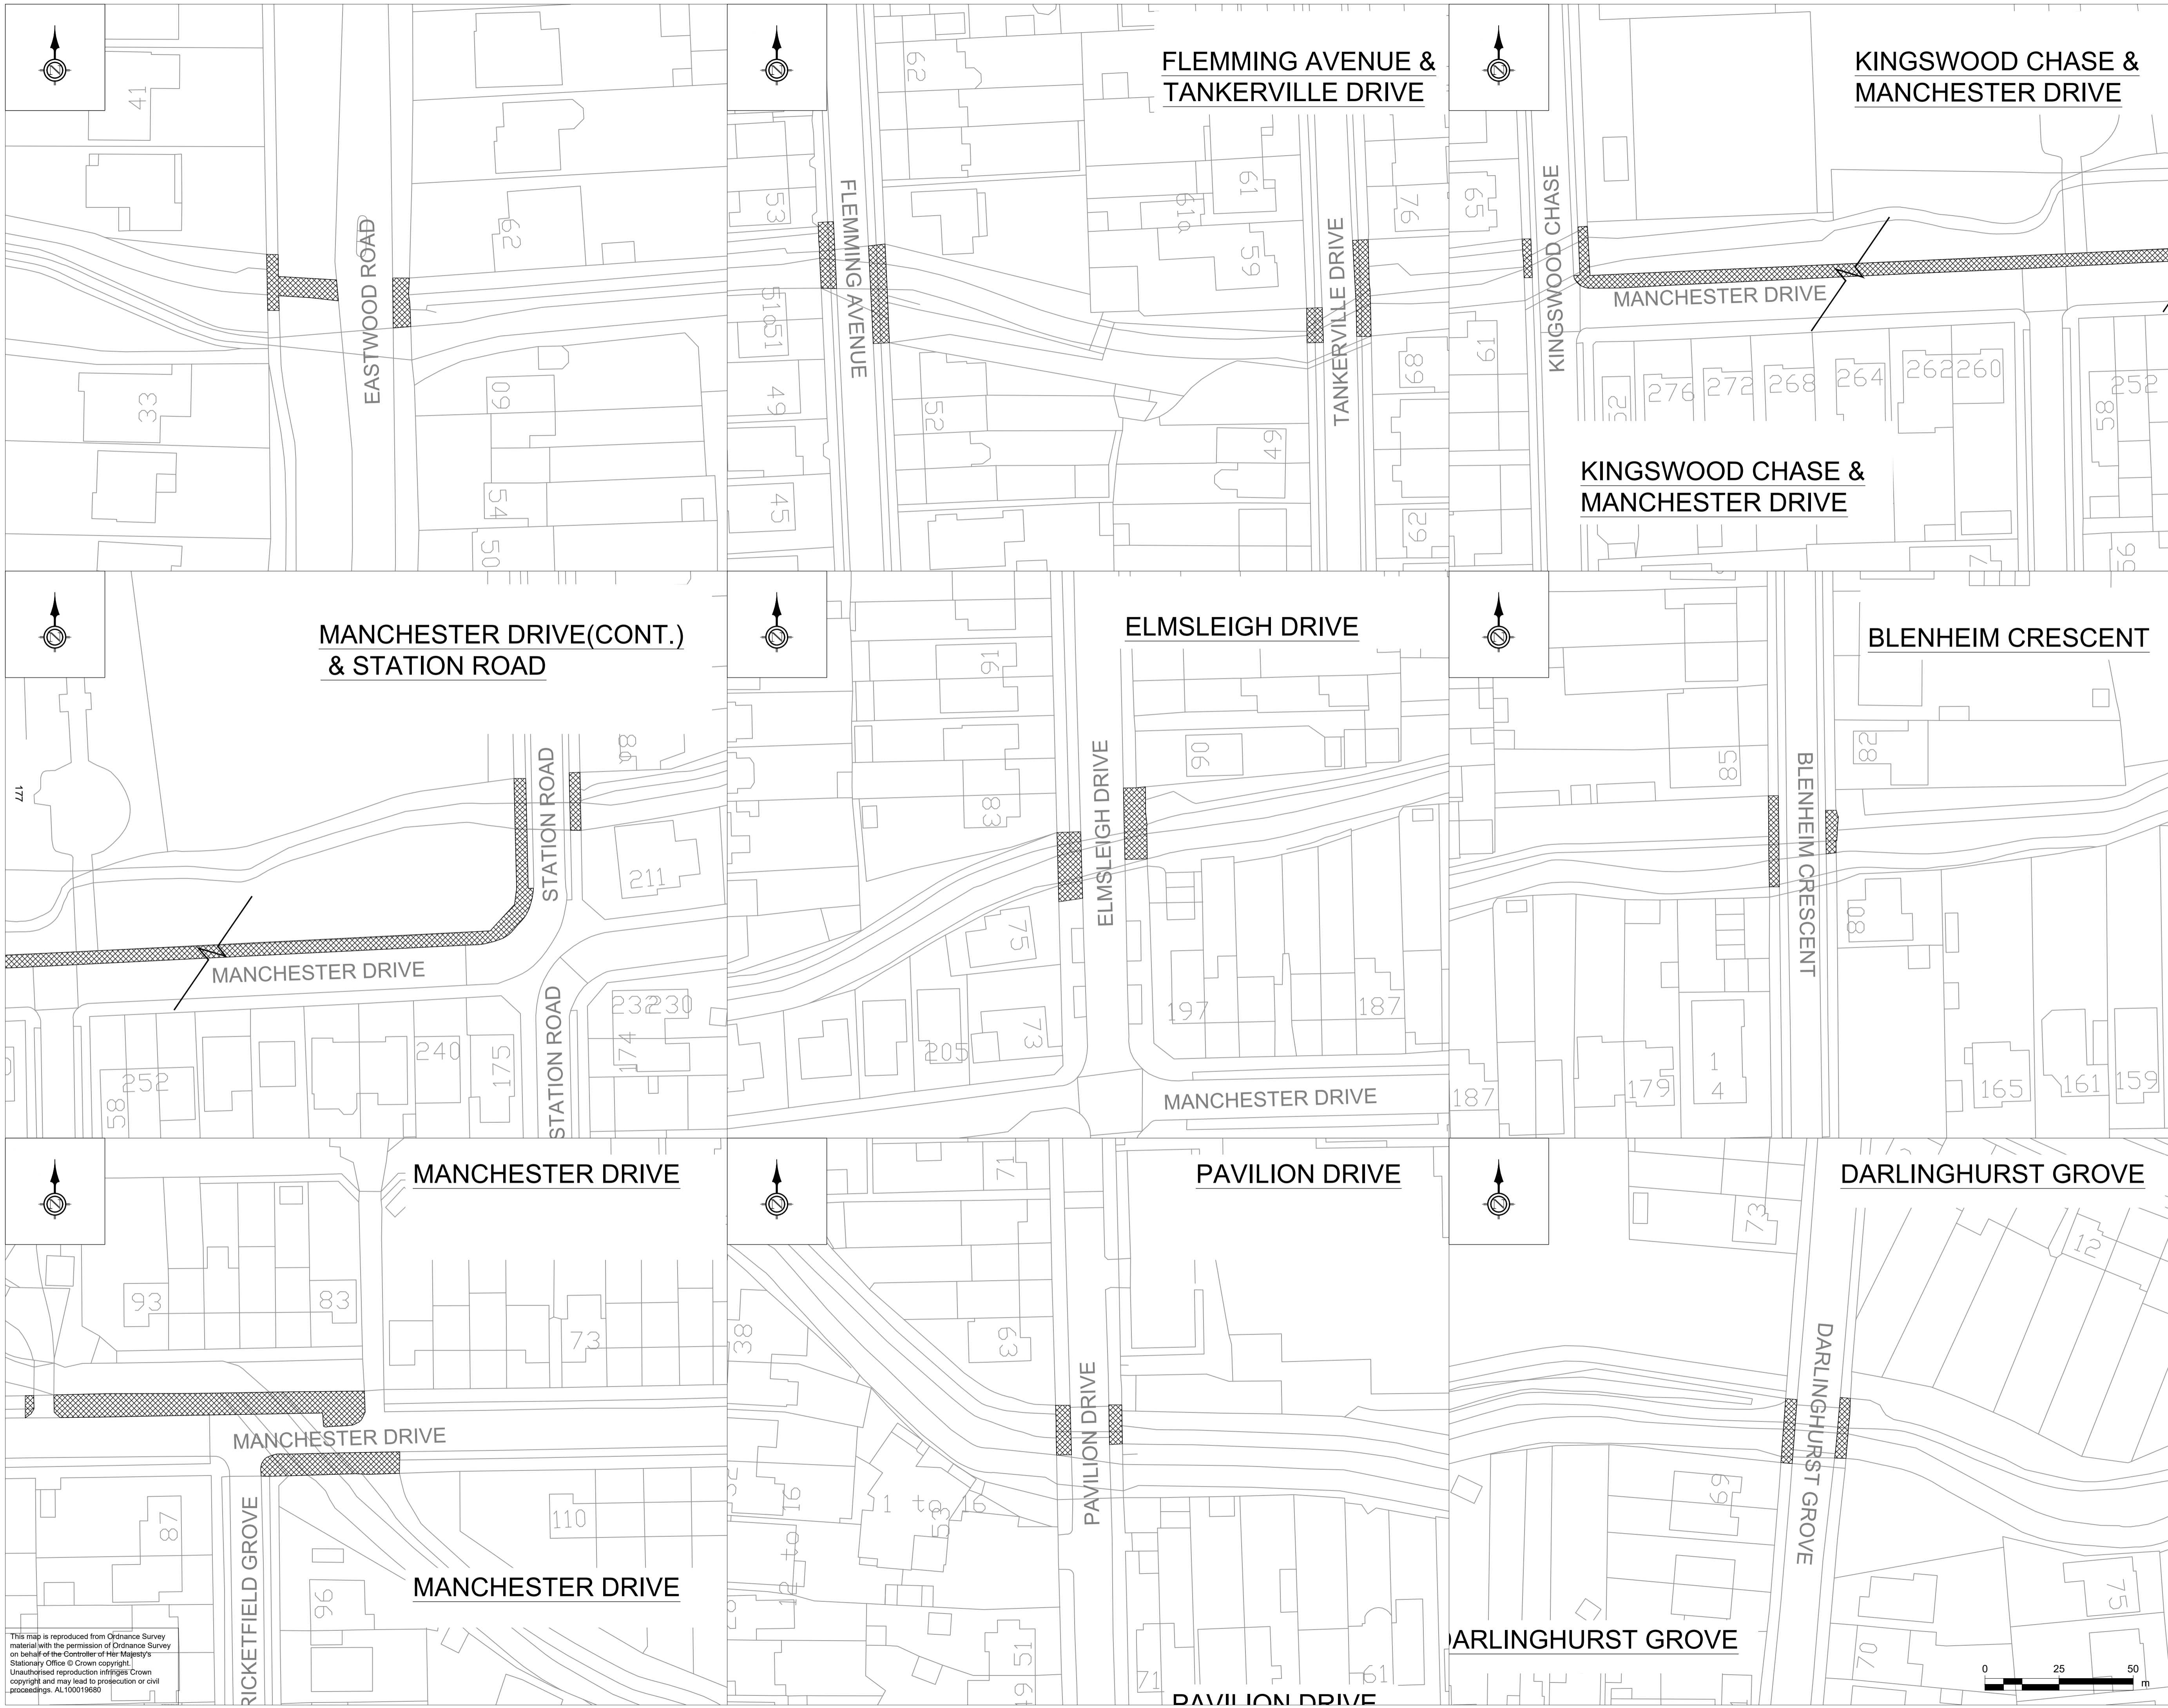

6.7.1 No EIA needed at this time

6.9 Community Safety Implications

None
