Prior building works must be instructed by the client.

It is essential that all client/builders notes are instructed by the client as per the Architects/Engineers request.

Failure to complete these instructions could have a cost implication on the tender stage or even the feasibility to deliver the project as proposed.

It is solely the responsibility of the client to instruct these works so that the information is available prior to build.

Client and Builder Notes 1 (CBN1)

Trial pits to be carried out to expose all interface areas between the existing and new building. To be checked by contractor prior to building works commencing and information to be relayed back to the Architect.

Client and Builder Notes 2 (CBN2)

Drainage search to be carried out. Client to instruct prior to formal planning submission. To be checked by contractor prior to building works commencing and information to be relayed back to the Architect.

Client and Builder Notes 3 (CBN3)

Client budget awaiting confirmation so that a cost plan can be commissioned.
